

- Economical standard cylinder without variants
- Profile slot for proximity sensors and air connections on one side
- Choice of mounting options
- Stroke of up to 2,000 mm
- Wide range of accessories

High quality product

- Proven technology, compact, solid and reliable
- Excellent running characteristics thanks to efficient piston system
- Simple and sensitive adjustable end-position cushioning thanks to new PPV adjusting screw
- When an ideal setting has been found, the imprinted scale ensures easy reproducibility

Practical

- Elegant, easy-to-clean profile design
- Space-saving sensing thanks to proximity sensors in the profile slot

Easy to assemble

- Large selection of mounting options
- All accessories and mounting attachments from the DNC range can be used

Standard cylinder DNCB, ISO 15552

Features

FESTO

General data

If you need to solve simple tasks with a standard cylinder, the latest member of the DNC standard-cylinder family – the DNCB – is definitely the right choice. This standard cylinder is ideal for use wherever you need a techni-

cally and functionally high-quality drive. For instance, the new piston system with its outstanding running characteristics is far more compact and is able to absorb significantly more energy – and the space saved allows

a longer nose bearing to be fitted. Naturally, all existing accessories and mounting attachments can be used for this member of the DNC family, too.

Contactless sensing

The cylinder piston is fitted with a permanent magnet, the magnetic field of which is used to actuate proximity sensors. Proximity sensors can be

used to detect the end or intermediate positions of cylinders. One or more proximity sensors can be clamped into a groove. The illustrations depict the

new generation of proximity sensors. These can be inserted from above and are easily adjustable.

Mounting attachments and accessories		
	Brief description	→ Page
1 Adapter kit DPNC	for connecting two DNCB cylinders with identical piston $\varnothing$ to form a multi-position cylinder	1 / 1.2-12
2 Foot mounting HNC	for bearing and end caps corresponds to MS1 to ISO 15552	1 / 1.2-13
3 Flange mounting FNC	for bearing or end caps corresponds to MF1/MF2 to ISO 15552	1 / 1.2-13
4 Trunnion flange ZNCF	for bearing or end caps	1 / 1.2-14
5 Trunnion support LNZG	corresponds to MT4 to ISO 15552	1 / 1.2-16
6 Swivel flange SNC	for end caps	1 / 1.2-16
7 Clevis foot LSNG	with spherical bearing	1 / 1.2-18
8 Clevis foot LSNSG	weld-on with spherical bearing	1 / 1.2-18
9 Swivel flange SNCS	with spherical bearing for end caps	1 / 1.2-17
10 Clevis foot LBG	with non-rotating pivot pin	1 / 1.2-18
11 Swivel flange SNCL	for end caps corresponds to MP4 to ISO 15552	1 / 1.2-18
12 Swivel flange SNCB	for end caps corresponds to MP2 to ISO 15552	1 / 1.2-17
13 Clevis foot LNG	for swivel flange SNCB 12	1 / 1.2-18
14 Clevis foot LSN	with spherical bearing	1 / 1.2-18
15 Trunnion mounting kit ZNCM	for mounting anywhere on the cylinder barrel corresponds to MT4 to ISO 15552	1 / 1.2-15
16 Rod eye SGS	with spherical bearing	1 / 1.2-19
17 Right-angle clevis foot LQG	with non-rotating pivot pin	1 / 1.2-18
18 Rod clevis SGA	suitable for spherical mounting of cylinders in conjunction with rod eye SGS 16	1 / 1.2-19
19 Coupling piece KSG	for compensating radial deviations	1 / 1.2-19
20 Rod clevis SG	permits a swivelling movement of the cylinder in one plane	1 / 1.2-19
21 Self-aligning rod coupler FK	for compensating radial and angular deviations	1 / 1.2-19
22 Guide unit FENG	to protect against torsion at high torque loads	1 / 1.2-20
24 Slot cover ABP-5-S	to protect the sensor cable and keep dirt out of the sensor slots	1 / 1.2-21
25 Proximity sensors SME/SMT-8	can be integrated in the cylinder profile barrel	1 / 1.2-21
26 One-way flow control valve GRLA	for speed regulation	1 / 1.2-19
27 Push-in fitting QS	for connecting compressed air tubing with standard O.D.	Volume 3

Connecting two cylinders with identical piston Ø as a 3 or 4-position cylinder.

A 3 or 4-position cylinder consists of two separate cylinders whose piston rods advance in opposing directions.

Depending upon actuation and stroke pattern, this type of cylinder can assume up to four positions. In each

case the cylinder is driven precisely against a stop. If one end of the piston rod is fixed, the cylinder barrel

executes the movement. The cylinder must be connected with flexible line connections.

Implementing 3 positions

Two cylinders with identical stroke length must be connected to this end.

Implementing 4 positions

Two cylinders with different stroke lengths must be connected to this end.

1) Corrosion resistance class 2 according to Festo standard 940 070

Components requiring moderate corrosion resistance. Externally visible parts with primarily decorative surface requirements which are in direct contact with a surrounding industrial atmosphere or media such as cooling or lubricating agents

Standard cylinder DNCB, ISO 15552

Accessories

FESTO

LNZG trunnion support

Material:

Trunnion support:

Anodised aluminium

Plain bearing: Plastic

Free of copper, PTFE and silicone
