Motor controllers CMMP-AS, for servo motors

FESTO

Key features

Features

Compact

- Extremely small dimensions
- Full integration of all components for the controller and power unit, including USB interface, Ethernet and CANopen interface
- Integrated brake chopper
- Integrated EMC filters
- Automatic actuation for a holding brake
- Compliance with the current CE and EN standards without additional external measures (➔ page 6)

Motion control

- Evaluation of digital absolute encoders (EnDat/HIPERFACE) in single-turn or multi-turn versions
- Can be operated as a torque, rotational speed or position controller
- Integrated positioning control
- Time-optimised (trapezoidal) or jerk-free (S-shaped) positioning
- Absolute and relative movements
- Point-to-point positioning with and without motion path smoothing
- Position synchronisation
- Electronic gear unit
- 255 position sets
- Wide range of homing methods

Bus protocols

CANopen®

EtherCAT.

PROFIBUS®

EtherNet/IP™

DeviceNet.

PROFINET®

Modbus

Input/output

- Freely programmable I/Os
- High-resolution 16-bit analogue input
- Jog/teach mode
- Easy connection to a higher-order controller via I/O or fieldbus
- Synchronous operation
- Master/slave mode
- Additional I/Os with the plug-in card CAMC-D-8E8A ➔ page 18

Integrated sequence control

- Automatic sequence of position sets without a higher-level controller
- Linear and cyclical position sequences
- Adjustable delay times
- Branches and wait positions
- Overlapping restart possible during the movement

Integrated safety functions

- Depending on the variant or plug-in card, the motor controller supports the following safety functions:
  - Safe torque off (STO)
  - Safe stop 1 (SS1)
  - Safe brake control (SBC)
  - Safe operating stop (SOS)
  - Safe stop 2 (SS2)
  - Safely limited speed (SLS)
  - Safe speed range (SSR)
  - Safe speed monitor (SSM)

Interpolating multi-axis movement

- With a suitable controller, the CMMP-AS can perform path movements with interpolation via CANopen or EtherCAT. To do this, the controller specifies set-point position values in a fixed time pattern. In between, the servo position controller independently interpolates the data values between two interpolation points.

Key features

Motion program

- Linking of any number of position sets into a motion program
- Step enabling conditions for the motion program possible via digital inputs, for example
  MC – motion complete
  I/O – digital inputs

Library for EPLAN   ➔ www.festo.com/eplan

EPLAN macros for fast and reliable planning of electrical projects in combination with motor controllers, motors and cables. This enables a high level of planning reliability and standardisation of documentation without the need to create symbols, graphics and master data.

Cam disc functionality

The "electronic cam disc" application type creates optimised motion profiles that generate less vibration and lower acceleration forces at the machine. In addition, the movement of the motor is always synchronised with the position of a master axis so that overlapping, time-optimised motion sequences can be easily defined. To be able to use the cam disc function, you will need the Festo Configuration Tool (FCT) and also the cam editor ➔ Page 4.

Key features:
- High flexibility of the system. The mechanical system does not need to be modified if the requirements for the cam shapes change.
- User-friendly motion plan editor. All limits for position, speed and acceleration are immediately displayed in the editor. Up to 16 cam discs with a total of up to 2048 interpolation points can be managed. The interpolation points can be randomly distributed along the cam discs.
- There are four digital trip cams coupled with each cam disc.
- Each cam disc can be offset by a certain amount from the master axis.

ePLAN® is a registered trademark of its respective trademark holder in certain countries.

Key features

FCT software – Festo Configuration Tool
Software platform for electric drives from Festo
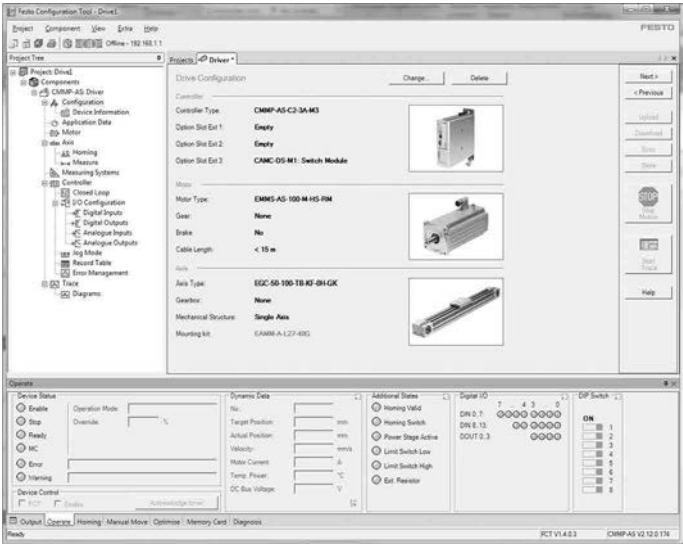

