

Key features

At a glance

- Toothed belt axis with two opposing slides
- Optimum price/performance ratio
 Ready-to-install unit for quick and easy design
- High reliability thanks to a tested service life of 2,500 km per slide

Opposing movement, controlled via a motor

- Motor can be mounted on four sides using identical mounting accessories
- Complete kit for a simple and space-saving solution for end-position sensing

• Positioning and handling with low

process forces

• Centring and aligning

- Plain-bearing guide
 For small loads
 - Restricted operating behaviour with torque load
 - Guide backlash = 0.05 mm (on delivery)
- Recirculating ball bearing guide
 For medium loads
 - Very good operating behaviour with torque load
 - Backlash-free guide (preloaded guide elements)

Optionally with central support to increase the forces and torques per slide

Application examples

- Suitable for sorting, separating and spreading
- For opening doors
- For gripping tasks with small loads

Characteristic values of the axes

The specifications shown in the table are maximum values. The precise values for each of the variants can be found in the relevant technical data.

Version	Size	Working stroke	Speed	Repetition	Feed force ¹⁾	Guide characteristics

Technical data

Characteristic load values

The indicated forces and torques refer to the centre of the guide. These values must not be exceeded during dynamic operation. Special attention must be paid to the cushioning phase.

With central support

The point of application of force is the

point where the centre of the guide and

the centre point between the bearing

cap and the central support intersect.

Without central support

The point of application of force is the point where the centre of the guide and the centre point between the two bearing caps intersect.

If the axis is subjected to more than two of the indicated forces and torques simultaneously, the following equation must be satisfied in addition to the indicated maximum loads:

Without central support

Calculating the load comparison factor:

$$f_{v} = \frac{\left|F_{y1,dyn} + F_{y2,dyn}\right|}{Fy_{max.}} + \frac{\left|F_{z1,dyn} + F_{z2,dyn}\right|}{Fz_{max.}} + \frac{\left|M_{x1,dyn} + M_{x2,dyn}\right|}{Mx_{max.}} + \frac{\left|M_{y1,dyn} + M_{y2,dyn}\right|}{My_{max.}} + \frac{\left|M_{z1,dyn} + M_{z2,dyn}\right|}{Mz_{max.}} \le 1$$

With central support

Calculating the load comparison factor:

$$f_{v} = \frac{|F_{y1,dyn}|}{Fy_{max.}} + \frac{|F_{z1,dyn}|}{Fz_{max.}} + \frac{|M_{x1,dyn}|}{Mx_{max.}} + \frac{|M_{y1,dyn}|}{My_{max.}} + \frac{|M_{z1,dyn}|}{Mz_{max.}} \le 1 \qquad \qquad f_{v} = \frac{|F_{y2,dyn}|}{Fy_{max.}} + \frac{|F_{z2,dyn}|}{Fz_{max.}} + \frac{|M_{x2,dyn}|}{Mx_{max.}} + \frac{|M_{y2,dyn}|}{My_{max.}} + \frac{|M_{z2,dyn}|}{Mz_{max.}} \le 1$$

Permissible forces and torques for a service life of 2,500 km per slide

Technical data

Service life

The service life of the guide depends on the load. To provide a rough indication of the service life of the guide, the graph below plots the load comparison factor ${\rm f}_{\rm V}$ against the service life.

These values are only theoretical. Consultation with your local contact person at Festo is mandatory for load comparison factors $f_{\rm v}\,greater$ than 1.5.

FESTO

Load comparison factor f_v as a function of service life

Maximum acceleration a as a function of applied load m

2

m [kg]

3

4

5

----- Vertical

📱 - Note

For the plain-bearing guide (GF) it is recommended to reduce the acceleration to minimise overswings and increase positioning accuracy.

Example:

A user wants to move an X kg load. Using the formula \rightarrow 10 gives a value of 1.5 for the load comparison factor f_v. According to the graph, the guide would have a service life of approx. 750 km. Reducing the acceleration reduces the Mz and My values. A load comparison factor of 1 now gives a service life of 2,500 km.

Technical data

Toothed belt axes ELGG

Technical data

Working stroke reduction With standard slide or long slide L with ad	dditional slide ZB			
			L7 = L16 = L17 =	Slide length Distance between both slides Additional slide length
• With a toothed belt axis with addi- tional slide, the working stroke is reduced by the length of the addi- tional slide and the distance between both slides	• If the variant long slide L is ordered, the additional slide is not extended	Example: Type ELGG-TB-35-500ZR Working stroke = 500 L16 = 100 L7 = 146 L17 = 766	Working mm with ad mm (500 m 5 mm	g stroke per slide ditional slide = 414mm m – 10mm – 76mm)
Dimensions – Additional slide				
Size	35	45	55	
Length L17 [mm]	76	96	116	
Distance between the slides [mm] L16	≥ 0			

2nd moment of area

Size		35	45	55
ly	[mm ⁴]	3.77x10 ³	1.57x10 ⁴	3.83x10 ⁴
lz	[mm ⁴]	1.89x10 ⁵	8.08x10 ⁵	1.85x10 ⁶

Recommended deflection limits

It is recommended to adhere to a maximum deflection of 0.5 mm so as not to impair the functionality of the axes. Greater deformation can result in increased friction, greater wear and reduced service life.

Product Range and Company Overview

A Complete Suite of Automation Services

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

Custom Automation Components Complete custom engineered solutions

Custom Control Cabinets Comprehensive engineering support and on-site services

Complete Systems Shipment, stocking and storage services

The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

Electromechanical Electromechanical actuators, motors, controllers & drives

Pneumatics Pneumatic linear and rotary actuators, valves, and air supply

PLCs and I/O Devices PLC's, operator interfaces, sensors and I/O devices

Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 12,000 employees in 56 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.
