Adding counters CCES

Technical data

FESTO

Function:

The electric adding counter CCES can be used in combination with a proximity sensor to count the number of switching cycles performed by a cylinder.

Recommended proximity sensors SME/SMT ➔ 2

Features:
- 8-digit LCD display
- Own power supply
- Designed for front panel mounting
- Connection via terminal strip
- Reset button

➔ Internet: www.festo.com/catalogue/...

General technical data		
Constructional design		Electric adding counter with battery
Type of mounting		Front panel mounting
Power supply		Lithium battery (nominal value retention 7 years)
Display		8-digit
Reset method		Pushbutton or electric signal
Min. pulse length for drive	[ms]	15
Min. pulse length for reset	[ms]	15
Product weight	[g]	30
Electrical data		
Lower threshold value	[V DC]	< 0.7
Upper threshold value	[V DC]	5 ... 30
Clock pulse input		Programmable
Clock pulse input setting		Negative edge 30 Hz
Max. counting rate	[kHz]	7.5
Max. attenuated counting rate	[Hz]	30
Materials		
Housing		Polycarbonate
Note on materials		RoHS-compliant

| Operating and environmental conditions		
Ambient temperature	[°C]	−10 ... +50
Corrosion resistance class CRC[1]		2

1) Corrosion resistance class 2 as per Festo standard 940 070
    Components subject to moderate corrosion stress. Externally visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment or media such as coolants or lubricating agents.

Technical data ➔ Internet: sme-8m, smt-8m

	Switching element function	Switch output	Electrical connection	Cable length [m]	Part No.	Type
	N/O contact	Contacting, bipolar	Cable, 3-wire	2.5	**543 862**	**SME-8M-DS-24V-K-2,5-OE**
		PNP	Cable, 3-wire	2.5	**543 867**	**SMT-8M-PS-24V-K-2,5-OE**

-░- Note

Please note the following points:
• The abovementioned proximity sensor SME can be connected to the adding counter as a 2-wire switch without additional power supply.
• If using other proximity sensors, an additional power supply is needed and the clock pulse input of the adding counter must be reprogrammed from NPN to PNP.
• Screened cables must be used for cables longer than 3 m.
• The maximum permissible cable length is 30 m.
