

Passive guide axes DGC-FA, without drive

Passive guide axes DGC-FA, without drive

Key features

At a glance

- Driveless linear guide units with guide and freely movable slide
- The passive guide axis is designed to support force and torque capacity in multi-axis applications
- Higher torsional resistance
- Reduced vibrations with dynamic loads
- Drive axis and passive guide axis can be placed adjacent to or above one another

System product for handling and assembly technology

System components and accessories

Type/Order code	Description	→ Page/Internet
1 Axes	Wide range of combinations possible within handling and assembly technology	axis
2 Passive guide axes	For supporting force and torque capacity in multi-axis applications	passive guide axis
3 Drives	Wide range of combinations possible within handling and assembly technology	drive
5 Grippers	Wide range of variations possible within handling and assembly technology	gripper
6 Adapters	For drive/drive and drive/gripper connections	adapter kit
- Motors	Servo and stepper motors, with or without gear unit	motor

Passive guide axes DGC-FA, without drive

Key features

Guide axes and the corresponding drives

Passive guide axis DGC-FA

- Can be combined with:
 - Linear drive DGC-KF
- For size 8 ... 63
- Load capacity to max. 6890 N or 380 Nm

Passive guide axis EGC-FA

- Can be combined with:
 - Toothed belt axis EGC-TB
 - Spindle axis EGC-BS
- For size 70 ... 185
- Load capacity to max. 15200 N or 1820 Nm

Passive guide axis FDG-ZR-RF

- Can be combined with:
 - Toothed belt axis DGE-ZR-RF
- For size 25 ... 63
- Load capacity to max. 1500 N or 600 Nm

Passive guide axis FDG-P/-ZR/-SP

- Can be combined with:
 - Linear drive DGPL
 - Toothed belt axis DGE-ZR-KF
 - Spindle axis DGE-SP-KF
- For size 18 ... 63
- Load capacity to max. 14050 N or 1820 Nm

Options

Central lubrication – C

The lubrication adapter enables the guide of the passive guide axis DGC-FA to be permanently lubricated in applications in humid or wet ambient conditions using semi or fully automatic relubrication devices. The adapters are suitable for oils and greases.

- For piston \varnothing 25, 32, 40, 63 mm
- Connections:
 - On both sides of the slide
 - In three places (front, top, rear) on each side

Technical data → 13

Clamping unit – 1H-PN

- 1-channel design, for holding loads
 - Reliable holding is guaranteed since the forces act directly on the slide
 - A limited number of emergency braking operations are permissible with the sizes 40 and 50
- For piston \varnothing 25, 32, 40, 50 mm

Technical data → 10

Passive guide axes DGC-FA, without drive

Peripherals overview

-  - Note
 1) End stops or shock absorbers must not be removed.

Passive guide axes DGC-FA, without drive

Passive guide axes DGC-FA, without drive

Technical data

FESTO

Characteristic load values

The indicated forces and torques refer to the centre of the slide surface.

These values must not be exceeded during dynamic operation. Special attention must be paid to the cushioning phase.

If the drive is simultaneously subjected to several of the indicated forces and torques, the following equation must be satisfied in addition to the indicated maximum loads:

$$\frac{F_y}{F_{y_{max}}} + \frac{F_z}{F_{z_{max}}} + \frac{M_x}{M_{x_{max}}} + \frac{M_y}{M_{y_{max}}} + \frac{M_z}{M_{z_{max}}} \leq 1$$

Permissible forces and torques

Piston Ø		8	12	18	25	32	40	50	63
F _y _{max.}	[N]	300	650	1850	3050	3310	6890	6890	15200
F _z _{max.}	[N]	300	650	1850	3050	3310	6890	6890	15200
M _x _{max.}	[Nm]	1.7	3.5	16	36	54	144	144	529
M _y _{max.}	[Nm]	4.5	10	51	97	150	380	634	1157
M _z _{max.}	[Nm]	4.5	10	51	97	150	380	634	1157

Technical data – Clamping unit

Size		25	32	40	50
Pneumatic connection		M5	M5	M5	M5
Clamping type		Clamping via spring force, released via compressed air			
Static holding force	[N]	320	500	1200	1200
Max. number of emergency braking operations ¹⁾ at reference energy	[Nm]	–	–	750 35	750 35
Number of clamping operations under nominal load	[million switching cycles]	0.45	0.55	0.05	0.05

1) Emergency braking refers to braking the effective load if the drive axis loses power.

