

Wide range of configuration options
→ www.festo.com/en/engineering

- All variants available in three sizes:
 - MS4 – grid dimension 40 mm
 - MS6 – grid dimension 62 mm
 - MS12 – grid dimension 124 mm
- Modular
- Easy to assemble
- Broad range of functions
- Compact with high flow rates
- Modern design
- Wide choice of variants
- Integrated safety functions

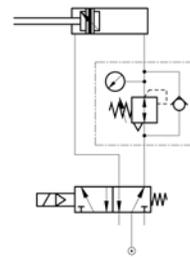

A breakthrough in compressed air preparation: the MS series

Lockable regulators for safety

Integrated return venting in the regulators as standard for high functionality

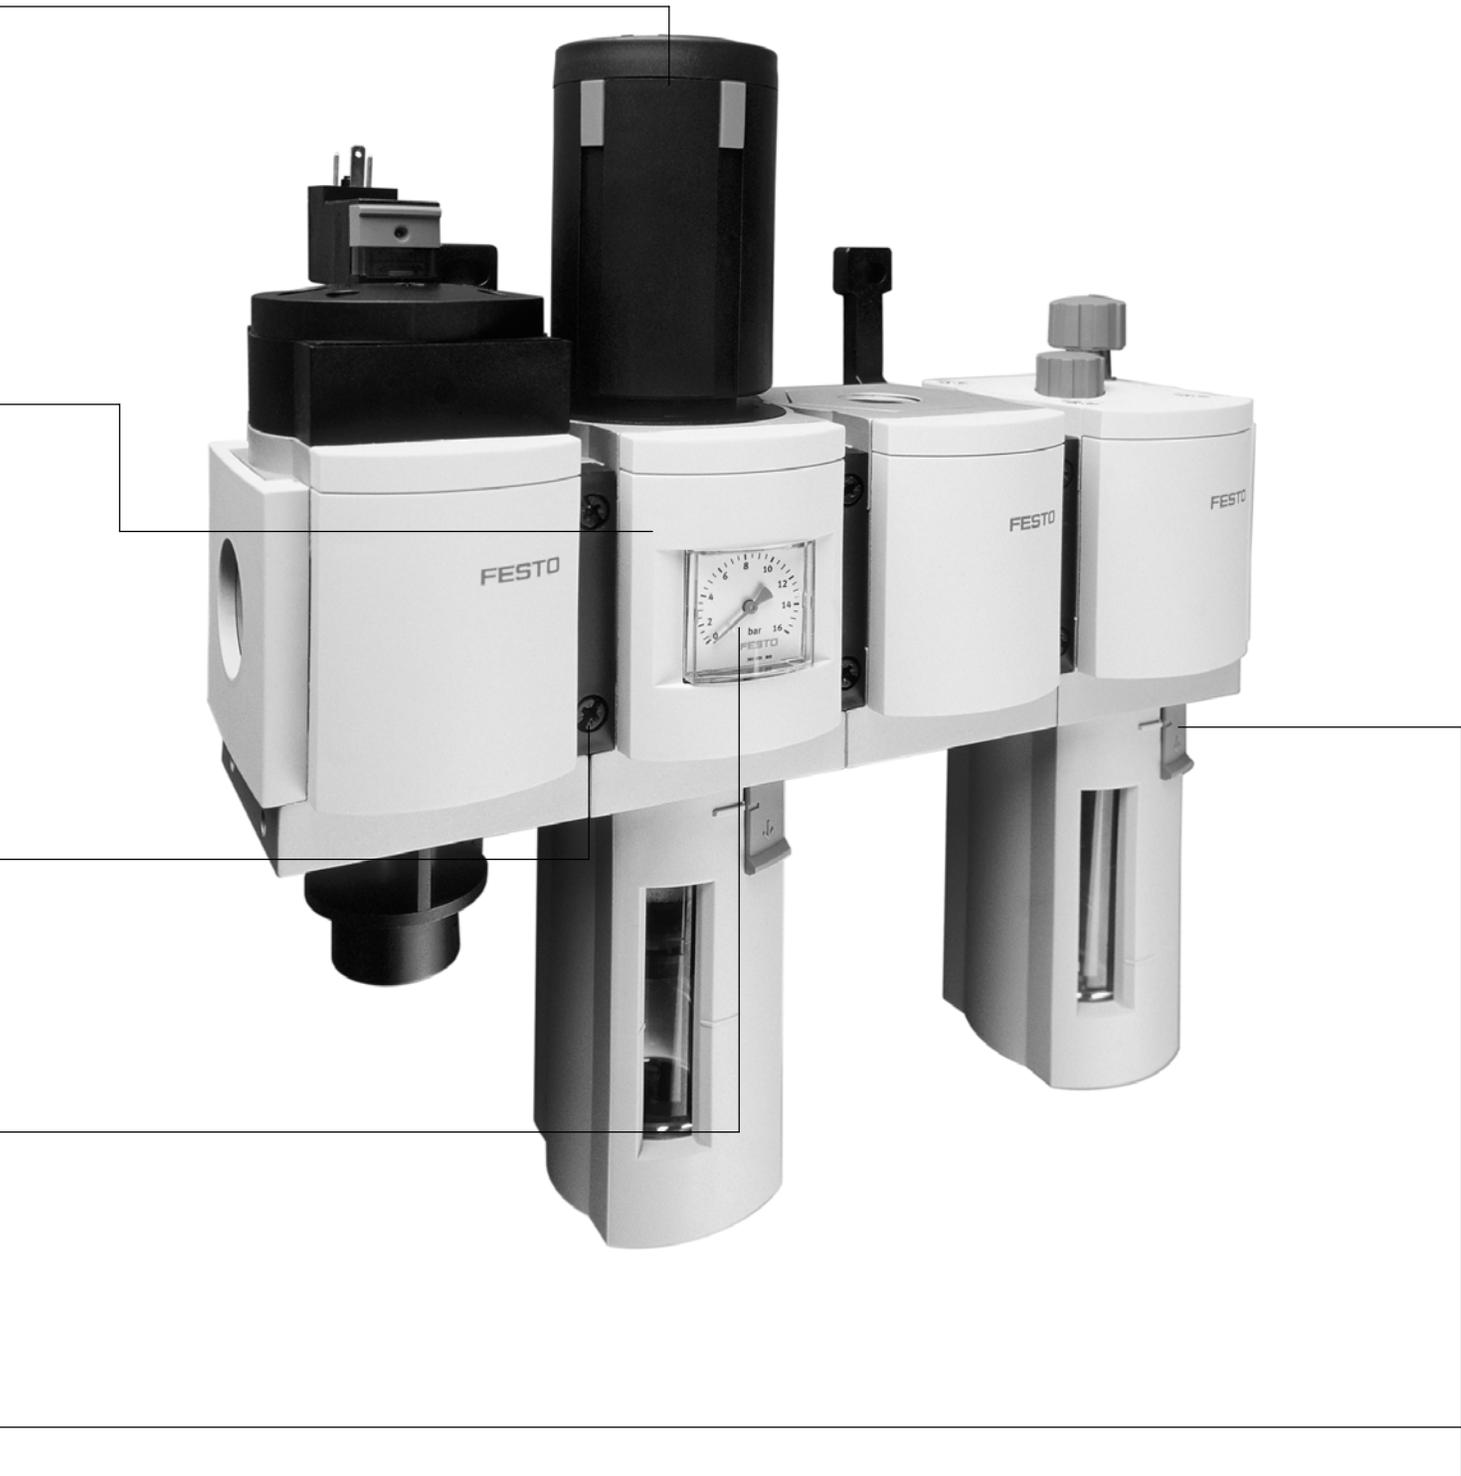

Straightforward module connectors for fast installation

Integrated pressure gauges save space and are less prone to interference

Latching filter bowls for safety

MSB 6 - 3/8 - FRC2:J6 M1 - Z

Basic function	
MSB	Service unit

Size	
4	Grid dimension 40 mm
6	Grid dimension 62 mm

Pneumatic connection	
1/8	Thread G1/8
1/4	Thread G1/4
3/8	Thread G3/8
1/2	Thread G1/2

Service unit consisting of:	
<ul style="list-style-type: none"> ■ Filter regulator with pressure gauge, lockable standard type rotary knob ■ Lubricator 	

Pressure regulation range 0.3 ... 7 bar	
Plastic bowl guard	
FRC3:J7	Grade of filtration 5 µm, manual rotary condensate drain
FRC4:J8	Grade of filtration 5 µm, fully automatic condensate drain
FRC1:J5	Grade of filtration 40 µm, manual rotary condensate drain
FRC2:J6	Grade of filtration 40 µm, fully automatic condensate drain

Pressure regulation range 0.5 ... 12 bar	
Plastic bowl guard	
