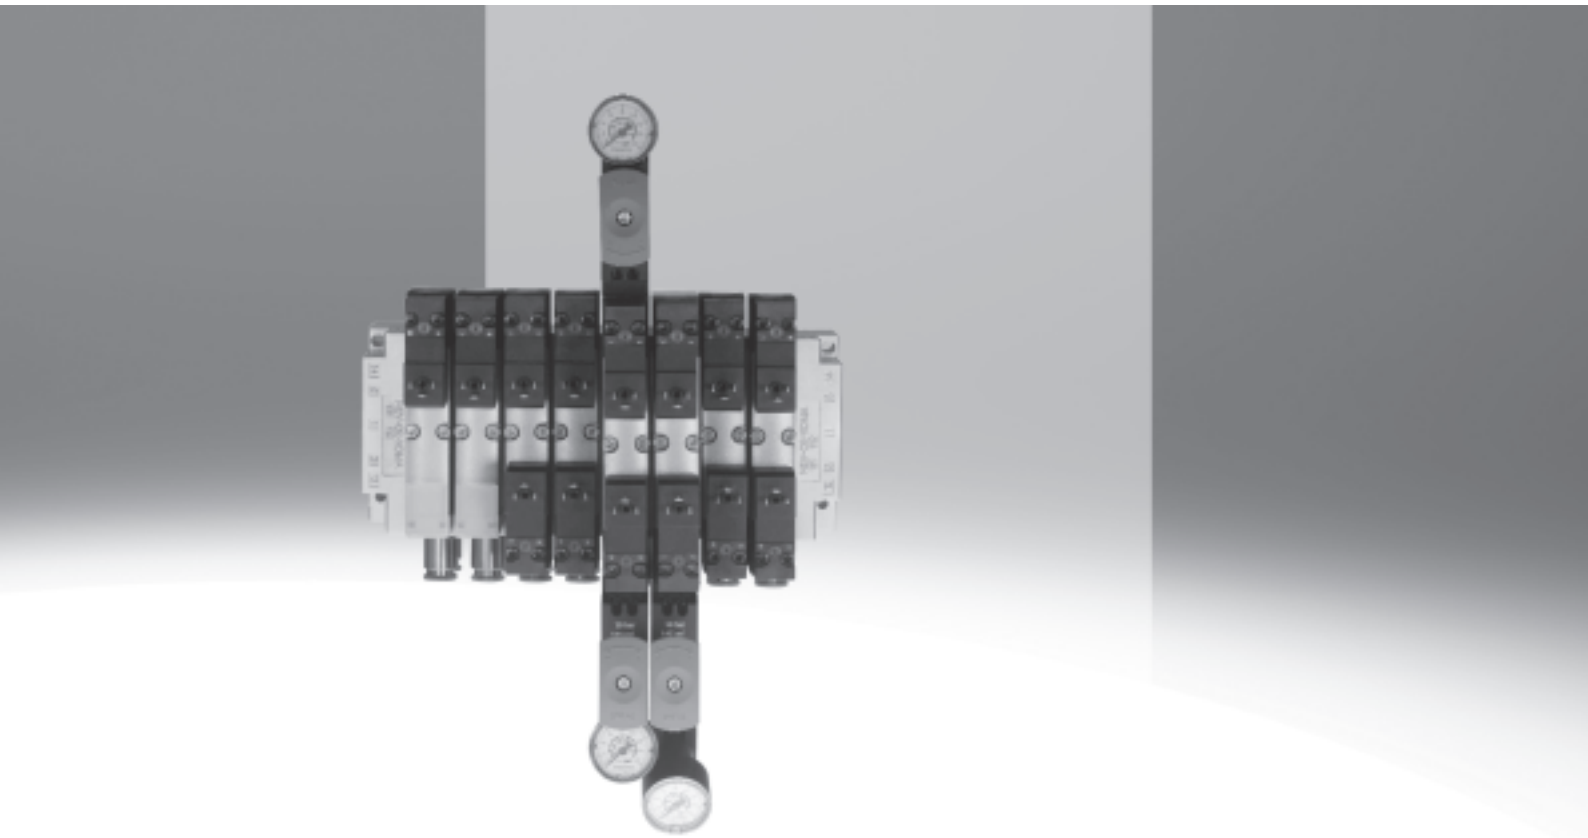
Solenoid/pneumatic valves, ISO 15407-1

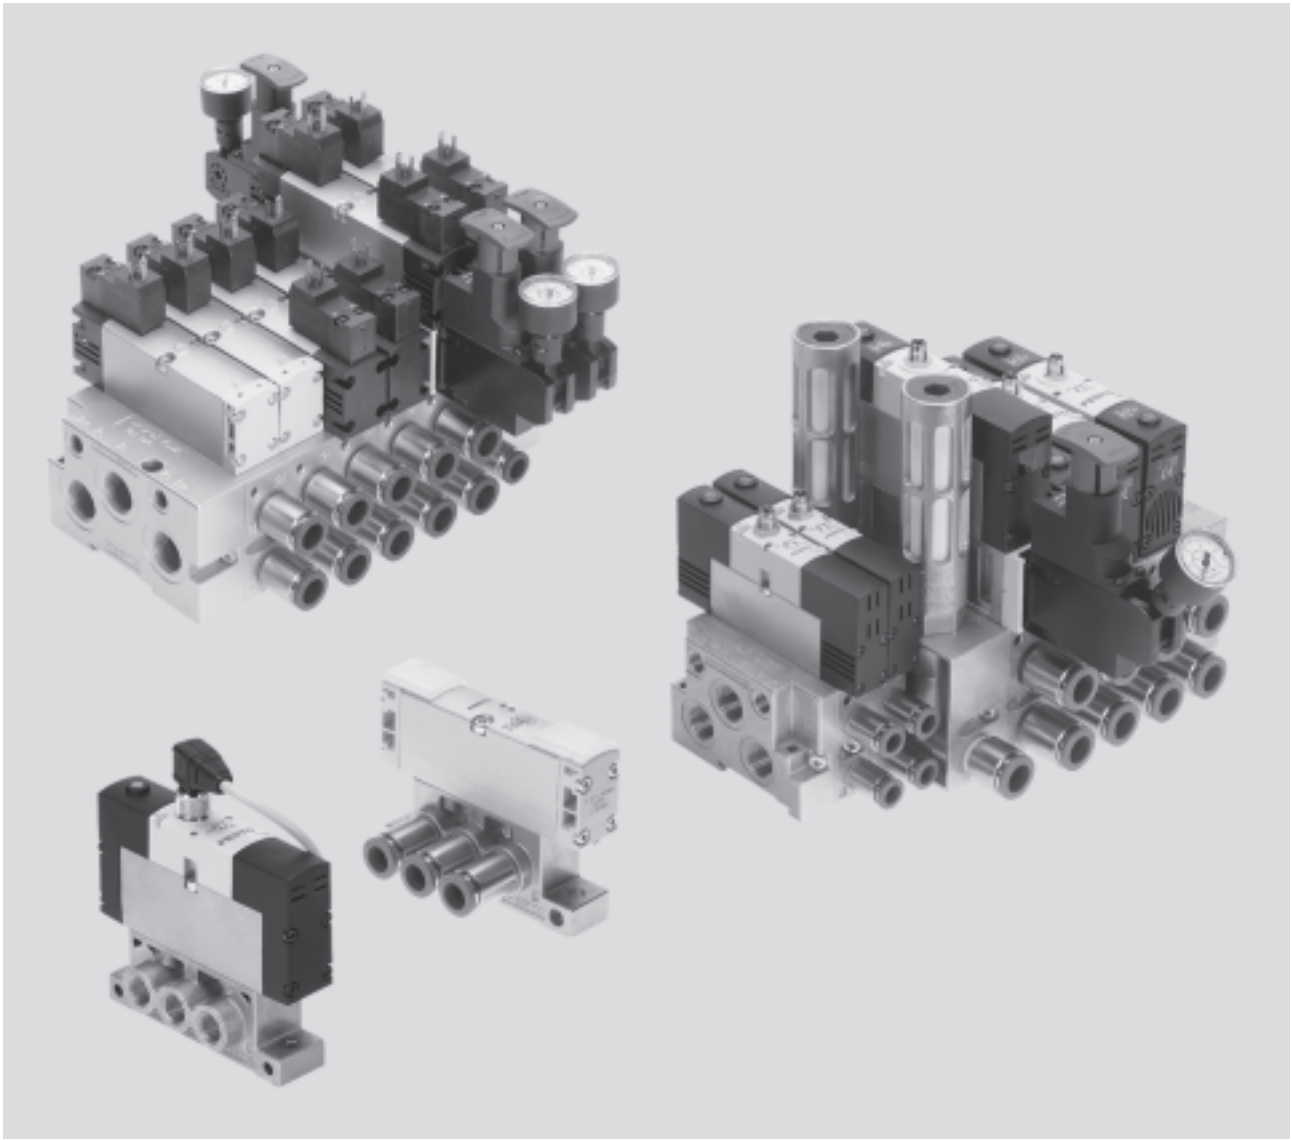
FESTO



New

Solenoid valves VSVA, ISO 15407-1

Key features



Innovative

- High-performance valves in sturdy metal housing
- Individual electrical connection via square plug sockets or centrally for each valve via round plug sockets
- Valve replacement under pressure possible using vertical shut-off plate
- Reverse operation
- Vacuum operation

Flexible

- Modular system offering a range of configuration options
- Conversions and extensions are possible at any time
- Integration of innovative function modules possible
  - Pressure regulator plate
  - Flow control plate
  - Vertical shut-off plate
  - Vertical supply plate
