

## Valve series VOFC

**FESTO**

# Solenoid valves VOFC

Key features

FESTO

## General information

- The valves in the VOFC series are special 3/2-way and 5/2-way valves for process automation, for use within chemical and petrochemical systems, where they are frequently used as pilot valves for flaps and drives. Their sturdy design and high resistance to corrosion make these valves suitable for outdoor use under harsh ambient conditions.
- The Namur flange pattern makes the solenoid valves especially suitable for quarter-turn actuators. The integrated spring chamber ventilation protects quarter-turn actuators with spring return (single-acting cylinders and drives) against contaminated ambient air and weather influences such as rain.
- With German Technical Control Board (TÜV) report up to AK7/SIL-4.

## Function, design

- 3/2-way or 5/2-way, single solenoid or double solenoid, depending on type.
- Piloted piston spool and piston poppet valves.

## Sturdy

- The surface of the valve housing is treated with hard Ematal. This treatment involves converting the aluminium surface into a very hard aluminium oxide layer with titanium oxide intercalations and gives the valves very high resistance to wear and abrasion as well as first-class sliding qualities. This provides optimum protection against atmospheric and chemical influences.
- You can find information on the media resistance of the product at → [www.festo.com](http://www.festo.com).

## Flexible in function

- The valve is easily modified for internal or external pilot air using a screw.
- Depending on the required function, the pressure connection is established independently of the working pressure as a pressure or vacuum connection.

## Economical

- One type, one part number for two functions.
- Internal and external pilot air function integrated in one valve.
- One valve, two connection options.
- Port pattern to Namur for direct mounting of a drive as well as G and NPT threaded connections.

## VOFC – Basic valves

- 3/2-way, 5/2-way valves
- Connections G $\frac{1}{4}$ , NPT $\frac{1}{4}$ , G $\frac{1}{2}$
- Namur port pattern, optional with P channel

→ 6

## VACC-S13 – Solenoid coils

- AC and DC voltage 24V, 110V, 230V
- Type of explosion protection Ex emb II, Ex ia IIC

→ 28

## VOFC – Solenoid valves

- Combination of basic valve VOFD and S13 coil VACC
- 3/2-way, 5/2-way valves
- Type of explosion protection Ex emb II

→ 20

## VOFC – Accessories

- Throttle plate
- Mounting plate
- Adapter with filter
- Hand lever

→ 33

# Solenoid valves VOFC

Peripherals overview

Mounting attachments and accessories		
	Brief description	→ Page/Internet
1	Solenoid coil VACC-S13 Standard magnet	28
2	Solenoid coil VACC-S13-me Ex-me magnet	29
3	Solenoid coil VACC-S13-A Ex-ia magnet	31
4	Adapter NPFV-AF-G14-N14-MF Adapter from G $\frac{1}{4}$ to NPT $\frac{1}{4}$ , with filter	35
5	Adapter NPFV-AF-G14-G14-MF Adapter from G $\frac{1}{4}$ to G $\frac{1}{4}$ , with filter	35
6	Exhaust protection VABD-D3-SN-G14 Exhaust protection to IP65. The spring chamber of drive 8 solenoid valve is protected against the ingress of aggressive ambient air and water by the one-way flow control system	36
7	Flow control plate VABF-S7-F1B1P2-F Exhaust air flow control plate for Namur interface for installation between the solenoid valve and double-acting drives	33
8	Flow control plate VABF-S7-F1B5P1-F Exhaust air flow control plate for Namur interface for installation between the solenoid valve and single-acting drives	33
9	Connection plate kit VABF-S7-S-G14 Mounting plate for attaching the valve to a Namur rib	34
10	Mounting plate VAME-S7-P Mounting plate for attaching the valve to a Namur rib	34
11	Mounting bracket VAME-S7-Y Alternative option (instead of screw) of attaching the valve to a Namur rib with the help of a mounting bracket	35

# Solenoid valves VOFC

Type codes

VOFC - L - B52 - M - Z - G12 - 1 - A1

Type	
VOFC	Solenoid valve

Type of directional control valve	
L	In-line valve

Valve function	
B52	5/2-way valve, double solenoid
M32C	3/2-way valve, normally closed
M52	5/2-way valve, single solenoid

Reset method for single solenoid valves	
M	Mechanical spring

Pilot supply air	
	Internal
Z	External
C	Internal/external pilot air

Pneumatic connection	
G12	G $\frac{1}{2}$
G14	G $\frac{1}{4}$
N12	$\frac{1}{2}$ NPT
N14	$\frac{1}{4}$ NPT
FG12	Namur G $\frac{1}{2}$
FG14	Namur G $\frac{1}{4}$

Nominal operating voltage	
	Without solenoid coil, not relevant
1	24 V DC
1U	24 V DC and AC
2A	110 V AC/50-60 Hz
2U	110 V DC and AC
3A	230 V AC/50-60 Hz
3U	230 V DC and AC

Electrical connection	
A1	Port pattern type A, to EN 175 301
K4	Cable connector M20
F9	Armature tube for solenoid coil 13
F10	Armature tube for solenoid coil 18
K1	Cable

# Solenoid valves VOFC

Type codes

Protective circuit	
	None/standard
F	Fuse
FX	Fuse and freewheeling diode
X	Freewheeling diode

Approval EU, US	
	Approval defined upon introduction (standard)
Ex3	II 2G
Ex4	II 2GD

Type of explosion protection	
	None
D	Pressure-resistant casing
E	Enhanced safety
M	Moulded encapsulation
ME	Moulded encapsulation, enhanced safety
N	Non-sparking
Q	Sand casing
A	Intrinsically safe

## Basic valves VOFC

Technical data – 3/2-way valves, G $\frac{1}{4}$  and Namur

Function  
3/2-way valve

 - Temperature range  
-25 ... +60 °C

 - Flow rate  
600 l/min
