# Angle grippers HGWM, micro

# **FESTO**

# Angle grippers HGWM, micro Key features

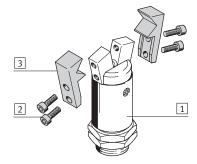

## At a glance

- Compact, handy design
- With open or closed gripper jaws
- Versatility thanks to externally adaptable gripper fingers
- Wide range of options for attaching drive units
- With stroke compensation after installation
- Mounting options:
  - Clamping spigot
- Male thread
- Note Sizing software Gripper selection →www.festo.com

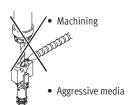

# Mounting options for external gripper fingers (customer-specific)

- 1 Angle gripper
- 2 External gripper fingers
- 3 Mounting screws

Grippers are not suitable for the following, or for similar applications:

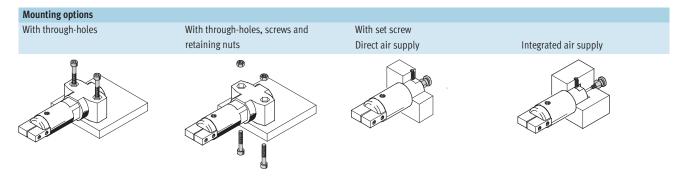

# Angle grippers HGWM, micro Key features

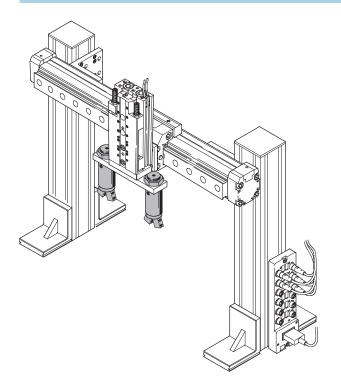

# With male thread and lock nut

stroke compensation

General technical da	ta					
Size				8	12	
Constructional design		Wedge-shaped drive				
Mode of operation				Single-acting		
Gripper function				Angle		
Number of gripper jav	VS			2		
Opening angle (±2°)	Gripper jaws	Open	[°]	20	18.5	
	open	Closed	[°]	4	3.5	
	Gripper jaws	Open	[°]	14	14	
	closed	Closed	[°]	4	4	
Spring resetting	Gripper jaws		[Ncm]	0.5	1.3	
torque <sup>1)</sup>	open					
	Gripper jaws		[Ncm]	0.55	1.5	
	closed					
Pneumatic connection	n			M3		
Repetition accuracy <sup>2)</sup>	3)		[mm]	< 0.02		
Max. operating freque	ency		[Hz]	4		
Position sensing		Without				
Type of mounting	HGWMEG6		With internally threaded cap screws			
HGWMG7		With lock nut				
	HGWMEG	i8		Clamped		

- 1) Spring resetting force between the gripper jaws
- 2) End position drift under constant conditions of use with 100 consecutive strokes in the direction of movement of the gripper jaws
  3) The indicated values are only valid when gripping with compressed air, not with spring force

Operating and environmental conditions			
Min. operating pressure	[bar]	2	
Max. operating pressure	[bar]	8	
Operating medium		Compressed air in accordance with ISO 8573-1:2010 [7:-:-]	
Ambient temperature	[°C]	+5 +60	
Corrosion resistance class CRC <sup>1)</sup>		2	

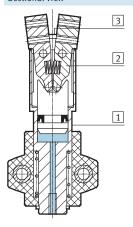

1) Corrosion resistance class 2 according to Festo standard 940 070 Components requiring moderate corrosion resistance. Externally visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment or media such as coolants or lubricating agents

Weights [g]				
Size	8	12		
With stroke compensation	23	75		
With male thread	14	52		
With clamping spigot	13	45		

**FESTO** 

#### Materials

#### Sectional view

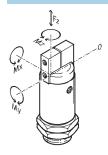

Angl	e gripper	
1	Body	Stainless steel
2	Gripper jaw	Stainless steel
3	Cover cap	Polyacetate
-	Note on materials	Copper, PTFE and silicone-free
		Conforms to RoHS

## Total gripping torque [Ncm] at 6 bar

Size	8		12	
	HGWMEO	HGWMEZ	HGWMEO	HGWMEZ
Total gripping torque				
Opening	-	24	-	76
Closing	22	-	64	-

## Characteristic load values at the gripper jaws

The indicated permissible forces and torques apply to a single gripper jaw. Static forces and torques relate to additional applied loads caused by

the workpiece or external gripper fingers, as well as forces which occur during handling. The zero co-ordinate

line (gripper jaws point of rotation) must be taken into consideration for the calculation of torques.

Size		8	12
Max. permissible force F <sub>Z</sub>	[N]	7	20
Max. permissible torque M <sub>X</sub>	[Ncm]	20	40
Max. permissible torque M <sub>Y</sub>	[Ncm]	20	40
Max. permissible torque M <sub>Z</sub>	[Ncm]	20	40

## Applied load [N] and mass moment of inertia [kgm²x10-4] per external gripper finger

Size	8	12
Applied load Fz <sub>1</sub> <sup>1)</sup>	< 0.04	< 0.1
Mass moment of inertia Jx <sup>1)</sup>	< 0.025	< 0.056

<sup>1)</sup> Valid for unthrottled operation

## Mass moment of inertia [kgm²x10-4]

Mass moment of inertia [kgm<sup>2</sup>x10<sup>-4</sup>] for angle grippers in relation to the central axis without external gripper fingers.

