

# Copac and Copar – Linear and Rotary Actuators for the Process Industry

**FESTO**

Info 188 →→

### **Festo Corporation Mission**

Enhance the business success of our customers by providing cost-efficient automation solutions with innovative products and services.

We accomplish this through:

- The commitment and conduct of our employees
- Allocation of capital
- Continuous improvement of internal processes
- Product innovation with reliability
- Application knowledge

### **Copac/Copar Actuators**

Superior Quality - Excellent Value

A Step Ahead

**Pneumatics in process technology:  
Your next step towards a more  
economical future**

**Copac and Copar –  
Linear and quarter turn actuators**

The Festo linear and quarter turn actuators – Copac and Copar – are particularly suited for use in water, sewage, industrial process water and silage technology, as well as the paper and bulk goods industries, among others.

Water, sludge, waste or contaminated material of widely differing consistency pass through processing stations, and are treated, separated, sorted or filtered. In silage or bulk goods industry, materials such as powder, granulates, and flour are transported and fed – all in a dusty, polluted and hazardous environment.

Festo actuators provide reliable control of a wide range of different ball, plug, butterfly, and shut-off valves, etc.

**Our know-how – Your benefit**

Festo offers you:

- Simple, sturdy and durable technology, tried and tested a million times over in industry.
- System solutions of modular design, which can be easily upgraded and offer potential savings compared to conventional actuators.
- Economic operation thanks to optimum configuration of actuators
- Safety, thanks to explosion-proof actuators and components, defined fail-safe positions and manual override
- Intelligent open and closed loop control systems controlled by means of actuators networked with sensors and controllers, also suitable for decentralized control.
- Decentralized automation  
Pneumatic drive technology  
Controllable via 30 different fieldbus protocols: fast, safe, cost effective, easily expandable.
- Extensive service network in more than 170 countries and 53 independent national companies

## Copac Linear Valve Actuator, Type DLP

Key features at a glance

### Copac linear valve actuator DLP

Air connection hole pattern per Namur [VDI/VDE 3845] for attaching solenoid valves.

For cylinder sensor mounting.

Sturdy and reliable, even in aggressive environments.

Mounting hole pattern per DIN 3358/ISO 5210 for direct mounting.

Designed for slow and fast valve activation.

- Highly corrosion resistant.
- Suitable for manual on-site use, as well as automatic operation.
- For contactless end-position sensing.
- Opening and closing motion is actuated via a flange-mounted solenoid valve with hole pattern in accordance with Namur, or via valve terminals with 30 different fieldbus protocols.
- Internal air lines eliminate protruding tubing and attachments, thereby also eliminating bothersome accumulations of contamination.

## Actuator design

The actuators described are designed for standard valve/ fittings suitable for the process industry (i.e.: water, paper, etc.) The preliminary selection is based on experience. Variances caused as a result of high process pressures, special fittings, and special safety requirements have not been taken into account.

## Stroke length of actuator

Generally, the stroke length of the Copac linear actuator corresponds to the nominal diameter of the valve. The system tolerances may lead to a greater stroke range than the specified nominal stroke range of the linear actuator. The zero point is set with an adjustable rod clevis. This ensures that the end position of the valve slide is reached and the zero position of the system is fixed.

## Copac Linear Valve Actuator, Type DLP

Order code

<b>Example:</b>	You require a linear actuator with a maximum force of 4800 N for a valve slide with a nominal diameter of 150 mm and an operating pressure of 6 bar. Which Copac linear actuator is suitable for this task?	
<b>Step 1</b>	In order to operate the valve slide, the return force of the linear actuator must be greater than the maximum inherent force of the valve slide [4800 N]. From the table at the bottom of page 10, you will see that these requirements are met by the linear actuator DLP-125 [return force 6881 N], while also providing an adequate reserve.	
<b>Step 2</b>	<p>The required stroke length of the linear actuator is obtained from the travel distance of the valve/ slide. Assumption: The travel distance corresponds exactly to the nominal diameter of the valve/ slide [150 mm]. The result of this is the following order designation:</p> <p>DLP-125-150</p>	<p>If the piston position is to be sensed by means of a proximity switch, the order designation is as follows:</p> <p>DLP-125-150-A</p> <p>[The proximity switches must be ordered separately]</p>
<b>Step 3</b>	<p>The overall dimension of the linear actuator can be calculated according to the dimensions table on page 11. The overall length is obtained from the dimension ZB and the required stroke.</p> <p>Overall length = ZB + stroke                  Overall length = 138 mm + 150 mm                  Overall length = 288 mm</p>	
<b>Step 4</b>	<p>The total air consumption for a complete cycle [opening and closing] is calculated from the air consumption for the pulling movement [opening] and for the pushing movement [closing] of the linear drive.</p> <p>An operating pressure of 6 bar results in the following total air consumption:</p>	<p>Total air consumption = air consumption for opening + air consumption for closing</p> <p>Total air consumption =</p> $150 \text{ mm} \times \frac{0.800 \text{ NI}}{10 \text{ mm}} +$ $150 \text{ mm} \times \frac{0.860 \text{ NI}}{10 \text{ mm}}$ <p>Total air consumption = 24.9 NI</p>

# Copar Rotary Valve Actuator, Type DRD/DRE

Key features at a glance

Actuators for the process industry

**Copar rotary valve actuator**  
**DRD-...**  
**DRE-...**

- Torque range  
7.5 ... 8800 Nm
- 90° rotation angle  
standard, other angles  
available on request
- NPT models also available