FRC7:J3	Grade of filtration 5 µm, manual rotary condensate drain
FRC8:J4	Grade of filtration 5 µm, fully automatic condensate drain
FRC5:J1	Grade of filtration 40 µm, manual rotary condensate drain
FRC6:J2	Grade of filtration 40 µm, fully automatic condensate drain

Metal bowl	
FRC11:J9	Grade of filtration 5 µm, manual rotary condensate drain
FRC12:J10	Grade of filtration 5 µm, fully automatic condensate drain
FRC9:J11	Grade of filtration 40 µm, manual rotary condensate drain
FRC10:J12	Grade of filtration 40 µm, fully automatic condensate drain

Lubricator	
M1	Plastic bowl guard
M2	Metal bowl

Alternative flow direction	
	Flow direction from left to right
Z	Flow direction from right to left

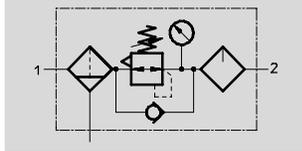

Service units MSB4/MSB6-FRC, MS series

Technical data

Function

-  - Flow rate
800 ... 4800 l/min

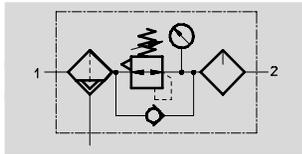

Condensate drain
manual rotary

-  - Temperature range
-10 ... +60 °C

-  - Input pressure
1.5 ... 20 bar

fully automatic

- Filter, regulator and lubricator functions in a single unit
- High flow rate and highly efficient removal of contaminants
- Good regulating characteristics with minimal pressure hysteresis
- Setting values are secured by locking the rotary knob
- Lockable rotary knob
- Two pressure regulation ranges: 0.3 ... 7 bar and 0.5 ... 12 bar
- Two pressure gauge connections for different fitting options
- Choice of filter cartridges: 5 µm or 40 µm
- With manual or integrated, fully automatic condensate drain

