

Flow sensors SFAW

Flow sensors SFAW

Key features

General

The SFAW is intended for use in measuring and monitoring the flow, volume and temperature of liquid media in piping or in terminals in industry. The flow velocity is recorded in accordance with the vortex principle. The flow rate and the accumulated volume are

calculated from the flow velocity. An optional, integrated temperature sensor records the temperature of the media. Connection to higher-level systems is provided by 2 switching outputs, an analogue output and/or

an IO-Link interface, depending on the type. The outputs can be configured as appropriate to the application. The switching outputs can be configured to monitor a threshold value or a range. Either PNP or NPN and

either normally open (NO) or normally closed (NC) can be set for the outputs. Process values can be read out and parameters changed and transmitted to additional devices via the IO-Link interface.

Application

- Cooling circuit monitoring
- Monitoring for leaks and line breaks
- Process water monitoring
- Filling volume monitoring

Overview

An installation concept with short mounting and dismantling times that is easy to implement in all installation situations.

Mounting

The sensor can be rotated through 360° in the direction of flow, so that once it has been installed it can be aligned without the need for tools.

Dismounting

The sensor can be replaced quickly by virtue of the fact that the fluid connections on the sensor can be dismantled by releasing the clips on the basic sensor body.

Display

A large, illuminated LCD display increases the operational safety and makes the currently displayed values for flow rate or medium temperature and the accumulated volume easy to read. The rotatable display ensures ease of readability and usability when mounted either horizontally or vertically.

Change in colour

Depending on the switching status (e.g. a flow threshold has not been achieved or media temperature exceeded) a change in colour to red can be set in the display for the switching

outputs. As a result, it is possible to reliably identify the system status from a large distance or in inaccessible areas.

Media connections

- Free choice of various media connections:
 - Threaded connection (female thread) (G, RC, NPT)
 - Clamped terminal connection to DIN 32676
 - Female hose connector
- Free choice of media connection type on sensor input and sensor output side
- Basic sensor body and media connections can be obtained separately
- Ultra-simple and fast mounting of media connections using clips
- Option of designing dedicated, application-specific connections

Electronics

Maximum versatility and reduced warehousing thanks to switchable electrical outputs:

- PNP/NPN
- NC/NO contact function
- Current output 4 ... 20 mA
- or voltage output 1 ... 5 V, 0 ... 10 V

Sensor signal monitoring

Flow signal monitoring to detect unstable flows. Possible causes for unstable flows include:

- Air in the line
- Line filling during start-up
- Turbulent flows as a result of unfavourable or incorrect installation

Flow sensors SFAW

Key features

Operation

Monitoring and setting a flow threshold, a flow range, a temperature threshold and a temperature range using a teach-in function or by entering values.

- Flow indication, medium temperature indication, switching outputs and analogue value output for flow rates and temperature can be set on site in one device
- Fast commissioning of the flow sensor thanks to intuitive menu navigation
- Display colour red/blue as visual feedback that the flow rate or temperature thresholds have not been achieved or have been exceeded.
- Min./max. value memory for monitoring the flow and temperature (storage of flow and temperature peaks)
- To prevent undesirable switching status changes – an integrated adjustable filter damps the sensor signal generated by flow peaks
- Scaling the analogue output to increase the signal dynamics
- Switchable flow and volume units l/min, l/h, US gal/min, cfm, l, m³, US gal, cft
- Switchable temperature units °C, °F
- ECO function with option to set display switch-off
- Optional security code can be freely chosen (4-digit code)
- All settings that have been carried out on one sensor (master) can be transferred (replication) to other, identical sensors (device). This makes it possible to significantly shorten commissioning time.
- Recorder mode for manual volume measurements with start, stop and reset functionality
- Adjustable volume pulse

IO-Link

- Serial communication integrated using IO-Link 1.1
- Analogue process values are provided digitally
- The sensor can be parameterised and maintained remotely at control level using an IO-Link master
- Automatic parameterisation following sensor change: no need to repeat parameterisation and sensor settings after changing the sensor

