

# Connecting cable NEBV-H1G2-P-5-LE2

Part number: 552004

FESTO

für Magnetventile MH1, mit LED.

## Data sheet

| Feature                                 | Value                                |
|---|--------------------------------------|
| Assembly position                       | Any                                  |
| Cable attribute                         | Für statische Anwendungen            |
| Polarity protected                      | for all electrical connections       |
| Operating voltage range AC              | 0 ... 30 V                           |
| Operating voltage range DC              | 0 ... 30 V                           |
| maximum output current                  | 2,000 mA                             |
| Stoßspannungsfestigkeit                 | 0.8 kV                               |
| Corrosion resistance classification CRC | 4                                    |
| Protection class                        | IP40                                 |
| Ambient temperature                     | -5 ... 70 °C<br>-20 ... 70 °C        |
| Product weight                          | 120 g                                |
| Electrical connection                   | 2-core<br>Straight socket / cable    |
| Cable length                            | 5 m                                  |
| Mounting type                           | Clip                                 |
| Colour code, core insulation            | Pin 1 = black<br>Pin 3 = schwarz/rot |
| Materials note                          | Free of copper and PTFE              |
| Materials information, housing          | POM<br>PUR                           |
| Materials information, cable sheaths    | PVC                                  |
