

• **Local installation guide (OnlineActivation)**

Local installation guide (OnlineActivation)

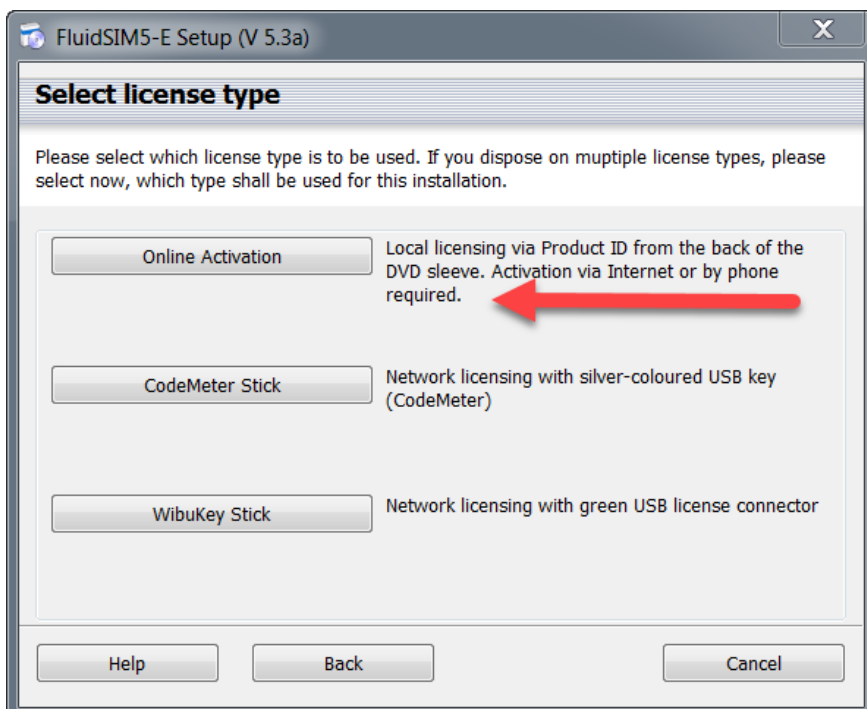

During installation, you must have a permanent Internet connection. After installation, the software will no longer need a connection to the Internet.

Insert the DVD and open the file directory. Click setup.exe.

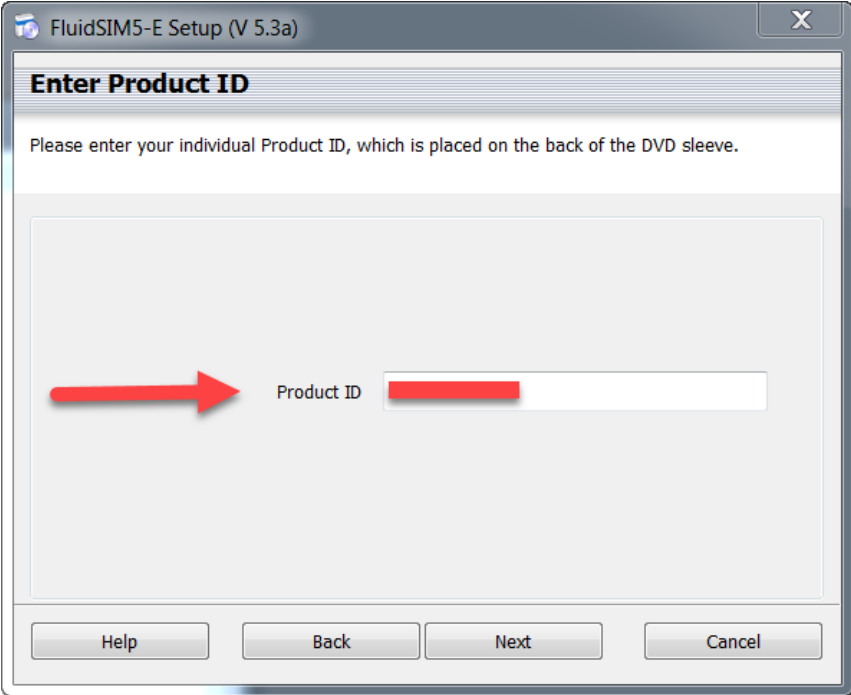

Click Install FluidSIM5-E.

