

Axis controllers SPC200

FESTO

Axis controllers SPC200

Key features

FESTO

At a glance

SPC200 – the most unique positioning controller in the world for pneumatic and electrical positioning technology

Strength in variety

- 1 to 4 positioning axes
- 3 different pneumatic drive families
- Stepper motor axes
- Technology mix

Strength in modularity

- Two housing sizes
- 9 different plug-in cards
- Combinable as required

Multi-purpose

- Set selection for simple applications
- Start/stop operation for demanding automation tasks
- Up to 100 programs
- Subprogram technology
- Register operations and much more

Strength in flexibility

- Digital inputs/outputs
- Analogue inputs
- Profibus, Device Net, Interbus
- CPV valve terminals for pneumatic switching functions

Strength in installation

- One axis string controls
- 2 pneumatic axes
- CPV valve terminals can be connected directly to the axis string
- Pre-assembled cables
- Plugs fit only in the correct sockets

Software WINPISA

- Project archiving
- Simple commissioning
- User-friendly programming
- Comprehensive diagnostics with graphics functions

Axis controllers SPC200

Key features

FESTO

In combination with the drive DNCI

The SPC200 is a position controller and positioning control in one. Together with the drive, the displacement encoder and the proportional directional control valve, it forms a closed control loop.

Individual components		
Type		Brief description
1	DNCI-...	The pneumatic drive, in this case DNCI with integrated displacement encoder, generates the movement. It is controlled by the SPC200.
2	SPC200-...	The axis controller with operating unit, in this case designed for a pneumatic drive, is an open and closed loop controller in one.
3	MPYE-...	The proportional directional control valve is the final control element in the control loop and controls the movement of the drive in accordance with the specification of the closed loop controller in the SPC200.
4	–	Connecting cable that connects the displacement encoder with the axis interface. The cable is permanently attached to the drive.
5	KSPC-AIF-...	Connecting cable that connects the controller SPC200 with the axis interface.
6	KMPYE-AIF-...	Connecting cable that connects the proportional directional control valve with the axis interface.
7	SPC-AIF-...	The axis interface forwards the measured values from the displacement encoder to the closed loop controller in the SPC200 and the control signal from the closed loop controller to the proportional directional control valve.

Axis controllers SPC200

Product range overview

FESTO

Individual components for SPC200			
	Type	Brief description	→ Page/Internet
Basic units			
	SPC200-CPU-4	Basic unit with 4 card locations	6
	SPC200-CPU-6	Basic unit with 6 card locations	6
Plug-in cards			
	SPC200-BP	Blanking plate	7
	SPC200-PWR-AIF	Power supply unit and axis interface connection	10
	SPC200-MMI-DIAG	Diagnostics and control unit connection	11
	SPC200-DIO	Digital inputs/outputs (10I/8O)	12
	SPC200-2AI-U	Analogue setpoint specification, 2 channels, 0 ... 10 V	14
	SPC200-SCU-AIF	Sub-controller for 3rd and 4th pneumatic axes	15
	SPC-200-SMX-1	Stepper motor interface	16
	SPC200-COM-PDP	Profibus-DP interface	18
	SPC200-COM-DN2	DeviceNet interface	20
	SPC200-COM-IBS	Interbus interface	22
Control unit			
	SPC200-MMI-1	Control unit for commissioning, programming and diagnostics. Not all functions of the axis controller SPC200 are supported. Please use WinPISA for commissioning.	23
Connector modules for SPC200			
	Type	Brief description	→ Page/Internet
Axis interface			
	SPC-AIF-POT	For analogue displacement encoder (potentiometer)	24
	SPC-AIF-POT-LWG		
	SPC-AIF-MTS	– For digital displacement encoder Tempsonics/AIF – For linear drive DGPI...-AIF	24
	SPC-AIF-INC	For standard cylinder DNCI	26
	SPC-AIF-MTS-2	For linear drive DGCI	28
Power supply module			
	SPC-AIF-SUP-24V	Additional power supply for the load voltage at the axis interface for cable lengths over 16 m	30

FESTO

Axis controller basic unit

SPC200-CPU-4

SPC200-CPU-6

Function

Basic unit for 4 or 6 function cards,
contains closed loop position
controller for 2 pneumatic axes and
universal positioning control for
4 axes

