Key features

FESTO

Simply "plug and work"	Reliably connected	Captive seal	Orientable
			
The stainless steel retaining claw within the fitting holds the tubing securely without damaging its surface. Vibration and pressure surges are safely absorbed. The tubing can be detached easily by pressing down the blue release ring. For your convenience, the appropriate outside tubing diameter is marked on the release ring.	A nitrile rubber sealing ring guarantees a perfect seal between standard OD tubing and the body of the fitting. Standard tubing is suitable for use with compressed air and vacuum.	All brass parts of Festo's push-in fittings are nickel plated and are thus highly resistant to corrosion. The tapered ISO R threads have a self-sealing PTFE coating, which allows the fitting to be re-used up to five times without the need for additional sealing components.	The fitting can be aligned after assembly.

Which fitting fits which thread?

G thread to ISO 228-1

- Shorter thread
- Constant installation depth
- Replaceable sealing ring
- Sealing at front
- Can be re-used a number of times thanks to replaceable sealing ring

R thread to EN 10226-1 and ISO 7/1

- Self-sealing thread
- Sealing on the threads
- No additional sealing surface required
- Smaller installation dimensions since there is no need for a rebate for the sealing surface
- Can be re-used up to five times

Technical data

FESTO

General technical data	
Size	Standard
Design structure	Push/pull principle
Assembly position	Any
Type of seal on threaded plug	Sealing ring (G thread)
	Coating (R thread)

Operating and environmental conditions	
Operating pressure [bar]	−0.95 ... +6
complete temperature range	
Temperature-dependent operating pressure [bar]	−0.95 ... +14 → diagram
Operating medium	Compressed air in accordance with ISO 8573-1:2010 [7:--:--]
	Water as per manufacturer's declaration ²⁾
Note on operating/pilot medium	Operation with lubricated medium possible
Ambient temperature [°C]	−10 ... +80
Corrosion resistance class CRC ¹⁾	1
Maritime classification	See certificate ²⁾

1) Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. For dry indoor applications or transport and storage protection. Also applies to parts behind covers, in the non-visible interior area, and parts which are covered in the application (e.g. drive trunnions).

2) Additional information www.festo.com/sp → Certificates.

Operating pressure p as a function of temperature t
