

## Plastic tubing, standard O.D.

**FESTO**

Festo core product range  
Covers 80% of your automation tasks

Worldwide:

Always in stock

Superb:

Festo quality at an attractive price

Easy:

Reduces procurement and storing complexity

Generally ready for shipping ex works in 24 hours  
Held in stock in 13 service centres worldwide  
More than 2200 product

Generally ready for shipping ex works in 5 days  
Assembled for you in 4 service centres worldwide  
Up to  $6 \times 10^{12}$  variants per product series

# Plastic tubing, standard O.D.

Features

## Application

The requirements with respect to pressure, temperature, flexibility and environmental influences differ from industry to industry. Users frequently underestimate the risks: around 90%

of all cases of damage can be traced back to the wrong choice of tubing or tubing materials. This can not only result in energy losses, but also

machine downtimes. It is especially important to find a reliable and cost-effective product that prevents tubing degradation during operation.

Summary of tubing/fitting combinations			
Applications	Tubing	Fitting	Description
Standard	PEN	QS	Suitable for a wide range of tasks and attractively priced. Flexible thanks to highly resistant materials, easy to install thanks to optimised bending radii. High level of abrasion resistance in dynamic applications.
	PUN	QS	Maximum flexibility in standard applications thanks to an extremely wide range of options for combining the different types.
	PAN	QS	Meets all requirements, even for standard applications with increased pressure and temperature ranges.
High pressures	PAN-MF	NPQM	Meets DIN standard 73378: ideal for use in mobile pneumatics. Suitable for increased temperature ranges combined with high pressure ranges.
	PAN-R	NPQH	Powerful in pressure ranges up to 20 bar, for example in applications with the pressure booster DPA.
Resistant to chemicals, food safe and hydrolysis resistant	PLN	NPQP	Resistant to cleaning agents, FDA compliant and economical. Can be used instead of the combination with stainless steel fittings.
	PUN-H	NPKA	Hydrolysis resistant and suitable for water applications. Combination suitable for use in clean rooms, FDA compliant and corrosion resistant thanks to 100% polymer construction. Very easy to install thanks to the "one click principle".
	PFAN/PTFEN	NPQH	For high temperatures up to 150 °C. Suitable for use in the food industry, FDA compliant and resistant to cleaning agents.
	PFAN/PTFEN	NPCK	Easy to clean thanks to the union nut's edge-free design. Maximum resistance to corrosion (CRC 4) and FDA compliant. Suitable for a wide range of media.
	PFAN/PTFEN	CRQS	Maximum resistance to corrosion (CRC 4) and to aggressive acids and lyes.
Resistant to chemicals and hydrolysis resistant	PFAN/PTFEN	NPQR	Optimised design, reduction in edges where dirt can collect – all at an attractive price. For high temperatures up to 150 °C. Pressure range up to 16 bar. Highest level of corrosion resistance (CRC 4).
Anti-static	PUN-CM	NPQM	Anti-static tubing plus solid metal fitting: maximum protection for electrical and electronic components.
Flame retardant	PUN-V0	NPQM	Very safe in areas where there is a risk of fire thanks to flame-retardant properties. The tubing has been tested to DIN 5510-2.
Resistant to welding spatter	PUN-V0-C	NPQH	Ideal for applications involving welding spatter. Reliable thanks to a tubing wall thickness of 2 mm for all diameters.
	PAN-V0	QS-V0	Safe even in the mediate vicinity of welding spatter thanks to the double-walled tubing with special fitting.

## Note

The ambient conditions and the operating medium transported can have a considerable effect on the service life of plastic tubing. Based on empirical values, Festo recommends the following time specifications for the usage of plastic tubing in general and safety-related applications:

- For general applications, a minimum service life of 10 years can be expected.
- For safety-related applications, we recommend regular inspection at least every 12 months.
- For applications that have an effect on the material, inspections must be carried out at suitable intervals. We recommend that the interval between inspections should be no more than 6 months, at most half of the period in which failures can occur.

# Plastic tubing, standard O.D.

Technical data

## Note

Tubing diameters that are too big or too small as well as bending radii that are too small result in flow rate losses.

One of the most important rules when selecting tubing is therefore that it should be as long as necessary and as short as possible.

Make sure therefore that in practice tubing is laid loosely and is not stretched.

Tools for bundling tubing or for avoiding bending/pinching tubing are available as accessories:

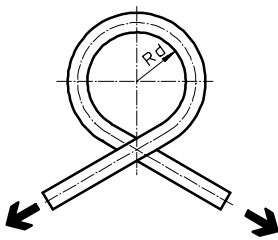

- Tubing strap PB
- Spiral wraps for tubing PKB
- Tubing support NPAW
- Tubing support PKS
- Multi-tube holder KK

Other accessories include connecting tools for tubing:

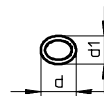

- Pipe and tubing cutter ZRS
- Tubing cutter PAN-VOS for flame-retardant plastic tubing PAN-VO
- Connecting pliers ZMS/disconnecting pliers ZDS for connecting/disconnecting the plastic tubing and barbed fitting

## Measuring methods

### Flow-relevant bending radius Rd

The tubing is bent in the direction of its inherent flexion until a 5% flattening of the tubing O.D. occurs. The Rd is then calculated. There is no reduction in the flow rate up until the Rd is reached.

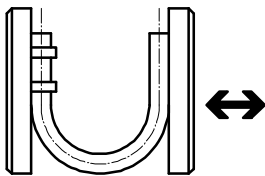

Cross section flattened as a result of bended tubing

d = non deformed tubing OD

d1 = deformed tubing OD

### Minimum bending radius Rmin

The tubing attached to a movable plate is bent until the deformation results in a kink. The measured value is the minimum bending radius Rmin. This Rmin leads to considerable reductions in flow.

