## standards-based cylinder DSBC-32-20-D3-PPVA-N3 Part number: 3656511

With adjustable cushioning at both ends.

**FESTO** 

## **Data sheet**

| Feature                                                  | Value                                                            |
|----------------------------------------------------------|------------------------------------------------------------------|
| Stroke                                                   | 20 mm                                                            |
| Piston diameter                                          | 32 mm                                                            |
| Piston rod thread                                        | M10x1,25                                                         |
| Cushioning                                               | PPV: Pneumatic cushioning adjustable at both ends                |
| Assembly position                                        | Any                                                              |
| Conforms to standard                                     | ISO 15552                                                        |
| Piston-rod end                                           | Male thread                                                      |
| Design structure                                         | Piston                                                           |
|                                                          | Piston rod                                                       |
|                                                          | Profile barrel                                                   |
| Position detection                                       | For proximity sensor                                             |
| Variants                                                 | Single-ended piston rod                                          |
| Operating pressure MPa                                   | 0.08 1.2 MPa                                                     |
| Operating pressure                                       | 0.8 12 bar                                                       |
| Mode of operation                                        | double-acting                                                    |
| Operating medium                                         | Compressed air in accordance with ISO8573-1:2010 [7:4:4]         |
| Note on operating and pilot medium                       | Lubricated operation possible (subsequently required for further |
|                                                          | operation)                                                       |
| Corrosion resistance classification CRC                  | 2 - Moderate corrosion stress                                    |
| PWIS conformity                                          | VDMA24364-B1/B2-L                                                |
| Ambient temperature                                      | -20 80 °C                                                        |
| Impact energy in end positions                           | 0.4 J                                                            |
| Cushioning length                                        | 17 mm                                                            |
| Theoretical force at 0.6 MPa (6 bar, 87 psi), retracting | 415 N                                                            |
| Theoretical force at 0.6 MPa (6 bar, 87 psi), advance    | 483 N                                                            |
| Moving mass with 0 mm stroke                             | 110 g                                                            |
| Additional mass factor per 10 mm of stroke               | 9 g                                                              |
| Basic weight for 0 mm stroke                             | 480 g                                                            |
| Additional weight per 10 mm stroke                       | 31 g                                                             |
| Mounting type                                            | with internal (female) thread                                    |
|                                                          | with accessories                                                 |
|                                                          | Optional                                                         |
| Pneumatic connection                                     | G1/8                                                             |
| Materials note                                           | Conforms to RoHS                                                 |
| Material cover                                           | Die-cast aluminium, coated                                       |
| Material piston seal                                     | TPE-U(PU)                                                        |
| Material piston                                          | Wrought Aluminium alloy                                          |
| Material piston rod                                      | High alloy steel                                                 |
| Material piston rod wiper seal                           | TPE-U(PU)                                                        |
| Buffer seal material                                     | TPE-U(PU)                                                        |
| Cushion piston material                                  | POM                                                              |
| Material cylinder barrel                                 | Smooth-anodised wrought aluminium alloy                          |
| Material nut                                             | steel, galvanized                                                |
| Rod wiper seal material                                  | TPE-E                                                            |
| Material bearing                                         | Metal polymer compound                                           |
| Material of flange screw                                 | steel, galvanized                                                |
