Conforms to standard ISO 15552 Piston rod end Male thread Design structure Piston Piston rod Tie rod Cylinder barrel Position detection For proximity sensor Variants Single-ended piston rod Operating pressure MPa O.02 1 MPa Working pressure More O.2 10 bar Mode of operation double-acting Operating medium Compressed air in accordance with ISO8573-1:2010 [7:4:4] Note on operating and pilot medium Lubricated operation possible (subsequently required for furthe operation) Corrosion resistance classification CRC 2 · Moderate corrosion stress PWIS conformity VDMA2364-B1/B2-L Ambient temperature -20 80 °C Impact energy in end positions 2.5 Cushioning length 45 mm Theoretical force at 0.6 MPa (6 bar, 87 psi), retracting 6,881 N Theoretical force at 0.6 MPa (6 bar, 87 psi), advance 7,363 N Moving mass Moving mass with 0 mm stroke 2,245 g Additional mass factor per 10 mm of stroke 66,11 g Additional weight per 10 mm stroke 143 g Mounting type With internal (female) thread with accessories Optional Pneumatic connection G1/2 Material cover Coated die-cast aluminium			
Piston-rod end Design structure Piston Design structure Piston rod Tie rod Cylinder barrel Position detection For proximity sensor Variants Single-ended piston rod Operating pressure MPa O.2 1 MPa Working pressure O.2 1 MPa Working pressure O.2 1 O bar Mode of operation Operating medium Compressed air in accordance with ISO8573-1:2010 [7:4:4] Note on operating and pilot medium Lubricated operation possible (subsequently required for furthe operation) Corrosion resistance classification CRC 2 · Moderate corrosion stress PWIS conformity VDMA24364-B1/B2-L Ambient temperature 2 · 2 · 0 80 °C Lushioning length A5 mm Theoretical force at 0.6 MPa (6 bar, 87 psi), retracting Theoretical force at 0.6 MPa (6 bar, 87 psi), advance Moving mass Moving mass with 0 mm stroke Additional mass factor per 10 mm of stroke Additional mass factor per 10 mm stroke Additional weight per 10 mm stroke Additional weight per 10 mm stroke Mounting type With internal (female) thread with accessories Optional Pneumatic connection Materials note Coafforms to RoHS Materials cover Coated die-cast aluminium			
Design structure Piston Piston rod Tie rod Cylinder barrel Position detection For proximity sensor Variants Single-ended piston rod Operating pressure MPa Working pressure 0.2 10 bar Mode of operation Operating medium Compressed air in accordance with ISO8573-1:2010 [7:4:4] Note on operating and pilot medium Lubricated operation possible (subsequently required for furthe operation) Corrosion resistance classification CRC 2 · Moderate corrosion stress PWIS conformity VDMA24364-B1/B2-L Ambient temperature -20 80 °C Impact energy in end positions 2.5 J Cushioning length 45 mm Theoretical force at 0.6 MPa (6 bar, 87 psi), retracting Theoretical force at 0.6 MPa (6 bar, 87 psi), advance Moving mass 4,765 g Moving mass with 0 mm stroke 2,245 g Additional mass factor per 10 mm of stroke Froduct weight Basic weight for 0 mm stroke Additional weight per 10 mm stroke Mounting type with accessories Optional Pneumatic connection Materials note Conforms to RoHS Materials cover Coated die-cast aluminium			Piston-rod end
Piston rod Tie rod Cylinder barrel Position detection For proximity sensor Variants Single-ended piston rod Operating pressure MPa O.2 1 MPa Working pressure Morking pressure Mode of operation Operating medium Compressed air in accordance with ISO8573-1:2010 [7:4:4] Note on operating and pilot medium Lubricated operation possible (subsequently required for furthe operation) Corrosion resistance classification CRC 2 · Moderate corrosion stress PWIS conformity VDMA24364-81/B2-L Ambient temperature Impact energy in end positions 2.5 J Cushioning length Theoretical force at 0.6 MPa (6 bar, 87 psi), retracting Theoretical force at 0.6 MPa (6 bar, 87 psi), advance Moving mass 4,765 g Moving mass with 0 mm stroke Additional mass factor per 10 mm of stroke Forduct weight Basic weight for 0 mm stroke Additional weight per 10 mm stroke Mounting type With internal (female) thread with accessories Optional Pneumatic connection Materials note Conforms to RoHS Material cover Coated die-cast aluminium			