Operating and environmental conditions – Clamping unit

Operating medium		Compressed air according to ISO 8573-1:2010 [7:4:4]
Operating pressure		
Clamping unit opened	[bar]	4.5 ... 8
Clamping unit closed	[bar]	Pressureless
Ambient temperature	[°C]	–10 ... +60

Passive guide axes DGC-FA, without drive

Technical data

Maximum permissible piston speed v as a function of effective load m and distance r_{max} from centre of gravity of load

Piston \varnothing 8/12 with P cushioning

Piston \varnothing 8 ... 40 with YSR cushioning

Piston \varnothing 8 ... 40 with YSRW cushioning

 Note
This data represents the maximum values that can be achieved. Values fluctuate in practice relative to the position of the effective load and mounting position.

Operating range of cushioning

The end-position cushioning must be adjusted to ensure jerk-free operation. If the operating conditions are outside the permissible range, the

load to be moved must be cushioned using suitable equipment (shock absorbers, stops, etc.), preferably at the centre of gravity of the load.

 Note
To avoid distortion in the slide, the bearing surfaces of the attachments must maintain a flatness of 0.01 mm.

The specifications apply to a horizontal mounting position:

Piston \varnothing	8	12	18	25	32	40	50	63
Distance r_{max} [mm]	25	35	35	50	50	50	50	50

Passive guide axes DGC-FA, without drive

Technical data

Number of profile mountings MUC as a function of force due to weight F and support span l

In order to limit deflection in the case of large strokes, the guide axis may need to be supported. The following

graphs help to determine the maximum permissible support span

as a function of mounting position, force due to weight and normal force.

Horizontal mounting position

Vertical mounting position

Example:

The guide axis DGC-25-1500 is subjected to a force of 300 N in the horizontal mounting position.

The axis has an overall length of:

$$\begin{aligned} l &= \text{stroke length} + L1 \\ &= 1500 \text{ mm} + 200 \text{ mm} \\ &= 1700 \text{ mm} \end{aligned}$$

According to the graph, the max. support span for the axis DGC-25 with a force of 300 N is 1300 mm.

In this example, profile mountings are required as the max. support span (1300 mm) is smaller than the overall length of the axis (1700 mm).

Passive guide axes DGC-FA, without drive

Technical data

Central lubrication

The lubrication adapter enables the guide of the passive guide axis DGC-FA to be permanently lubricated in applications in humid or wet ambient conditions using semi or fully automatic relubrication devices.

- For piston \varnothing 25, 32, 40, 63
- The modules are suitable for oils and greases
- The dimensions of the passive guide axis DGC-FA are the same with and without central lubrication modules
- Both lubrication adapters must be connected
- There are three connection options on each side
- Can be used in combination with:
 - Additional slide K
- Cannot be used in combination with:
 - Protected recirculating ball bearing guide GP

Slide dimensions
→ 22

Order code C in the modular product system → 27

Connection options

Only the connection at the rear or on the top can be used in combination with shock absorbers in the end caps.

Only the connection on the front or top can be used in combination with shock absorber retainer DADP.

Connection option for customer design

The drawing opposite shows the connection option on the top lubrication interface using a customer design.

- D1 8^{+0.2} mm
- D2 6 mm
- T1 0.6_{-0.05} mm
- T2 0.1^{+0.2} mm
- O-ring \varnothing 6x1 mm (DIN3771)

- 1 Slot depth for O-ring
- 2 Required air gap

Additional dimensions → 22

Structure of a central lubrication system

A central lubrication system requires various additional components. The illustration shows different options (using a hand pump, pneumatic container pump or electric container pump) required as a minimum for designing a central lubrication system. Festo does not sell these additional components, however they can be obtained from the following companies:

- Lincoln
- Bielomatik
- SKF (Vogel)

Festo recommends these companies because they can supply all the necessary components.

- 1 Hand pump
- 2 Pneumatic container pump
- 3 Electric container pump
- 4 Manually operated container pump
- 5 Nipple block
- 6 Distributor block
- 7 Tubing or piping
- 8 Fittings

Ordering data – Modular products

Order code

Effective stroke reduction when ordering an additional slide K

For a linear drive DGC with additional slide, the effective stroke is reduced by the length of the additional slide and the distance between both slides.

Given:
 DGC-12-500-...
 L = 20 mm
 L17 = 65 mm

∅ [mm]	8	12	18	25	32	40	50	63
L17	52	65	99	118.5	145.7	195.4	256.8	280

The effective stroke is reduced to
 415 mm = 500 mm – 20 mm – 65 mm

Passive guide axes DGC-FA, without drive

Accessories

Profile mounting MUC
(order code: M)

Material:
High-alloy steel

Position of the profile mounting along the profile barrel is freely selectable.
The profile mounting can only be mounted underneath in combination with the clamping unit, shock absorber retainer DADP and intermediate position module DADM.