- Vertical supply plates permit a flexible air supply and variable pressure zones
- Wide range of valve functions
- Extensive operating voltage range from 12 V DC to 230 V AC

Reliable

- Sturdy and durable metal components
  - Valves
  - Horizontal stacking plates
  - Vertical stacking plates
- Fast troubleshooting thanks to LED in the plug socket or illuminating seal
- LED integrated in the valve with the round plug variant
- Reliability of service thanks to valves that can be replaced easily and quickly
- Manual override
- Durable thanks to the use of tried-and-tested piston spool valves

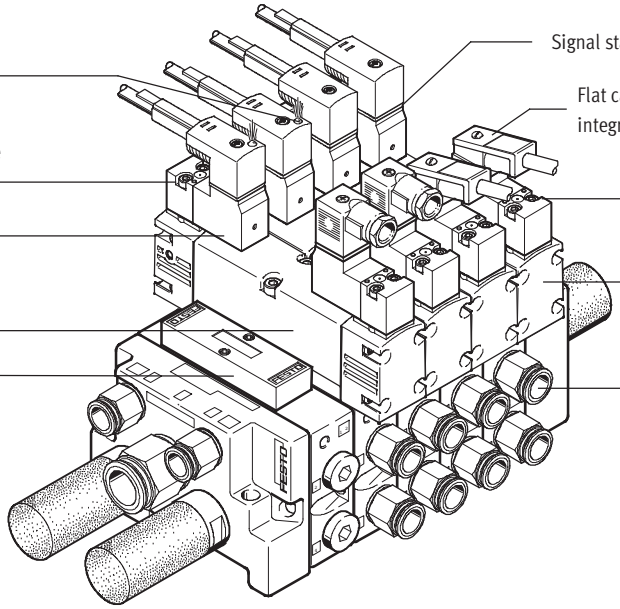
Easy to assemble

- Secure wall mounting or H-rail mounting
- Combi manifolds of width 18 mm and 26 mm
- Plug-in pressure gauges on the pressure regulator

