

## Axis controllers SPC200

**FESTO**

# Axis controllers SPC200

Key features

FESTO

## At a glance

**SPC200 – the most unique positioning controller in the world for pneumatic and electrical positioning technology**

### Strength in variety

- 1 to 4 positioning axes
- 3 different pneumatic drive families
- Stepper motor axes
- Technology mix

### Strength in modularity

- Two housing sizes
- 9 different plug-in cards
- Combinable as required

### Multi-purpose

- Set selection for simple applications
- Start/stop operation for demanding automation tasks
- Up to 100 programs
- Subprogram technology
- Register operations and much more

### Strength in flexibility

- Digital inputs/outputs
- Analogue inputs
- Profibus, DeviceNet, Interbus
- CPV valve terminals for pneumatic switching functions

### Strength in installation

- One axis string controls
- 2 pneumatic axes
- CPV valve terminals can be connected directly to the axis string
- Pre-assembled cables
- Plugs fit only in the correct sockets

### Software WINPISA

- Project archiving
- Simple commissioning
- User-friendly programming
- Comprehensive diagnostics with graphics functions

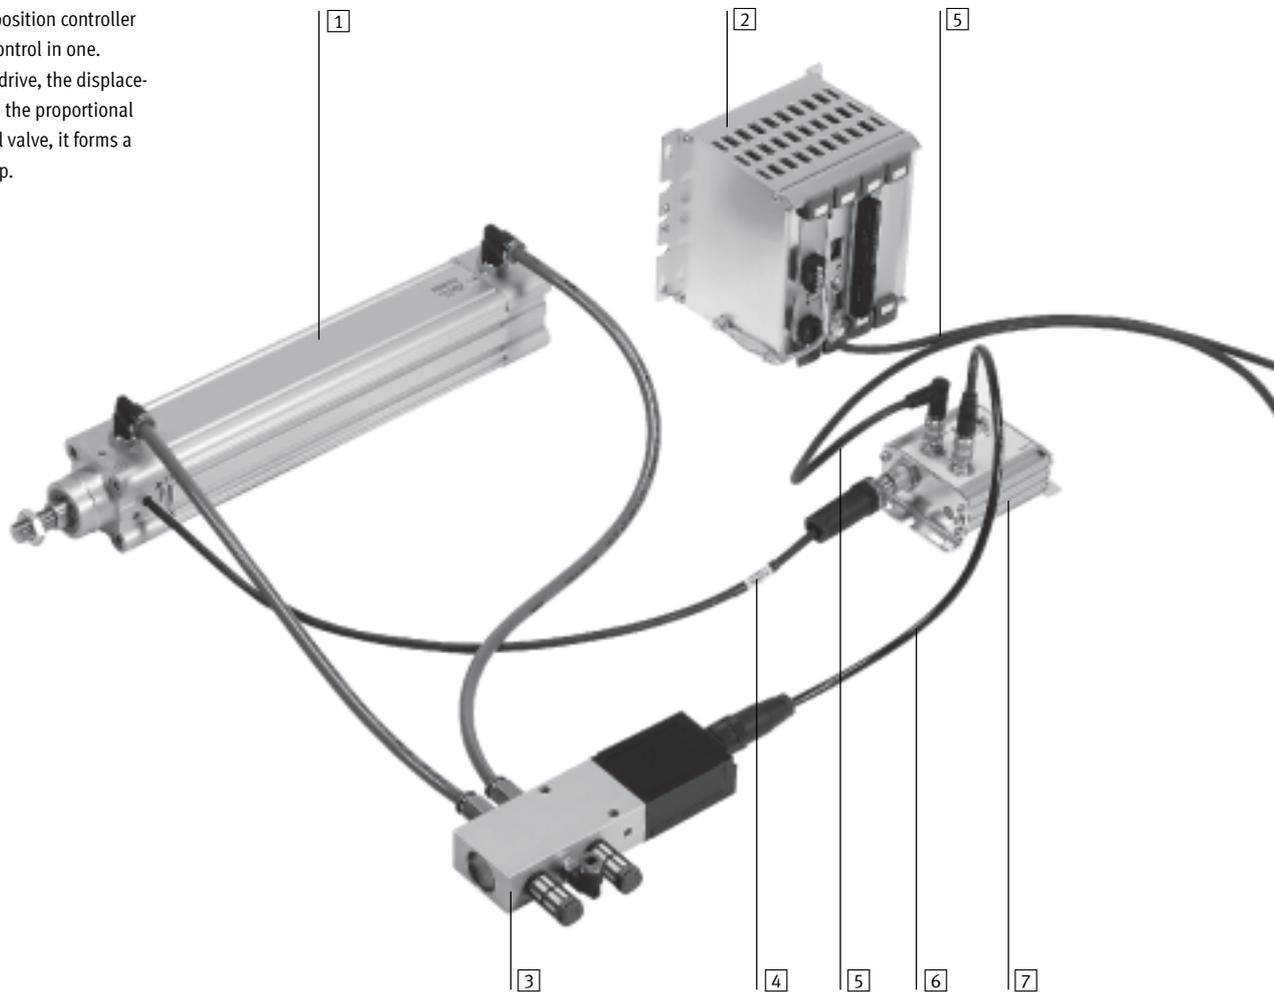

PROFIBUS®, DeviceNet®, INTERBUS® is a registered trademark of its respective trademark holder in certain countries.

# Axis controllers SPC200

Key features

### In combination with the drive DNCI

The SPC200 is a position controller and positioning control in one. Together with the drive, the displacement encoder and the proportional directional control valve, it forms a closed control loop.

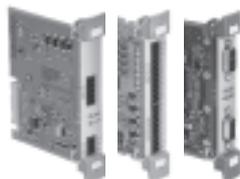

Individual components	
Type	Brief description
1 DNCI-...	The pneumatic drive, in this case DNCI with integrated displacement encoder, generates the movement. It is controlled by the SPC200.
2 SPC200-...	The axis controller with operating unit, in this case designed for a pneumatic drive, is an open and closed loop controller in one.
3 MPYE-...	The proportional directional control valve is the final control element in the control loop and controls the movement of the drive in accordance with the specification of the closed loop controller in the SPC200.
4 -	Connecting cable that connects the displacement encoder with the axis interface. The cable is permanently attached to the drive.
