

## One-way flow control, flow control and functional combinations

**FESTO**

- One-way flow control valves for exhaust and supply air flow control
- Flow control valves without non-return function
- For threads M3 ... G $\frac{3}{4}$  and push-in fitting Ø 3 ... 12 mm
- Functional combinations with one-way flow control valve and piloted non-return valve
- Polymer and metal designs
- Designs free of copper, PTFE and silicone
- Corrosion resistant designs

# Flow control valves and one-way flow control valves

FESTO

Key features

## General information

### Standard nominal flow rate $q_{nN}$

The standard nominal flow rate  $q_{nN}$  is the flow rate based on standard conditions at an input pressure of  $p_1 = 6$  bar and an output pressure of  $p_2 = 5$  bar, measured at room temperature  $t = 20^\circ\text{C}$ .

### Standard flow rate $q_n$

The standard flow rate is measured at an input pressure of  $p_1 = 6$  bar and an output pressure with respect to atmospheric pressure ( $p_2 = 0$  bar).

### Exhaust air flow control

### Supply air flow control

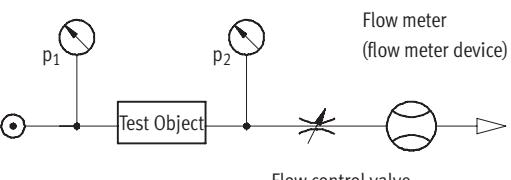

### Flow control at both sides

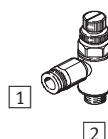

### Flow measurement circuit

Pressure gauge      Pressure gauge

$p_1$  Input pressure

$p_2$  Output pressure

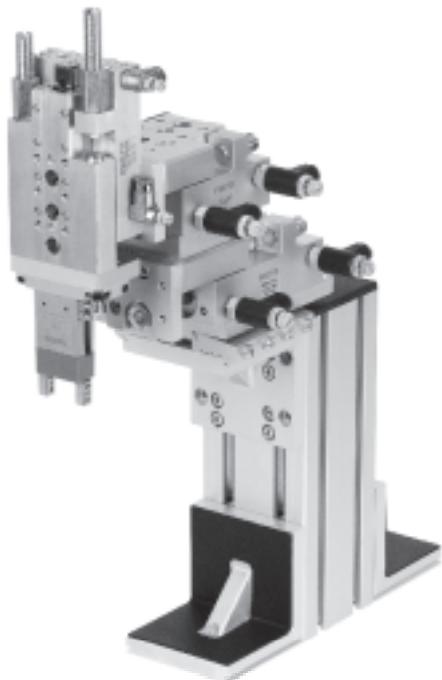

[1] Compressed air connection

[2] Working connection

## Typical applications

### Mini slide SLT with standard flow control valves

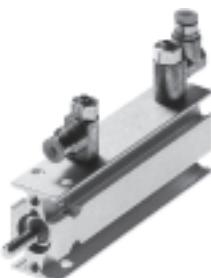

### Gripper HGW with mini flow control valves

### Flat cylinder DZF with mini flow control valves

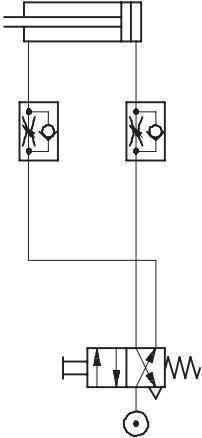

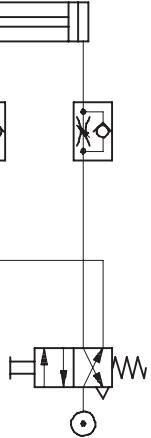

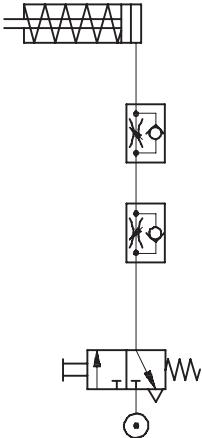

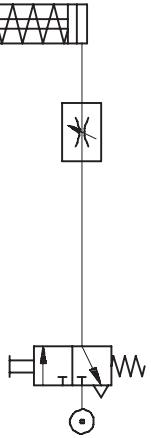

### Multimount cylinder DMM with mini flow control valves

# Flow control valves and one-way flow control valves

FESTO

Key features

Flow control functions and range of applications		Circuit symbol	Description
Circuit symbol	Description	Circuit symbol	Description
<b>Double-acting cylinder with one-way flow control valve</b>			
Exhaust air flow control	Speed adjustment through exhaust air flow control. Uncontrolled supply air and controlled exhaust moves the piston between air cushions (improves motion, even with load changes).	Supply air flow control	Adjustable speed of advance and return strokes. The air flow is identical in both directions.
			
<b>Single-acting cylinder with one-way flow control valve</b>		<b>Single-acting cylinder with flow control valve</b>	
Exhaust and supply air flow control	Adjustable speed of advance and return strokes. The air flow can be adjusted differently for both directions.	Flow control acting at both sides	Speed adjustment through flow control at both sides is often applied in the case of single-acting or small cylinders. The benefit of this application lies in its simplicity.