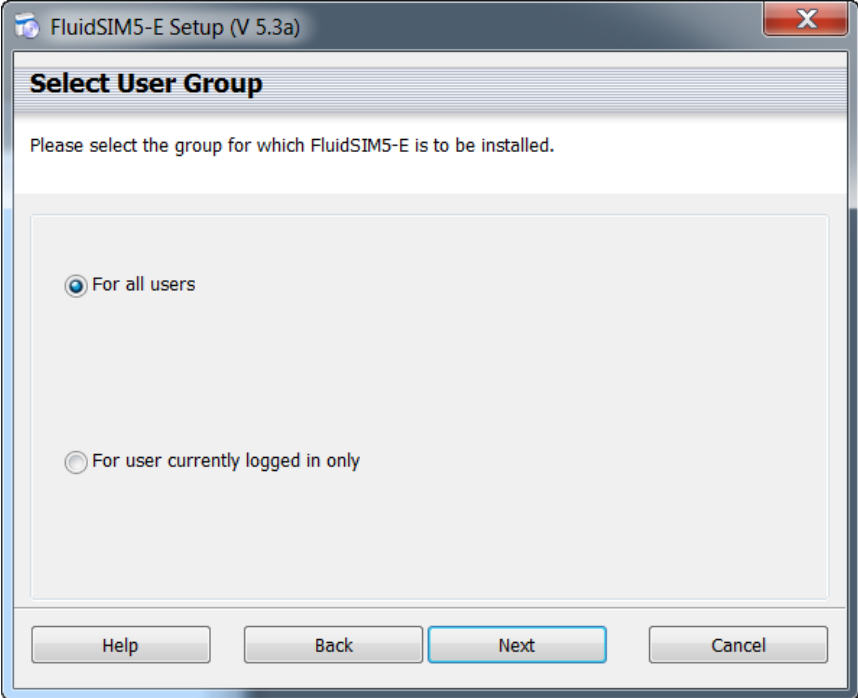

Select the variant "Online Activation".

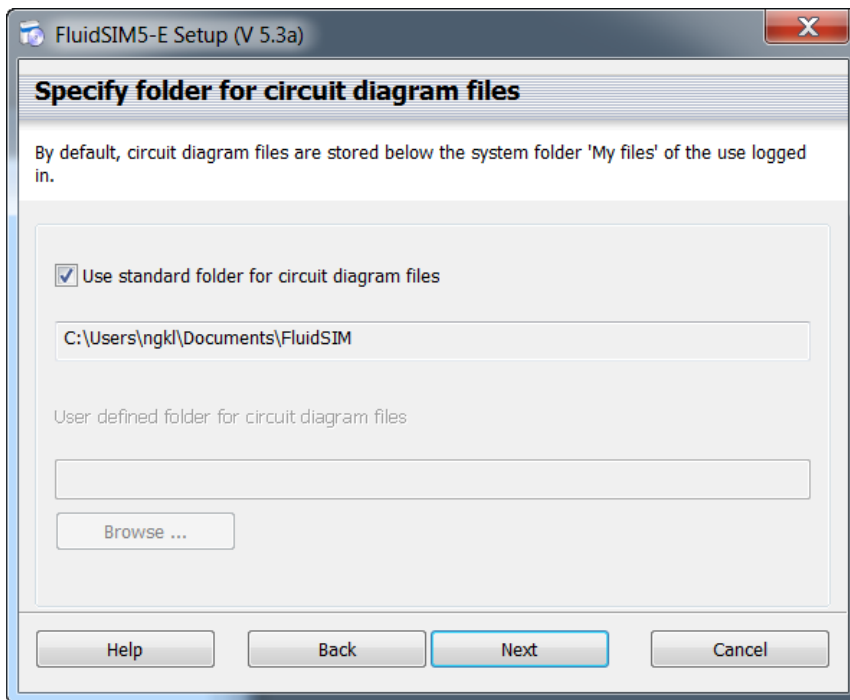

Enter the complete product ID. This consists of 12 digits.

