

Motor controllers CMMS-AS, for servo motors

FESTO

Motor controllers CMMS-AS, for servo motors

Key features

FESTO

Comparison of motor controllers				
Motor controller for motor type	CMMD-AS Servo motor	CMMS-AS Servo motor	CMM-AS Servo motor	CMMS-ST Stepper motor
Positioning records	2x 63	63	255	63
Measuring system	Incremental/absolute		Analogue/incremental/ absolute	Incremental
Extended I/O interface	4 working modes		Flexibly configurable	4 working modes
Notification of remaining distance	1 for n		Separately for all positions	1 for n
Torque reduction	No		Separately for all positions	No
Set linking	Linear		With branching	Linear
Safety functions to EN 61800-5-2	STO, SS1 (with external safety switching device)		STO, SS1, SBC, SOS, SS2, SLS, SSR, SSM	STO, SS1 (with external safety switching device)

Performance characteristics

Compactness

- Small dimensions
- Full integration of all components for controller and power section, including RS232 and CANopen interface
- Integrated brake chopper
- Integrated EMC filters
- Automatic actuation for a holding brake
- Adheres to the current CE and EN standards without additional external measures (motor cable length of up to 15 m)

Motion control

- Digital absolute shaft encoder in single-turn and multi-turn versions
- Can be operated as a torque, speed or position controller
- Integrated positioning controller
- Time-optimised (trapezoidal) or jerk-free (S-shaped) positioning
- Absolute and relative movements
- Point-to-point positioning with and without approximate positioning
- Position synchronisation
- Electronic gear unit
- 63 position sets
- 8 travel profiles
- Wide range of homing methods

Fieldbus interfaces

Integrated:

Optional:

Input/output

- Freely programmable I/Os
- High-resolution 12-bit analogue input
- Jog/teach mode
- Simple linking to a higher-level controller via I/O or fieldbus
- Synchronous operation
- Master/slave mode

Integrated sequence control

- Automatic sequence of position sets without a higher-level controller
- Linear and cyclic position sequences
- Adjustable delay times

PROFIBUS®, DeviceNet®, CANopen® is a registered trademark of its respective trademark holder in certain countries.

Motor controllers CMMS-AS, for servo motors

FESTO

Key features

Performance characteristics

Integrated safety functions

- The motor controller CMMS-AS support "Safe Torque off (STO)" and, by providing a reliable time delay, also supports "Safe Stop 1 (SS1)" functions with protection against unexpected startup in accordance with EN 61800-5-2
- Protection against unexpected start-up

- Two-channel disconnection of the output stage
- Less external circuitry
- Shorter response times in the event of an error
- Faster restart, intermediate circuit remains charged

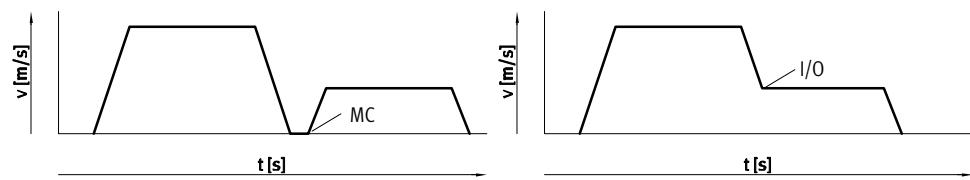

Interpolating multi-axis movement

- With a suitable controller, the CMMS-AS can perform path movements with interpolation via CANopen. The controller specifies setpoint position values in a fixed

time pattern to this end. In between, the servo positioning controller independently interpolates the data values between two data points.

Travel program

- Linking of any number of position sets into a travel program
 - Further switching conditions for the travel program possible via digital inputs, for example
- MC – motion complete
I/O – digital inputs

Library for EPLAN

EPLAN macros for fast and reliable planning of electrical projects in combination with motor controllers,

motors and cables. This enables a high level of planning reliability, standardisation of documentation,

no need to create symbols, graphics and master data.

