# Motor controllers SFC-DC

Key features

FESTO

## Hardware

- The motor controller SFC-DC serves as a positioning controller and closed loop position controller
- Available with or without control panel
- Thanks to IP54 protection, the motor controller can be mounted close to the drive

- Parameter assignment via:
  - Control panel:
    - suitable for simple position sequences
  - FCT (Festo Configuration Tool) configuration package:
    - with RS 232 interface
    - Windows-based PC user interface, Festo Configuration Tool

- Easy actuation via:
  - I/O interface
    - (only in combination with mini slide SLTE)
  - Profibus
  - CANopen
  - DeviceNet

CANopen

DeviceNet

## For controlling

Mini slide SLTE

Parallel gripper HGPLE

## FHPP – Festo Handling and Positioning Profile

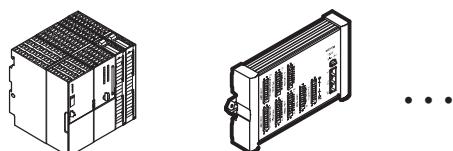

Optimised data profile

Festo has developed an optimised data profile, the “Festo Handling and Positioning Profile (FHPP)”, that is tailored to the target applications for handling and positioning tasks.

The FHPP data profile permits the actuation of Festo motor controllers, using a fieldbus interface, via standardised control and status bytes.

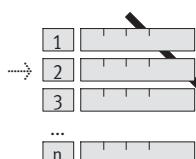

The following are defined, among others:

- Operating modes
- I/O data structure
- Parameter objects
- Sequence control

Fieldbus communication

### Set selection

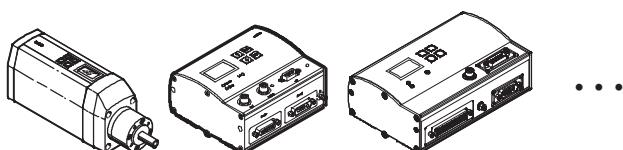

### Direct operation

Mode      Position      Speed

### Parameter channel

Free access to all parameters for reading and writing

PROFIBUS®, DeviceNet®, CANopen® is a registered trademark of its respective trademark holder in certain countries.

FESTO

## Key features

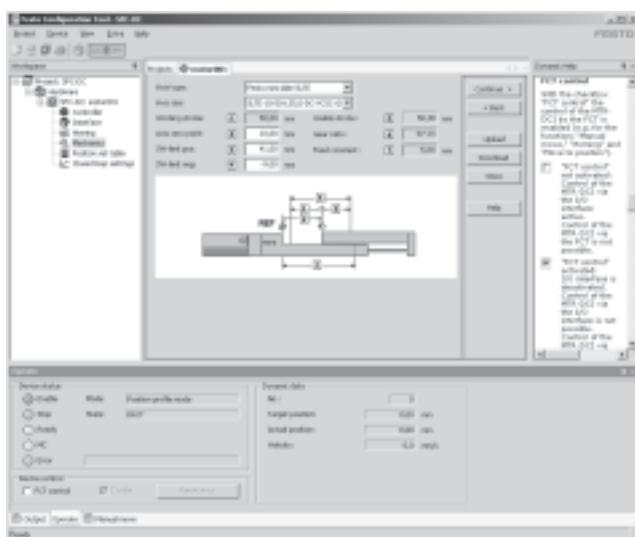

### FCT software – Festo Configuration Tool

Software platform for electrical drives from Festo

- All the drives in a system can be managed and archived in a common project
- Project and data management for all supported device types
- Simple to use thanks to graphically supported parameter entry
- Universal mode of operation for all drives
- Working offline at your desk or online at the machine

### Mechanical reference positions and limit positions

- Reference positions can be either edited or taught in
- Flexible adaptation to installation conditions
- Settings are displayed clearly

### Position set table

- 31 position sets ensure flexibility in positioning
- Absolute or relative positioning values can be used
- The following parameters can be set flexibly for each application:
  - Position
  - Speed
  - Acceleration
  - Braking ramps
- Complete function test