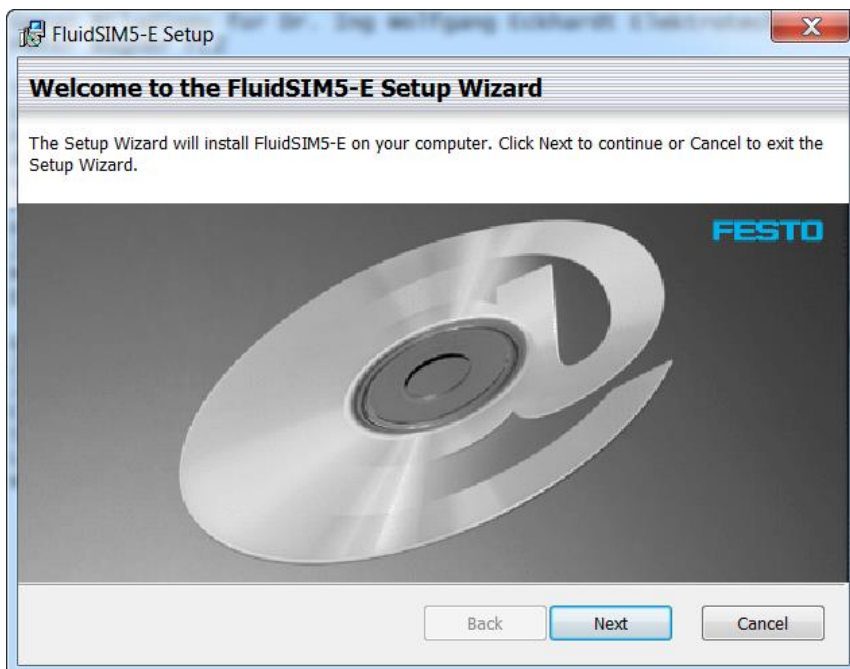

Choose from the two options for which users the software should be installed.

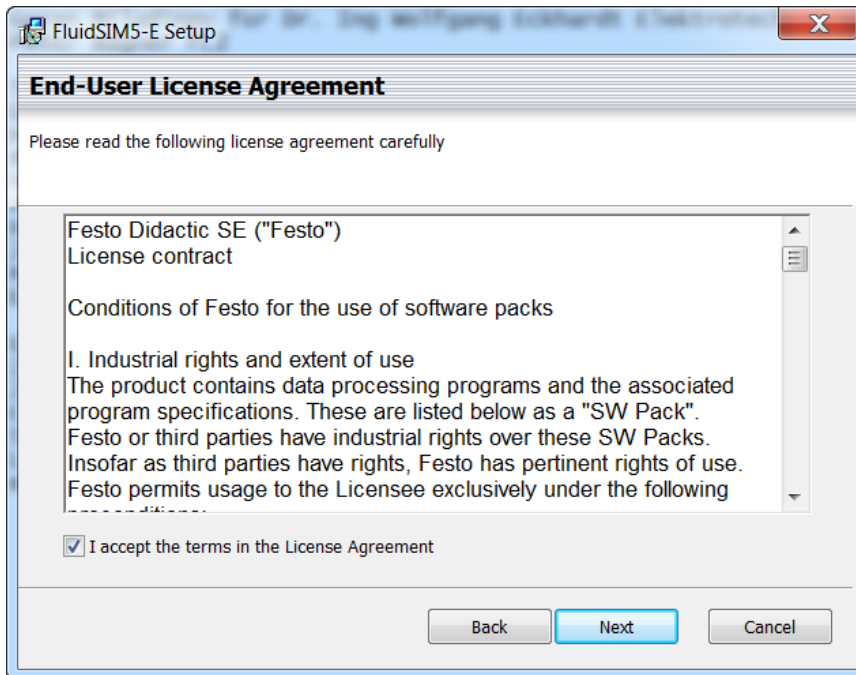

Enter the location for the circuit files.

