

Solenoid valves, to ISO 5599-1

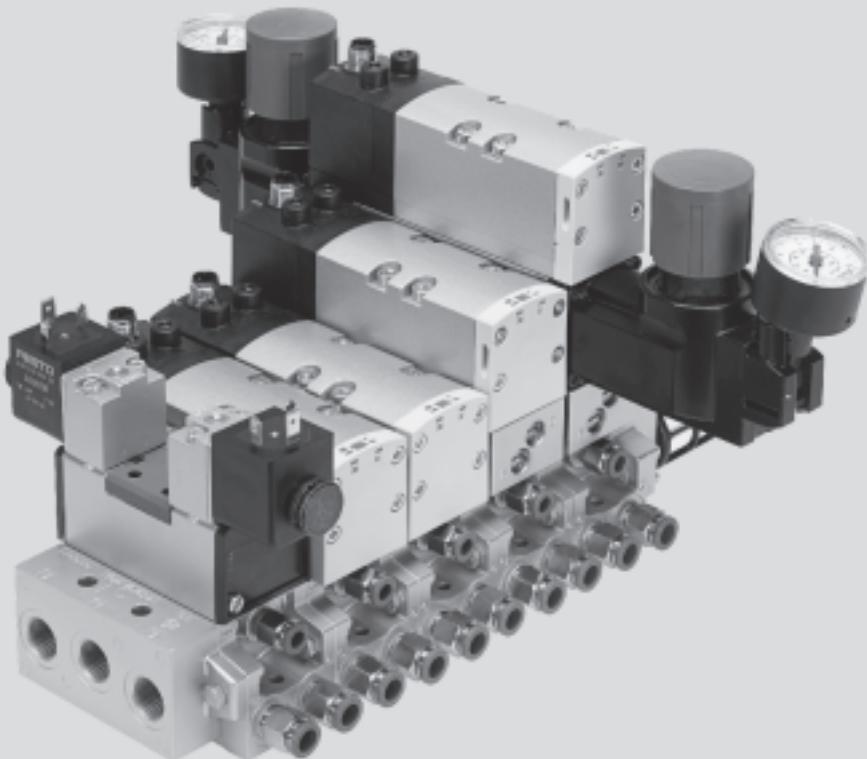

FESTO

Solenoid valves, to ISO 5599-1

Key features

FESTO

Innovative

- High-performance valves in sturdy metal housing
- Individual electrical connection via square plug sockets or centrally for each valve via round plug sockets
- Valve replacement under pressure possible using vertical pressure shut-off plate
- Reverse operation
- Vacuum operation

Versatile

- Modular system offering a range of configuration options
- Conversions and extensions are possible at any time
- Integration of innovative function modules possible
 - Pressure regulator plate
 - Flow control plate
 - Vertical pressure shut-off plate
 - Vertical supply plate
- Vertical supply plates permit a flexible air supply and variable pressure zones
- Wide range of valve functions
- Extensive operating voltage range from 12 V DC to 230 V AC

Reliable

- Sturdy and durable metal components
 - Valves
 - Horizontal stacking plates
 - Vertical stacking plates
- Fast troubleshooting thanks to LED in the plug socket or illuminating seal
- LED integrated in the valve with the round plug variant
- Reliability of service thanks to valves that can be replaced quickly and easily
- Manual override
- Durable thanks to tried-and-tested piston spool valves

