## spindle axis unit ELGS-BS-KF-60-Part number: 8083398

## **Data sheet**

Overall data sheet – Individual values depend upon your configuration.

| Feature                                     | Value   |
|---|---|
| Working stroke                              | 100 800 mm  |
| Size  | 60  |
| Stroke reserve                              | 0 mm  |
| Spindle diameter                            | 12 mm   |
| Spindle pitch                               | 12 mm/U   |
| Assembly position                           | Any   |
| Guide                                       | Recirculating ball bearing guide                                |
| Design structure                            | Electromechanical linear axis                                   |
|   | with recirculating ball bearing spindle                         |
|   | With integrated drive   |
| Motor type                                  | Stepper motor   |
| Spindle type                                | Ball screw  |
| Position detection                          | Motor encoder   |
|   | For proximity sensor  |
| Referencing                                 | Fixed stop block positive                                       |
|   | Fixed stop block negative                                       |
| Rotor position sensor                       | Absolute single turn encoder                                    |
| Rotary position encoder measuring principle | Magnetic  |
| Temperature monitoring                      | Shutdown at over-temperature                                    |
|   | Integrated precise CMOS temperature sensor with analogue output |
| Additional functions                        | User interface  |
|   | Integrated end-position sensing                                 |
| Display                                     | LED   |
| Ready status display                        | LED   |
| Max. acceleration                           | 3 5 m/s2  |
| Max. speed                                  | 0.215 0.25 m/s  |
| Repetition accuracy                         | ±0,01 mm  |
| Digital logic output characteristics        | configurable  |
|   | Not electrically isolated                                       |
| Duty cycle                                  | 100 %   |
| Insulation protection class                 | В   |
| Max. current, digital logic outputs         | 100 mA  |
| Max. current consumption                    | 5.3 A   |
| Nominal voltage DC                          | 24 V  |
| Nominal current                             | 5.3 A   |
| Parameters configuring interface            | IO-Link   |
|   | User interface  |
| Rotor position encoder resolution           | 16 Bit  |
| Permissible voltage fluctuation             | +/- 15 %  |
| Power supply, type of connection            | Plug  |
| Power supply, connection technology         | M12x1, T-coded to EN 61076-2-111                                |
| Power supply, number of pins/wires          | 4   |
| Authorisation                               | RCM Mark  |
| KC mark                                     | KC-EMV  |

| Feature  | Value  |
