Motor controllers CMMS-ST, for stepper motors

FESTO

Motor controllers CMMS-ST, for stepper motors

Key features

Comparison of motor controllers

Motor controller for motor type	CMMD-AS Servo motor	CMMS-AS Servo motor	CMMP-AS Servo motor	CMMS-ST Stepper motor
Positioning records	2x 63	63	255	63
Measuring system	Incremental/absolute		Analogue/incremental/absolute	Incremental
Extended I/O interface	4 working modes		Flexibly configurable	4 working modes
Notification of remaining distance	1 for n		Separately for all positions	1 for n
Torque reduction	No		Separately for all positions	No
Set linking	Linear		With branching	Linear
STO/SS1	To EN 61800-5-2		To EN 61800-5-2	To EN 61800-5-2

Performance characteristics

Compactness

- Small dimensions
- Full integration of all components for controller and power section, including RS232 and CANopen interface
- Integrated brake chopper
- Integrated EMC filters
- Automatic actuation for a holding brake
- Adheres to the current CE and EN standards without additional external measures (motor cable length of up to 15 m)

Motion control

- Can be operated as a torque, speed or position controller
- Integrated positioning controller
- Time-optimised (trapezoidal) or jerk-free (S-shaped) positioning
- Absolute and relative movements
- Point-to-point positioning with and without approximate positioning
- Position synchronisation
- Electronic gear unit
- 63 position sets
- 8 travel profiles
- Wide range of homing methods

Fieldbus interfaces

Integrated:

CANopen

Optional:

PROFIBUS

DeviceNet

Input/output

- Freely programmable I/Os
- High-resolution 12-bit analogue input
- Jog/teach mode
- Simple linking to a higher-level controller via I/O or fieldbus
- Synchronous operation
- Master/slave mode

Integrated sequence control

- Automatic sequence of position sets without a higher-level controller
- Linear and cyclic position sequences
- Adjustable delay times

Integrated safety functions

- The motor controller CMMS-ST support "Safe Torque off (STO)" and "Safe Stop 1 (SS1)" functions with protection against unexpected startup in accordance with EN 61800-5-2
- Protection against unexpected start-up
- Two-channel disconnection of the output stage
- Shorter response times in the event of an error

Interpolating multi-axis movement

- With a suitable controller, the CMMS-ST can perform path movements with interpolation via CANopen. The controller specifies setpoint position values in a fixed time pattern to this end. In between, the servo positioning controller independently interpolates the data values between two data points.

PROFIBUS®, DeviceNet®, CANopen® is a registered trademark of its respective trademark holder in certain countries.

# Motor controllers CMMS-ST, for stepper motors

Key features

Performance characteristics
Servo mode

- Encoder option (closed loop), in other words no step losses, following errors are corrected

Travel program

- Linking of any number of position sets into a travel program
- Step criteria for the travel program possible via digital inputs, for example

  MC – motion complete

  I/O – digital inputs
Library for EPLAN

ePLAN electric 8

EPLAN macros for fast and reliable planning of electrical projects in combination with motor controllers, motors and cables. This enables a high level of planning reliability, standardisation of documentation, no need to create symbols, graphics and master data.

Motor controllers CMMS-ST, for stepper motors

Key features

FCT software – Festo Configuration Tool
Software platform for electric drives from Festo

- All drives in a system can be managed and archived in a common project
- Project and data management for all supported device types
- Simple to use thanks to graphically-supported parameter entry

- Universal mode of operation for all drives
- Working offline at your desk or online at the machine
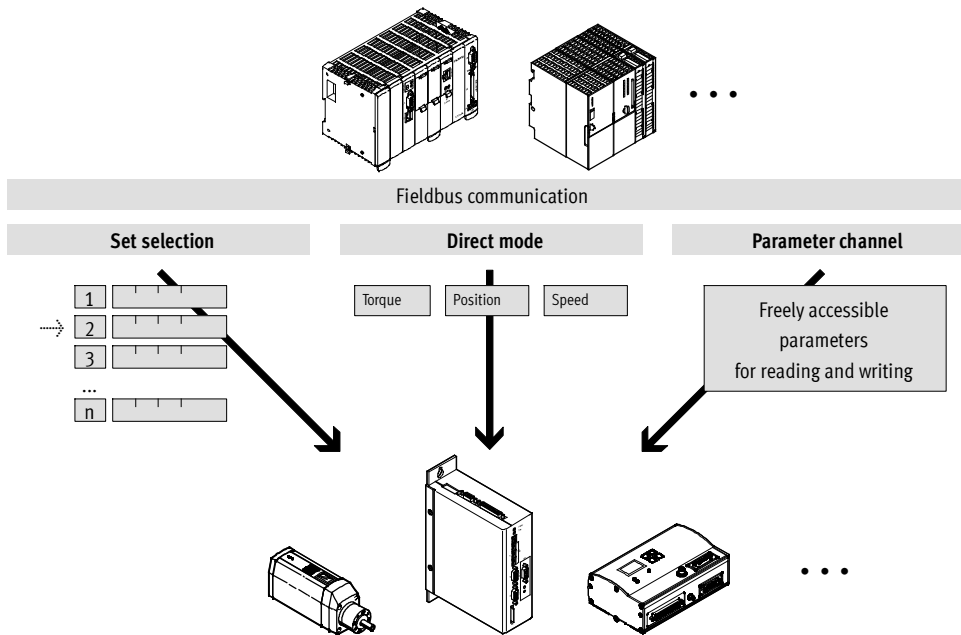