Solenoid valves VSVA, ISO 15407-1

Key features

Individual valve manifold



Equipment options

5/2-way valve

- Single solenoid, pneumatic or spring return
- Bistable, double solenoid valve
- Bistable, double solenoid valve with dominance at 14

2x 3/2-way valve, single solenoid

- Normally open
- Normally open, reversible (on request)
- Normally closed
- Normally closed, reversible (on request)
- 1x normally open, 1x normally closed
- 1x normally open, 1x normally closed, reversible (on request)

5/3-way valve, double solenoid

- Mid-position valve
  - Normally open
  - Normally closed
  - Normally exhausted

Special features

Operation with external pilot air

- For vacuum applications
- For working pressures lower than 3 bar
- For pressure fluctuations in the power section. Power section and pneumatic control section are decoupled
- For strongly lubricated air in the power section
- For manifolds if the pressure zones are created via ducts 3 and 5 (not possible with 2x 3/2)
- For manifolds or pressure zones that are equipped with reversible 2x 3/2-way valves

Operation with internal pilot air

- For small pressure fluctuations in the power section
- For using pressure regulator plates in a vertical stacking construction, also in reverse operation
- As a low-cost solution

Reverse operation with pressure supply via ducts 3 and 5

- Pressure zone separation via ducts 3 and 5
  - Example: Duct 3 vacuum, duct 5 ejector pulse
  - Example: Duct 3 high pressure for advancing the piston rod of a double-acting cylinder. Duct 5 low pressure for retracting the piston rod with low energy consumption
- 2x 3/2-way valves used as 5/4-way valve with controllable overlapping with the reversible variant

Reverse operation with a pressure regulator plate, compressed air supply via duct 1

- Reversible pressure regulator combined with a reversible 2x 3/2-way valve regulates outputs 2 and 4
  - AB regulator for outputs 2 and 4
  - A regulator for output A
  - B regulator for output 2
- Reversible pressure regulators are in the control position immediately after the power supply is switched on
  - Adjustment possible at all times
  - Dynamic response characteristics
  - Reduced regulator load because the supply pressure is maintained when the valve is switched
  - Venting not via the regulator

New

Solenoid valves VSVA, ISO 15407-1

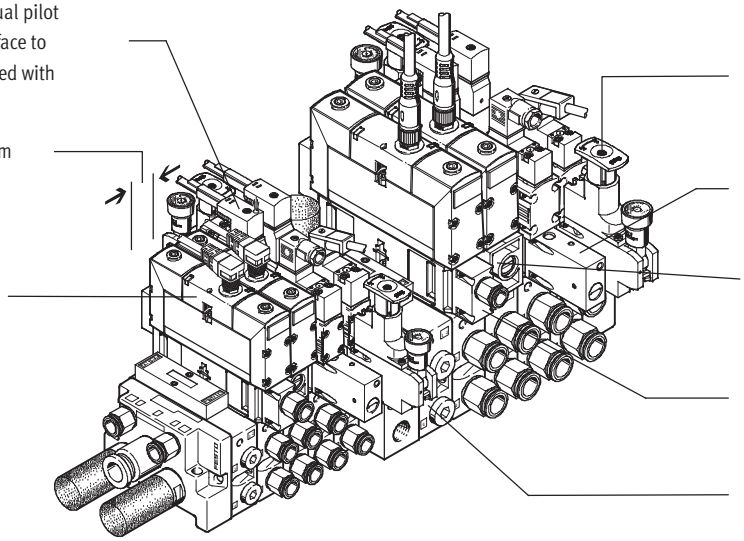
Key features

Valve manifold with combination of sizes and vertical stacking

Solenoid valve with individual pilot valves and pneumatic interface to ISO 15218. Can be connected with square plug sockets

Widths of 18 mm and 26 mm can be combined

Solenoid valve with central round plug



Pressure regulator for adjusting the force of the actuated drive

Pressure shut-off plate for solenoid valve replacement during operation

Flow control plate in the valve manifold for adjusting the speed of the drive

Supply plate for compressed air supply of a control chain as a separate pressure zone

Intermediate plate as interface between width 18 mm and width 26 mm

Vertical stacking function

Pressure regulator

- Single variant to regulate the pressure at output 4(A) or 2(B) or at input 1(P)
- Dual variant to regulate the pressure at output 4(A) and 2(B) individually
- Reverse variant for the outputs so that the regulator is in the control position
- With pressure gauge connection

Flow control plate

- Designed with two flow control valves, on which the exhaust air flow rate at exhausts 5 or 3 can be adjusted. The movement of the drive can thus be initiated and the desired speed set on the manifold using the manual override

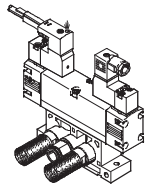
Vertical shut-off plate

- Equipped with a switch via which the compressed air supply can be shut off. A directional control valve or subsequent vertical stacking plate can thus be replaced without switching off the overall air supply
- If the control chain has a redundant connection, the cycle can continue in the case of a cyclical control system

Vertical supply plate

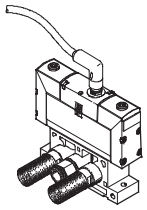
- As additional air supply for one valve
- To supply a third pressure zone

Individual connection with square plug, type C



The directional control valve has a pilot control to ISO 15218 and a plug pattern to DIN EN 175301-803, type C.