Flow sensors SFAW

Peripherals overview

Flow sensors SFAW

Peripherals overview

Mounting components and accessories			
	Description	→ Page/Internet	
1	Connecting adapter SASA-FW-A-32-T...	Female thread for flow measuring range 32 with connection G $\frac{1}{2}$, G $\frac{3}{4}$, R $\frac{1}{2}$, R $\frac{3}{4}$, NPT $\frac{1}{2}$, NPT $\frac{3}{4}$	16
2	Connecting adapter SASA-FW-A-32-S...	Female hose connector for flow measuring range 32 with connection size 13 mm or 19 mm	16
3	Connecting adapter SASA-FW-A-32-CS5...	Clamped terminal connection for flow measuring range 32 with connection DN15	17
4	Connecting adapter SASA-FW-A-100-T...	Female thread for flow measuring range 100 with connection G $\frac{3}{4}$, G1, R $\frac{3}{4}$, R1, NPT $\frac{3}{4}$, NPT1	16
5	Connecting adapter SASA-FW-A-100-CS5...	Clamped terminal connection for flow measuring range 100 with connection DN20	17
6	Wall mounting SAMH-FW-W	For wall or surface mounting of the flow sensor	14
7	Clip SAMH-FW-SB	For mounting the fluid connections on the body of the flow sensors	15
8	Seal SASF-FW-S-E	For sealing the fluid connections against the body of the flow sensors	14
9	Protective cover SACC-PU-G	For covering the display and control elements	15
10	Connecting cable NEBU	–	17

Flow sensors SFAW

Type codes

SFAW - 32 T - C S5 15 - E - PNLK PNVBA M12

Type

SFAW	Flow sensor

Flow sensors SFAW

Technical data

Function

SFAW-...-PNLK-PNVBA

SFAW-...-PNLK-PN-VBA

- Maximum versatility and reduced warehousing owing to switchable electrical outputs:
 - PNP/NPN, switchable
 - N/C or N/O contact, switchable
 - Current output 4 ... 20 mA or voltage output 1 ... 5 V, 0 ... 10 V, switchable
- Pulse output for volume measurement can be freely selected
- Measuring signal filter for setting the rise time
- Additional filter for smoothing the display values

General technical data

Electrical data			
		-32	-100
Output, general			
Accuracy of zero point Flow \leq 50% FS ¹⁾	[% FS]	± 2	
Accuracy of margin Flow \geq 50% FS ¹⁾	[% FS]	± 3	
Repetition accuracy of zero point Flow \leq 50% FS ²⁾	[% FS]	± 0.5	
Repetition accuracy of margin Flow \geq 50% FS ²⁾	[% FS]	± 1	
Accuracy of temperature	[°C]	± 2	
Temperature coefficient of margin	[% FS]	Typ. ± 0.05 % FS/K	
Switching output			
Switching output	2 x PNP or 2 x NPN or IO-Link, switchable		
Switching function	Threshold value comparator or window comparator, freely programmable		
Switching element function	N/C contact or N/O contact, switchable		
Switch-on time	[ms]	400 with filter time constant 150 ms (adjustable)	
Switch-off time	[ms]	300 with filter time constant 150 ms (adjustable)	
Max. output current	[mA]	100	
Voltage drop	[V]	Max. 1.5	
Pull-down / pull-up resistor	PNP: integrated; NPN: not integrated		
Inductive protective circuit	Present		
Analog output			
Characteristic curve for flow rate	[l/min.]	0 ... 32	0 ... 100
Characteristic curve for temperature	[°C]	0 ... 100	
Output characteristic curve for current	[mA]	4 ... 20	
Output characteristic curve for voltage	[V]	0 ... 10 or 1 ... 5, adjustable	
Rise time	[ms]	900 with filter time constant 150 ms (adjustable)	
Max. load resistance at current output	[Ohm]	500	
Min. load resistance at voltage output	[kOhm]	10	
Output, additional data			
Protection against short circuit	Yes		
Overload protection	Yes		
Electronic components			
Operating voltage range DC	[V]	18 ... 30	
Protection against incorrect polarity	For all electrical connections		
IO-Link, SIO mode support	Yes		
Electromechanical components			
Electrical connection	Straight plug, M12x1, 5-pin, A-coded		
Max. connecting cable length	[m]	30, for IO-Link operation 20	

1) Accuracy of flow value = $\pm 2\%$ FS for flow $\leq 50\%$ FS and $\pm 3\%$ o.m.v. for flow $\geq 50\%$ FS

2) Repeat accuracy of flow value = $< \pm 0.5\%$ FS for flow $\leq 50\%$ FS $< \pm 1\%$ o.m.v. for flow $\geq 50\%$ FS

Product Range and Company Overview

A Complete Suite and Company Overview

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

Custom Automation Components
Complete custom engineered solutions

Custom Control Cabinets
Comprehensive engineering support and on-site services

Complete Systems
Shipment, stocking and storage services

The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

Electromechanical
Electromechanical actuators, motors, controllers & drivers

Pneumatics
Pneumatic linear and rotary actuators, valves, and air supply

PLCs and I/O Devices
PLC's, operator interfaces, sensors and I/O devices

Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 16,000 employees in 60 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.