Tie rod Cylinder barrel Position detection For proximity sensor Variants Single-ended piston rod Operating pressure MPa O.2 1 MPa Working pressure Mode of operation Operating medium Compressed air in accordance with ISO8573-1:2010 [7:4:4] Note on operating and pilot medium Lubricated operation possible (subsequently required for furthe operation) Corrosion resistance classification CRC PWIS conformity VDMA24364-B1/B2-L Ambient temperature 20 80 °C Impact energy in end positions 2.5 J Cushioning length Theoretical force at 0.6 MPa (6 bar, 87 psi), retracting Theoretical force at 0.6 MPa (6 bar, 87 psi), advance Moving mass Moving mass with 0 mm stroke Additional mass factor per 10 mm of stroke Froduct weight Basic weight for 0 mm stroke Additional weight per 10 mm stroke Mounting type with internal (female) thread with accessories Optional Pneumatic connection Materials note Conforms to RoHS Materials note Conforms to RoHS Material cover Coated die-cast aluminium		I	200.5.1 0.1 00.10.1
Cylinder barrel Position detection For proximity sensor Variants Single-ended piston rod Operating pressure MPa O.2 1 MPa Working pressure O.2 10 bar Mode of operation Operating medium Compressed air in accordance with ISO8573-1:2010 [7:4:4] Note on operating and pilot medium Lubricated operation possible (subsequently required for furthe operation) Corrosion resistance classification CRC 2 - Moderate corrosion stress PWIS conformity VDMA24364-B1/B2-L Ambient temperature -20 80 °C Impact energy in end positions Cushioning length 45 mm Theoretical force at 0.6 MPa (6 bar, 87 psi), retracting Theoretical force at 0.6 MPa (6 bar, 87 psi), advance Ay765 g Moving mass with 0 mm stroke 4,765 g Moving mass with 0 mm stroke 4,765 g Additional mass factor per 10 mm of stroke 63 g Product weight Basic weight for 0 mm stroke 4,611 g Additional weight per 10 mm stroke Mounting type with internal (female) thread with accessories Optional Pneumatic connection G1/2 Materials note Conforms to RoHS Material cover Coated die-cast aluminium		I	
Position detection Variants Single-ended piston rod Operating pressure MPa 0.02 1 MPa Morking pressure 0.2 10 bar Mode of operation Operating medium Compressed air in accordance with ISO8573-1:2010 [7:4:4] Note on operating and pilot medium Corrosion resistance classification CRC 2 · Moderate corrosion stress PWIS conformity VDMA24364-B1/B2-L Ambient temperature 1.20 80 °C Impact energy in end positions Cushioning length 45 mm Theoretical force at 0.6 MPa (6 bar, 87 psi), retracting Theoretical force at 0.6 MPa (6 bar, 87 psi), advance Moving mass 4,765 g Moving mass with 0 mm stroke Additional mass factor per 10 mm of stroke 63 g Product weight Basic weight for 0 mm stroke Additional weight per 10 mm stroke Mounting type with internal (female) thread with accessories Optional Pneumatic connection Materials note Conforms to RoHS Materials note Coated die-cast aluminium			
Variants Operating pressure MPa O.2 1 MPa Working pressure O.2 10 bar Mode of operating medium Operating medium Operating medium Compressed air in accordance with ISO8573-1:2010 [7:4:4] Note on operating and pilot medium Lubricated operation possible (subsequently required for furthe operation) Corrosion resistance classification CRC 2 - Moderate corrosion stress PWIS conformity Ambient temperature Impact energy in end positions Cushioning length Theoretical force at 0.6 MPa (6 bar, 87 psi), retracting Moving mass Moving mass with 0 mm stroke Additional mass factor per 10 mm of stroke Product weight Basic weight for 0 mm stroke Additional weight per 10 mm stroke Additional measure weight per 10 mm stroke Add			Position detection