5 KSPC-AIF-...	Connecting cable that connects the controller SPC200 with the axis interface.
6 KMPYE-AIF-...	Connecting cable that connects the proportional directional control valve with the axis interface.
7 SPC-AIF-...	The axis interface forwards the measured values from the displacement encoder to the closed loop controller in the SPC200 and the control signal from the closed loop controller to the proportional directional control valve.

## Axis controller basic unit

**SPC200-CPU-4**

**SPC200-CPU-6**

### Function

Basic unit for 4 or 6 function cards,  
contains closed loop position  
controller for 2 pneumatic axes and  
universal positioning control for  
4 axes

General technical data			SPC200
Power supply			→ 10 (SPC200-PWR-AIF)
Current consumption	SPC200-CPU-4/6 incl. SPC200-PWR-AIF	[mA]	Typically 100
Processor type			Digital signal processor
Operating system			Festo OS 4.6x <sup>1)</sup>
Controller sampling time		[ms]	Typically 1.5
Control cycle		[ms]	Typically 2
Memory	Available for programs and data	[KB]	20
Data backup			Flash memory
	Backup cycles		> 100 000
No. of positioning axes	Total		4
	Pneumatic		Max. 4
	Stepper motor		Max. 3
No. of inputs/outputs	Local		Max. 40 inputs, 32 outputs <sup>2)</sup>
	Per AIF string		Max. 16 inputs and 16 outputs <sup>3)</sup>
	Via fieldbus		Max. 64 inputs and 64 outputs
No. of start programs			2 <sup>4)</sup>
No. of position registers			100 per axis
Operating modes	Set selection	No. of motion sets	Max. 32 via local I/O per start program Max. 1,000 via fieldbus interface per start program
		Control signals	ENABLE, READY, STOP, RESET, RECBIT1..5, CLK_A/B, RC_A/B, ACK_A/B
	Start/stop	No. of programs	Max. 100
		Control signals	ENABLE, READY, START/RESET, STOP, MC_A/B, SYNC_IA/B, SYNC_OA/B
		Programming	NC programming to DIN 66025
		Instruction classes	Positioning instructions I/O instructions Register instructions Sequence instructions
		No. of NC sets	Max. 2,000
		No. of NC sets per program	Max. 1,000
		Nesting depth for subprograms	Max. 4

1) Status: April 2003

2) Less the used control signals of the first card

3) Either as 1 input device and 1 output device of the CP fieldbus modules or 1 input/output module SPC-FIO ...