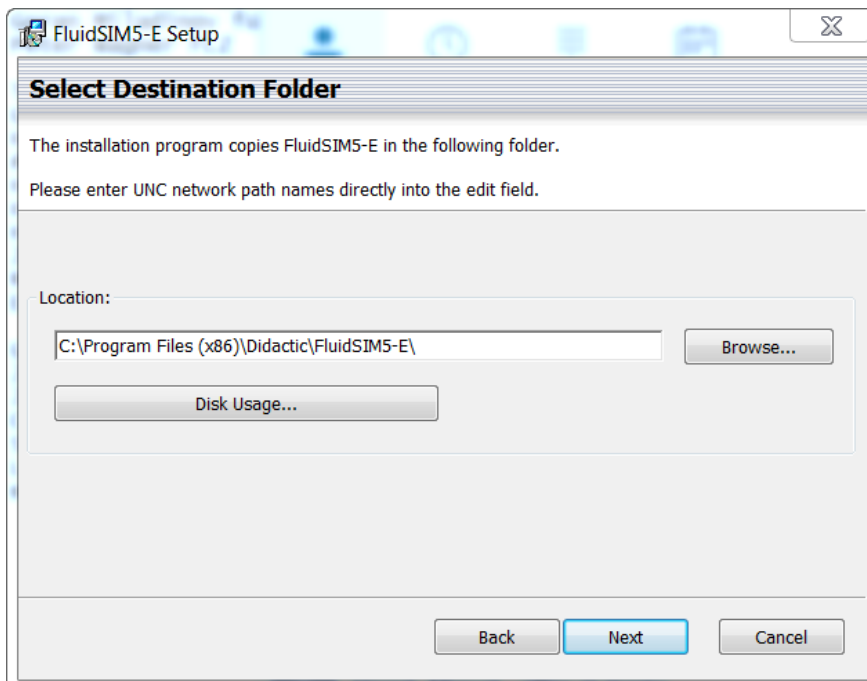

Click on "NEXT"