Individual connection with central round plug



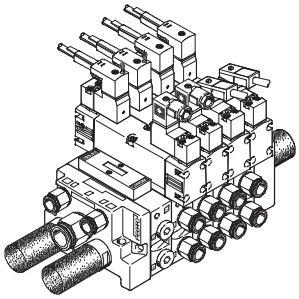
The electrical connection is established using a standardised M12 or M8 socket 24 V DC (EN 61076-2-101).

Solenoid valves VSVA, ISO 15407-1

Key features

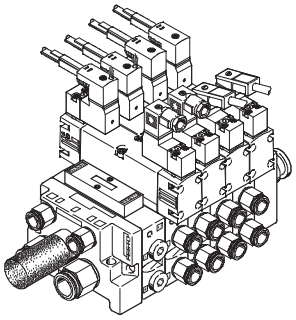
FESTO

Individual valve manifold, directional control valves with square plug, type C



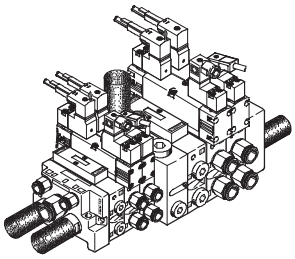
Variant
- Width 26 mm
- Vacant position
- Compressed air supply via duct 1
- External pilot air supply
- QS push-in fittings
- Venting via silencer for ducts 3 and 5

Individual valve manifold, pressure zones via ducts 3 and 5



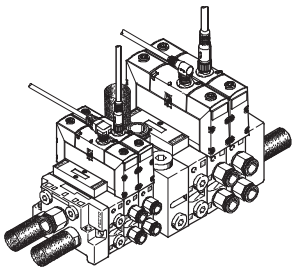
Variant
- Width 26 mm
- Vacant position
- Compressed air supply via ducts 3 and 5
- External pilot air supply
- QS push-in fittings
- Venting via silencer

Valve manifold equipped with width 18 mm and 26 mm, directional control valves with square plug, type C



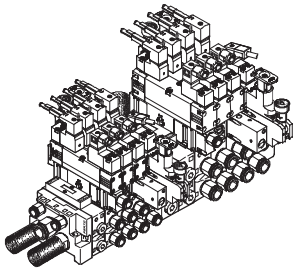
Variant
- Width 18 mm and 26 mm combined via intermediate plate
- Vacant positions
- Compressed air supply via duct 1
- External pilot air supply
- QS push-in fittings
- Venting via silencer for ducts 3 and 5 on the end plates and for duct 3 also on the intermediate plate

Valve manifold equipped with width 18 mm and 26 mm, directional control valves with central round plug



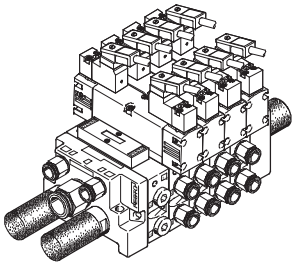
Variant
- Width 18 mm and 26 mm combined via intermediate plate
- Vacant positions
- Compressed air supply via duct 1
- Internal pilot air supply
- QS push-in fittings
- Venting via silencer for ducts 3 and 5 on the end plates and for duct 3 also on the intermediate plate

Maximum valve manifold expansion with all vertical stacking components



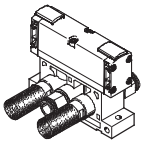
Variant
- Width 18 mm and 26 mm combined via intermediate plate
- Directional control valves with square plug
- Pressure regulators
- Flow control plates
- Shut-off plates
- Supply plates with vacant position

Individual valve manifold with cable routing in one direction



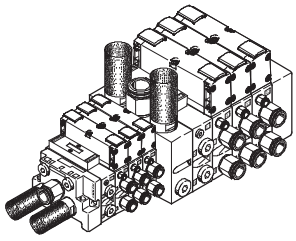
Variant
- Width 26 mm
- Solenoid coils 220 V DC
- Plug socket with cable KMEB-2
  - With plug socket with cable KMEB-1 the outgoing direction of the cable cannot be chosen with AC coils

Pneumatically actuated directional control valve on individual sub-base



Directional control valves on an individual sub-base can be used for drives that are further away from a valve manifold or when there is only one drive available.

Valve manifold equipped with width 18 mm and 26 mm with pneumatically actuated directional control valves



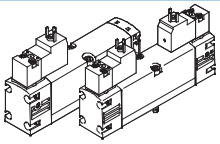
Variant
- Width 18 mm and 26 mm combined via intermediate plate
- Vacant positions
- Compressed air supply via duct 1
- QS push-in fittings
- Venting via silencer for ducts 3 and 5 on the end plates and for ducts 3 and 5 also on the intermediate plate

New

Solenoid valves VSVA, ISO 15407-1

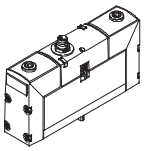
Key features

Solenoid valves with square plug, type C



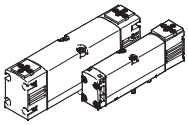
Designs
- Width 18 and 26 mm
- 2x 3/2-way, 5/2-way and 5/3-way valves
- 2x 3/2-way valves for reverse operation
- Internal or external pilot air supply available
- 12, 24 V DC, 24, 110 or 220 V AC

