

## DSNU-20--P-A-KP

Standard cylinder

Data sheet

Part no.: 178501

Page:1

| Feature                                 | Data/description                          |
|---|---|
| Mode of operation                       | Double acting                             |
| Shape piston                            | Round                                     |
| Shape of piston rod                     | Round                                     |
| In accordance with standard ISO         | ISO 6432                                  |
| Sensing type                            | Magnetic                                  |
| Type of cushioning                      | Internal cushioning ring (non-adjustable) |
| Protection against torsion              | None                                      |
| Clamping                                | Compressed air -> Compressed air          |
| Piston, nominal size                    | 20  |
| X-stroke                                | x   |
| Min. stroke for X-stroke                | 1 mm                                      |
| Max. stroke for X-stroke                | 320 mm                                    |
| Piston rod diameter                     | 8 mm                                      |
| End of piston rod                       | Male thread                               |
| KK Piston rod thread                    | M 8                                       |
| Operating pressure min.                 | 1 bar                                     |
| Operating pressure max.                 | 10 bar                                    |
| Minimum ambient temperature             | -20 °C                                    |
| Maximum ambient temperature             | 80 °C                                     |
| Bearing cap connection type             | Female thread                             |
| EE Connecting thread for bearing cap    | G 1/8                                     |
| Material of cap                         | Wrought aluminium alloy                   |
| Material of seals                       | NBR, TPE-U(PU)                            |
| Material of piston rod                  | Stainless high-alloy steel                |
| Material of barrel/housing              | Stainless high-alloy steel                |
| Coating of cover                        | Neutral anodised                          |
| Air connection type cover cap           | Female thread                             |
| EE Connecting thread for end cap        | G 1/8                                     |
| Effective force (theor.) at 6 bar, adv. | 188,5 N                                   |
| Effect. force (theor.) at 6 bar, return | 158,3 N                                   |
| Air consumption at 6 bar advance /10mm  | 0,0203 I                                  |

## DSNU-20--P-A-KP

Standard cylinder

## Data sheet

Part no.: 178501

Page:2

| Feature                      | Data/description                      |  |
|------------------------------|---------------------------------------|--|
| Air consumption at 6 bar ret | 0,017 l                               |  |
| Medium                       | Dried air, lubricated or unlubricated |  |
