Shut-off valves HE-LO

FESTO

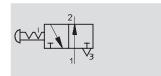

Shut-off valves HE-LO, to safety standard

Technical data

Function

Flow rate 5,200 ... 12,000 l/min

Operating pressure 1 ... 10 bar

· 🖣 - Note

The shut-off valve may not be used as an emergency stop valve.

For units that require a pneumatic shut-off in order to carry out maintenance or repair work, for example.

The valve is installed into the air supply line and fulfils requirements set forth by OSHA 29 CFR 147, "Controlling Dangerous Energy Sources", issued by the United States Department of Labor.

Function

The valve is used for shutting off the compressed air supply, while simultaneously exhausting systems which are powered using compressed air.

Flow from port 1 to port 2 is blocked when the actuator knob is pressed, and flow from port 2 to port 3 is opened.

The largest exhaust flow rate is achieved by keeping the actuating knob in the actuated position until the connected system is completely exhausted.

The valve can be locked in the closed position using a padlock.
This ensures that a decommissioned system (e.g. during maintenance work) cannot be pressurised without authorisation.

General technical data						
Туре		HE-G3/8-LO	HE-G1/2-LO	HE-G ³ / ₄ -LO	HE-G1-LO	
Design		Manually actuated 3/2-way valve with piston slide				
Type of mounting		Screwed into piping				
		2 through holes in housing with \varnothing 8 mm for wall mounting				
Mounting position		Any, but make sure there is easy access to the actuating knob				
Connection	1, 2	G3/8	G1/2	G3/4	G1	
(Female thread)	3	G1				
Operating pressure	[bar]	1 10				

 $\cdot \| \cdot \|$ Note: This product conforms with the ISO 1179-1 standard and the ISO 228-1 standard.

Standard nominal flow rate ¹⁾ qnN [l/min]					
Connection	G3/8	G ¹ / ₂	G ³ / ₄	G1	
1 > 2	5,200	6,200	8,000	10,000	
2 > 3	12,000	•	•	•	

1) Measured at primary pressure pl = 6 bar and $\Delta p = 1$ bar.

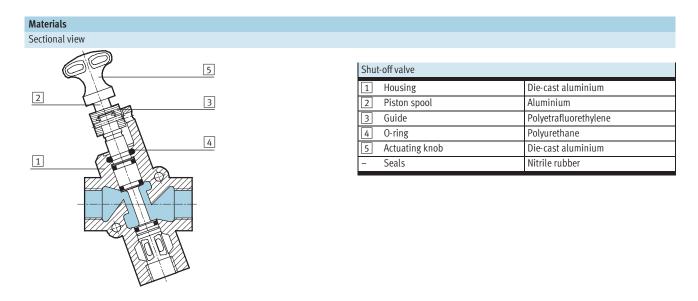

Ambient conditions			
Ambient temperature	[°C]	-10 +60	
Corrosion resistance	CRC ¹⁾	3	

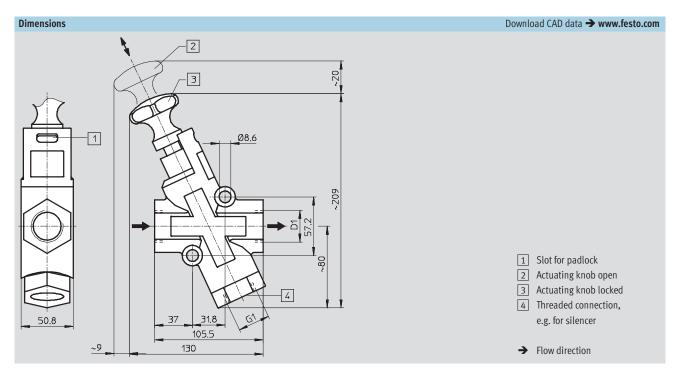

1) Corrosion resistance class 3 according to Festo standard 940 070 Components requiring higher corrosion resistance. External visible parts in direct contact with industrial atmospheres or media such as solvents and cleaning agents, with a predominantly functional requirement for the surface.