Easy to mount

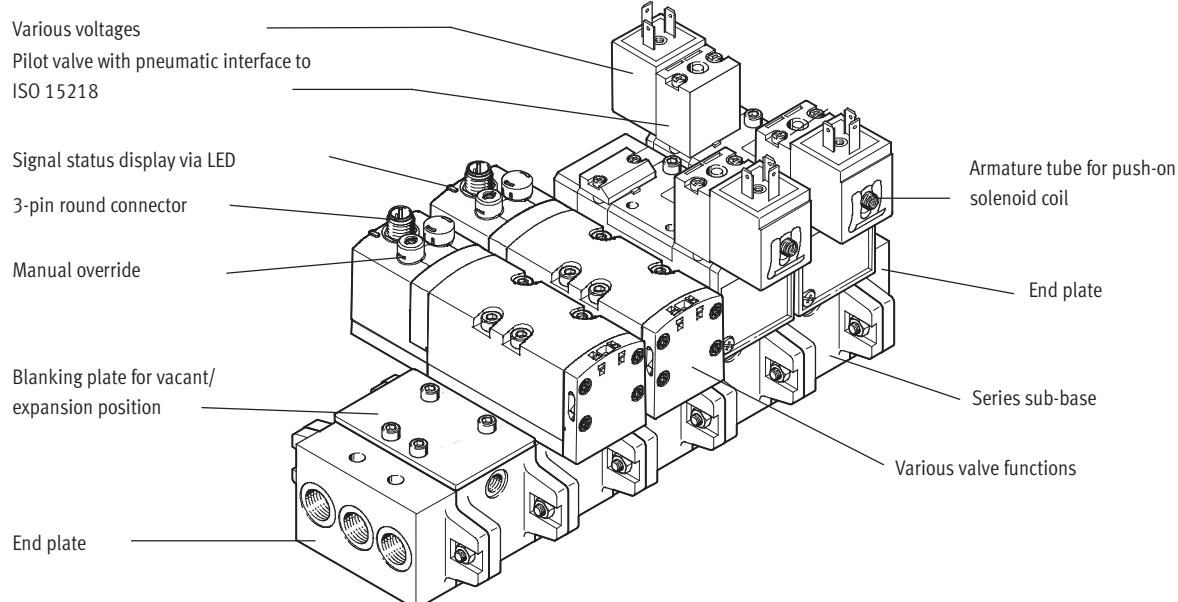

- Plug-in pressure gauges on the pressure regulator plate

Solenoid valves, to ISO 5599-1

FESTO

Key features

Individual valve manifold

Equipment options

2x 2/2-way valve, single solenoid

- Normally closed
- Normally closed, vacuum operation possible at ports 3 and 5

2x 3/2-way valve, single solenoid

- Normally open
- Normally closed
- 1x normally open, 1x normally closed
- Reverse operation possible (→12)

5/2-way valve

- Single solenoid, mechanical or pneumatic spring return
- Double solenoid
- Double solenoid, with dominant signal at port 14

5/3-way valve

- Mid-position pressurised
- Mid-position closed
- Mid-position exhausted

Special features

- Operation with external pilot air**
- For vacuum applications
 - For working pressures lower than 3 bar
 - For significant pressure fluctuations in the power section. Power section and pneumatic control section are decoupled
 - For heavily lubricated air in the power section
 - For manifolds if the pressure zones are created via ducts 3 and 5 (not possible with 2x 3/2)
 - For manifolds or pressure zones that are equipped with reversible 2x 3/2-way valves (valves on request)

Operation with internal pilot air

- For small pressure fluctuations in the power section
- For using pressure regulator plates in a vertical stacking construction, also in reverse operation
- As a low-cost solution

Reverse operation with pressure supply via ducts 3 and 5

- Pressure zone separation via ducts 3 and 5
 - Example: duct 3 vacuum, duct 5 ejector pulse
 - Example: duct 3 high pressure for advancing the piston rod of a double-acting cylinder. Duct 5 low pressure for retracting the piston rod with low energy consumption
- 2x 3/2-way valves used as 5/4-way valve with controllable overlapping and pressure zone separation with the reversible variant

Reverse operation with a pressure regulator plate, compressed air supply via duct 1

- Reversible pressure regulator combined with a reversible 2x 3/2-way valve regulates outputs 2 and 4
 - AB regulator for outputs 2 and 4
 - A regulator for output 4
 - B regulator for output 2
- Reversible pressure regulators are in the control position immediately after the power supply is switched on
 - Adjustment possible at all times
 - Dynamic response characteristics
 - Reduced regulator load because the supply pressure is maintained when the valve is switched
 - Venting not via the regulator

Solenoid valves, to ISO 5599-1

Key features

FESTO

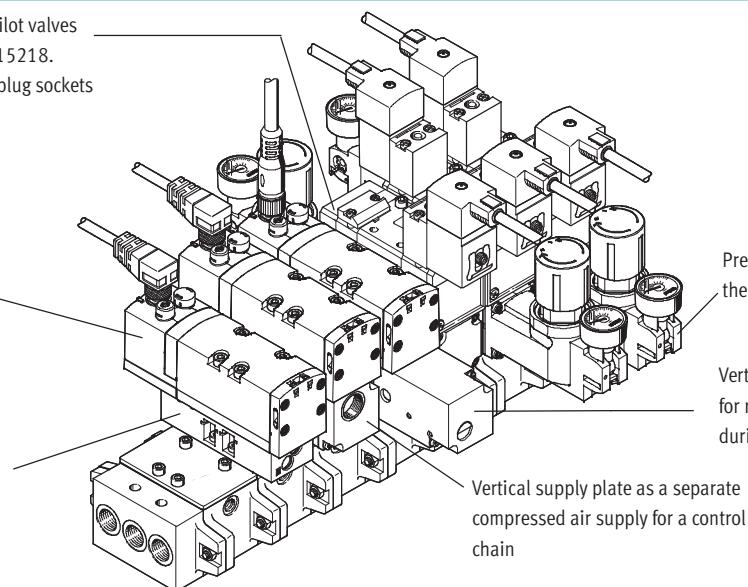

Valve manifold with vertical stacking

Solenoid valve with individual pilot valves
and pneumatic interface to ISO 15218.