Solenoid valves with central round plug



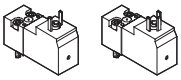
Variants
- Width 18 and 26 mm
- 2x 3/2-way, 5/2-way and 5/3-way valves
- Internal or external pilot air supply available
- 24 V DC

Basic valves with interface to ISO 15218



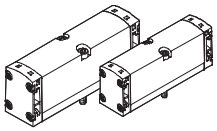
Variants
- Width 18 and 26 mm
- 2x 3/2-way, 5/2-way and 5/3-way valves
- Internal or external pilot air supply available

Pilot valve with interface to ISO 15218



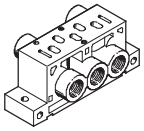
Variants
- For 12, 24 V DC and 24 V AC without protective earth conductor
- For 110 and 220 V AC with protective earth conductor
- 3/2-way valve
- Manual override, non-detenting

Pneumatically actuated directional control valves



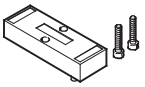
Variants
- Width 18 and 26 mm
- 2x 3/2-way, 5/2-way and 5/3-way valves
- Signal inputs 12 and 14 via the sub-base

Individual sub-base



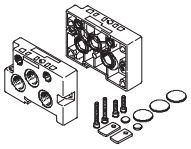
Variants
- Width 18 and 26 mm
- Ports 12 and 14 for external pilot air supply for solenoid valves and
- Ports signal inputs 12 and 14 for pneumatically actuated valves are the same

Blanking plate for vacant positions



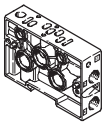
Variants
- Width 18 and 26 mm

End plate kit



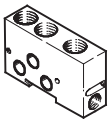
Variants
- Width 18 mm and 26 mm
- Ports 12 and 14 for external pilot air supply for solenoid valves
- For pneumatically actuated valves the signal inputs are only on the manifold sub-base suitable for this purpose

Manifold sub-base/series sub-base



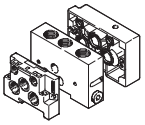
Variants
- Width 18 mm and 26 mm
- For solenoid valves
- For pneumatically actuated valves with additional ports for the signal inputs

Intermediate plate



Variant
- Adapter between width 18 mm and 26 mm
- With additional sir supply port and exhaust ports

Intermediate plate kit

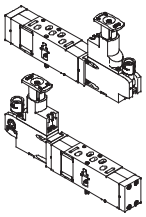


Variant
- Intermediate plate as adapter between width 18 mm and 26 mm
- One 18 mm and one 26 mm end plate

Solenoid valves VSVA, ISO 15407-1

Key features

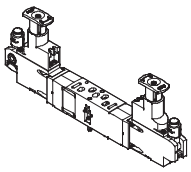
Pressure regulator plate with one pressure regulator



Variants

- Width 18 mm and 26 mm
- For pressure regulation on the supply input 1(P). Set pressure is the same for output 2 and 4
- For pressure regulation on the working port 4 (A)
  - The pressure regulators for reverse operation are supplied via port 1 of the sub-base and supply port 5 on the directional control valve
  - The directional control valve vents via port 1 to port 3 and 5 of the sub-base.
- For pressure regulation on the working port 2 (B)
  - In reverse operation input 3 is supplied here

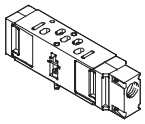
Pressure regulator plate with two pressure regulators



Variants

- Width 18 mm and 26 mm
- For pressure regulation on the working ports 4 (A) and 2 (B)
  - The pressure regulators for reverse operation are supplied via port 1 of the sub-base and supply inputs 5 and 3 on the directional control valve
  - The directional control valve vents via port 1 to port 3 and 5 of the sub-base.

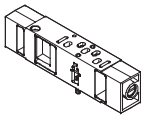
Vertical supply plate



Variants

- Width 18 mm and 26 mm
- As intermediate supply
  - For one valve
  - To supply a third pressure zone
- Can be equipped with a directional control valve

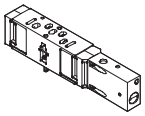
Flow control plate



Variants

- Width 18 mm and 26 mm
- Exhaust air restriction in ducts 3 and 5
  - For pressure zones that are formed via ducts 3 and 5 the flow control plates function as supply air restrictors

Vertical shut-off plate



Variants

- Width 18 mm and 26 mm
- A switch activated with a slotted head screwdriver shuts off duct 1.
  - The overlying flow control plates, pressure regulator plates or directional control valves can be replaced
  - Other components of the control chain such as drives, for example, can be replaced following venting via the directional control valve