4) At least 1 start program must be active

# Axis controllers SPC200

Technical data

General technical data			
			SPC200
CE marking symbol (see conformity declaration)			As per EU EMC directive
Vibrations/shock	Vibrations		Tested to DIN/IEC 68, parts 2-6, severity level 1
	Shock		Tested to DIN/IEC 68, parts 2-27, severity level 2
Ambient conditions	Temperature range	[°C]	-5 ... +50
	Protection class		IP20 <sup>5)</sup>
	Relative air humidity		95% non-condensing
Weight	SPC200-CPU-4	[kg]	0.675
	SPC200-CPU-6	[kg]	0.85

5) With fully equipped basic unit

 **New**

Communication modules for connecting to a fieldbus, like Profibus or DeviceNet, facilitate reading and writing all registers of the axis controller SPC200.

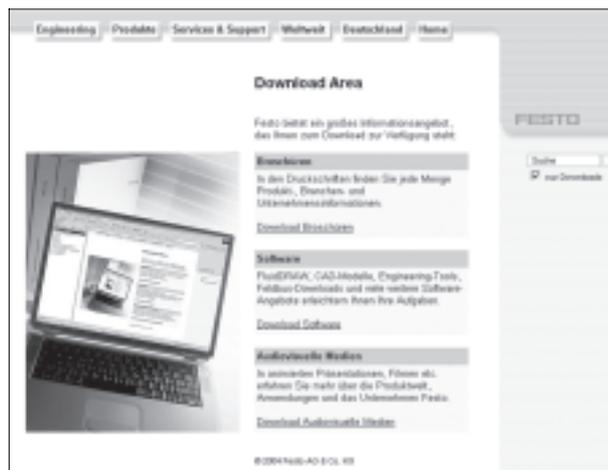

Reading the actual position and writing a digital position setpoint.

## Power supply SPC200-PWR-AIF

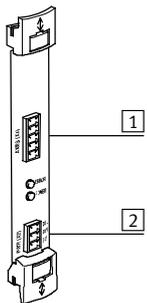

Function  
Power supply and connection of the first axis string

General technical data			SPC200-PWR-AIF
Current consumption	Plug-in card	[mA]	See basic unit
Power supply unit (PWR)	Supply	[V DC]	24 -5/+25%
	Residual ripple	[%]	2
	Power failure buffering for logic supply (pin 2)	[ms]	10
	Current consumption	Load, pin 1	[A]
Logic, pin 2		[A]	Max. 4.0
Feature	-		2 pneumatic axes
Axis connection	Digital inputs	[max]	16 function inputs <sup>1)</sup>
	Digital outputs	[max]	16 function outputs <sup>1)</sup>
Electrical connections	Power supply unit		3-pin terminal strip
	Axis connection		5-pin terminal strip
CE marking symbol (see conformity declaration)			As per EU EMC directive
Weight		[g]	82
Mounting location → 9			1

1) Either as 1 input module and 1 output module of the CP modules or 1 input/output module SPC-FIO-...

## Pin allocation

- 1 Terminal strip on cable type KSPC-AIF-WD-... pre-assembled
- 2 3-pin terminal strip included in the scope of delivery. Connection cross section max. 1.5 mm<sup>2</sup>

Connecting cable → 29, no. 1

Note

The valves at the axis interfaces and the outputs of the CP modules are supplied via the 24 V load supply. They can therefore be switched off independently of the logic supply in an emergency stop situation.

