

## Rotary lifting modules EHMB, electric

**FESTO**

# Rotary lifting modules EHMB, electric

Key features

FESTO

## At a glance

The rotary lifting module EHMB combines rotary and linear movement in one compact unit. The rotary movement is transmitted to a hollow shaft via a toothed belt driven by an electric motor while the linear movement is generated either by

means of a pneumatic cylinder DNC or an electric cylinder DNCE. Both movements act on the output flange, which is compatible with the semi-rotary drive DRQD, so that numerous grippers can be used. Cables and tubing can be easily

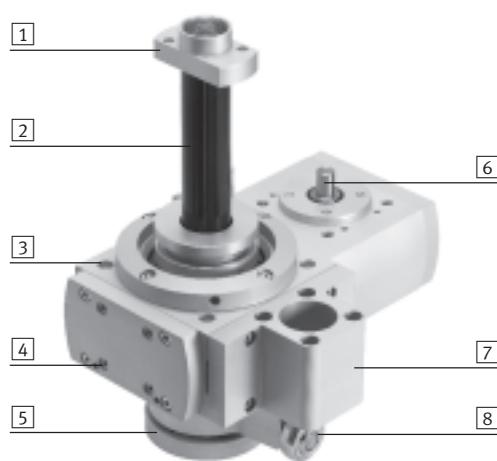

routed to the front end of the rotary lifting module through the large hollow shaft. The movement range can also be sensed via proximity sensors at the rotary unit and the cylinder.

Advantages:

- Large hollow shaft
- Stable bearing arrangement
- Various motors and cylinders enable easy adaptation of the performance to the application

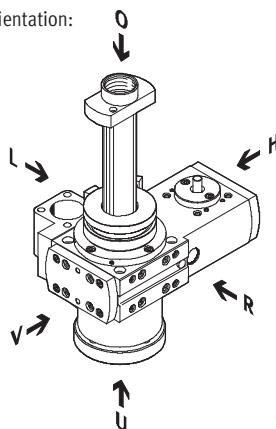

## The technology in detail

- [1] Stop nut
- [2] Grooved-shaft guide
- [3] Through-hole for mounting
- [4] Mounting thread/holes
- [5] Output flange with centring and threaded holes for effective load. The interface corresponds to that of the pneumatic semi-rotary drive DRQD
- [6] Drive shaft for rotary movement
- [7] Cylinder retainer
- [8] Rod eye and connection bolt for linear movement

## Flexible connection

Orientation:

O= top  
U= underneath  
R= right  
V= front  
L= left  
H= rear

- The rotary lifting module EHMB can be mounted on four sides:
  - On the right or left of the housing (L, R)
  - On the front cover (V)
  - Underneath the housing (U)
- The cylinder retainer can be mounted on three sides:
  - On the right or left of the housing (L, R)
  - On the front, after removing the front cover (V)
- The side where the cylinder retainer is mounted cannot be used for mounting the rotary lifting module.
- A pneumatic standard cylinder DNC or an electric cylinder DNCE can be attached to the cylinder retainer (these cylinders must be ordered separately).

## Note

Eccentric loads can destroy the bearing.  
The front side (V) is only permissible for mounting with a symmetrical applied load.

## Note

When installing electric cables or compressed air tubing through the hollow shaft of the grooved-shaft

guide, the rotation angle of the EHMB must be limited to a value that is dependent on the cables or

compressed air tubing. Endless rotation damages cables and tubing.

FESTO

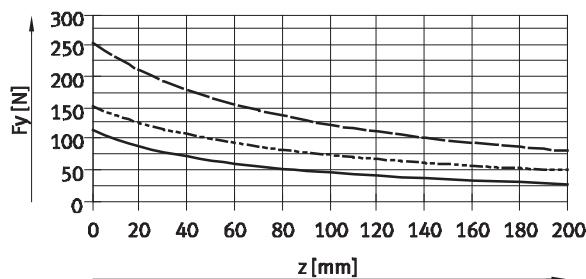

## Maximum radial and axial force Fy/Fz at the output shaft as a function of distance x/z

If the rotary module is subjected to two or more forces at once, the following equation must be satisfied in addition to the maximum loads indicated below.

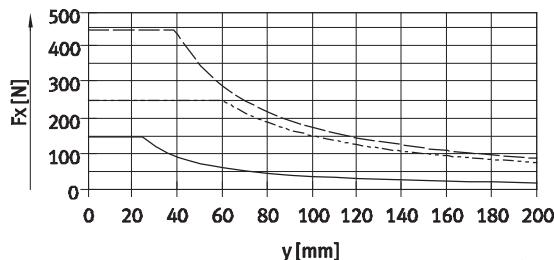

$$\frac{|Fx|}{Fx_{max.}} + \frac{|Fy|}{Fy_{max.}} + \frac{|Fz|}{Fz_{max.}} \leq 1$$

## Max. radial force Fy, dynamic

## Max. axial force Fx, dynamic, pushing and pulling

With motor unit			
MTR-DCI-42S-...	1570950	EAMM-U-60-D40-42B/C-91	

1) The parallel kit EAMM-U-50-.. cannot be operated in combination with the cover EASC-H1 in all attachment positions.

2) The parallel kit EAMM-U-60-.. cannot be operated in combination with the cover EASC-H1.

3) The parallel kit EAMM-U-86-.. cannot be operated in combination with the cover EASC-H1 in all attachment positions.

## Note

The motor and/or axis shaft can optionally be supported with a counter bearing EAMG.

# Product Range and Company Overview

## A Complete Suite of Automation Services

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

**Custom Automation Components**  
Complete custom engineered solutions

**Custom Control Cabinets**  
Comprehensive engineering support and on-site services

**Complete Systems**  
Shipment, stocking and storage services

## The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

**Electromechanical**  
Electromechanical actuators, motors, controllers & drives

**Pneumatics**  
Pneumatic linear and rotary actuators, valves, and air supply

**PLCs and I/O Devices**  
PLC's, operator interfaces, sensors and I/O devices

## Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 12,000 employees in 56 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

## Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.