Pressure gauge

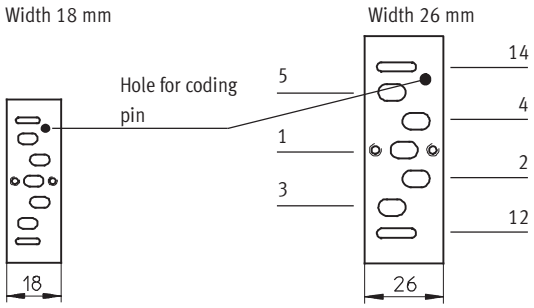
Variant

- Can be connected to the pressure regulator plates

Solenoid valves VSVA, ISO 15407-1

Key features

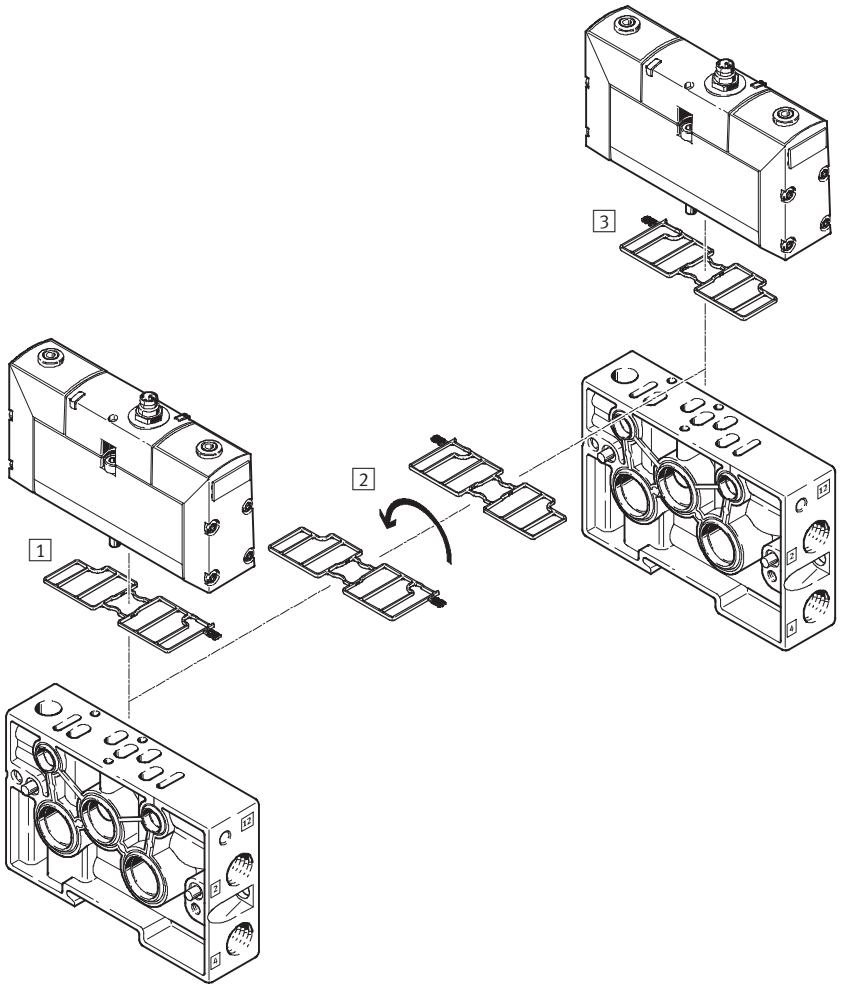
Port pattern on sub-base to ISO 15407-1



VSVA

Conversion of pilot air venting

VSVA valve manifolds are supplied with unducted ventilation of the pilot air. By turning the seal between the valve and manifold block, ventilation (pilot air) can be diverted into the pilot duct 12 and it can thus be contained and silenced (see Figure).



1 Ducted pilot air venting
2 Turning of seal by 180°
3 Unducted pilot air venting (as supplied)

Solenoid valves VSVA, ISO 15407-1

FESTO

Key features

Application of 2x 3/2-way valve as 5/4-way valve

Code	Circuit symbol	Value table	Equivalent circuit symbol	Function
K		Y1 Y2 A 0 0 0 1 1 0 1 1		• Normally exhausted • A double-acting drive connected to outputs 2 and 4 is unpressurised when the valve is in the normal position and can be moved by an external force • If there is a signal present at Y1(14) and Y2(12), there is pressure at outputs 2 and 4
		Y1 Y2 A 0 0 0 1 1 0 1 1		• Normally closed (by combining directional control valve code K and two piloted non-return valves) • The piloted non-return valves connected to outputs 2 and 4 are unpressurised when the valve is in the normal position and the pressures in the drive close the non-return valves leak-tight • The drive stops when the forces are in equilibrium • Leakages can only occur via the drive seals • If there is a signal present at Y1(14) and Y2(12), the same pressure is present at outputs 2 and 4
N		Y1 Y2 A 0 0 0 1 1 0 1 1		• Normally open • A double-acting drive connected to outputs 2 and 4 is fed with the same compressed air at both ends when the valve is in the normal position and stops when the forces are in equilibrium • If there is a signal present at Y1(10) and Y2(10), outputs 2 and 4 are exhausted, the drive is unpressurised and can be moved by an external force
H		Y1 Y2 A 0 0 0 1 1 0 1 1		• Normally open after output 2 • A double-acting drive connected to outputs 2 and 4 is fed with compressed air via output 2 when the valve is in the normal position. Output 4 is exhausted. The drive is thus in a clearly defined position in the initial position, as would also be the case with a single solenoid 5/2-way valve • If there is a signal present at Y1(14) and Y2(10), output 2 is exhausted and pressure is fed to output 4. The drive leaves the initial position • With this 2x 3/2-way valve a closed circuit can be created by combining it with piloted non-return valves. However, this is then selected by an active signal at Y2(10)