## Serial interface SPC200-MMI-DIAG

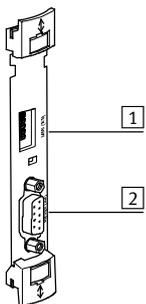

Function  
Serial interface for diagnostics and programming, connection of the control unit MMI-1

General technical data			SPC200-MMI-DIAG
Current consumption	Plug-in card	[mA]	Typically 50 <sup>1)</sup>
Serial interface	Version		RS 232 C
	Electrical isolation		Yes
	Baud rate	[baud]	9,600; 19,200; 38,400; 57,600; 115,200 <sup>2)</sup>
	Data	[bit]	8
	Stop bit	[bit]	1
	Parity		Even parity
	Protocol		No handshake
MMI interface	Version		Similar to RS 232 C
	Electrical isolation		No
Electrical connections	Serial interface		9-pin SUB-D, female
	MMI-1		5 double-pin row
CE marking symbol (see conformity declaration)			As per EU EMC directive
Weight		[g]	68
Mounting location → 9			2

1) With control unit SPC200-MMI-1  
2) The baud rate is 9,600 baud after each POWER ON

## Digital I/O module

### SPC200-DIO

#### Function

Digital input/output card (local I/O)

General technical data		SPC200-DIO
Current consumption	Plug-in card [mA]	Typically 50
Digital inputs	Number	10
	Sensor supply [A]	0.5 <sup>1)</sup>
	Current consumption [mA]	8 (at 24 V DC/"logic 1")
	Fuse protection for sensor supply	Electronic short-circuit protection
	Delay [ms]	5
Digital outputs	Number	8
	Supply [V DC]	24 ±25% <sup>2)</sup>
	Max. current-carrying capacity per output [mA]	250
	Fuse protection for outputs	Electronic, all outputs
	Max. tripping current [A]	2
	Response time [ms]	1.5
Version	Inputs/outputs	To IEC 61131-2, positive logic (PNP)
Electrical isolation	Inputs/outputs	No/yes
Electrical connections	Inputs	12-pin terminal strip
	Outputs	10-pin terminal strip
Weight	[g]	62
Mounting location → 9		From 3 upwards

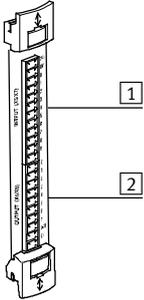

1) Via internal 24 V supply (pin 2 to PWR to plug-in card SPC200-PWR-AIF)

2) Supplied separately, note load data

Technical data

## Pin allocation

- 1 12-pin terminal strip included in the scope of delivery. Connection cross section max. 1.5 mm<sup>2</sup>
- 2 10-pin terminal strip included in the scope of delivery. Connection cross section max. 1.5 mm<sup>2</sup>

 Note

Inputs and outputs on the first card are reserved for necessary functions such as start, stop, etc. Up to 7 inputs and 5 outputs are freely programmable.

On the other cards, all 10 inputs and 8 outputs are freely programmable. Up to 4 I/O cards can be inserted (in 6x rack).

1 Input (X5/X7)			
Pin	Function	Start/stop operation	Set selection
1	24 V	Supply (for switch/sensor)	
2	0 V		
3	I0.0	Freely programmable	RECBIT1
4	I0.1	Freely programmable	RECBIT2
5	I0.2	Freely programmable	RECBIT3
6	I0.3	Freely programmable	RECBIT4
7	I0.4	Freely programmable	RECBIT5
8	I0.5	(SYNC_IN/B) <sup>1)</sup>	CLK_B
9	I0.6	(SYNC_IN/B) <sup>1)</sup>	CLK_A
10	I0.7	STOP	STOP
11	I0.8	START/RESET <sup>2)</sup>	RESET <sup>2)</sup>
12	I0.9	ENABLE	ENABLE

2 Output (X2)			
Pin	Function	Start/stop operation	Set selection
1	Q0.0	Freely programmable	–
2	Q0.1	Freely programmable	–
3	Q0.2	Freely programmable	–
4	Q0.3	MC_B	RC_B
5	Q0.4	MC_A	RC_A
6	Q0.5	(SYNC_OUT/B) <sup>1)</sup>	ACK_B
7	Q0.6	(SYNC_OUT/A) <sup>1)</sup>	ACK_A
8	Q0.7	READY	READY
9	24 V	Supply (load supply for outputs)	
10	0 V		

