- N - Flow rate 130 ... 3 500 l/min

- 4/3-way valve mid-position closed mid-position exhausted
- Connections: M5, G½, G¼, G½
- 3/3-way valve
 The hand lever valve HS can be used as a 3/3-way valve by sealing port 2.

With these valves it is possible to stop single acting cylinders (3/3-way valve) or double acting cylinders (4/3-way valve) within the stroke range. If the hand lever valve is used, the cylinder piston is held in its neutral position by applying pressure at both sides, whereas if type HSO is used, the piston can be moved without pressure.

Pressure -0.95 ... +10 bar

Temperature range −10 ... +80°C