Service unit combinations MSB4/MSB6, MS series

Type codes

MSB 6 - 1/2 : H7 N3 M2 - WP - Z

Basic function

MSB	Service unit combination
-----	--------------------------

Size

4	Grid dimension 40 mm
6	Grid dimension 62 mm

Pneumatic connection

1/4	Thread G1/4
1/2	Thread G1/2

Service unit combination

On-off valve → 3/2.16-4

C1	MS...-EM
----	----------

Filter → 3/2.13-1

H1	MS...-LF-ERV
H2	MS...-LF-ERM
H3	MS...-LF-CRM
H4	MS...-LF-CRV
H7	MS...-LF-EUV
H8	MS...-LF-EUM

Filter regulator → 3/2.12-1

J1	MS...-LFR-D7-ERM-AS
J2	MS...-LFR-D7-ERV-AS
J3	MS...-LFR-D7-CRM-AS
J4	MS...-LFR-D7-CRV-AS

Pressure regulator → 3/2.14-4

N2	MS...-LR-D6-AS
N3	MS...-LR-D7-AS

Soft-start valve → 3/2.16-4

A1	MS...-DL
----	----------

Lubricator → 3/2.15-1

M1	MS...-LOE-R
M2	MS...-LOE-U

On-off valve → 3/2.16-4

D1	MS...-EE-V24
----	--------------

Branching module → 3/2.18-2

F3	MS...-FRM-Y
----	-------------

Type of mounting

WP	Wall mounting plate
----	---------------------

Alternative flow direction

	Flow direction from left to right
Z	Flow direction from right to left

Further variants can be ordered using the modular system

Service unit combinations MSB4/MSB6, MS series

Technical data

FESTO

Function

-  Flow rate
900 ... 3300 l/min
-  Temperature range
-10 ... +60 °C
-  Pressure regulation range
1 ... 12 bar

- On-off valve MS...-EM
 - manually actuated
- Filter regulator MS...-LFR-D7
 - grade of filtration 5 or 40µm
 - plastic bowl guard
 - manual rotary or fully automatic condensate drain
 - lockable standard type rotary knob
 - pressure gauge
- Branching module MS...-FRM-Y
 - pressure switch without display
- Lubricator MS...-LOE-R
 - plastic bowl guard
- Wall mounting plate MS...-WP

- The unit is vented when switched off
- To ensure safe venting of the system, an additional quick exhaust valve is necessary at the output of the service unit combination
- Supply pressure can be opened and closed
- Electrical pressure monitoring with adjustable switching pressure

General technical data

Type	MSB4	MSB6
Pneumatic connection	G1/4	G1/2
Grade of filtration [µm]	5 or 40	5 or 40
Pressure regulation range [bar]	1 ... 12	1 ... 12
Input pressure [bar]		
Manual rotary condensate drain	1.5 ... 14	1.5 ... 18
Fully automatic condensate drain	1.5 ... 12	1.5 ... 12

Standard nominal flow rate

Type	MSB4	MSB6
Grade of filtration	5 µm	3200
	40 µm	3300

Ambient conditions

	Condensate drain	
	manual rotary	fully automatic
Ambient temperature [°C]	-10 ... +60	+5 ... +60
Temperature of medium [°C]	-10 ... +60	+5 ... +60
Storage temperature [°C]	-10 ... +60	-10 ... +60
Corrosion resistance class CRC ¹⁾	2	

1) Corrosion resistance class 2 according to Festo standard 940 070
Components requiring moderate corrosion resistance. Externally visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment or media such as coolants or lubricating agents.

Service unit combinations MSB4/MSB6, MS series

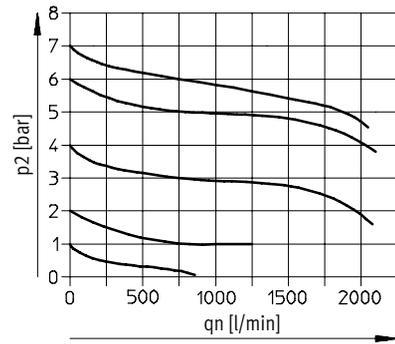

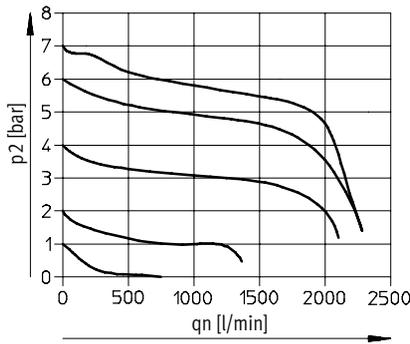

Technical data

Function

- Flow rate
950 ... 5100 l/min
- Temperature range
-10 ... +60 °C
- Pressure regulation range
0.5 ... 12 bar

- On-off valve MS...-EM
 - manually actuated
- Filter regulator MS...-LFR-D7
 - grade of filtration 5 or 40µm
 - plastic bowl guard
 - manual rotary or fully automatic condensate drain
 - lockable standard type rotary knob
 - pressure gauge
- Wall mounting plate MS...-WP

- For unlubricated compressed air
- Supply pressure can be opened and closed
- To ensure safe venting of the system, an additional quick exhaust valve is necessary at the output of the service unit combination

Corrosion resistance class CRC ¹⁾	2	

1) Corrosion resistance class 2 according to Festo standard 940 070
Components requiring moderate corrosion resistance. Externally visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment or media such as coolants or lubricating agents.

