

Pressure boosters DPA

FESTO

Pressure boosters DPA

Key features

FESTO

Function

The pressure booster is a twin-piston pressure intensifier intended solely for compressing air. When the DPA is pressurised with compressed air, integrated non-return valves automatically facilitate pressure build-up on the secondary side. The output pressure p_2 can increase to up to twice the value of the supply

pressure p_1 . The required output pressure is set using a manually operated pressure regulator. In the case of pressure boosters without a pressure regulator, the output pressure is always twice the supply pressure. The air supply to both drive pistons is controlled by a pneumatic directional control valve that reverses

automatically when the stroke end position is reached. The pressure booster starts automatically when the supply pressure is applied and the desired output pressure has not yet been reached. When the set output pressure is reached, the pressure booster

switches to energy-saving mode but restarts automatically if the pressure drops during system operation. With the DPA with sensing option, it is also possible to record individual strokes of the drive piston with the aid of an external sensor and adding counter.

Note

Pressure boosters are intended for the occasional relieving of compressed air. They are not suitable as a replacement for compressors, as wear on seals and drive pistons increases significantly during continuous operation without breaks.

Note

The pressure regulator is supplied with a non-tensioned regulator spring (DPA-...-10/16 only). After the supply pressure is applied, the regulator spring is pretensioned by turning the regulator knob until the desired output pressure p_2 is achieved.

A pressure gauge is strongly recommended to monitor the output pressure p_2 . In the case of the DPA-63/100, the regulator setting can be secured against unauthorised adjustment by means of the regulator lock LRVS.

Connection to the compressed air network

Supply pressure side

The use of a 3/2-way on-off valve (e.g. HE-...-D, HEE-...-D or a similar type) in the air supply line to the pressure booster is recommended. The 3/2-way on-off valve must not be opened until the supply pressure p_{in} has already built up.

Output pressure side

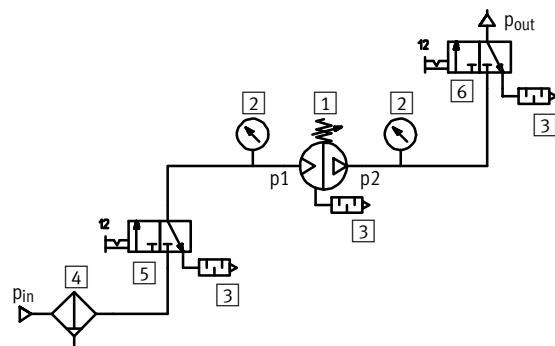

The connection of a 3/2-way on-off valve on the output pressure side of the pressure booster is recommended for safe venting of the output pressure p_{out} . If a 3/2-way valve is not used, the output pressure can only be vented by fully releasing the regulator spring (regulator knob turned all the way to the left).

Note

If there is a soft-start valve in the system, it is essential that a 3/2-way on-off valve is inserted between the soft-start valve and pressure booster.

Note

In the case of pressure boosters without pressure regulator, external venting must be ensured via a 3/2-way on-off valve.

FESTO

Key features

Installation with air reservoir

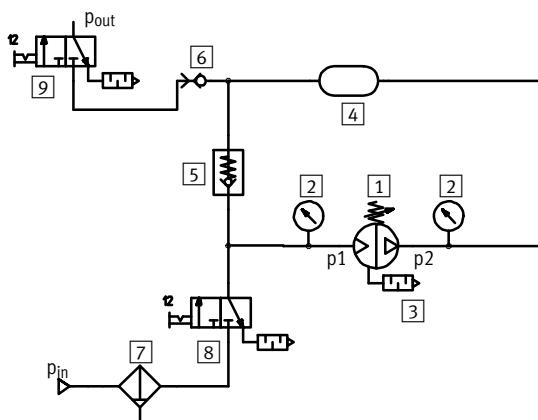

An air reservoir (e.g. CRVZS) should always be used on the output pressure side to compensate for pressure fluctuations. The air reservoir evens out the pulsation of the pressure booster. An effective way of filling the air reservoir with the supply pressure p_1 is via a connecting cable. The pressure booster only has to make up

the difference between the supply and output pressures. The air reservoir is filled faster. A non-return valve prevents the air from flowing back out of the reservoir. This configuration corresponds to the scope of delivery of the pressure booster/air reservoir combination that can be ordered (→ 16).