1) Freely programmable, if not used

2) Reset (program reset) only in combination with 0 signal at stop input

## Setpoint module SPC200-2AI-U

Function  
Analogue input card

General technical data			SPC200-2AI-U
Current consumption	Plug-in card	[mA]	Typically 10
Analogue inputs	Number		2
	Input voltage	[V DC]	0 ... 10
	Input filter, low pass	[Hz]	16
	Resolution	[bit]	12
	Non-linearity		3 LSB
	Max. amplification error	[%]	0.2
	Max. offset error	[mV]	1.5
	Absolute accuracy	[%]	< 0.3
	Input resistance	[kΩ]	> 200
Reference voltage		[V DC]	10
	Absolute accuracy	[%]	0.4
	Max. current	[mA]	8
Electrical connection			9-pin terminal strip
Weight		[g]	55
Mounting location →	9		From 3 upwards

### Pin allocation

**1** 9-pin terminal strip included in the scope of delivery.  
Connection cross section max. 1.5 mm<sup>2</sup>

**Note**

Max. 2 plug-in cards can be used for position specifications for up to 4 axes.  
The allocation of the channel to an axis is programmable.

Only one axis can be allocated to each channel.  
Offset and scaling of the setpoint specifications are also separately programmable for each channel.

1 Analogue IN (X9)	
Pin	Function
1	Reference voltage 10 V <sub>REF</sub>
2	0 V
3	A1+; signal (+) for channel 1
4	A1-; signal (-) for channel 1
5	Reference voltage 10 V <sub>REF</sub>
6	0 V
7	A2+; signal (+) for channel 2
8	A2-; signal (-) for channel 2

## Profibus-DP interface SPC200-COM-PDP

Function  
Profibus interface of the SPC200 as  
slave to a Profibus network

General technical data			SPC200-COM-PDP	
Current consumption	Plug-in card	[mA]	Typically 50	
Profibus	Version		RS 485	
	Electrical isolation		Yes	
	Type of transmission		Serial asynchronous, half-duplex	
	Protocols		Profibus-DP (standard slave), to DIN 19245, 1 – 4, EN 50170 Vol. 2	
	Addressing range of the fieldbus interface		0 ... 125	
	Max. address volume	Outputs	[Byte]	32
		Inputs	[Byte]	32
	Baud rate		[kBit/s]	9.6 – 12,000 <sup>1)</sup>
Line length		[km]	23.8 <sup>2)</sup>	
Max. load capacity		[mA]	100 <sup>3)</sup>	
Configuration support for the fieldbus interface			GSD file	
Electrical connection	Profibus		9-pin SUB-D, female	
CE marking symbol (see conformity declaration)			As per EU EMC directive	
Weight		[g]	80	
Mounting location → 9			From 3 upwards <sup>4)</sup>	

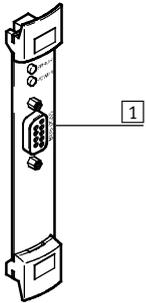

- 1) Automatic baud rate detection
- 2) Line length dependent on baud rate and type of cable
- 3) Supply voltage positive (PV5), pin 6
- 4) When using the control unit MMI-1 as of location 4

## DeviceNet interface SPC200-COM-DN2

### Function

DeviceNet interface of the SPC200 as slave to a DeviceNet network.