Technical data

FESTO

Function

-  - Flow rate
850 ... 7200 l/min

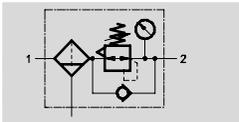

Condensate drain
manual rotary
without pressure gauge

-  - Temperature range
-10 ... +60 °C

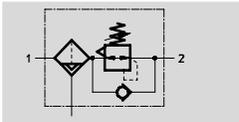

-  - Input pressure
0.8 ... 20 bar

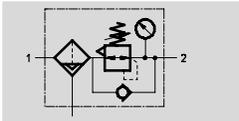

with pressure gauge

Condensate drain
semi- or fully automatic
without pressure gauge

with pressure gauge

With this device, the filter and pressure regulator are combined into a single unit. The sintered filter with water separator removes contamination, pipe sinter, rust and condensate from the compressed air.

- Good control characteristics with low hysteresis and primary pressure compensation
- Good particle and condensate separation
- High flow rates
- Choice of filter cartridges: 5 µm or 40 µm
- Available with manual, semi-automatic, fully automatic or fully automatic, electrically actuated condensate drain
- Directly actuated diaphragm regulator
- Available with or without secondary venting
- Setting values are secured by locking the rotary knob
- Lockable rotary knob
- Four pressure regulation ranges: 0.3 ... 4 bar, 0.3 ... 7 bar, 0.5 ... 12 bar and 0.5 ... 16 bar
- Two pressure gauge connections for different fitting options
- Return flow option for exhausting from output 2 to output 1

FESTO

Technical data

Function

Condensate drain
manual rotary

semi- or fully automatic

-  Flow rate
1000 ... 4100 l/min
-  Temperature range
-10 ... +60 °C
-  Input pressure
0 ... 20 bar

The sintered filter with centrifugal separation removes contamination, rust and condensate from the compressed air. The filter cartridges are replaceable.

- Good particle and condensate separation
- High flow rate with minimal pressure drop
- Choice of filter cartridges: 5 µm or 40 µm
- Available with manual, semi-automatic, fully automatic or fully automatic, electrically actuated condensate drain

Function

-  - Flow rate
120 ... 850 l/min

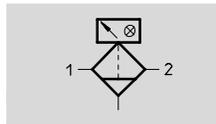

Condensate drain
manual rotary
without differential pressure indicator

-  - Temperature range
-10 ... +60 °C

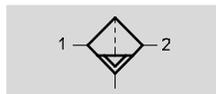

-  - Input pressure
0 ... 20 bar

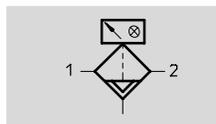

with differential pressure indicator

Condensate drain
semi- or fully automatic
without differential pressure indicator

with differential pressure indicator

- High-performance filter for exceptionally clean compressed air
- Choice of filter cartridges: 0.01 µm or 1 µm
- Air quality to DIN ISO 8573-1
- Available with manual, semi-automatic, fully automatic or fully automatic, electrically actuated condensate drain
- Available with differential pressure indicator for optical indication of filter contamination

LFM-A:
ISO class 1 for particles:
max. particle density 0.1 mg/m³
ISO class 2 for oil aerosols:
max. oil concentration 0.1 mg/m³
Filter efficiency 99.9999%

LFM-B:
ISO class 2 for particles:
max. particle density 1 mg/m³
ISO class 3 for oil aerosols:
max. oil concentration 1 mg/m³
Filter efficiency 99.99%

Active carbon filters MS4/MS6-LFX, MS series

FESTO

Technical data

Function

Condensate drain
manual rotary

- - Flow rate
250 ... 1200 l/min

- - Temperature range
-10 ... +60 °C

- - Input pressure
0 ... 20 bar

- Removal of liquid and gaseous oil particles from compressed air using active carbon
- Removal of odour and taste
- Prefiltration with micro filter MS-LFM-A, grade of filtration 0.01 µm, recommended

General technical data					
		MS4		MS6	
Pneumatic connection 1		G $\frac{3}{8}$	G $\frac{1}{4}$	G $\frac{1}{4}$	G $\frac{3}{8}$
Pneumatic connection 2		G $\frac{3}{8}$	G $\frac{1}{4}$	G $\frac{3}{8}$	G $\frac{1}{2}$
Operating medium		Compressed air, filtered, unlubricated, grade of filtration 0.01 µm			
Design		Activated carbon filter			
Type of mounting		Via accessories In-line installation			
Assembly position		Vertical ±5°			
Residual oil content	[mg/m ³]	≤ 0.003			
Air purity class at the output					
Air purity class at the output ¹⁾		1.7.1 to DIN ISO 8573-1			
Input pressure					
Input pressure	[bar]	0 ... 14		0 ... 20	

1) It is recommended to replace filter cartridges after 1000 operating hours.

Standard nominal flow rate qnN ¹⁾ and standard flow rate qn [l/min]					
		MS4		MS6	
		G $\frac{3}{8}$	G $\frac{1}{4}$	G $\frac{1}{4}$	G $\frac{3}{8}$
qnN 1 \rightarrow 2		250	250	700	1000
qn max		360	360	900	900

1) measured at p₁ = 6 bar and Δp = 70 mbar

Ambient conditions		
		MS4
Ambient temperature	[°C]	-10 ... +60
Temperature of medium	[°C]	+5 ... +30
Storage temperature	[°C]	-10 ... +60
Corrosion resistance class	CRC ¹⁾	2

1) Corrosion resistance class 2 according to Festo standard 940 070
Components requiring moderate corrosion resistance. Externally visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment or media such as coolants or lubricating agents.