# Plastic tubing, standard O.D.

High thermal and mechanical load capacities.

Operating and environmental conditions		
Temperature dependent operating pressure	[bar]	-0.95 ... +14 → diagram
Operating medium		Compressed air in accordance with ISO 8573-1:2010 [7:--:-]
Ambient temperature	[°C]	-30 ... +80

### Operating pressure p as a function of temperature t

### Accessories

Type		→ Internet
	Recommended fitting	
	- Push-in fitting QS-G <sup>3</sup> / <sub>4</sub> -22	qs
	- Push-in fitting CQ-...-22/28	cq
	Pipe cutter ZR	tool

 **Note**  
 When using the pipe cutter ZR to cut to length, we recommend rotating the tube through approx. 90° at the start of the cutting process. Rotating the tube gives a drawing cut so that the tube can be cut with a significantly lower force. This also minimises deformation of the tube.

# Plastic tubing PAN-V0, flame retardant

Technical data

## Plastic tubing PAN-V0

PVC casing, flame-retardant. The tube casing must be cut to length X (table → 15) before being inserted in the push-in fitting QS-V0. The tubing cut-

ter PAN-V0S is the perfect tool for this task. The tubing cutter PAN-V0S will always cut the casing to the right length.

1) Packaging unit  
Only whole meters can be ordered.

 **Note**
**Do not bend tubing!**

It is essential that bending of the tubing or excessive constriction when using cable binders is avoided during assembly and operation.

This could cause preliminary damage

to the tubing such that it could split at the bending location after a short while under normal operating conditions.

# Plastic tubing PEN

Technical data

## Plastic tubing PEN

Polyethylene tubing is distinguished by its high resistance to chemicals and hydrolysis. It is also resistant to most cleaning agents and lubricants.

Operating and environmental conditions

# Plastic tubing PLN

Technical data

## Plastic tubing PLN

Polyethylene tubing is distinguished by great resistance to chemicals and hydrolysis. It is resistant to most cleaning agents and lubricants.

Operating and environmental conditions		
Temperature dependent operating pressure	[bar]	-0.95 ... +14 → diagram
Operating medium		Compressed air in accordance with ISO 8573-1:2010 [7:--:-] Water as per manufacturer's declaration <sup>1)</sup>
Ambient temperature	[°C]	-30 ... +80
Food-safe <sup>1)</sup>		See supplementary material information
Approval		German Technical Control Board (TÜV)

1) Additional information [www.festo.com/sp](http://www.festo.com/sp) → Certificates.

# Plastic tubing PUN-H-DUO, hydrolysis resistant

Technical data

## DUO tubing PUN-H-DUO

Highly flexible paired plastic tubing distinguished by great resistance to abrasion and kinks. Two lengths of

tubing are fused together into a tubing pair. For fitting, the paired tubing is separated as required at both ends.

Operating and environmental conditions

# Plastic tubing PUN-V0, flame retardant

Technical data

## Plastic tubing PUN-V0

Highly flexible single-sheath plastic tubing, flame retardant

For use in indirect proximity to welding applications.

 Note  
Due to the included flame retardant, the colour of the tubing deviates from the standard colour.

Only whole meters can be ordered.

# Plastic tubing PUN-VO-C, flame retardant

Technical data

## Plastic tubing PUN-VO-C

Highly flexible single-sheath plastic tubing, flame retardant

For use in the immediate vicinity of welding applications.

 Note  
Due to the included flame retardant, the colour of the tubing deviates from the standard colour.

Operating and environmental conditions							
Type	PUN-VO-4	PUN-VO-6	PUN-VO-8	PUN-VO-10	PUN-VO-12	PUN-VO-14	PUN-VO-16
Temperature dependent operating pressure [bar]	-0.95 ... +10 → diagram	-0.95 ... +30 <sup>1)</sup> → diagram	-0.95 ... +20 <sup>1)</sup> → diagram	-0.95 ... +16 <sup>1)</sup> → diagram	-0.95 ... +10 → diagram	-0.95 ... +9 → diagram	-0.95 ... +10 → diagram
Operating medium	Compressed air in accordance with ISO 8573-1:2010 [7:-:-] Water as per manufacturer's declaration <sup>2)</sup>						
Ambient temperature [°C]	-35 ... +60						
Fire test <sup>2)</sup>	DIN 5510-2 S3/SR2/ST1						
Material fire test	UL94 V-0 (3 mm) UL94 V-2 (0.75 mm)						
Approval <sup>2)</sup>	German Technical Control Board (TÜV)						
Tubing characteristics	Suitable for energy chains for applications with a high cycle rate						
Tubing test conditions	Suitable for energy chains: > 5 million cycles to Festo standard 942021						

1) Limited to 10 bar in applications with welding spatter.  
2) Additional information [www.festo.com/sp](http://www.festo.com/sp) → Certificates.

## Operating pressure p as a function of temperature t

— PUN-VO-4-C  
- - - PUN-VO-6-C

For applications without welding spatter  
- - - PUN-VO-8x2-C  
- - - PUN-VO-10x2-C

1) Not for O.D. 16 mm  
2) Not for O.D. 14 mm

3) Not for O.D. 14/16 mm

## Materials

Shore hardness	D 54 ±3
Tubing	TPE-U(PU)
Note on materials	Conforms to RoHS Free of copper and PTFE

# Plastic tubing PUN-V0-C, flame retardant