Technical data – Directional control valves width 18 mm

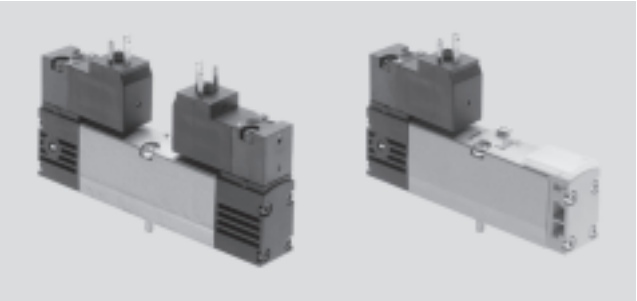
Flow rate

550 ... 700 l/min

Voltage

12, 24 V DC

24, 110, 230 V AC



General technical data								
Valve function		2x 3/2	5/2		5/3		
Normal position		C[1], U[2], H[4], N[5], F[6], W[7]	–	–	C[1]	U[2]	E[3]
Memory stability		Monostable		Bi-stable	Monostable		
Pneumatic spring reset method		Yes	Yes	–	No		
Mechanical spring reset method		No	Yes	–	Yes		
Design		Piston spool valve					
Sealing principle		Soft					
Actuation type		Solenoid					
Pilot control mode		Piloted					
Pilot interface		To ISO 15218					
Pilot air supply		Internal or external					
Direction of flow		Non-reversible	Reversible for external pilot air supply				
Exhaust function		Flow control					
Manual override		Pushing (non-detenting)					
Type of mounting		On sub-base					
Mounting position		Any					
Nominal diameter	[mm]	5					
Flow rate of valve	[l/min]	550	700		650		
Flow rate of valve on individual sub-base	[l/min]	500	600		550		
Flow rate of valve, pneumatically interlinked	[l/min]	400	550		450		
Standard nominal flow rate	[l/min]	400	550		450		
Switching time on/off, pneumatic spring	[ms]	13/21	21/19	–	–		
Switching time on/off, mechanical spring	[ms]	–	17/35	–	18/30		
Switching time on/off, for N, F and W	[ms]	21/13	–	–	–		
Changeover time	[ms]	–		15	–		
Freedom from overlap		Yes					
Width	[mm]	18					
Ports on the sub-base 1, 2, 3, 4, 5		G1/8					
12, 14		M5					
Tightening torque, valve mounting	[Nm]	0.9 ... 1.1					
Product weight	[g]	174	127	174			
Noise level	[dB (A)]	85					
Conforms to		ISO 15407-1 and interface for pilot valve ISO 15218					
Corrosion resistance class	CRC	0[8]					
CE mark[9] (see declaration of conformity)		To EU Low Voltage Directive					

1) C=Normally closed
2) U=Normally open
3) E=Normally exhausted
4) H=2x 3/2-way valve in one housing with 1x normally closed and 1x normally open
5) N=Normally closed, reverse operation, i.e. the pressure supply ports are 3 and 5, venting is via port 1
6) F=Normally open, reverse operation, i.e. the pressure supply ports are 3 and 5, venting is via port 1
7) W=2x 3/2-way valve in one housing with 1x normally closed and 1x normally open, reverse operation, i.e. the pressure supply ports are 3 and 5, venting is via port 1
8) CRC 0: Very light or no protection, no corrosion stress. Applies to small, visually unimportant standard parts such as threaded pins, circlips, clamping sleeves, etc. that are normally only offered on the market phosphated or burnished (if applicable oiled) as well as to ball bearings (for components < CRC 3) and plain bearings.
9) With solenoid valves with 110 V AC and 230 V AC

Technical data – Directional control valves width 26 mm

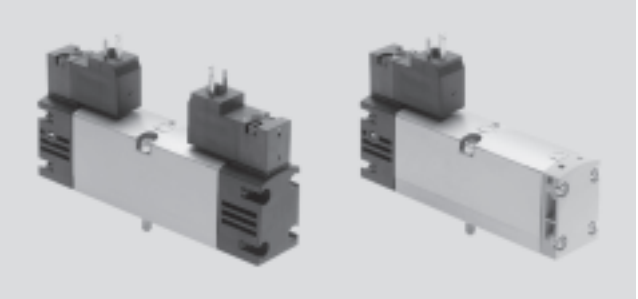
Flow rate

1,250 ... 1,400 l/min

Voltage

12, 24 V DC

24, 110, 230 V AC



General technical data								
Valve function		2x 3/2	5/2		5/3		
Normal position		C[1], U[2], H[4], N[5], F[6], W[7]	–	–	C[1]	U[2]	E[3]
Memory stability		Monostable		Bi-stable	Monostable		
Pneumatic spring reset method		Yes	Yes	–	No		
Mechanical spring reset method		No	Yes	–	Yes		
Design		Piston spool valve					
Sealing principle		Soft					
Actuation type		Electric					
Pilot control mode		Piloted					
Pilot interface		To ISO 15218					
Pilot air supply		Internal or external					
Direction of flow		Non-reversible	Reversible for external pilot air supply				
Exhaust function		Flow control					
Manual override		Pushing (non-detenting)					
Type of mounting		On sub-base					
Mounting position		Any					
Nominal diameter	[mm]	9					
Flow rate of valve	[l/min]	1,250	1,400		1,400		
Flow rate of valve on individual sub-base	[l/min]	1,000	1,100		1,100		
Flow rate of valve, pneumatically interlinked	[l/min]	900	1,100		1,000		
Standard nominal flow rate	[l/min]	900	1,100		1,000		
Switching time on/off, pneumatic spring	[ms]	20/28	35/43	–	–		
Switching time on/off, mechanical spring	[ms]	–	26/56	–	23/58		
Switching time on/off, for N, F and W	[ms]	28/20	–	–	–		
Changeover time	[ms]	–		18	–		
Freedom from overlap		Yes					
Width	[mm]	26					
Ports on the sub-base	1, 2, 3, 4, 5	G¼					
	12, 14	M5					
Tightening torque, valve mounting	[Nm]	1.8 ... 2.2					
Product weight	[g]	305	260	305			
Noise level	[dB (A)]	85					
Conforms to		ISO 15407-1 and interface for pilot valve ISO 15218					
Corrosion resistance class	CRC	0[8]					
CE mark[9] (see declaration of conformity)		To EU Low Voltage Directive					