- Type of mounting

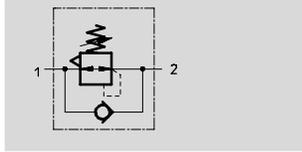

Pressure regulators MS4/MS6-LR, MS series

Technical data

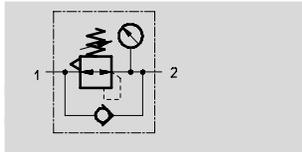

Function

-  - Flow rate
1000 ... 7500 l/min
-  - Temperature range
-10 ... +60 °C
-  - Input pressure
0.8 ... 20 bar

Without pressure gauge

With pressure gauge

The pressure regulator maintains a constant working pressure (secondary side), regardless of the pressure variations in the system (primary side) and the air consumption.

- Good control characteristics with low hysteresis and primary pressure compensation
- High flow rate with minimal pressure drop
- Available with or without secondary venting
- Setting values are secured by locking the rotary knob
- Lockable rotary knob
- Four pressure regulation ranges: 0.3 ... 4 bar, 0.3 ... 7 bar, 0.5 ... 12 bar and 0.5 ... 16 bar
- Two pressure gauge connections for different fitting options
- Return flow option for exhausting from output 2 to output 1

Pressure regulators MS4/MS6-LRB, MS series

Technical data

Function

-  - Flow rate
300 ... 7300 l/min

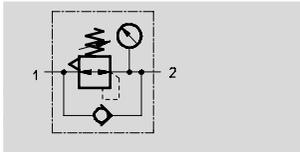

Without pressure gauge

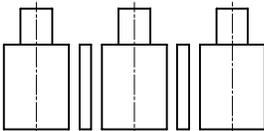

-  - Temperature range
-10 ... +60 °C

-  - Input pressure
0.8 ... 20 bar

With pressure gauge

LRB-manifold with through pressure supply for manifold assembly

The pressure regulator is suitable for manifold assemblies with through air supply on both sides, for configuring of a regulator manifold with separate, independent pressure regulation ranges. Pressure output is at the front or rear.

- Good control characteristics with low hysteresis and primary pressure compensation
- Manifold assembly with through air supply
- For configuring a regulator manifold with independent pressure regulation ranges
- Available with or without secondary venting
- Setting values are secured by locking the rotary knob
- Lockable rotary knob
- Four pressure regulation ranges: 0.3 ... 4 bar, 0.3 ... 7 bar, 0.5 ... 12 bar and 0.5 ... 16 bar
- Return flow option for exhausting from output 2 to output 1

FESTO

Technical data

Function

- - Flow rate
1100 ... 7200 l/min
- - Temperature range
-10 ... +60 °C
- - Input pressure
1 ... 16 bar

The proportional lubricator adds a precision adjustable quantity of oil to the compressed air stream.

The pressure drop that occurs when air flows through a Venturi nozzle is used to convey oil from the container to the drip cap. From here, the oil drips into the air duct directly behind the proportional valve, where it is atomised. The oil mist component is

proportional to the compressed air flow rate.

- Proportional lubricator with precision oil metering
- Reduces wear on drive units subject to high loading
- High flow rate
- Quick and easy oil top-up even during operation (under pressure)

The following oils are recommended for Festo components:

Viscosity range to ISO 3448, ISO class VG 32

32 mm²/s (= cSt) at 40°C

- Festo special oil OFSW-32 → 3/2.15-5
- ARAL Vitam GF 32
- BP Energol HLP 32
- Esso Nuto H 32
- Mobil DTE 24
- Shell Tellus Oil DO 32

On-off/soft-start valves MS4/MS6-EM/EE/DL/DE, MS series

FESTO

Type codes

MS 6 - EE - 1/2 - V110 - Z

Basic function

MS	Standard service unit
----	-----------------------

Size

4	Grid dimension 40 mm
6	Grid dimension 62 mm

Service function

EM	On-off valve, manually operated
EE	On-off valve, solenoid actuated
DL	Soft-start valve, pneumatically actuated
DE	Soft-start valve, solenoid actuated

Connection size

1/8	Thread G1/8
1/4	Thread G1/4
3/8	Thread G3/8
1/2	Thread G1/2

Supply voltage (for EE and DE only)

V24	Supply voltage 24 V DC
V110	Supply voltage 110 V AC
V230	Supply voltage 230 V AC

Silencer (for EM and EE only)

	Without silencer
S	Silencer

Alternative flow direction

	Flow direction from left to right
Z	Flow direction from right to left

MS4/MS6 series service units
Start-up and exhaust valves

2.16

Further variants can be ordered using the modular system

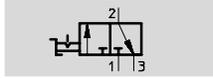

On-off valves EM	→ 3/2.16-9
On-off valves EE	→ 3/2.16-15
Soft-start valves DL	→ 3/2.16-20
Soft-start valves DE	→ 3/2.16-25

- Connecting plates
- Pressure gauge/adaptor
- Alternative pressure gauge scale
- Type of mounting