Operating pressure MPa 0.02 1 MPa Working pressure 0.2 10 bar Mode of operation double-acting Operating medium Compressed air in accordance with ISO8573-1:2010 [7:4:4] Note on operating and pilot medium Lubricated operation possible (subsequently required for furthe operation) Corrosion resistance classification CRC 2 · Moderate corrosion stress PWIS conformity VDMA24364-B1/B2-L Ambient temperature -20 80 °C Impact energy in end positions 2.5 J Cushioning length 45 mm Theoretical force at 0.6 MPa (6 bar, 87 psi), retracting 6,881 N Theoretical force at 0.6 MPa (6 bar, 87 psi), advance 7,363 N Moving mass 4,765 g Moving mass with 0 mm stroke 2,245 g Additional mass factor per 10 mm of stroke 63 g Product weight 12,331 g Basic weight for 0 mm stroke 6,611 g Additional weight per 10 mm stroke 143 g Mounting type with internal (female) thread with accessories Optional Pneumatic connection G1/2 Materials note Conforms to RoHS Material cover Coated di			
Working pressure Mode of operation Operating medium Compressed air in accordance with ISO8573-1:2010 [7:4:4] Note on operating and pilot medium Lubricated operation possible (subsequently required for furthe operation) Corrosion resistance classification CRC 2 · Moderate corrosion stress PWIS conformity WDMA24364-B1/B2-L Ambient temperature 1-20 80 °C Impact energy in end positions 2.5 J Cushioning length Theoretical force at 0.6 MPa (6 bar, 87 psi), retracting Theoretical force at 0.6 MPa (6 bar, 87 psi), advance 7,363 N Moving mass Moving mass with 0 mm stroke Additional mass factor per 10 mm of stroke 63 g Product weight Basic weight for 0 mm stroke Additional weight per 10 mm stroke 4.6611 g Additional weight per 10 mm stroke Mounting type with internal (female) thread with accessories Optional Pneumatic connection Materials note Conforms to RoHS Materials cover Coated die-cast aluminium			
Mode of operation double-acting Operating medium Compressed air in accordance with ISO8573-1:2010 [7:4:4] Note on operating and pilot medium Lubricated operation possible (subsequently required for furthe operation) Corrosion resistance classification CRC 2 - Moderate corrosion stress PWIS conformity VDMA24364-B1/B2-L Ambient temperature -20 80 °C Impact energy in end positions 2.5 J Cushioning length 45 mm Theoretical force at 0.6 MPa (6 bar, 87 psi), retracting 6,881 N Theoretical force at 0.6 MPa (6 bar, 87 psi), advance 7,363 N Moving mass 4,765 g Moving mass with 0 mm stroke 2,245 g Additional mass factor per 10 mm of stroke 63 g Product weight 12,331 g Basic weight for 0 mm stroke 6,611 g Additional weight per 10 mm stroke 143 g Mounting type with internal (female) thread with accessories Optional Optional Pneumatic connection Materials note Conforms to RoHS Materials note Coated die-cast aluminium			
Operating medium Compressed air in accordance with ISO8573-1:2010 [7:4:4] Note on operating and pilot medium Lubricated operation possible (subsequently required for furthe operation) Corrosion resistance classification CRC 2 · Moderate corrosion stress PWIS conformity VDMA24364-B1/B2-L Ambient temperature -20 80 °C Impact energy in end positions 2.5 J Cushioning length 45 mm Theoretical force at 0.6 MPa (6 bar, 87 psi), retracting 6,881 N Theoretical force at 0.6 MPa (6 bar, 87 psi), advance 7,363 N Moving mass 4,765 g Moving mass with 0 mm stroke 2,245 g Additional mass factor per 10 mm of stroke 63 g Product weight 12,331 g Basic weight for 0 mm stroke 6,611 g Additional weight per 10 mm stroke 43 g Mounting type with internal (female) thread with accessories Optional Pneumatic connection G1/2 Materials note Conforms to RoHS Material cover Coated die-cast aluminium			
Note on operating and pilot medium Corrosion resistance classification CRC 2 · Moderate corrosion stress PWIS conformity Ambient temperature Impact energy in end positions Cushioning length Theoretical force at 0.6 MPa (6 bar, 87 psi), retracting Theoretical force at 0.6 MPa (6 bar, 87 psi), advance Moving mass Moving mass with 0 mm stroke Additional mass factor per 10 mm of stroke Additional weight per 10 mm stroke Additional weight per 10 mm stroke Additional weight per 10 mm stroke Mounting type With internal (female) thread with accessories Optional Pneumatic connection Materials note Conforms to RoHS Materials cover	h ISO8572 1-2010 [7-4-4]		