## Flow control and one-way flow control valves

Technical data – Standard flow control valve with QS push-in connector, D series

### Function

One-way flow control valve  
GRLA-F

### D series:

- QS push-in connector
- Swivel joint rotatable 360° after installation
- Adjustment via slotted head screw
- Surfaces nickel and chrome plated
- Temperature ranges  
0 ... +150 °C

### General technical data

Screw-in thread	G1/8	G1/4
Valve function	One-way flow control function for exhaust air	
Adjustment component	Slotted head screw	
Type of actuation	Manual	
Type of mounting	Screw-in	
Installation position	Any	
Special features	Freely rotatable around the screw-in axis after installation	
Max. tightening torque [Nm]	5.5	11

### Operating and environmental conditions

Screw-in thread	G1/8	G1/4
Operating medium	Filtered compressed air, lubricated or unlubricated, grade of filtration 40 µm	
Operating pressure [bar]	0.2 ... 10	
Storage temperature [°C]	-10 ... +150	
Ambient temperature [°C]	0 ... +150	
Temperature of medium [°C]	0 ... +150	
Corrosion resistance class CRC	3 <sup>1)</sup>	

1) Corrosion resistance class 3 to Festo standard 940 070  
Components requiring higher corrosion resistance. External visible parts in direct contact with industrial atmospheres or media such as solvents and cleaning agents, with a predominantly functional requirement for the surface.

### Weight [g]

## One-way flow control valves GRLSA

Technical data

### Function

One-way flow control valve with  
5 selectable flow control ranges

- QS push-in fittings
- 5 flow control ranges selectable via a rotary switch
- Continuous precision adjustment via internal hex on a reference scale marked with 30 degrees (10 positions)
- Exhaust air flow control

### General technical data

Screw-in thread	G1/8
Valve function	One-way flow control function for exhaust air
Means of adjustment	Internal hex
Actuation type	Manual
Type of mounting	Screw-in
Mounting position	Any
Special features	Freely rotatable around the screw-in axis after installation
Max. tightening torque	[Nm]

### Operating and environmental conditions

Screw-in thread	G1/8
Operating/control medium	Dried air, lubricated or unlubricated, grade of filtration 40 µm
Operating pressure	[bar]
Storage temperature	[°C]
Ambient temperature	[°C]
Temperature of medium	[°C]
Pneumatic connection 2	G1/8
Pneumatic connection 1	QS-6

### Weight

Screw-in thread	G1/8
Weight	[g]

### Standard nominal flow rate qnN at 6 bar → 5 bar

Technical data – Precision flow control valve

Standard flow rate  $q_n$  [l/min] 1 bar  $\rightarrow$  0 bar as a function of turns of the adjusting screw n

GRP/GRPO-10-PK-3

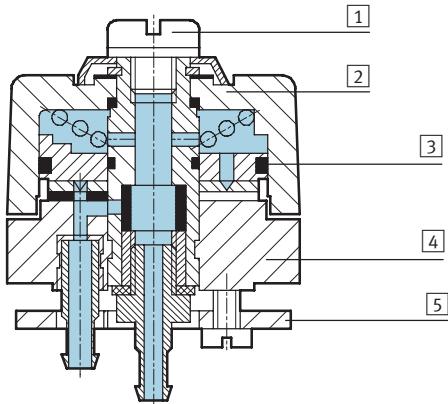

GRP/GRPO-70-PK-3

GRP/GRPO-160-PK-4

## Materials

Sectional view

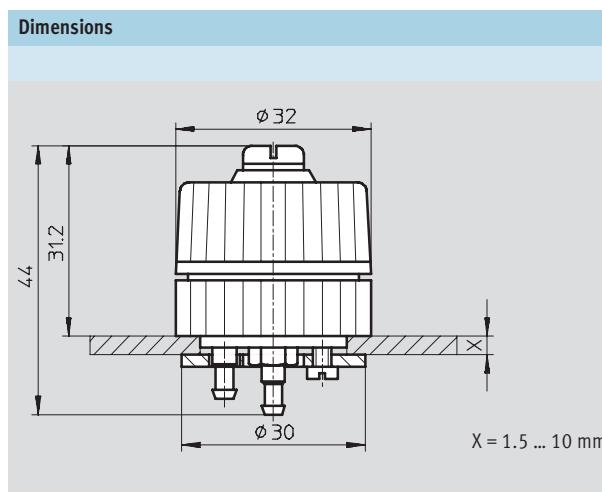

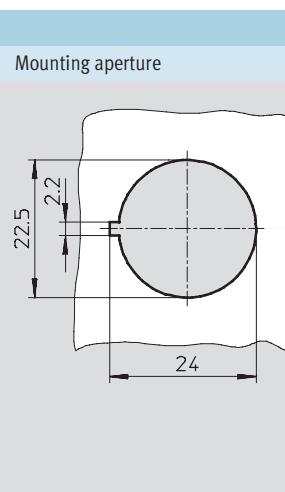

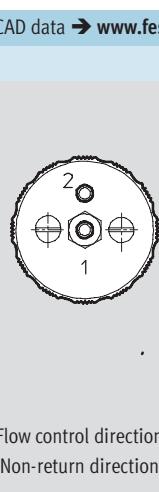

### Flow control valve

[1] Locking screw	Brass
[2] Rotary knob	Reinforced polyamide
[3] Seals	Nitrile rubber
[4] Back plate	Wrought aluminium alloy
[5] Mounting plate	Wrought aluminium alloy

# Flow control and one-way flow control valves

Technical data – Precision flow control valve

**FESTO**

Dimensions	Mounting aperture		Ports
			  1 → 2 Flow control direction 2 → 1 Non-return direction

## Ordering data

Version	For tubing I.D. [mm]	One-way flow control function		Bi-directional flow control function	
		Part No.	Type	Part No.	Type
	3	12 743	GRP-10-PK-3	13 229	GRPO-10-PK-3
		10 802	GRP-70-PK-3	10 803	GRPO-70-PK-3
	4	12 961	GRP-160-PK-4	13 230	GRPO-160-PK-4