On-off valves MS4/MS6-EM, MS series

Technical data

Function

- - Flow rate
1000 ... 7000 l/min
- - Temperature range
-10 ... +60 °C
- - Operating pressure
0 ... 18 bar

- Manually operated on-off valve for pressurising and venting pneumatic installations
- The unit is vented when switched off
- Ducted exhaust possible via a threaded connection with silencer
- The switching position is immediately recognisable
- Commercially available padlock can be used for security

Technical data

Function

- - Flow rate
1000 ... 7000 l/min
- - Temperature range
-10 ... +60 °C
- - Operating pressure
4 ... 18 bar

- Solenoid actuated on-off valve for pressurising and venting pneumatic installations
- With solenoid coil without plug socket
- Three voltage ranges can be selected
- Ducted exhaust possible via a threaded connection with silencer
- Pushing and detenting manual override (detenting is locked on delivery)
- Solenoid actuator can be repositioned by 180°

Soft-start valves MS4/MS6-DL, MS series

Technical data

Function

- - Flow rate
1000 ... 6450 l/min
- - Temperature range
-10 ... +60 °C
- - Operating pressure
4 ... 18 bar

The duration of the pressure build-up is adjusted using the restrictor attached to the valve cap. The output pressure p2 rises slowly in accordance with the restrictor setting. The main seat opens when the switch-through pressure is reached.

When the valve is exhausted, the main seat remains open until the switch-through pressure is reached. The rest of the exhaust procedure is performed using the restrictor.

- Pneumatically actuated soft-start valve for slowly pressurising and venting pneumatic installations (for use with on-off valves EM and EE)
- The drives advance slowly and reliably into the initial position
- Sudden and erratic movements are avoided
- Pressure switching approx. 50% of input pressure
- Adjustable switching time delay

Soft-start valves MS4/MS6-DE, MS series

Technical data

Function

- - Flow rate
1000 ... 6450 l/min
- - Temperature range
-10 ... +60 °C
- - Operating pressure
4 ... 18 bar

The duration of the pressure build-up is adjusted using the restrictor attached to the valve cap. The output pressure p2 rises slowly in accordance with the restrictor setting. Only the air flow from the restrictor is available when the solenoid valve is not actuated. The main seat is only opened by energising the solenoid valve.

When the solenoid valve is switched off, the main seat is closed and only the air flow from the flow control valve is available.

The solenoid valve should remain switched on in order to vent a system as this increases the flow rate from 2 and 1 and reduces the exhaust time.

- Solenoid actuated soft-start valve for slowly pressurising and venting pneumatic installations
- The drives advance slowly and reliably into the initial position
- Sudden and erratic movements are avoided
- With solenoid coil without plug socket
- Switch-through pressure can be exactly controlled using a solenoid valve
- Adjustable switching time delay
- Three voltage ranges can be selected
- Pushing and detenting manual override (detenting is locked on delivery)
- Solenoid actuator can be repositioned by 180°

+5 ... +55 °C

- - Input pressure
3 ... 8.5 bar

Compressed air always contains moisture. A characteristic measure of moisture content is the dew point.

- Optimum final dryer with excellent operational reliability
- Suitable for use as an individual device or for integration in existing service unit combinations

- Flow rate-dependent dew point reduction
- Wear-free function requiring no external energy

Typical areas of application:

- Drying, cleaning of precision parts
- Measuring technology
- Paper and packaging machines

- - Note
To ensure operational safety, it is necessary to prefilter the compressed air with a micro filter LFM (0.01 µm)

Flow sensors MS6-SFE, MS series

Technical data

Function¹⁾

1) For example with 2 switch outputs PNP and 0 ... 10 V analogue

- - Flow rate
200 ... 5,000 l/min
- - Temperature range
0 ... +50 °C
- - Operating pressure
0 ... 16 bar

- 2 digital outputs and 1 analogue output
- Suitable for flow and consumption measurement
- Available with mounting bracket, connecting plate and inlet section for individual operation or with filter cartridge for installation in a service unit combination.
- Switching points for measurement are freely programmable
- Prefiltration with filter MS-LF, grade of filtration 5 µm, recommended for compliance with air quality class

Note
To comply with the specified accuracies, the MS6-SFE-F5-AGD-... must be supplied via a connection inside diameter of at least 10 mm and the MS6-SFE-F5-... must be supplied via a pneumatic connection of at least G1/2.

Note
For installation directly after a filter regulator MS6-LFR or pressure regulator MS6-LR, the branching module MS6-FRM must be installed between these service units to comply with the specified accuracies.

General technical data		
Type	MS6-SFE-F5-...	MS6-SFE-F5-AGD-...
Flow measuring range [l/min]	200 ... 5,000 ¹⁾

Filter regulators MS12-LFR, MS series

Technical data

MS12 series service units
Filter regulators

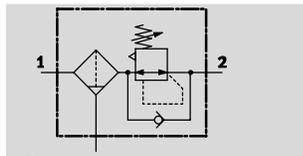

2.22

Function

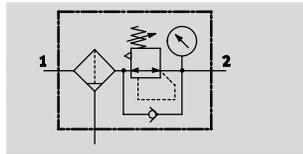

-  - Flow rate
11,000 ... 17,000 l/min

Condensate drain
manual rotary
without pressure gauge

-  - Temperature range
-10 ... +60 °C

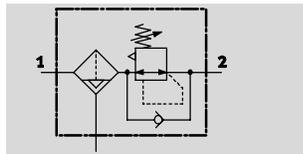

with pressure gauge

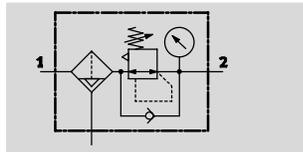

Condensate drain
fully automatic
without pressure gauge

-  - Input pressure
0.8 ... 20 bar

With this device, the filter and pressure regulator are combined into a single unit. The sintered filter with water separator removes contamination, pipe sinter, rust and condensate from the compressed air.