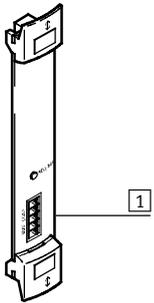

General technical data			SPC200-COM-DN2
Current consumption	Plug-in card	[mA]	Typically 50
Power supply	Fieldbus	[V DC]	11 ... 30
DeviceNet bus	Version		– Physical layer (layer 1) to ISO/DIS 11898 – Standard highspeed to 1Mbit – Data Link layer (layer 2) to CAN specifications V2.0 – DeviceNet, Release 2.0
	Electrical isolation		Yes
	Protocols		– DeviceNet-IO – DeviceNet-Profil
	Addressing range of the fieldbus interface		0 ... 63
	Baud rate	[kBit/s]	125, 250, 500
Number of outputs	Set selection	[Byte]	2
	Start/Stop	[Byte]	2 ... 8
Number of inputs	Set selection	[Byte]	4
	Start/Stop	[Byte]	2 ... 8
Operation characteristic			Reading and writing inputs and outputs
			Reading and writing all program registers of the SPC200
			Read out the actual position
			Digital setpoint specification
LED display			Module and network status
Device-specific diagnosis			Via status bit
			Via WinPISA status display
Configuration support for the fieldbus interface			EDS file
Electrical connection	Open Style		5-pin terminal strip
CE marking symbol (see conformity declaration)			As per EU EMC directive
Weight		[g]	80
Mounting location →	9		From 3 upwards

## Axis interface

SPC-AIF-POT

SPC-AIF-POT-LWG

SPC-AIF-MTS

## Function

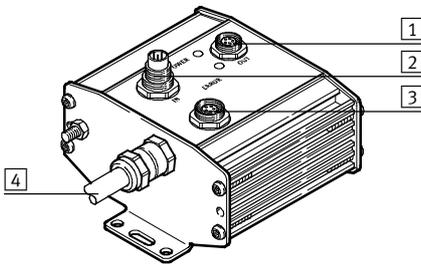

Connection of the proportional valve and the displacement encoder of a pneumatic axis to the SPC200.

Routing of the axis connection to the second axis interface or to a CP module

General technical data		SPC-AIF-POT	SPC-AIF-POT-LWG	SPC-AIF-MTS
Current consumption	Axis interface [mA]	100	100	200
	Prop. directional control valve, max. [A]	1.1		
Electrical connections	AIF IN	5-pin M9, male		
	AIF OUT	5-pin M9, female		
	Prop. directional control valve	7-pin M9, male		
	Displ. encoder cable length [m]	0.3		
	Plug	Type A DIN 43650	4-pin square plug	6-pin round connector DIN 45322
CE marking symbol (see conformity declaration)		As per EU EMC directive		
Ambient conditions	Temperature range [°C]	0 ... +50		
	Protection class to IEC 60529	IP65		
Weight	[g]	300		

## Pin allocation

Connecting cable → 29,  
no. [2]/no. [3]/no. [5]

## Axis interface SPC-AIF-INC

### Function

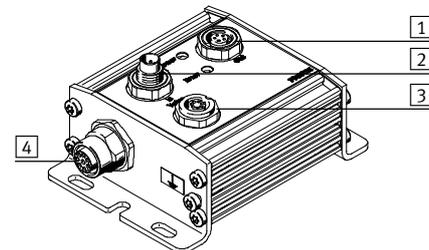

Connection of the proportional valve and the displacement encoder of a pneumatic axis to the SPC200.

Routing of the axis connection to the second axis interface or to a CP module.

General technical data		SPC-AIF-INC
Current consumption	Axis interface [mA]	60
	Prop. directional control valve, max. [A]	1.1
Electrical connections	AIF IN	5-pin M9, male
	AIF OUT	5-pin M9, female
	Prop. directional control valve	7-pin M9, female
	Displacement encoder	8-pin M12, female
CE marking symbol (see conformity declaration)		As per EU EMC directive
Ambient conditions	Temperature range [°C]	0 ... +50
	Protection class to IEC 60529	IP65
Weight	[g]	240

## Pin allocation

## Power supply module SPC-AIF-SUP-24V

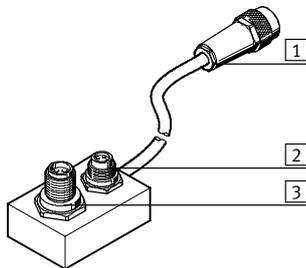

### Function

Additional power supply for the load voltage at the axis interface string, for cable lengths over 16 m.