Can be connected using square plug sockets

Solenoid valve with
central round plug

Flow control plate for adjusting
the speed of the drive

Pressure regulator for adjusting
the force of the actuated drive

Vertical pressure shut-off plate
for replacing solenoid valves
during operation

Vertical supply plate as a separate
compressed air supply for a control
chain

Vertical stacking function

Pressure regulator plate

- Single variant to regulate the pressure at output 4(A) or 2(B) or at input 1(P)
- Dual variant to regulate the pressure at output 4(A) and 2(B) individually
- Reverse variant for the outputs so that the regulator is in the control position
- With pressure gauge connection

Flow control plate

- Designed with two flow control valves at which the exhaust air flow rate at exhausts 5 or 3 can be adjusted. This enables the movement of the drive to be initiated and the desired speed to be set at the manifold using the manual override.

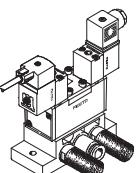

Vertical pressure shut-off plate

- Equipped with a switch via which the compressed air supply can be shut off. This enables a directional control valve or subsequent vertical stacking plate to be replaced without switching off the overall air supply
- If the control chain has a redundant connection, the cycle can continue in the case of a cyclical control system

Vertical supply plate

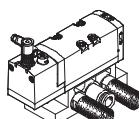

- As additional air supply for one valve
- To supply an additional pressure zone

Individual connection with square plug

The directional control valve has a pilot control to ISO 15218. The solenoid coil pushed onto the armature tube can be chosen in different designs and operating voltages.

Individual connection with central round plug

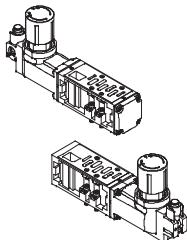

The electrical connection is established via a standardised M12 socket 24 V DC (EN 61076-2-101).

Solenoid valves, to ISO 5599-1

FESTO

Key features

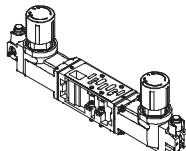

Pressure regulator plate with one pressure regulator

Versions

- For pressure regulation at supply input 1 (P). Set pressure is the same for outputs 2 and 4
- For pressure regulation at working port 4 (A)
 - The pressure regulator for reverse operation is supplied via port 1 of the sub-base and supplies port 5 on the directional control valve
 - The directional control valve vents via port 1 to ports 3 and 5 of the sub-base
- For pressure regulation at working port 2 (B)
 - Input 3 is supplied here in reverse operation

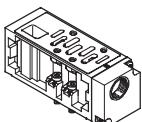

Pressure regulator plate with two pressure regulators

Versions

- For pressure regulation at working ports 4 (A) and 2 (B)
 - The pressure regulators for reverse operation are supplied via port 1 of the sub-base and supply inputs 5 and 3 on the directional control valve
 - The directional control valve vents via port 1 to ports 3 and 5 of the sub-base

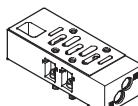

Vertical supply plate

Versions

- As intermediate supply
 - For one valve
 - To supply an additional pressure zone
- Can be equipped with a directional control valve

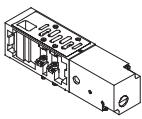

Flow control plate

Versions

- Exhaust air restrictors in ducts 3 and 5
 - The flow control plates function as supply air restrictors for pressure zones that are formed via ducts 3 and 5

Vertical pressure shut-off plate

Versions

- A switch activated with a slotted head screwdriver shuts off duct 1
 - The overlying flow control plates, pressure regulator plates or directional control valves can be replaced
 - Other components of the control chain such as drives, for example, can be replaced following venting via the directional control valve

