Advantages

Performance optimised sizes:
The solenoid valves CPE, Compact Performance are distinguished by their minimal width and low power consumption at high flow rates.

Can be mounted right in the "front line":
– On cylinders
– On moving system components
– Flexible installation through individual mounting

CPE10, CPE14 and CPE18:
Simple manifold structure consisting of fixed-grid manifold blocks made from stable aluminium with 2 to 10 valve positions or modular manifold blocks made from durable plastic.

Short tubing lengths requiring minimal air volume:

– Short switching times

– Short response times

Optimised installations:

– Shorter machine cycles

– Larger quantities

– Lower power consumption

Convenient manual override.

The sockets KMYZ-9 for sizes CPE10 and CPE14 feature integrated current reduction.

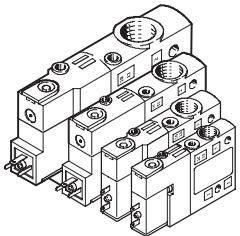

All CPE valves therefore have a duty cycle of 100%.