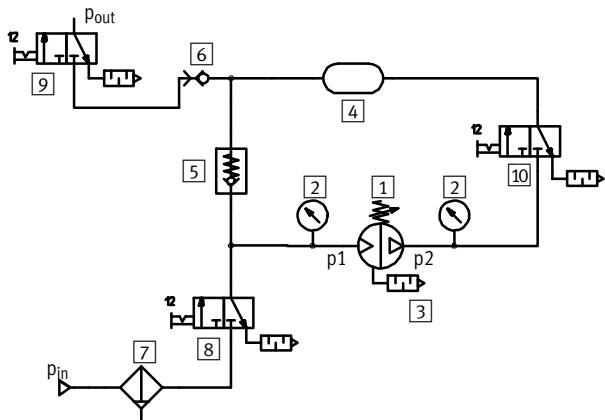

Circuitry with 2 on-off valves

The air reservoir is vented via the regulator knob of the pressure booster.

Circuitry with 3 on-off valves

The air reservoir is vented via the additional on-off valve.

Flange mounting FDPA for DPA-40

Material:

Mounting: anodised aluminium

Screws: galvanised steel

Free of copper and PTFE

Ordering data

| For type | CRC ¹⁾ | Weight [g] | Part No. | Type |
|----------|-------------------|---------------|----------|---------|
| DPA-40 | 2 | 120 | 540783 | FDPA-40 |

1) Corrosion resistance class CRC 2 to Festo standard FN 940070

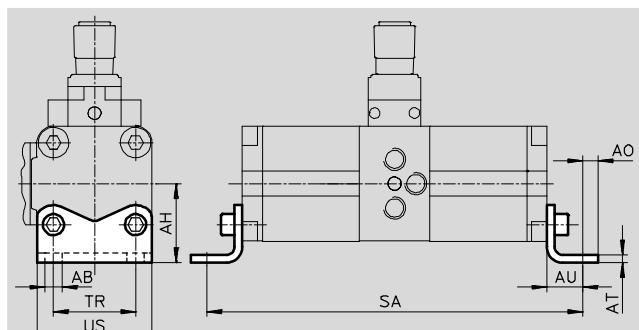

Moderate corrosion stress. Indoor applications in which condensation may occur. External visible parts with primarily decorative requirements for the surface and which are in direct contact with the ambient atmosphere typical for industrial applications.

Foot mounting HUA for DPA-63/100

Material:

Mounting, screws: galvanised steel

Free of copper and PTFE

Ordering data

| For type | AB ∅ | AH | AO | AT | AU | SA | TR | US | CRC ¹⁾ | Weight [g] | Part No. | Type |
|----------|---------|------|-------|----|----|-----|-----|-------|-------------------|---------------|----------|---------|
| DPA-63 | 11 | 56.5 | 11.75 | 6 | 27 | 343 | 62 | 85.5 | 1 | 581 | 157315 | HUA-63 |
| DPA-100 | 13.5 | 81 | 11.75 | 8 | 33 | 433 | 103 | 126.5 | 1 | 1,117 | 157317 | HUA-100 |

1) Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. For dry indoor applications or transport and storage protection. Also applies to parts behind covers, in the non-visible interior area, and parts which are covered in the application (e.g. drive trunnions).

Pressure gauge set DPA-MA-SET for DPA-40-10/16/D

The pressure gauges generally have to be sealed with PTFE sealing tape.