General technical data				
			SPC200	
Power supply			➔10 (SPC200-PWR-AIF)	
Current consumption	SPC200-CPU-4/6 incl. SPC200-PWR-AIF	[mA]	Typically 100	
Processor type			Digital signal processor	
Operating system			Festo OS 4.6x ¹⁾	
Controller sampling time		[ms]	Typically 1.5	
Control cycle		[ms]	Typically 2	
Memory	Available for programs and data	[KB]	20	
Data backup			Flash memory	
		Backup cycles	> 100 000	
No. of positioning axes	Total		4	
	Pneumatic		Max. 4	
	Stepper motor		Max. 3	
No. of inputs/outputs	Local		Max. 40 inputs, 32 outputs ²⁾	
	Per AIF string		Max. 16 inputs and 16 outputs ³⁾	
	Via fieldbus		Max. 64 inputs and 64 outputs	
No. of start programs			2 ⁴⁾	
No. of position registers			100 per axis	
Operating modes	Set selection	No. of motion sets		Max. 32 via local I/O per start program Max. 1,000 via fieldbus interface per start program
		Control signals		ENABLE, READY, STOP, RESET, RECBIT1..5, CLK_A/B, RC_A/B, ACK_A/B
	Start/stop	No. of programs		Max. 100
		Control signals		ENABLE, READY, START/RESET, STOP, MC_A/B, SYNC_IA/B, SYNC_OA/B
		Programming		NC programming to DIN 66025
		Instruction classes		Positioning instructions
				I/O instructions
				Register instructions
				Sequence instructions
		No. of NC sets		Max. 2,000
No. of NC sets per program		Max. 1,000		
Nesting depth for subprograms		Max. 4		

1) Status: April 2003

2) Less the used control signals of the first card

3) Either as 1 input device and 1 output device of the CP fieldbus modules or 1 input/output module SPC-FIO ...

4) At least 1 start program must be active

Axis controllers SPC200

Technical data

FESTO

General technical data			
			SPC200
CE marking symbol (see conformity declaration)			As per EU EMC directive
Vibrations/shock	Vibrations		Tested to DIN/IEC 68, parts 2-6, severity level 1
	Shock		Tested to DIN/IEC 68, parts 2-27, severity level 2
Ambient conditions	Temperature range	[°C]	-5 ... +50
	Protection class		IP20 ⁵⁾
	Relative air humidity		95% non-condensing
Weight	SPC200-CPU-4	[kg]	0.675
	SPC200-CPU-6	[kg]	0.85

5) With fully equipped basic unit

New

Communication modules for connecting to a fieldbus, like Profibus or DeviceNet, facilitate reading and writing all registers of the axis controller SPC200.

Reading the actual position and writing a digital position setpoint.

Power supply SPC200-PWR-AIF

Function
Power supply and connection of the
first axis string

General technical data				SPC200-PWR-AIF
Current consumption	Plug-in card	[mA]	See basic unit	
Power supply unit (PWR)	Supply	[V DC]	24 –5/+25%	
	Residual ripple	[%]	2	
	Power failure buffering for logic supply (pin 2)	[ms]	10	
	Current consumption	Load, pin 1 [A]	Max. 5.0	
		Logic, pin 2 [A]	Max. 4.0	
Feature	–		2 pneumatic axes	
Axis connection	Digital inputs	[max]	16 function inputs ¹⁾	
	Digital outputs	[max]	16 function outputs ¹⁾	
Electrical connections	Power supply unit		3-pin terminal strip	
	Axis connection		5-pin terminal strip	
CE marking symbol (see conformity declaration)			As per EU EMC directive	
Weight		[g]	82	
Mounting location → 9			1	

1) Either as 1 input module and 1 output module of the CP modules or 1 input/output module SPC-FIO-...

Pin allocation

1 Terminal strip on cable type KSPC-AIF-WD-... pre-assembled

2 3-pin terminal strip included in the scope of delivery. Connection cross section max. 1.5 mm²

Connecting cable → 32, no. 1

Note

The valves at the axis interfaces and the outputs of the CP modules are supplied via the 24 V load supply. They can therefore be switched off independently of the logic supply in an emergency stop situation.

1 AXES (X1)		2 PWR (X2)	
Pin	Function	Pin	Function
1	CAN-LOW (brown)	1	24 V load supply (switchable)
2	CAN-HIGH (white)	2	24 V supply logic
3	24 V (yellow)	3	0 V
4	0 V (green)		
5	24 V load supply (grey)

Digital I/O module SPC200-DIO

Function

Digital input/output card (local I/O)

General technical data			SPC200-DIO
Current consumption	Plug-in card	[mA]	Typically 50
Digital inputs	Number		10
	Sensor supply	[A]	0.5 ¹⁾
	Current consumption	[mA]	8 (at 24 V DC/"logic 1")
	Fuse protection for sensor supply		Electronic short-circuit protection
	Delay	[ms]	5
Digital outputs	Number		8
	Supply	[V DC]	24 ±25% ²⁾
	Max. current-carrying capacity per output	[mA]	250
	Fuse protection for outputs		Electronic, all outputs
	Max. tripping current	[A]	2
	Response time	[ms]	1.5
Version	Inputs/outputs		To IEC 61131-2, positive logic (PNP)
Electrical isolation	Inputs/outputs		No/yes
Electrical connections	Inputs		12-pin terminal strip
	Outputs		10-pin terminal strip
Weight		[g]	62
Mounting location → 9			From 3 upwards

