

Standard cylinders CDN, ISO 15552, Clean Design

## Standard cylinders CDN, ISO 15552, Clean Design

Key features

**FESTO**

### Design

DIN

- Standards-based cylinders to ISO 15552 (corresponds to the withdrawn standards ISO 6431, DIN ISO 6431, VDMA 24 562, NF E 49 003.1 and UNI 10290)

### Easy to clean

- Clean Design means smooth surfaces without slots and edges, which means fewer places where dirt can collect
- For hygiene reasons, the threads on the cylinder caps should be sealed with suitable blanking screws
- Resistant to conventional cleaning agents
- Increased corrosion protection

### Easy to mount

- Comprehensive range of mounting accessories for just about every type of installation
- Contactless position sensing via proximity sensors

### Flexible

- The variants can be configured according to individual needs thanks to the modular product system
- Greater flexibility thanks to the wide range of variants

### Variants

Symbol	Key features	Description
	A3 Unlubricated operation	Cleaning processes degrease the piston rod. A special piston rod seal permits a longer service life compared to the standard seal.
	S2 Through piston rod	For working at both ends with the same force in the forward and return stroke, for attaching external stops.
	K2 Extended male piston rod thread	–
	K3 Female piston rod thread	–
	K8 Extended piston rod	–
	S6 Heat-resistant seals	Temperature resistance up to max. 120 °C. The seals used and the grease mean that this variant is not suitable for direct contact with foodstuffs.

#### CDN...

- Ø 32 ... 100 mm
- Without position sensing

#### CDN...-A...-R

- Ø 32 ... 100 mm
- With position sensing integrated in the end positions

#### CDN...-A-R

- Ø 32 ... 100 mm
- With sensor mounting rail for external position sensing

Note

A combination of integrated and external position sensing is possible.

### Longer service life thanks to the bellows kit DADB

The bellows kit is a leak-free system. To prevent unwanted media being drawn in, the supply and exhaust air must be ducted via a venting hole in the connection part **1**.

The kit protects the piston rod, seal and bearings from a wide range of media, for example:

- dust,
- chips,
- oil,
- grease,
- fuel.

## Standard cylinders CDN, ISO 15552, Clean Design

Peripherals overview

**FESTO**

Mounting attachments and accessories		
	Brief description	→ Page/Internet
1	Foot mounting CRHNC	For bearing and end caps 15
2	Flange mounting CRFNG	– For bearing or end caps – Cannot be used on the bearing cap in combination with bellows kit DADB 15
3	Trunnion flange CRZNG	– For bearing or end caps in combination with trunnion supports CRLNZG – Cannot be used on the bearing cap in combination with bellows kit DADB 16
4	Trunnion supports CRLNZG	For swivel mounting CRZNG 16
5	Swivel flange SNCB- ... -R3	For end caps 17
6	Clevis foot CRLNG	For swivel flange SNCB- ...-R3 17
7	Rod clevis CRSG	Permits a swivelling movement of the cylinder in one plane 24
8	Rod eye CRSGS	With spherical bearing 24
9	Proximity sensor SMT-C1	For attachment to the sensor mounting rail 22
10	Plug socket with cable SIM-K- ... -CDN	– For electrical signal transmission and power supply – With food industry approval 22
11	One-way flow control valve CRGRLA	For regulating speed 24
12	Push-in fittings QS-F/QSL-F/CRQS/CRQSL	For connecting compressed air tubing with standard outside diameter 22
13	Blanking screws CR	For covering unused mounting threads 24
14	Bellows kit DADB	– Protects the cylinder (piston rod, seal and bearings) against a wide range of media and thus prevents premature wear – The kit can only be used in combination with an extended piston rod (K8) 18

Operating and environmental conditions	
Operating medium	Filtered compressed air, lubricated or unlubricated
Operating pressure [bar]	0.6 ... 12
Ambient temperature <sup>1)</sup> [°C]	-20 ... +80
S6 [°C]	0 ... +120
CE mark (see declaration of conformity)	To EU EMC Directive <sup>2)</sup>
Corrosion resistance class CRC <sup>3)</sup>	3

1) Note operating range of proximity sensors.  
 2) For information about the applicability of the component see the manufacturer's EC declaration of conformity at: [www.festo.com](http://www.festo.com) → Support → User documentation.  
 If the component is subject to restrictions on usage in residential, office or commercial environments or small businesses, further measures to reduce the emitted interference may be necessary.  
 3) Corrosion resistance class 3 as per Festo standard 940 070  
 Components requiring higher corrosion resistance. External visible parts in direct contact with industrial atmospheres or media such as solvents and cleaning agents, with a predominantly functional requirement for the surface.

### Speed of travel $v$ as a function of tubing length $l$

The bellows kit is a leak-free system. To prevent unwanted media from being drawn in, the supply and exhaust air must be ducted via a venting

hole in the connection part <sup>1</sup>. The pressure generated in the bellows kit by the positioning motion is primarily defined by the speed of travel

and the tubing length. The recommended tubing length based on the travel speed of the drive can be read from the graph.

#### Advancing

#### Retracting

#### Note

The push-in fittings opposite must be used for the venting hole. Silencers can be used as an alternative. This reduces the travel speed slightly.

#### Tubing length and push-in fitting for venting hole

Ø [mm]	Tubing O.D. [mm]	Push-in fitting	
		Part No.	Type

Accessories

### Ordering data – Bellows kit

An extended piston rod (order code K8) → 14 is absolutely necessary for using a bellows kit.

The necessary dimension for K8 as a function of piston diameter and cylinder stroke as well as the corresponding bellows kit is indicated in the table below:

### Order example:

Selected standard cylinder:

CDN-32-320-PPV-AIB-SME...

The dimension for the corresponding K8 value (see table):  
112 mm

Complete type code for standard cylinder:

CDN-32-320-PPV-AIB-SME...-112K8

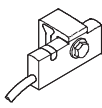

The corresponding bellows kit:

DADB-V6-32-S301-350