operation) Corrosion resistance classification CRC 2 · Moderate corrosion stress PWIS conformity VDMA24364-B1/B2-L Ambient temperature -20 80 °C Impact energy in end positions 2.5 J Cushioning length 45 mm Theoretical force at 0.6 MPa (6 bar, 87 psi), retracting 6,881 N Theoretical force at 0.6 MPa (6 bar, 87 psi), advance 7,363 N Moving mass 4,765 g Moving mass with 0 mm stroke 2,245 g Additional mass factor per 10 mm of stroke 63 g Product weight 12,331 g Basic weight for 0 mm stroke 6,611 g Additional weight per 10 mm stroke 143 g Mounting type with internal (female) thread with accessories Optional Pneumatic connection G1/2 Materials note Conforms to RoHS Materials note Coated die-cast aluminium			
Corrosion resistance classification CRC PWIS conformity Ambient temperature -20 80 °C Impact energy in end positions 2.5 J Cushioning length Theoretical force at 0.6 MPa (6 bar, 87 psi), retracting Theoretical force at 0.6 MPa (6 bar, 87 psi), advance Moving mass 4,765 g Moving mass with 0 mm stroke Additional mass factor per 10 mm of stroke Product weight Basic weight for 0 mm stroke Additional weight per 10 mm stroke Mounting type With internal (female) thread with accessories Optional Pneumatic connection G1/2 Materials note Coated die-cast aluminium	bsequently required for further	 	Note on operating and phot medium
PWIS conformity VDMA24364-B1/B2-L Ambient temperature -20 80 °C Impact energy in end positions 2.5 J Cushioning length 45 mm Theoretical force at 0.6 MPa (6 bar, 87 psi), retracting Theoretical force at 0.6 MPa (6 bar, 87 psi), advance 7,363 N Moving mass 4,765 g Moving mass with 0 mm stroke 2,245 g Additional mass factor per 10 mm of stroke Product weight Basic weight for 0 mm stroke 4,6611 g Additional weight per 10 mm stroke Mounting type with internal (female) thread with accessories Optional Pneumatic connection G1/2 Materials note Conforms to RoHS Material cover		1 '	Comparing and internal planning and the CDC
Ambient temperature Impact energy in end positions Cushioning length 45 mm Theoretical force at 0.6 MPa (6 bar, 87 psi), retracting Theoretical force at 0.6 MPa (6 bar, 87 psi), advance Topic force at 0.6 MPa (6 bar, 87 psi), advance Topic force at 0.6 MPa (6 bar, 87 psi), advance Topic force at 0.6 MPa (6 bar, 87 psi), advance Topic force at 0.6 MPa (6 bar, 87 psi), advance Topic force at 0.6 MPa (6 bar, 87 psi), advance Topic force at 0.6 MPa (6 bar, 87 psi), advance Topic force at 0.6 MPa (6 bar, 87 psi), advance Topic force at 0.6 MPa (6 bar, 87 psi), retracting Topic force at 0.6 MPa (6 bar, 87 psi), ret			
Impact energy in end positions Cushioning length Theoretical force at 0.6 MPa (6 bar, 87 psi), retracting Theoretical force at 0.6 MPa (6 bar, 87 psi), advance 7,363 N Moving mass 4,765 g Moving mass with 0 mm stroke Additional mass factor per 10 mm of stroke Product weight Basic weight for 0 mm stroke Additional weight per 10 mm stroke 4,6611 g Additional weight per 10 mm stroke Mounting type with internal (female) thread with accessories Optional Pneumatic connection G1/2 Materials note Conforms to RoHS Material cover			,
Cushioning length Theoretical force at 0.6 MPa (6 bar, 87 psi), retracting Theoretical force at 0.6 MPa (6 bar, 87 psi), advance T,363 N Moving mass 4,765 g Moving mass with 0 mm stroke Additional mass factor per 10 mm of stroke Froduct weight Basic weight for 0 mm stroke Additional weight per 10 mm stroke 143 g Mounting type with internal (female) thread with accessories Optional Pneumatic connection G1/2 Materials note Conforms to RoHS Material cover Coated die-cast aluminium			