with pressure gauge

- Good control characteristics with low hysteresis and primary pressure compensation
- Good particle and condensate separation
- High flow rates
- Choice of filter cartridges: 5 µm or 40 µm
- Available with manual, fully automatic or fully automatic, electrically actuated condensate drain
- Pilot actuated diaphragm regulator without intrinsic air consumption
- Pressure gauge connection for different fitting options
- Three pressure regulation ranges: 0.3 ... 7 bar, 0.5 ... 12 bar and 0.5 ... 16 bar
- Setting values are secured by locking the rotary knob
- Rotary knob can be locked using accessories

Pressure regulators MS12-LR, MS series

Technical data

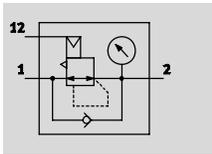

FESTO

Function

with pressure gauge

with pressure gauge and pneumatic setpoint specification PO

-  Flow rate
13,000 ... 22,000 l/min
-  Temperature range
-10 ... +60 °C
-  Input pressure
0.8 ... 21 bar

The pressure regulator maintains a constant working pressure (secondary side), regardless of the pressure variations in the system (primary side) and the air consumption.

- Good control characteristics with low hysteresis and primary pressure compensation
- High flow rate with minimal pressure drop
- Setting values are secured by locking the rotary knob
- Rotary knob can be locked using accessories

- With secondary venting
- Three pressure regulation ranges: 0.3 ... 7 bar, 0.5 ... 12 bar and 0.5 ... 16 bar
- Pressure gauge connection for different fitting options
- Return flow option for exhausting from output 2 to output 1

FESTO

Technical data

Function

-  - Flow rate
20,000 ... 22,000 l/min
-  - Temperature range
0 ... 60 °C
-  - Input pressure
1 ... 16 bar

The proportional lubricator adds a precision adjustable quantity of oil to the compressed air stream.

The pressure drop that occurs when air flows through a Venturi nozzle is used to convey oil from the container to the drip cap. From here, the oil drips into the air duct directly behind the proportional valve, where it is atomised. The oil mist component is proportional to the compressed air flow rate.

- Proportional lubricator with precision oil metering
- Reduces wear on drive units subject to high loading
- High flow rate
- Quick and easy oil top-up even during operation (under pressure)

The following oils are recommended for Festo components:

Viscosity range to ISO 3448, ISO class VG 32

32 mm²/s (= cSt) at 40°C

- Festo special oil OFSW-32
→ 3/2.25-5
- ARAL Vitam GF 32

Soft-start valves MS12-DL, MS series

Technical data

Function

-  Flow rate
25,000 ... 42,000 l/min
-  Temperature range
-10 ... +60 °C
-  Operating pressure
2 ... 21 bar

The duration of the pressure build-up is adjusted using the restrictor attached to the valve cap. The output pressure p2 rises slowly in accordance with the restrictor setting. The main seat opens when the switch-through pressure is reached.

When the valve is exhausted, the main seat remains open until the switch-through pressure is reached. The rest of the exhaust procedure is performed using the restrictor.

- Pneumatically actuated soft-start valve for slowly pressurising and venting pneumatic installations (for use with on-off valves EM and EE)
- The drives advance slowly and reliably into the initial position
- Sudden and erratic movements are avoided
- Pressure switching approx. 75% of input pressure
- Adjustable switching time delay

Soft-start valves MS12-DE, MS series

Technical data

Function

-  Flow rate
25,000 ... 42,000 l/min
-  Temperature range
-10 ... +50 °C
-  Operating pressure
3 ... 16 bar

The duration of the pressure build-up is adjusted using the restrictor attached to the valve cap.

The output pressure p2 rises slowly in accordance with the restrictor setting. Only the air flow from the restrictor is available when the solenoid valve is not actuated. The main seat is only opened by energising the solenoid valve.

When the solenoid valve is switched off, the main seat is closed and only the air flow from the flow control valve is available.

The solenoid valve should remain switched on in order to vent a system as this increases the flow rate from 2 and 1 and reduces the exhaust time.

- Solenoid actuated soft-start valve for slowly pressurising and venting pneumatic installations
- The drives advance slowly and reliably into the initial position
- Sudden and erratic movements are avoided
- With solenoid coil without plug socket
- Switch-through pressure can be exactly controlled using a solenoid valve
- Adjustable switching time delay
- Three voltage ranges can be selected
- Non-detenting manual override (except variant V24P)

Connecting plate MS4/6-AG...

(order code: AG...)