1) Via internal 24 V supply (pin 2 to PWR to plug-in card SPC200-PWR-AIF)

2) Supplied separately, note load data

Axis controllers SPC200

Technical data

FESTO

Pin allocation

- 1 12-pin terminal strip included in the scope of delivery.
Connection cross section max. 1.5 mm²
- 2 10-pin terminal strip included in the scope of delivery.
Connection cross section max. 1.5 mm²

Note

Inputs and outputs on the first card are reserved for necessary functions such as start, stop, etc. Up to 7 inputs and 5 outputs are freely programmable.

On the other cards, all 10 inputs and 8 outputs are freely programmable. Up to 4 I/O cards can be inserted (in 6x rack).

1 Input (X5/X7)			
Pin	Function	Start/stop operation	Set selection

FESTO

DeviceNet interface SPC200-COM-DN2

Function
DeviceNet interface of the SPC200 as
slave to a DeviceNet network.

Note

This function card replaces the
following card:
Part No. 194 017
Type: SPC200-COM-DN2

General technical data			SPC200-COM-DN2
Current consumption	Plug-in card	[mA]	Typically 50
Power supply	Fieldbus	[V DC]	11 ... 30
DeviceNet bus	Version		– Physical layer (layer 1) to ISO/DIS 11898 – Standard highspeed to 1Mbit – Data Link layer (layer 2) to CAN specifications V2.0 – DeviceNet, Release 2.0
	Electrical isolation		Yes
	Protocols		– DeviceNet-IO – DeviceNet-Profil
	Addressing range of the fieldbus interface		0 ... 63
	Baud rate	[kBit/s]	125, 250, 500
Number of outputs	Set selection	[Byte]	2
	Start/Stop	[Byte]	2 ... 8
Number of inputs	Set selection	[Byte]	4
	Start/Stop	[Byte]	2 ... 8
Operation characteristic			Reading an writing inputs and outputs
			Reading and writing all program registers of the SPC200
			Read out the actual position
			Digital setpoint specification
LED display			Module and network status
Device-specific diagnosis			Via status bit
			Via WinPISA status display
Configuration support for the fieldbus interface			EDS file
Electrical connection	Open Style		5-pin terminal strip
CE marking symbol (see conformity declaration)			As per EU EMC directive
Weight		[g]	80
Mounting location → 9			From 3 upwards

Axis controllers SPC200

Technical data

FESTO

Pin allocation

- 1 5-pin terminal strip included in the scope of delivery.
Connection cross section
max. 1.5 mm²

New

The card SPC200-COM-DN2 facilitates the connection of the SPC200 to DeviceNet. Position data can be read and written directly via Profibus (as of firmware release 4.9).

1 Bus (X20)

Pin	Function
1	0 V bus interface/logic (CAN_GND)

Interbus interface SPC200-COM-IBS

Function

Interbus interface of the SPC200 to an

Interbus network

General technical data			
			SPC200-COM-IBS
Current consumption	Plug-in card	[mA]	Typically 70
Interbus	Version		RS 422
	Electrical isolation		Yes
	Type of transmission		Serial asynchronous, full-duplex
	Protocols		Remote bus
	Max. no. of process data	Outputs	64
	bits	Inputs	64
	Baud rate	[kBit/s]	500
	Line length, overall system	[km]	12.8
	Between 2 remote bus stations	[m]	400
Configuration support for the fieldbus interface			Icons for CMD software
Electrical connection	Input		9-pin SUB-D, male
	Output		9-pin SUB-D, female
CE marking symbol (see conformity declaration)			As per EU EMC directive
Weight		[g]	80
Mounting location ➔ 9			From 3 upwards ¹⁾

1) When using the control unit MMI-1 as of location 4

Pin allocation

1 + 2 Cable with plug acc. to Interbus standard

Note

The card SPC200-COM-IBS facilitates the connection of the SPC200 to Interbus. The operating modes that are available via I/Os are emulated.

Product Range and Company Overview

A Complete Suite of Automation Services

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

Custom Automation Components
Complete custom engineered solutions

Custom Control Cabinets
Comprehensive engineering support and on-site services

Complete Systems
Shipment, stocking and storage services

The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

Electromechanical
Electromechanical actuators, motors, controllers & drives

Pneumatics
Pneumatic linear and rotary actuators, valves, and air supply

PLCs and I/O Devices
PLC's, operator interfaces, sensors and I/O devices

Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 12,000 employees in 56 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.