Theoretical force at 0.6 MPa (6 bar, 87 psi), retracting Theoretical force at 0.6 MPa (6 bar, 87 psi), advance Theoretical force at 0.6 MPa (6 bar, 87 psi), advance To describe the force at 0.6 MPa (6 bar, 87 psi), advance To describe the force at 0.6 MPa (6 bar, 87 psi), advance To describe the force at 0.6 MPa (6 bar, 87 psi), advance To describe the force at 0.6 MPa (6 bar, 87 psi), retracting To describe the force at 0.6 MPa (6 bar, 87 psi), retracting To describe the force at 0.6 MPa (6 bar, 87 psi), retracting To describe the force at 0.6 MPa (8 bar, 87 psi), retracting To describe the force at 0.6 MPa (8 bar, 87 psi), retracting To describe the force at 0.6 MPa (8 bar, 87 psi), advance To describe the force at 0.6 MPa (8 bar, 87 psi), advance To describe the force at 0.6 MPa (8 bar, 87 psi), advance To describe the force at 0.6 MPa (8 bar, 87 psi), advance To describe the force at 0.6 MPa (8 bar, 87 psi), advance To describe the force at 0.6 MPa (8 bar, 87 psi), advance To describe the force at 0.6 MPa (8 bar, 87 psi), advance To describe the force at 0.6 MPa (8 bar, 87 psi), advance To describe the force at 0.6 MPa (8 bar, 87 psi), advance To describe the force at 0.6 MPa (8 bar, 87 psi), advance To describe the force at 0.6 MPa (8 bar, 87 psi), advance To describe the force at 0.6 MPa (8 bar, 87 psi), advance To describe the force at 0.6 MPa (8 bar, 87 psi), advance To describe the force at 0.6 MPa (8 bar, 87 psi), advance To describe the force at 0.6 MPa (8 bar, 87 psi), advance To describe the force at 0.6 MPa (8 bar, 87 psi), advance To describe the force at 0.6 MPa (8 bar, 87 psi), advance To describe the force at 0.6 MPa (8 bar, 87 psi), advance To describe the force at 0.6 MPa (8 bar, 87 psi), advance To describe the force at 0.5 MPa (8 bar, 87 psi), advance To describe the force at 0.5 MPa (8 bar, 87 psi), advance To describe the force at 0.5 MPa (8 bar, 87 psi), advance To describe the force at 0.5 MPa (8 bar, 87 psi), advance To describe the force at 0.5 MPa (8 bar, 87 psi), advance To describ			
Theoretical force at 0.6 MPa (6 bar, 87 psi), advance Moving mass 4,765 g Moving mass with 0 mm stroke Additional mass factor per 10 mm of stroke Product weight Basic weight for 0 mm stroke Additional weight per 10 mm stroke Mounting type with internal (female) thread with accessories Optional Pneumatic connection G1/2 Materials note Moterial cover Adoming type Coated die-cast aluminium			
Moving mass 4,765 g Moving mass with 0 mm stroke 2,245 g Additional mass factor per 10 mm of stroke 63 g Product weight 12,331 g Basic weight for 0 mm stroke 6,611 g Additional weight per 10 mm stroke 143 g Mounting type with internal (female) thread with accessories Optional Pneumatic connection G1/2 Materials note Conforms to RoHS Material cover Coated die-cast aluminium			
Moving mass with 0 mm stroke Additional mass factor per 10 mm of stroke Product weight Basic weight for 0 mm stroke Additional weight per 10 mm stroke Additional weight per 10 mm stroke Mounting type with internal (female) thread with accessories Optional Pneumatic connection G1/2 Materials note Coated die-cast aluminium			• • •
Additional mass factor per 10 mm of stroke Product weight 12,331 g Basic weight for 0 mm stroke Additional weight per 10 mm stroke Additional weight per 10 mm stroke Mounting type with internal (female) thread with accessories Optional Pneumatic connection G1/2 Materials note Conforms to RoHS Material cover Coated die-cast aluminium			
Product weight 12,331 g Basic weight for 0 mm stroke 6,611 g Additional weight per 10 mm stroke 143 g Mounting type with internal (female) thread with accessories Optional Pneumatic connection G1/2 Materials note Conforms to RoHS Material cover Coated die-cast aluminium			
Basic weight for 0 mm stroke Additional weight per 10 mm stroke Mounting type with internal (female) thread with accessories Optional Pneumatic connection G1/2 Materials note Conforms to RoHS Material cover Material cover G6,611 g With internal (female) thread with accessories Optional Coptional Conforms to RoHS			•
