

De-Activation of Fluid SIM

Press on Windows-Start Button – Control Panel – Programs and Functions – Please de-install FluidSIM here as shown on the picture.

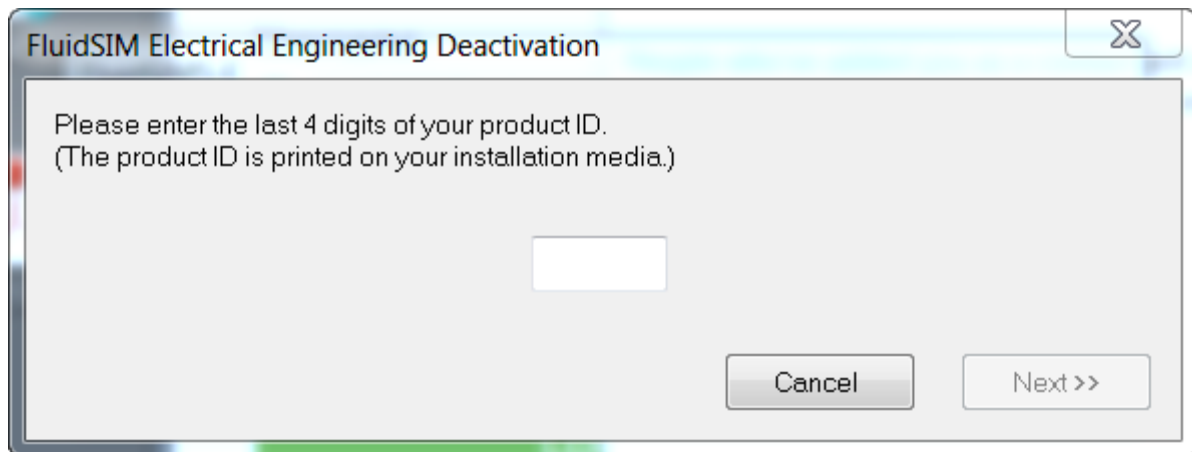

Now you have three options to do the deactivation shown in the screenshot.

OPTION1:
Requires Internet access on your PC.

You will be prompt to enter the four last digits of your product ID and the click on "Next"

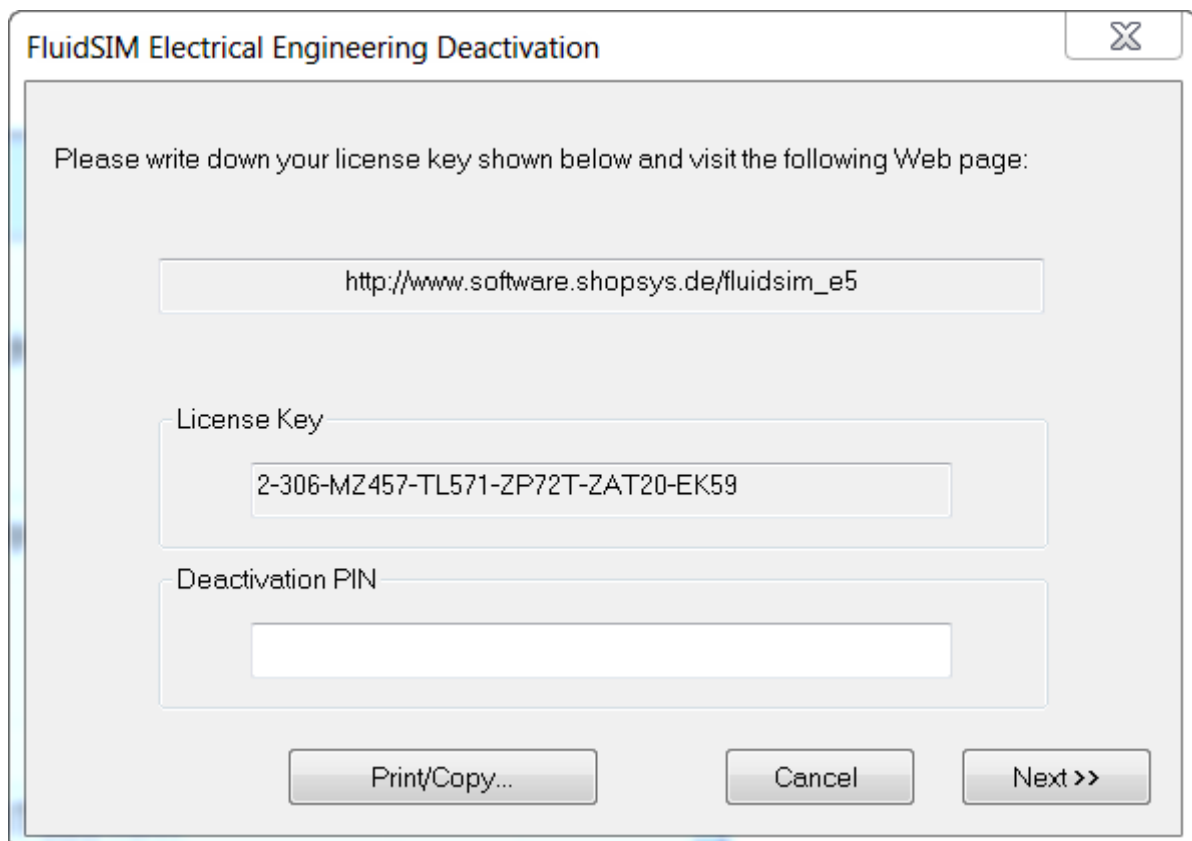

After this the de-activation is done and with the finish of the uninstall process the license returns to your product ID. You can use the license again.

OPTION2:

Your PC has no internet access.

You will be prompt to enter the four last digits of your product ID. Proceed.

Go to the website shown on the screenshot, copy License Key

Switch to deactivate license