Size	8	12
With stroke compensation	0.00705	0.0421
With male thread	0.00315	0.0267
With clamping spigot	0.00252	0.02154

## Opening and closing times [ms] at 6 bar

Without external gripper fingers

The indicated opening and closing times [ms] have been measured at room temperature and 6 bar operating pressure with vertically

mounted gripper and without external gripper fingers. Load is increased if external gripper fingers are attached. This means that kinetic energy is also

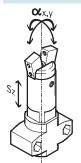

increased, as this is determined by gripper finger mass moment of inertia and angular velocity.

Size		8	12
HGWMEO	Opening	2.7	3.7
	Closing	1.2	1.8
HGWMEZ	Opening	1	1.7
	Closing	2.5	2.8

## Gripper jaw backlash

Without external gripper fingers

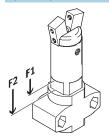

With angle grippers, backlash occurs between the gripper jaws and the guide element due to the plain-bearing guide. The backlash values listed in the table have been  $% \left\{ 1,2,\ldots ,n\right\}$ 

calculated based upon the traditional accumulative tolerance method and usually do not occur with mounted grippers.

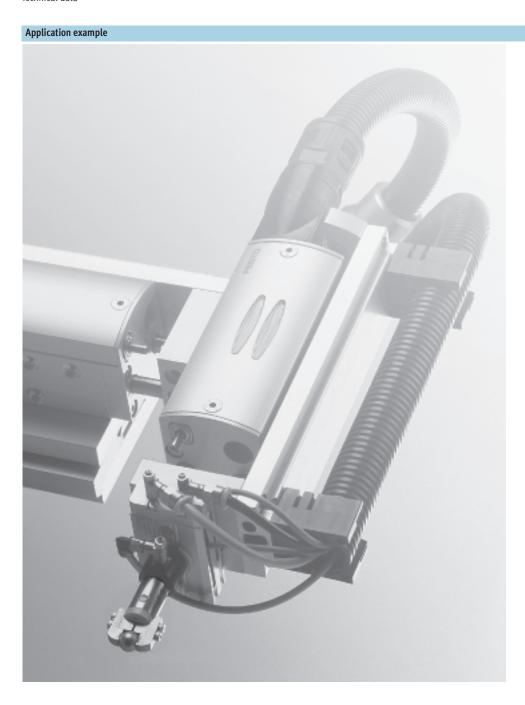

Size		8	12
Gripper jaw backlash s <sub>z</sub>	[mm]	< 0.03	
Gripper jaw angular backlash a <sub>x</sub> , a <sub>y</sub>	[°]	< 0.5	

## Spring displacement forces [N]

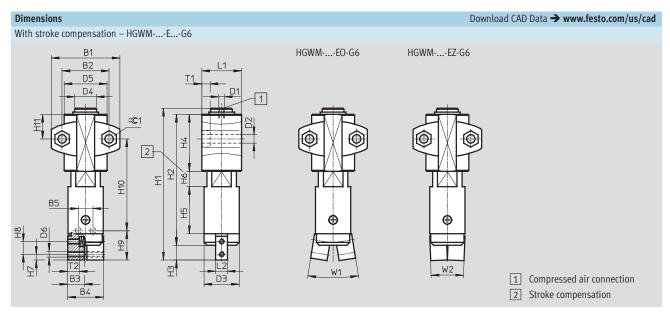

Theoretical actuating force due to stroke compensation for design variant with stroke compensation.

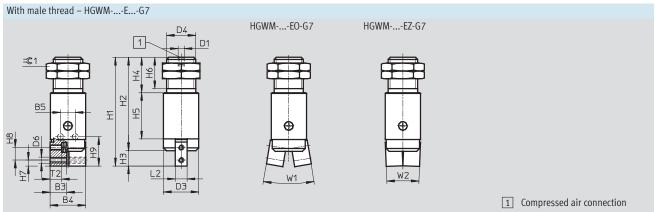

Size	8	12
Spring displacement forces F <sub>1</sub>	4	10
Spring displacement forces F <sub>2</sub>	6	23

<sup>1)</sup> Corrosion resistance class 2 according to Festo standard 940 070 Components subject to moderate corrosion stress. Externally visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment or media such as coolants or lubricating agents.

The kit includes the individual mounting interface as well as the necessary mounting material.

# **Product Range and Company Overview**

#### **A Complete Suite of Automation Services**

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

**Custom Automation Components** Complete custom engineered solutions

**Custom Control Cabinets** Comprehensive engineering support and on-site services

**Complete Systems** Shipment, stocking and storage services

## The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

Electromechanical Electromechanical actuators, motors, controllers & drives

**Pneumatics** Pneumatic linear and rotary actuators, valves, and air supply

PLCs and I/O Devices PLC's, operator interfaces, sensors and I/O devices

#### Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 12,000 employees in 56 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

#### Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.
