

Linear modules HMPL

Linear modules HMPL

Key features

FESTO

At a glance

- Diameter of 12 ... 20 mm
- Stroke lengths of 30 ... 200 mm
- The drive design ensures maximum force and dynamics, especially for vertical operation.
- High precision:
 - Four press-fitted recirculating ball bearing guides and two guide rods ensure high precision and good rigidity
 - Metallic inserts in the limit stops ensure exceptional end-position accuracy results
- Highly dynamic:
 - With integrated shock absorbers, exhaust air flow control and a very rigid housing, the linear module HMPL is capable of cycle times down to <0.5 seconds.
- User-friendly installation system:
 - Centrally arranged and protected cables and tubing.
- Lightweight:
 - The linear module HMPL has a very low dead weight, making it ideal as a front-end axis for the Festo modular system for handling and assembly.
- Modular functionality:
 - By means of versatile and accurate mounting options.

- 1** Front plate
With precision mounting options for attachment components such as drives, grippers, etc.
- 2** Basic profile
The rigid, sealed housing contains both guide and cylinder. High precision and load capacity is achieved by means of the large spacing between the recirculating ball bearing guides.
- 3** Housing cover
For protection against contamination of internal components and with built-in display window.
- 4** Connector cap
Cables and tubing are arranged externally in a centralised, safe and convenient fashion. With mounting option for sensor inscription labels.

Linear modules HMPL

Key features

Wide choice of variants

Internal stop element and position sensing

1 Internal stop element
Self-adjusting soft shock absorbers with metallic inserts are used in both end positions. The stop element combines important handling technology functions including position sensing, cushioning stroke adjustment and drive stroke adjustment. Depending upon the size of the stop elements, the end positions can be precision adjusted within a range of up to 20 mm.

2 Position sensing
Sensor slots for proximity sensor SME/SMT-8 are included in the stop elements. The proximity sensor's LED position display can be viewed at the two display windows in the housing cover, even when the linear module is closed.

Clamping unit

A clamping cartridge holds the clamping rod by means of friction (for safety in the event of pressure failure). The clamping rod is attached to the front plate. When the clamping cartridge is pressurised, the guide

rods move freely along with the front plate and the yoke plate. The clamping cartridge can be released by means of an integrated manual override.

Active intermediate position

Travel to any desired position between the end positions of the linear module is made possible with an additionally attached cylinder, and an additional stop element. The intermediate position can be approached from

either the rear or the front end position. Furthermore, continued travel in the original direction is also possible from the intermediate position.

Reinforcing plate

For additional stability, especially for multi-axis operation. The reinforcing plate is attached via the front plate and the yoke plate. Additional functions include a dovetail for

flexible adaptation, and three through-holes through which tubing or cables can be fed, or which can be used for direct air connection.

Linear modules HMPL

System example

System elements and accessories		
	Brief description	→ Page/Internet
1	Drives	Wide range of combination options within handling and assembly technology drive
2	Grippers	Wide range of combination options within handling and assembly technology gripper
3	Basic components	Profiles and profile combinations as well as profile/drive combinations basic component
4	Installation components	For achieving a clear-cut, safe layout for electrical cables and tubing installtion component
-	Adapters	For combining drives with drives and drives with grippers adapter kit
-	Axes	Wide range of combination options within handling and assembly technology axes
-	Motors	Servo and stepper motors, with or without gearing motor

 X = Selected intermediate position

Linear modules HMPL

Technical data

Passive intermediate position HMMP-...-HMP

The intermediate position in the Z axis is approached with retracted Y axis. The counter-stop for the stop element (in this case mounted on the reinforcing plate VP on the linear module HMPL) is attached to the linear module HMP and is included in the scope of delivery.

 - Note
For reasons of rigidity, the retracted end position may not be moved forward more than 50 mm.

Linear modules HMPL

Product Range and Company Overview

A Complete Suite of Automation Services

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

Custom Automation Components
Complete custom engineered solutions

Custom Control Cabinets
Comprehensive engineering support and on-site services

Complete Systems
Shipment, stocking and storage services

The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

Electromechanical
Electromechanical actuators, motors, controllers & drives

Pneumatics
Pneumatic linear and rotary actuators, valves, and air supply

PLCs and I/O Devices
PLC's, operator interfaces, sensors and I/O devices

Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 12,000 employees in 56 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.