- Adapter for pneumatic connection
- MS6-AGE for implementing threaded connection G $\frac{3}{4}$

Material:
Aluminium

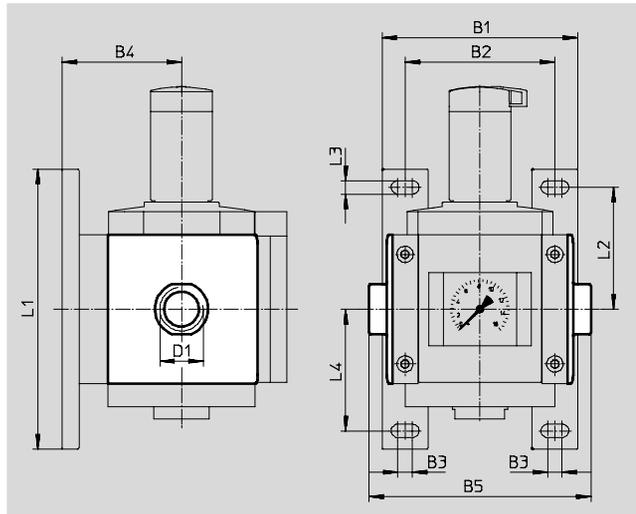

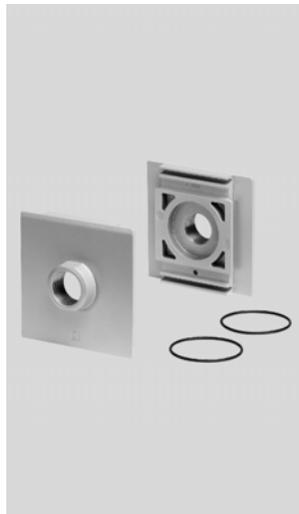

Dimensions and ordering data									
Size	B1	B2	B4	D1	D2	L1	Weight [g]	Part No.	Type

Wall mounting plate MS4/6-WPM

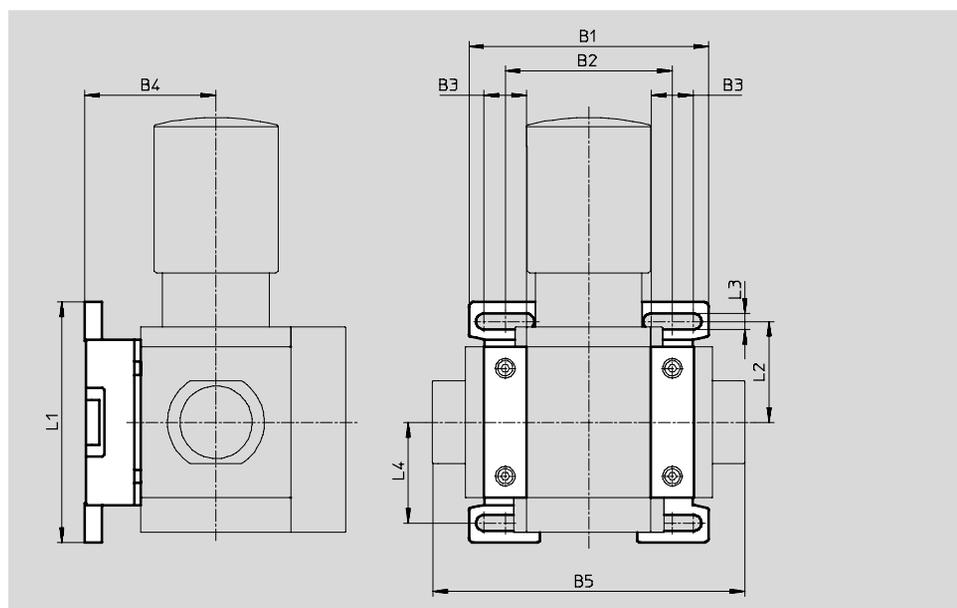

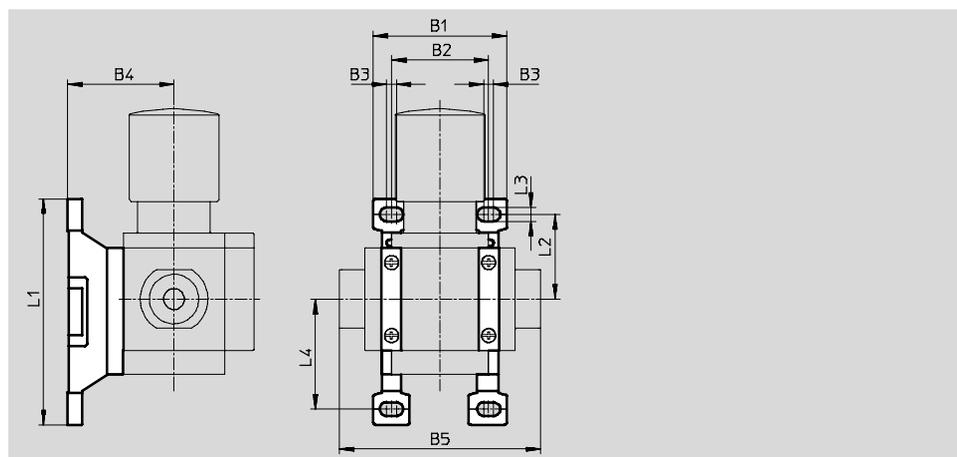

(order code: WPM)

- For connecting the modules for wall mounting
- In combination with a connecting plate for mounting an individual unit on a wall
- Speedy attachment and detachment
- For installation of modules with regulating knob pointing downwards

- Also matches the hole pattern of M series service units for retrofitting

The distance piece D or 2D (designated in the type code) is included in the scope of delivery and ensures the correct clearance.

Material:
Die-cast aluminium