- All drives in a system can be managed and saved in a common project
- Project and data management for all supported types of equipment
- Easy to use thanks to graphically supported parameter entry

- Universal mode of operation for all drives
- Work offline at your desk or online at the machine

FHPP – Festo Handling and Positioning Profile
Optimised data profile

Festo has developed an optimised data profile, the "Festo Handling and Positioning Profile (FHPP)", which is specifically tailored to handling and positioning applications.
With the FHPP data profile, Festo motor controllers can be controlled using a fieldbus interface via standardised control and status bytes.

The following are defined, among others:
- Operating modes
- I/O data structure
- Parameter objects
- Sequence control

General technical data

CMMP-AS-		C2-3A-...	C5-3A-...	C5-11A-P3-...	C10-11A-P3-...	C15-11A-P3-...
Type of mounting		Screwed onto connection plate				
Display		Seven-segment display				
Parameterisation interface		USB, Ethernet				
Active PFC		Yes		–		
DIP switch		Firmware download/fieldbus settings[1]/CAN terminating resistor				
SD card slot		Memory card ➔ page 19				
Encoder interface input		Resolver				
		Incremental encoder with analogue or digital tracking signals				
		Absolute encoder with EnDat V2.1 serial/V2.2				
		Absolute encoder with HIPERFACE				
		Additional input for synchronous/cam disc operation				
Encoder interface output		Actual value feedback via encoder signals in rotational speed control mode				
		Setpoint specification for downstream slave drive				
		Resolution up to 16384 ppr				
Braking resistor, integrated	[Ω]	60		68		
Pulse power of braking resistor	[kVA]	2.8		8.5		
Braking resistor, external	[Ω]	≥ 50		≥ 40		
Impedance of setpoint input	[kΩ]	20				
Number of analogue outputs		2				
Operating range of analogue outputs	[V]	±10				
Resolution of analogue outputs		9 bit				
Characteristics of analogue outputs		Short-circuit-proof				
Number of analogue inputs		3				
Operating range of analogue inputs	[V]	±10				
Characteristics of analogue inputs		1x differential, resolution 16 bit				
		2x single-ended, resolution 10 bit				
		Configurable for rotational speed setpoint value/torque setpoint value/position setpoint value				
Mains filter		Integrated				External[2]
Max. motor cable length[3]	[m]	25				–
Product weight	[g]	2100	2200	3800		3450

1) Not in combination with CMMP-AS-...-M0
2) The mains filter is mandatory for compliance with the CE and EN standards ➔ page 21
3) Without external mains filter

Accessories

Technical data		
General		
Parameterisation		Using SafetyTool, integrated into the FCT plug-in for CMMP-AS-…
Digital safe inputs DIN 40A/B to DIN 43A/B		
Specification		IEC 61131-2, type 3
Number of 2-channel inputs		4
Nominal voltage	[V DC]	24
Operating range	[V]	−3 … 30
Nominal current	[mA]	15
Max. nominal current	[mA]	200
Key features		Suitable for emergency-stop switchgear, protective door circuit, light curtain, enabling button, two-hand operator unit; Inputs switching equivalently/antivalently; Test pulses can be configured; Function can be configured
Digital safe inputs DIN 44 to DIN 49		
Specification		IEC 61131-2, type 3
Number of 1-channel inputs		6
Nominal voltage	[V DC]	24
Operating range	[V DC]	−3 … 30
Nominal current	[mA]	15
Max. nominal current	[mA]	200
Key features		Suitable for start button, brake feedback, mode selector, error acknowledgement, restart blocking; Test pulses can be configured; Function can be configured
Digital safe outputs DOUT 40A/B to 42A/B		
Number of 2-channel outputs		3
Output		High-side switch with pull-down
Nominal voltage	[V DC]	24
Operating range	[V DC]	18 … 30
Permissible output current	[mA]	< 50
Key features		Semiconductor outputs: parameterisable PNP (positive switching) Outputs switching equivalently/antivalently Test pulses can be configured Function can be configured
Monitoring contact C1, C2		
Nominal voltage	[V DC]	24
Max. voltage	[V DC]	< 30 (overvoltage-resistant up to 60 V)
Nominal current	[mA]	< 200 (not short-circuit-proof)
Design		Potential-free signal contact
Key features		Suitable for the diagnostics of safety functions Function can be configured