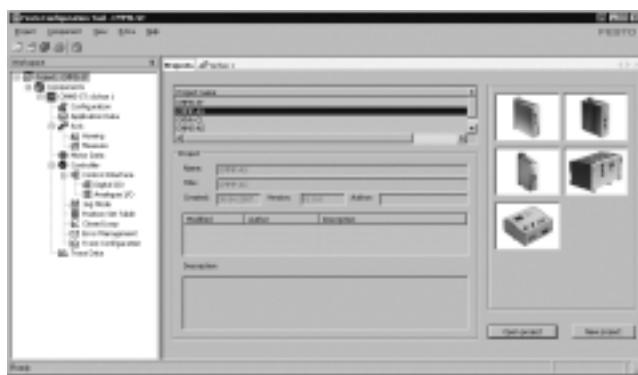

Motor controllers CMMS-AS, for servo motors

Key features

FESTO

FCT software – Festo Configuration Tool

Software platform for electric drives from Festo

- All drives in a system can be managed and archived in a common project
- Project and data management for all supported device types
- Simple to use thanks to graphically-supported parameter entry
- Universal mode of operation for all drives
- Working offline at your desk or online at the machine

FHPP – Festo Handling and Positioning Profile

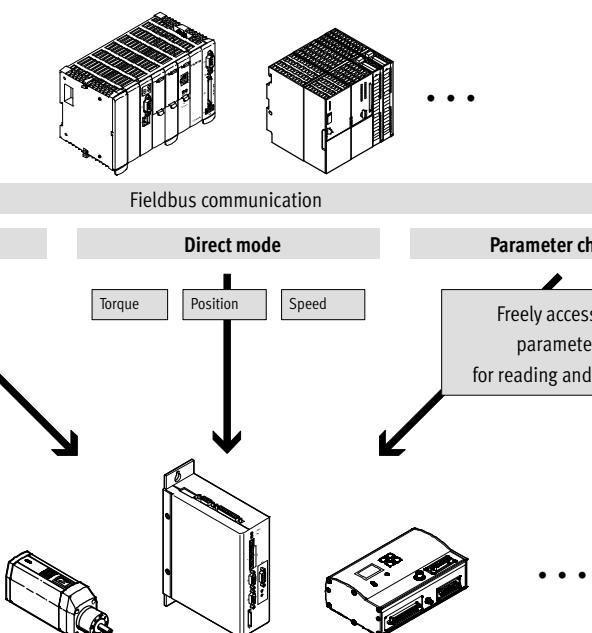

Optimised data profile

Festo has developed an optimised data profile, the “Festo Handling and Positioning Profile (FHPP)”, that is tailored to handling and positioning applications.

The FHPP data profile permits the actuation of Festo motor controllers, using a fieldbus interface, via standardised control and status bytes.

The following are defined, among others:

- Operating modes
- I/O data structure
- Parameter objects
- Sequence control

General technical data

Type of mounting	Screwed to a mounting plate
Display	7-segment display
Parameterisation interface	RS232 (9,600 ... 115,000 bits/s)
Encoder interface input	Setpoint position value as encoder signal EnDat V2.1 serial / V2.2
Encoder interface output	Actual value feedback via encoder signals in speed control mode Setpoint specification for downstream slave drive Resolution 4,096 ppr
Braking resistor, integrated	[Ω] 230
Pulse power of braking resistor	[kVA] 0.7
Braking resistor, external	[Ω] ≥ 100
Impedance of setpoint input	[kΩ] 20
Number of analogue outputs	1
Operating range of analogue outputs	[V] 0 ... 10
Resolution of analogue outputs	[Bit] 8
Characteristics of analogue outputs	Short circuit-proof
Number of analogue inputs	1
Operating range of analogue inputs	[V] ±10
Characteristics of analogue inputs	Differential inputs Configurable for speed Configurable for torque
Mains filter	Integrated
Max. length of motor cable	[m] 15 (without external mains filter)
Product weight	[g] 1,400

Technical data – Fieldbus interface

Interfaces	I/O	CANopen	Profibus DP	DeviceNet
Number of digital logic outputs	5			
Characteristics of digital logic outputs	Freely configurable in some cases