General technical data		SPC-AIF-SUP-24V
Electrical connections	AIF IN	5-pin M9, male
	AIF OUT	5-pin M9, female
	Cable length	[m] 0.2
	For load voltage	5-pin M12, male
	Voltage	[V DC] 24 - 5/+25%
	Current	[A] 3
Protection against polarity reversal		No
CE marking symbol (see conformity declaration)		As per EU EMC directive
Ambient conditions	Temperature range	[°C] 0 ... +50
	Protection class to DIN 60529	IP65
Weight	[g]	150

## Pin allocation

Connecting cable → 29,  
no. [3]/no. [4]

SPC-F10-2E/2A-M8

## Ordering data

		Part No.	Type
Power supply module	Additional power supply for the load voltage	171 182	SPC-AIF-SUP-24V

# Axis controllers SPC200

Technical data

## Control unit SPC200-MMI-1

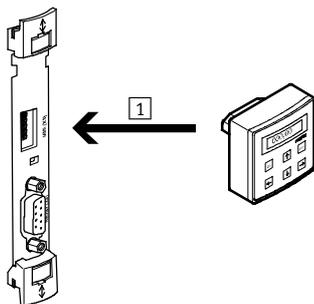

Not all functions of the axis controller SPC200 are supported. Please use WinPISA for commissioning.

General technical data		SPC200-MMI-1
Display		LCD display, 2 x 16 characters
Operation		Touch-sensitive keypad with 6 keys
Power supply	[V DC]	5 <sup>1)</sup>
Current consumption	[mA]	30 <sup>2)</sup>
Interface		3 <sup>3)</sup>
Electrical isolation		No
Electrical connections	Interface	10-pin row
	Power supply	10-pin row
CE marking symbol (see conformity declaration)		As per EU EMC directive
Ambient conditions	Temperature range	[°C] -5 ... +50
	Protection class to IEC 60529	IP20
Weight	[g]	90

- 1) Is supplied directly via the plug-in card SPC200-MMI-DIAG
- 2) Referred to 24 V supply of the SPC200-PVR card
- 3) Similar to RS 232

## Cables – Pneumatic drives

No.	Brief description	Length [m]	Connection	Suitable for chain link trunking	Part No.	Type
1	Connecting cable for axis controller/interface <sup>1)</sup>	5	angled	–	170 236	KSPC-AIF-1-WD-5
1	Connecting cable for axis controller/interface <sup>1)</sup>	8	angled	–	170 237	KSPC-AIF-1-WD-8
2	Connecting cable for axis interface/valve	0.3	straight	–	170 239	KMPYE-AIF-1-GS-GD-0,3
2	Connecting cable for axis interface/valve	2	straight	–	170 238	KMPYE-AIF-1-GS-GD-2
3	Connecting cable for axis interface/function I/O <sup>1)</sup>	0,25	angled	■	540 327	KVI-CP-3-WS-WD-0,25
3	Connecting cable for axis interface/function I/O <sup>1)</sup>	0,5	angled	■	540 328	KVI-CP-3-WS-WD-0,5
3	Connecting cable for axis interface/function I/O <sup>1)</sup>	2	angled	■	540 329	KVI-CP-3-WS-WD-2
3	Connecting cable for axis interface/function I/O <sup>1)</sup>	5	angled	■	540 330	KVI-CP-3-WS-WD-5
3	Connecting cable for axis interface/function I/O <sup>1)</sup>	8	angled	■	540 331	KVI-CP-3-WS-WD-8
3	Connecting cable for axis interface/function I/O <sup>1)</sup>	2	straight	■	540 332	KVI-CP-3-GS-GD-2
3	Connecting cable for axis interface/function I/O <sup>1)</sup>	5	straight	■	540 333	KVI-CP-3-GS-GD-5
3	Connecting cable for axis interface/function I/O <sup>1)</sup>	8	straight	■	540 334	KVI-CP-3-GS-GD-8
4	Additional 24 V power supply for AIF string <sup>2)</sup>	–	straight	–	171 182	SPC-AIF-SUP-24 V
5	Terminating resistor for AIF string <sup>3)</sup>	–	straight	–	175 403	KABS-M9-R100
6	Programming cable	3	straight	–	151 915	KDI-PPA-3-BU9

- 1) The total length of the lines must not exceed 30 m  
 2) Recommended where the total length of connecting cable is over 16 m  
 3) Must be connected at the last axis interface in the chain  
 (Contained in the controller package SPC200/POX)
