# Spiral plastic tubing

Technical data

## Method of measurement

### Flow-relevant bending radius $R_d$

The tube is bent in the direction of its own curve until the tubing outer diameter is flattened by 5%.  $R_d$  is then calculated mathematically. The flow rate is not reduced until  $R_d$  is reached.

Cross section flattened by bending the tube.

$d$  = non-deformed tubing O.D.  
 $d_1$  = deformed tubing O.D.

### Minimum bending radius $R_{min}$

The tube fixed to the base plate is bent until the deformation results in a kink. The measured value is the minimum bending radius  $R_{min}$ . This  $R_{min}$  results in significant reductions in flow rate.

## Length specifications

	Working length	With tensile load, 80% of the maximum section length
	Block length	Without tensile load

- - Note

The working length represents 80% of the maximum permissible expansion. This maximum expansion is the limit value before permanent deformation takes place.

# Spiral plastic tubing PUN-S-DUO

Technical data

## DUO spiral plastic tubing PUN-S-DUO

Highly flexible paired plastic tubing. Two lengths of tubing are fused together into a tubing pair. For fitting,

the paired tubing is separated to the required length at both ends.

# Spiral plastic tubing PPS, pre-assembled

Technical data

## Spiral plastic tubing PPS

This hydrolysis-resistant plastic tubing demonstrates high thermal and mechanical load capacities. Each tubing length is delivered ready for

installation with 2 rotatable connectors and captive O-ring sealing rings. Kinks at the tubing ends are prevented by the anti-kinking springs.

General technical data	
Pneumatic connection 1, 2	Male thread G1/4
Nominal tightening torque [Nm]	11 ±20%

Operating and environmental conditions		
Type	PPS-4	PPS-6
Temperature-dependent operating pressure [bar]	-0.95 ... +21.2 → graph	-0.95 ... +17.2 → graph
Operating medium	Compressed air to ISO 8573-1:2010 [7:-:-]	
Ambient temperature [°C]	-30 ... +80	
Corrosion resistance class CRC <sup>1)</sup>	1	

1) Corrosion resistance class CRC 1 to Festo standard FN 940070  
 Low corrosion stress. For dry indoor applications or transport and storage protection. Also applies to parts behind covers, in the non-visible interior area, and parts which are covered in the application (e.g. drive trunnions).