FHPP – Festo Handling and Positioning Profile
Optimised data profile

Festo has developed an optimised data profile, the "Festo Handling and Positioning Profile (FHPP)", that is tailored to handling and positioning applications.

The FHPP data profile permits the actuation of Festo motor controllers, using a fieldbus interface, via standardised control and status bytes.
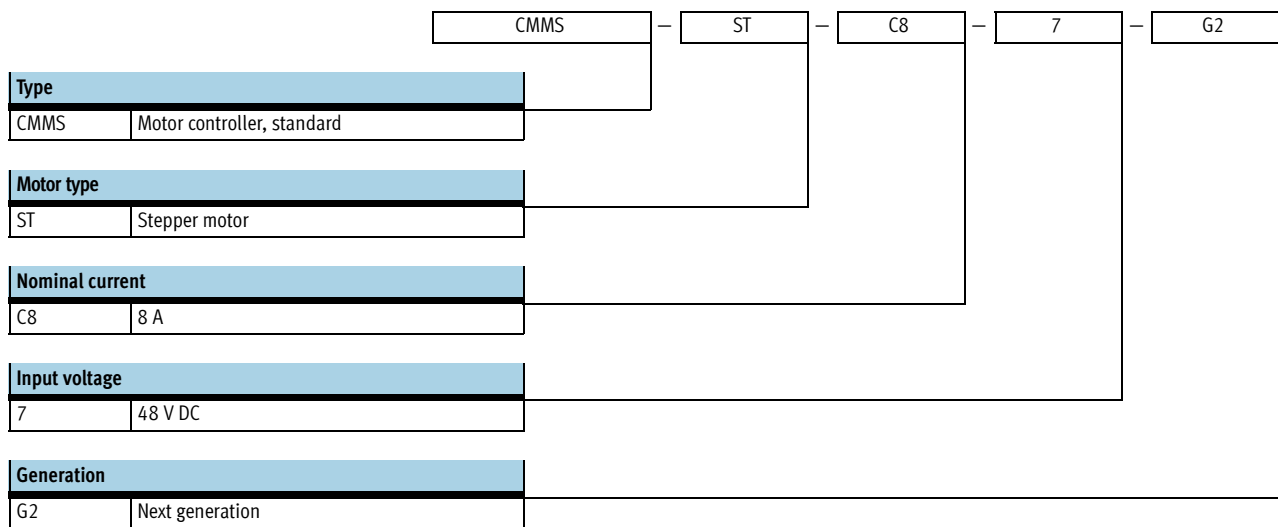

The following are defined, among others:
– Operating modes
– I/O data structure
– Parameter objects
– Sequence control

Fieldbus communication

General technical data		
Type of mounting		Screwed to a mounting plate
Operating mode		PWM MOSFET power amplifier
Motor actuation		Sinusoidal current impressing
Cycle rate	[kHz]	Constant 50
Rotary position generator		Encoder
Display		7-segment display
Parameterisation interface		RS232 (9,600 … 115,000 bits/s)
Encoder interface input		As speed/position specification for the slave drive in synchronous mode
		RS422
Encoder interface output		Setpoint specification for downstream slave drive
Brake resistor, integrated	[Ω]	17
Pulse power of braking resistor	[kVA]	0.5
Bus terminating resistor		Integrated
Impedance of setpoint input	[kΩ]	20
Number of analogue outputs		1
Operating range of analogue outputs	[V]	±10
Characteristics of digital logic outputs		Freely configurable in some cases
Number of analogue inputs		1
Operating range of analogue inputs	[V]	±10
Mains filter		Integrated
Product weight	[g]	900

Ordering data – Power supply units

|	Brief description	Input voltage range [V AC]	Nominal output voltage [V DC]	Nominal output current [A]	Part No.	Type
Power supply for motor controller	100 ... 240	24	5	547867	SVG-1/230VAC-24VDC-5A
			10	547868	SVG-1/230VAC-24VDC-10A
		48	5	542403	SVG-1/230VAC-48VDC-5A
			10	542404	SVG-1/230VAC-48VDC-10A
	400 ... 500		20	542405	SVG-3/400VAC-48VDC-20A

- Note

If a common power supply unit is used to supply the power section and the control section, the voltage tolerances for the supply to the control section cannot be maintained at high braking power. This can result in damage to the control section. Always use separate power supply units to supply the power section and the control section.
