MS	Standard service unit																
Size																	
9	Grid dimension 90 mm																
Service function																	
LR	Pressure regulator																
Connection size																	
NG	Module without connecting thread, without connecting plate																
Pressure regulation range/operation																	
D5	0.5 ... 4 bar, manually operated																
D6	0.5 ... 7 bar, manually operated																
Alternative actuation principle																	
	Piloted																
DI	Directly actuated																
Pressure gauge																	
AG	MS pressure gauge																
Pressure gauge scale																	
PSI	Psi																
Security																	
AS	Rotary knob with detent, can be locked using accessories																

Additional variants can be ordered using the modular product system → 10

- Connecting plates
- Pressure regulation range/operation
- Pressure gauge alternatives
- Alternative pressure gauge scale
- Secondary venting
- Security lock
- Type of mounting
- Alternative flow direction

Pressure regulators MS9-LR, MS series, NPT

Technical data

Pressure regulation range/operation
D5/D6/D7/D8, manually operated

P0, pneumatically actuated

Flow rate
6,500 ... 33,000 l/min

Temperature range
-10 ... +60 °C

Pressure
1 ... 20 bar

The pressure regulator maintains an essentially constant output pressure p2 independent of pressure fluctuations in the system and air consumption. The output pressure p2 can be set within the pressure regulation range either manually

using the rotary knob or pneumatically via a pilot pressure p12 by an external pilot regulator. When switching off the operating pressure, the output pressure p2 is vented via connection 3 (secondary venting).

- Good regulation characteristics with low hysteresis and primary pressure compensation
- High flow rate with minimal pressure drop
- Piloted or directly actuated diaphragm regulator
- Four pressure regulation ranges:
0.5 ... 4 bar, 0.5 ... 7 bar,
0.5 ... 12 bar and 0.5 ... 16 bar

- Available with or without secondary venting
- Actuator lock to protect set values against adjustment
- Return flow option for exhausting from output port 2 to output port 1 already integrated
- Optional pressure sensor

General technical data				
Pneumatic connection 1, 2		NPT3/4-14	NPT1-11½	NPT½-14 ... NPT1½-11½ (with connecting plate AQ...)
Pilot air connection 12 with pressure regulation range/operation P0		G1/4		
Design		Piloted diaphragm regulator		
		Directly actuated diaphragm regulator		
Regulator type	Piloted	Output pressure constant, with return flow action, with primary pressure compensation, with secondary venting		
	Directly actuated	Output pressure constant, with return flow action, with/without secondary venting		
Type of mounting		Via accessories		
		In-line installation		
		Front panel mounting		
Mounting position		Any ¹⁾		
Actuation security		Rotary knob with detent		
		Rotary knob with detent, can be locked using accessories		
		Rotary knob with integrated lock		
Pressure regulation range/operation	D5 [bar]	0.5 ... 4, manually operated		
	D6 [bar]	0.5 ... 7, manually operated		
	D7 [bar]	0.5 ... 12, manually operated (0.5 ... 10 with pressure sensor variant AD...)		
	D8 [bar]	0.5 ... 16, manually operated (0.5 ... 10 with pressure sensor variant AD...)		
	P0 [bar]	0.5 ... 16, pneumatically actuated ²⁾		
Max. pressure hysteresis [bar]		0.4		
Pressure display		Via pressure sensor for displaying output pressure via operational status indicator and electrical output		
		Via pressure gauge for displaying output pressure		
		Via pressure gauge with red/green scale for displaying output pressure		
		G1/4 prepared		

1) The pressure regulator must be mounted vertically when combined with a pressure sensor as condensate must not collect in the pressure sensor.

2) Output pressure p2 corresponds roughly to the applied pilot pressure p12.

Pressure regulators MS9-LR, MS series, NPT

Product Range and Company Overview

A Complete Suite of Automation Services

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

Custom Automation Components
Complete custom engineered solutions

Custom Control Cabinets
Comprehensive engineering support and on-site services

Complete Systems
Shipment, stocking and storage services

The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

Electromechanical
Electromechanical actuators, motors, controllers & drives

Pneumatics
Pneumatic linear and rotary actuators, valves, and air supply

PLCs and I/O Devices
PLC's, operator interfaces, sensors and I/O devices

Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 12,000 employees in 56 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.