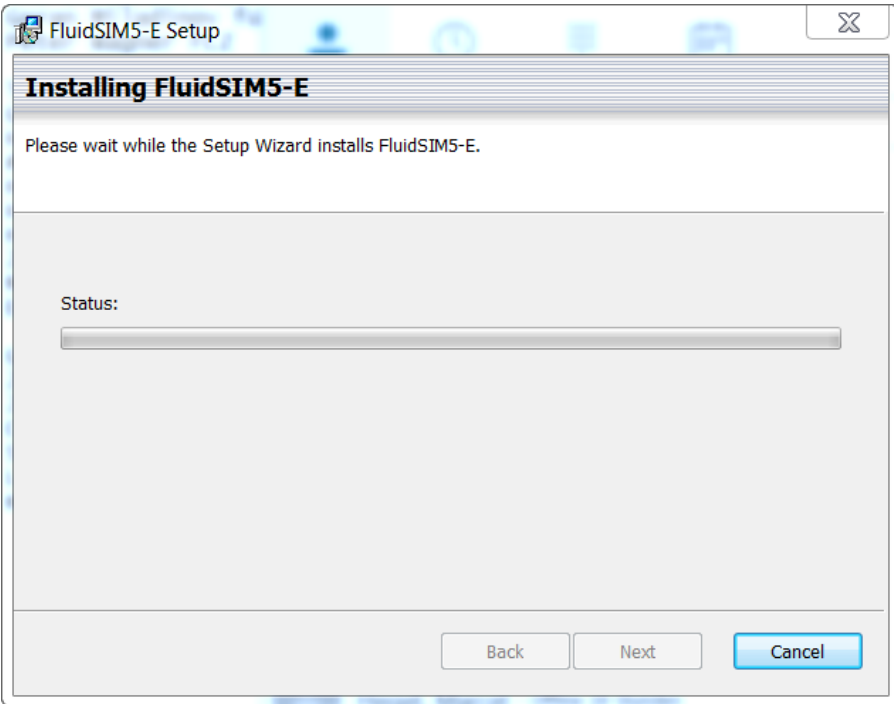

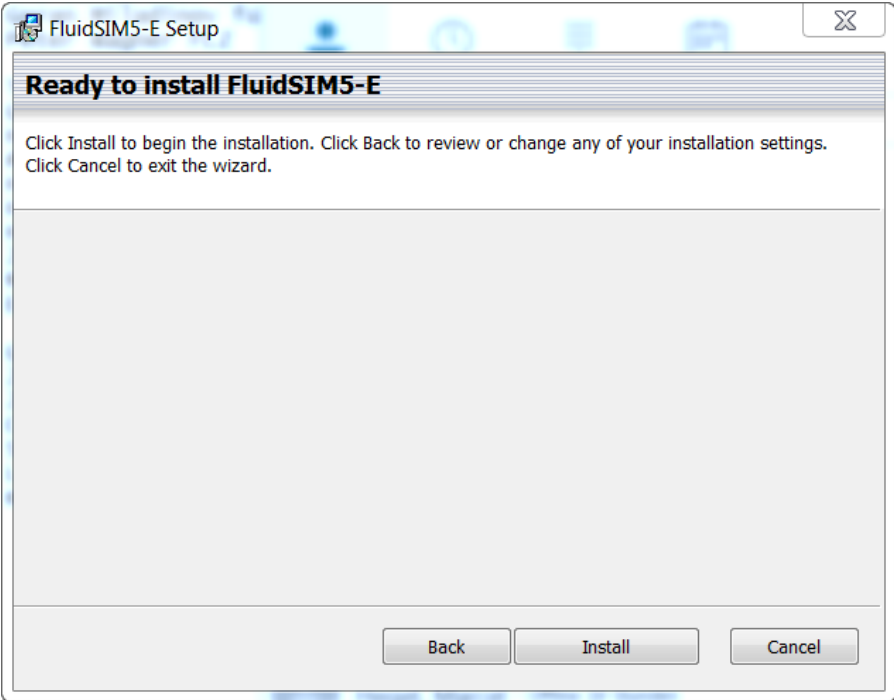

Accept the license agreement

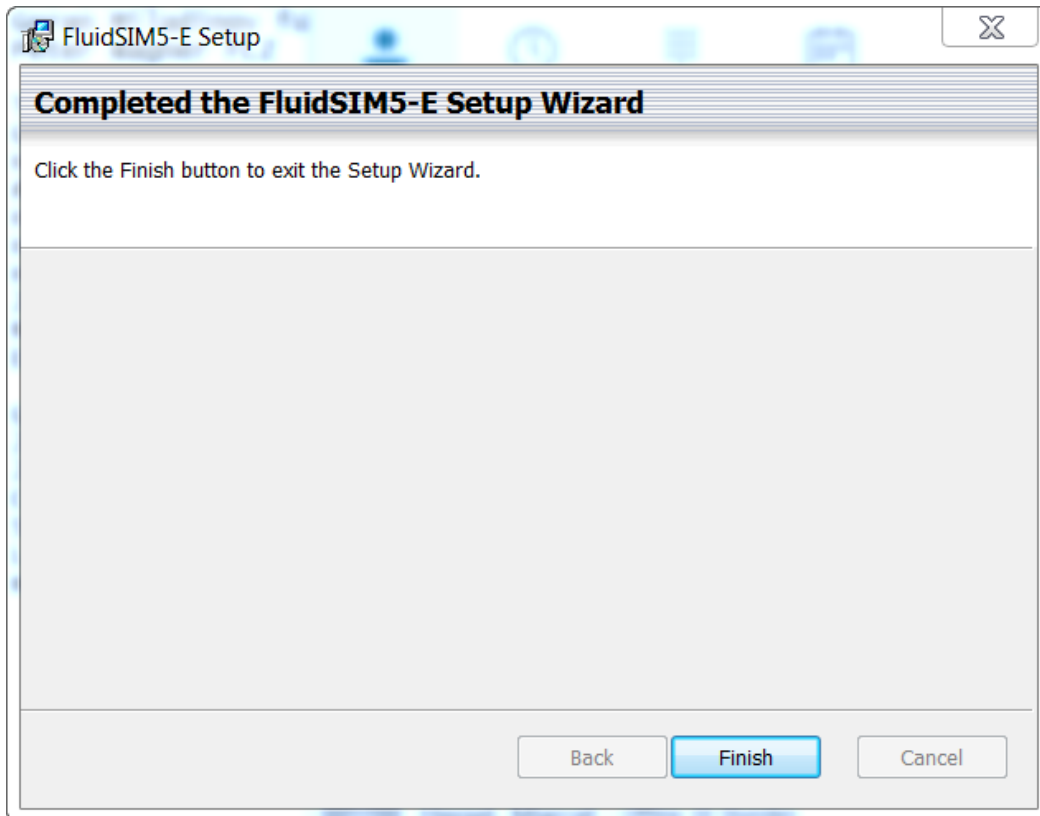

Specify the location for the software.

The software is now ready to install.

Installation completed successfully. Now start FluidSIM.

As a note: Each FluidSIM DVD is a guide. This is located under DOC / FluidSIMENUS.pdf