Pressure gauge

Version

- Can be connected to the pressure regulator plates

Solenoid valves, to ISO 5599-1

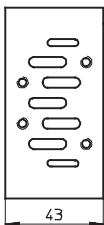

Key features

	Exhaust port for pilot air from 12 and 14

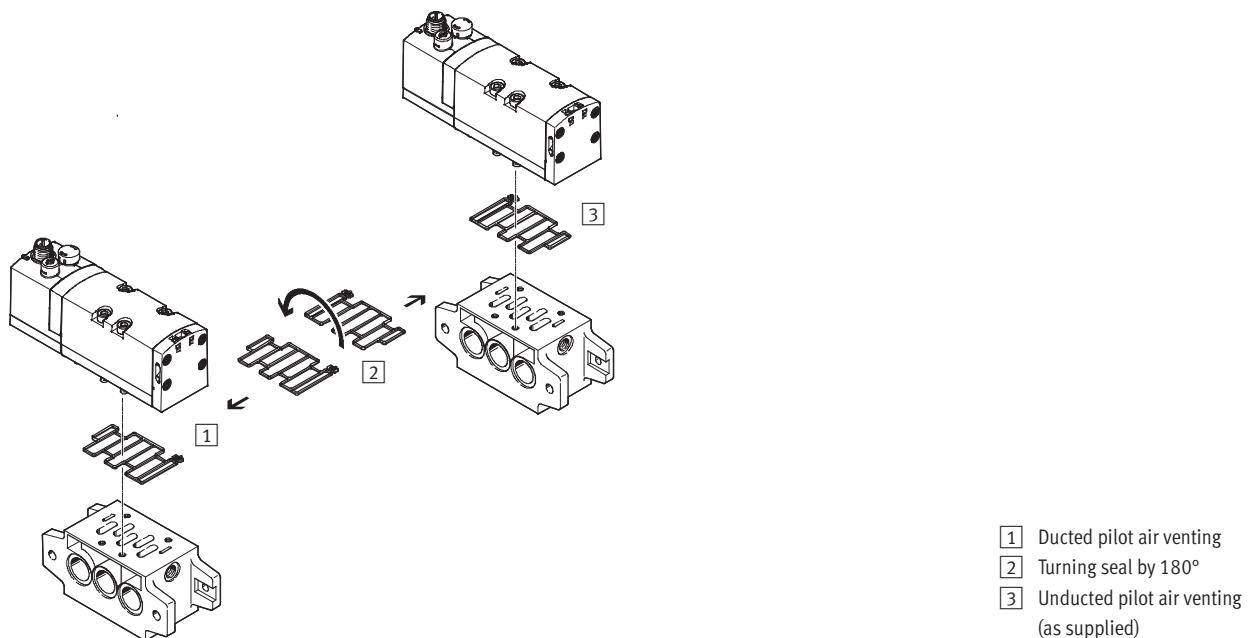

VSVA

Conversion of pilot air venting

VSVA valve manifolds are supplied with unducted venting of the pilot air. By turning the seal between the valve

and manifold block, exhaust air (pilot air) can be diverted into pilot duct 12

and can thus be contained and silenced (see illustration).

- [1] Ducted pilot air venting
- [2] Turning seal by 180°
- [3] Unducted pilot air venting (as supplied)

	Description	Part No.	Type
Illuminating seal			
	For F solenoid coils	12 ... 24 V DC	19143 MF-LD-12-24DC
		230 V DC/V AC	19144 MF-LD-230AC
	For N1 solenoid coils	12 ... 24 V DC	19145 MC-LD-12-24DC
		230 V DC/V AC	19146 MC-LD-230AC
Plug sockets, connecting cables for VSVA			
	Angled socket 4-pin M12x1		185498 SEA-M12-4WD-PG7
	Connecting cable, straight plug 4-pin M12x1, angled socket 4-pin	1 m	185499 KM-12-M12-GSWD-1-4
		2.5 m	550326 NEBU-M12G5-K-2,5-LE4
	Connecting cable, straight socket 5-pin M12x1, open end 4-wire	5 m	541328 NEBU-M12G5-K-5-LE4
		2.5 m	550325 NEBU-M12W5-K-2,5-LE4
	Connecting cable, angled socket 5-pin M12x1, open end 4-wire	5 m	541329 NEBU-M12W5-K-5-LE4
Pressure gauge			
	With cartridge connection for regulator	10 bar	543487 PAGN-26-16-P10
		6 bar	543488 PAGN-26-10-P10
Seal			
	Enables the VSVA valves to be assembled on sub-bases of the valve terminal VTSA (2 included in the scope of delivery)		571343 VABD-S2-1-S-C
Inscription label			
	Inscription label for valves VSVA (24 in frames included in scope of delivery)		18182 IBS-9x20
	Clip-on inscription label holder for valve cap (5 included in scope of delivery)		540888 ASCF-T-S6
Manual override			
	Tool for manual override for MN1H/MFH valves		157651 AHB-MD/MF/MV

Product Range and Company Overview

A Complete Suite of Automation Services

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

Custom Automation Components
Complete custom engineered solutions

Custom Control Cabinets
Comprehensive engineering support and on-site services

Complete Systems
Shipment, stocking and storage services

The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

Electromechanical
Electromechanical actuators, motors, controllers & drives

Pneumatics
Pneumatic linear and rotary actuators, valves, and air supply

PLCs and I/O Devices
PLC's, operator interfaces, sensors and I/O devices

Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 12,000 employees in 56 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.