Accessories

Supported position encoders

- Resolver via X2A
- SIN/COS incremental encoder
- SICK Hiperface shaft encoder (only process data channel)

- Heidenhain EnDat encoder
- Incremental encoder with digital A/B signals

- BISS position sensors for linear motors
- Incremental encoder with digital A/B signals

The manufacturers of SIL-certified shaft encoders publish guidelines for their use in safety applications.

The safety module CAMC-G-S3 takes the following manufacturer specifications into account when evaluating the encoder signals:

- Implementation Manual HIPER-FACE® Safety dated 21.12.2010 (801412 0/2010-12-21)
  ➔ www.sick.com

- Specification of the E/E/PES safety requirements for EnDat Master dated 19.10.2009 (D533095-04-G-01)
  ➔ www.heidenhain.de (in preparation)

Permissible combinations of position encoders
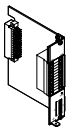

First encoder	Second encoder	Achievable safety level		Note

Resolver	Incremental encoder	SIL 3	Cat. 4/PL e	–
Resolver	None	SIL 2	Cat. 3/PL d	Please see the note below
SIN/COS incremental encoder	None	SIL 3	Cat. 3/PL d	Requires SIL classification of the encoder
SIN/COS incremental encoder	Incremental encoder	SIL 3	Cat. 4/PL e	Please see the note below
Hiperface incremental encoder	Incremental encoder	SIL 3	Cat. 3/PL e	Please see the note below
Hiperface incremental encoder	None	SIL 2 or 3	Cat. 3/PL d; Cat. 4/PL e	Requires SIL classification of the encoder
EnDat encoder	Incremental encoder	SIL 3	Cat. 4/PL e	Encoder setting: "Other encoder" Please see the note below
EnDat encoder	None	SIL 2	Cat. 3/PL d	In preparation. Requires SIL classification of the encoder
Other encoder	Incremental encoder	SIL 2	Cat. 3/PL d	–

Note

- Please check whether your selected position encoder is sufficiently accurate to fulfil the monitoring task, in particular the SOS safety function.
- In applications with only one shaft encoder/position encoder, it must have the SIL classification required in accordance with the risk assessment. In most cases, the classification requires additional requirements or fault exclusions in the mechanical system. Please check carefully that these requirements are fulfilled in your application and that the appropriate fault exclusions can be performed.

- In applications with only one shaft encoder/position encoder with analogue signal interface (resolver, SIN/COS, Hiperface, etc.), the restrictions on diagnostic coverage as well as the restrictions on the achievable accuracy of standstill and speed monitoring must be taken into account.
- When using two functional encoders without SIL classification, the suitability of the encoder combination for use in safe systems up to SIL3 must be proven separately (for example, the following are required: diversity of the encoder systems with regard to CCF, MTTFd, etc., suitability of the encoders for the operating and ambient conditions, EMC, etc.).

Ordering data – Plug-in card

|	Description	Part no.	Type
	Safety module: • One of the plug-in cards CAMC-G-S1, CAMC-G-S3 or CAMC-DS-M1 must be inserted in slot [7] (➔ page 11) in order to operate the motor controller. • The plugs are included in the scope of delivery. To reorder plug NEKM ➔ page 20	☆ 1501331	CAMC-G-S3

| Festo core product range	★	Generally ready for dispatch from the factory within 24 hours
	☆	Generally ready for dispatch from the factory within 5 days

Accessories

**Interface CAMC-D-8E8A**

Only for motor controller:
CMMP-AS-...-M3

The interface is used to extend the digital I/Os.
Up to two interfaces are supported simultaneously.