Single pressure gauge MA-27-...-R $\frac{1}{8}$:
Technical data → Internet: ma-27

for DPA-63/100-10/16

General technical data

| For type | DPA-40 | DPA-63 | DPA-100 |
|--------------------------------|-----------------------------|-----------------|-----------------|
| Pneumatic connection | R $\frac{1}{8}$ | G $\frac{1}{8}$ | G $\frac{1}{4}$ |
| Nominal size of pressure gauge | 27 | 40 | 40 |
| Design | Bourdon-tube pressure gauge | | |
| Based on standard | EN 837-1 | | |
| Type of mounting | With external thread | | |
| Mounting position | Any | | |
| Ambient temperature [°C] | +5 ... +60 | | |
| Measurement accuracy class | 4 | 2.5 | 2.5 |
| Protection class | IP43 | | |
| Weight [g] | 16 | 250 | 305 |

Materials

| | | |
|--------------------------------|--------------------|---------------------|
| Nominal size of pressure gauge | 27 | 40 |
| Housing | PA (colour: black) | ABS (colour: black) |
| Inspection window | PS | PS |
| Note on materials | RoHS-compliant | |

Dimensions and ordering data

| For type | D1 ∅ | H1 | L6 | Operating pressure [bar] | Part No. | Type |
|----------|---------|------|------|-----------------------------|----------|-------------------|
| DPA-40 | 28 | 19 | 59.2 | 10 | 540781 | DPA-40-10-MA-SET |
| | | | | 16 | 540782 | DPA-40-16-MA-SET |
| DPA-63 | 39 | 65 | 159 | 10 | 526096 | DPA-63-10-MA-SET |
| | | | | 16 | 526097 | DPA-63-16-MA-SET |

**Pressure gauge MA, to EN 837-1
for DPA-63/100-D**

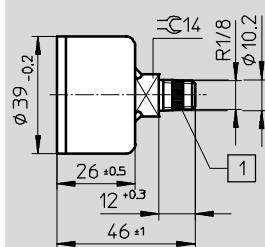

Material:

Housing: acrylic butadiene styrene
(colour: black)

Inspection window: polystyrene

Threaded plug/Materials in contact
with the medium: brass

Conforms to RoHS

[1] PTFE tape

General technical data

| | |
|----------------------------|---|
| Nominal size | 40 |
| Pneumatic connection | R1/8 |
| Operating medium | Neutral liquids Neutral gases Not permitted: Oxygen Not permitted: Acetylene |
| Design | Bourdon-tube pressure gauge |
| Based on standard | EN 837-1 |
| Type of mounting | Inline installation |
| Connection position | Centred, rear side |
| Ambient temperature [°C] | -20 ... +60 |
| Temperature of medium [°C] | -20 ... +60 |
| Measurement accuracy class | 2.5 |
| Continuous load factor | 0.75 |
| Intermittent load factor | 0.66 |
| Protection class | IP43 |
| Weight [g] | 60 |

Ordering data

| For type | Pressure control | Operating pressure [bar] | Indicating range [bar] [psi] | | Part No. | Type |

Adding counter CCES for DPA-63/100-...-A

Material:

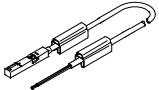

Housing: Polycarbonate

Conforms to RoHS

- [1] Front panel
- [2] Detailed drawing of the front panel
- [3] Installation depth
- [4] Clamping frame

| Ordering data | | | | | Technical data → Internet: cces | |
|------------------|---------|--|------------|----------|---------------------------------|--|
| For type | Display | Power supply | Weight [g] | Part No. | Type | |
| DPA-63/100-...-A | 8-digit | Lithium battery (nominal value retention 7 years) | 30 | 549403 | CCES-P-C8-E | |

| Ordering data – Proximity sensor SME/SMT for adding counter CCES | | | | | Technical data → Internet: sme-8m, smt-8m | |
|---|---------------|-----------------------|------------------|----------|---|------------------------|
| Switching element function | Switch output | Electrical connection | Cable length [m] | Part No. | Type | |
|  | N/O contact | Contacting, bipolar | Cable, 3-wire | 2.5 | 543862 | SME-8M-DS-24V-K-2,5-OE |
| | | PNP | Cable, 3-wire | 2.5 | 543867 | SMT-8M-PS-24V-K-2,5-OE |

- Note

Please note the following points:

- The abovementioned proximity sensor SME can be connected to the adding counter as a 2-wire switch without additional power supply.
- If using other proximity sensors, an additional power supply is needed
- and the clock pulse input of the adding counter must be reprogrammed from NPN to PNP.
- Screened cables must be used for cables longer than 3 m.
- The maximum permissible cable length is 30 m.