1) C=Normally closed
2) U=Normally open
3) E=Normally exhausted
4) H=2x 3/2-way valve in one housing with 1x normally closed and 1x normally open
5) N=Normally closed, reverse operation, i.e. the pressure supply ports are 3 and 5, venting is via port 1
6) F=Normally open, reverse operation, i.e. the pressure supply ports are 3 and 5, venting is via port 1
7) W=2x 3/2-way valve in one housing with 1x normally closed and 1x normally open, reverse operation, i.e. the pressure supply ports are 3 and 5, venting is via port 1
8) CRC 0: Very light or no protection, no corrosion stress. Applies to small, visually unimportant standard parts such as threaded pins, circlips, clamping sleeves, etc. that are normally only offered on the market phosphated or burnished (if applicable oiled) as well as to ball bearings (for components < CRC 3) and plain bearings.
9) With solenoid valves with 110 V AC and 230 V AC

Solenoid valves VSVA, ISO 15407-1/plug type C

Standard nominal flow rate	[l/min]	400			550		450		
Switching time on/off, pneumatic spring	[ms]	10/22			20/25	–	–		
Switching time on/off, mechanical spring	[ms]	–			12/34	–	15/36		
Changeover time	[ms]	–				10	–		
Non-overlapping		Yes							
Width	[mm]	18							
Ports on the sub-base 1, 2, 3, 4, 5		G1/8							
12, 14		M5							
Tightening torque, valve mounting	[Nm]	0.9 ... 1.1							
Product weight	[g]	140			140	140			
Noise level	[dB (A)]	85							
Conforms to		ISO 15407-1							
Corrosion resistance class	CRC	2[5]							
CE mark[6] (see declaration of conformity)		To EU Low Voltage Directive							

1) C = Normally closed
2) U = Normally open
3) E = Normally exhausted
4) H=2x 3/2-way valve in one housing with 1x normally closed and 1x normally open
5) Corrosion resistance class 2 as per Festo standard 940 070
Components subject to moderate corrosion stress. Externally visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment or media such as coolants or lubricating agents.
6) With solenoid valves with 110 V AC and 230 V AC

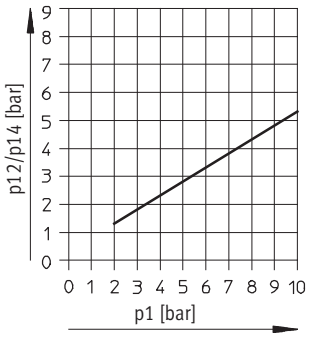
Solenoid valves VSVA, ISO 15407-1/central plug M8x1, M12x1

Technical data – Directional control valves width 18 mm

Operating and environmental conditions					
Valve function			2x 3/2	5/2	5/3
Operating medium			Filtered compressed air, grade of filtration 40 µm, lubricated or unlubricated, vacuum		
Operating pressure	Internal pilot air supply	[bar]	3 ... 8		3 ... 8
	External pilot air supply	[bar]	3 ... 10	–0.9 ... 10	
Pilot pressure		[bar]	3 ... 8[1)]	3 ... 8	3 ... 8
Ambient temperature		[°C]	–5 ... +50		
Temperature of medium		[°C]	–5 ... +50		
Fire protection classification to UL94			V0		
Paint-wetting impairment substances criterion			Yes (free of paint-wetting impairment substances)		

1) Pilot pressure dependent on operating pressure ➔ Graph

Minimum pilot pressure p12, p14 as a function of operating pressure p1 (external pilot air supply)



Electrical data			
Electrical connection to IEC 60 947-5-2			Central plug, round design, M8x1 or M12x1
Coil characteristics	Voltage	[V DC]	24±10% = 21.6 ... 26.4
	Output	[W]	High-current phase: 2.4; low-current phase: 1[1)]
Duty cycle		%	100
Protection class to EN 60529			IP65 (in combination with plug socket)
Protective circuit and LED			Integrated in the valve

1) Controlled by integrated current reduction

12	Type of manifold sub-base A, B	**M**	2, 4	G⅛ (QS-G⅛-8)	G¼ (QS-G¼-10)
12	Type of manifold sub-base AK, BK	**N**	2, 4	G⅛ (QS-G⅛-6)	G¼ (QS-G¼-8)

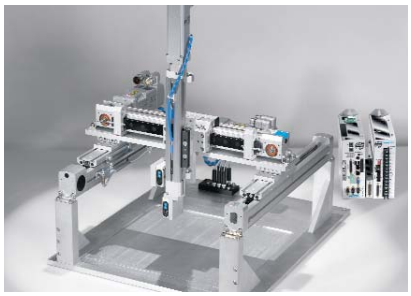
Product Range and Company Overview

A Complete Suite of Automation Services

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

Custom Automation Components
Complete custom engineered solutions

Custom Control Cabinets
Comprehensive engineering support and on-site services



Complete Systems
Shipment, stocking and storage services

The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

Electromechanical
Electromechanical actuators, motors, controllers & drives

Pneumatics
Pneumatic linear and rotary actuators, valves, and air supply

PLCs and I/O Devices
PLC's, operator interfaces, sensors and I/O devices

Supporting Advanced Automation... As No One Else Can!
Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 12,000 employees in 56 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.

Printed on recycled paper at New Horizon Graphic, Inc., FSC certified as an environmentally friendly printing plant.