Technical data		
General		
Max. connection cross-section	[mm²]	0.5
Electrical connection		Screw terminal
		Straight plug
Digital inputs		
Number		8
Nominal voltage	[V DC]	24
Voltage range	[V]	−30 ... +30 (protected against reverse polarity and short-circuit-proof)
Nominal value for True	[V]	8
Nominal value for False	[V]	2
Input impedance	[kΩ]	4.7
Digital outputs		
Number		8
Nominal voltage	[V DC]	24
Voltage range	[V]	+18 ... +30 (protected against reverse polarity and short-circuit-proof, protection in the event of thermal overload)
Output current	[mA]	100
Short circuit, overcurrent protection	[mA]	500

Ordering data – Plug-in card

|	Description	Part no.	Type
	Switch module: • One of the plug-in cards CAMC-G-S1, CAMC-G-S3 or CAMC-DS-M1 must be inserted in slot [7] (→ page 11) in order to operate the motor controller CMMP-AS-...-M3.	☆ 1501329	**CAMC-DS-M1**

Ordering data – Plug-in cards for bus protocols

	Description	Part no.	Type
	For PROFIBUS DP	☆ 547450	**CAMC-PB**
	For PROFINET RT	☆ 1911916	**CAMC-F-PN**
	For DeviceNet	547451	**CAMC-DN**
	For EtherCAT	☆ 567856	**CAMC-EC**
	For EtherNet/IP	☆ 1911917	**CAMC-F-EP**

Ordering data – Memory card

	Description	Part no.	Type
	Memory card, for data backup and firmware download	☆ 1436343	**CAMC-M-S-F10-V1**

Ordering data – Connection options from I/O interface to the controller

|	Description	Cable length [m]	Part no.	Type
Control cable				
	• For I/O interface to any controller • Recommended for analogue signals since the cable is shielded	2.5	552254	**NEBC-S1G25-K-2.5-N-LE26**
	• For I/O interface to any controller • Cannot be used if the incremental encoder interface (plug X10) is in use	3.2	☆ 8001373	**NEBC-S1G25-K-3.2-N-LE25**
Connection block				
	Ensures simple and clear wiring. The connection to the motor controller is established via the connecting cable NEBC-S1G25-K-...	–	8001371	**NEFC-S1G25-C2W25-S7**
Connecting cable				
	• Connects the motor controller to the manifold block. • Cannot be used if the incremental encoder interface (input) is in use	1.0	8001374	**NEBC-S1G25-K-1.0-N-S1G25**
		2.0	8001375	**NEBC-S1G25-K-2.0-N-S1G25**
		5.0	8001376	**NEBC-S1G25-K-5.0-N-S1G25**
Plug				
	• 25-pin Sub-D plug. Each single core can be individually assembled using screw terminals. • Cannot be used if the incremental encoder interface (input) is in use	–	☆ 8001372	**NEFC-S1G25-C2W25-S6**

Festo core product range	★	Generally ready for dispatch from the factory within 24 hours

	CMMP-AS-C15-11A-P3-...				

1) Recommended braking resistor

Ordering data – Mains filter

	For type	Operating voltage [V]	Input current [A]	Dimensions [mm]	Part no.	Type
	CMMP-AS-C15-11A-P3-...	520/300	16	Length: 230 Width: 50 Height: 70	3947275	CADF-C15-11A-P3

> **Note**
> Regardless of the length of the motor cable, the mains filter is mandatory for compliance with the CE and EN standards.

Ordering data – Software and documentation

	Description	→ Internet
	The following descriptions are available on the Festo website: • Hardware: mounting and installation of all variants • Functions: instructions on commissioning with FCT + functional description • FHPP: control and parameterisation of the motor controller via the FHPP profile • DS402: control and parameterisation of the motor controller via the device profile CiA 402 (DS402) • CAM editor: cam disc functionality (CAM) of the motor controller • Safety module: functional safety engineering for the motor controller with the safety function STO	www.festo.com/net/SupportPortal

Ordering data – Software and documentation for the cam editor

	Description	Part no.	Type

	Software package contains:
	• CD-ROM
	  – With user documentation in de, en, es, fr, it, ru, zh
	  – With additional functions for the cam disc functionality
	The software package is not included in the scope of delivery
		570903	GSPF-CAM-MC-ML