**Two basic models:**

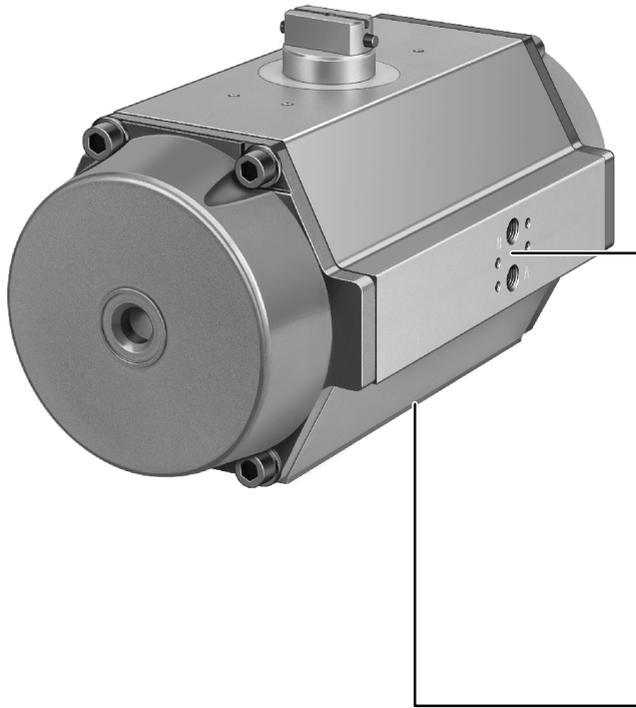

- Double acting actuator  
**Example: DRD-...**
- Single acting actuator  
**Example: DRE-...**

The copar rotary actuator is sturdy and accurate for precise positioning, especially with ball, plug, shut-off and butterfly valves, etc.

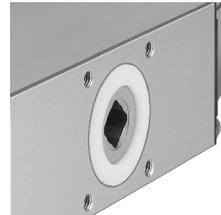

- Order code → Page 20
- Data sheet copar → Page 22
- Accessories → Page 32

## Copar Rotary Valve Actuator, Type DRD/DRE

Key features at a glance

Opening and closing can be controlled with a flange-mounted solenoid valve featuring an air connection hole pattern per Namur [VDI/VDE 3845].

Flange connection per ISO 5211/DIN 3337.

NPT models have square on shaft rotated 45°.

Copar rotary valve actuator DRD, DRE

- Direction of rotation can be changed from clockwise to counterclockwise.
- Torques are graduated in accordance with ISO.
- Fast or slow valve actuation.
- Suitable for manual on-site use, as well as automatic operation.
- Resistant to overload and continuous loads.
- Highly corrosion resistant.
- Can be used as a variable-speed drive in combination with an electro-pneumatic positioning controller.
- End-position sensor and limit switch module can be mounted directly to the actuator.
- For contactless end-position sensing.
- Optionally adjustable end positions for sizes 8 ... 100, facilitating adjustment ranges of -4° ... +8° and from 82° ... 94°.

### Important

If a rotary actuator needs optional requirements which go beyond those listed, a corresponding order code must be determined. [This order code

does not include a part no.]. For explanation of codes and ordering examples, see the next page.

# Copar Rotary Valve Actuator, Type DRD/DRE

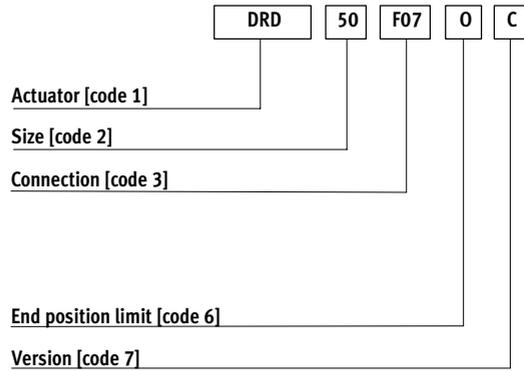

Order code

Actuators for the process industry

## Product modules

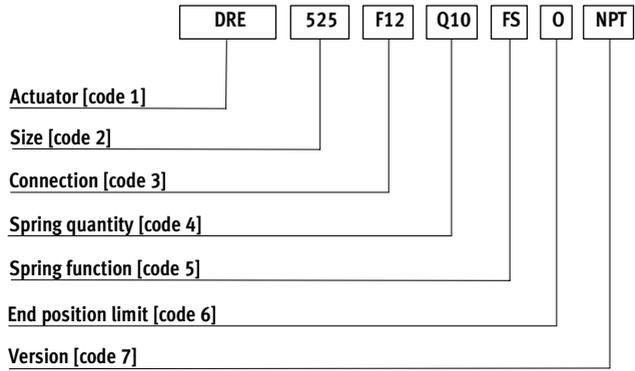

Order examples:

Double-acting rotary actuators

## Copar rotary actuators

Single-acting rotary actuators

Code 1: actuator		Code 2: sizes		Code 3: connection to valve †	
DRD	double-acting	1	Size 1	F03	Flange pattern F03 with square V09
DRE	single-acting	2	Size 2	F04	Flange pattern F04 with square V11
		4	Size 4	F05	Flange pattern F05 with square V14
		8	Size 8	F07	Flange pattern F07 with square V17
		14	Size 14	F10	Flange pattern F10 with square V22
		26	Size 26	F12	Flange pattern F12 with square V27
		50	Size 50	F14	Flange pattern F14 with square V36
		77	Size 77	F16	Flange pattern F16 with square V46
		100	Size 100	F25	Flange pattern F25 with square V55
		150	Size 100	F30	Flange pattern F30 with square V75
		225	Size 225	† See overview on page 22	
		375	Size 375		
		575	Size 575		
		880	Size 880		

Code 4: spring quantity for rotary actuator DRE-...		Code 5: spring function for rotary actuator DRE-...	
Q06	Spring quantity 06	FS	Spring-force closing
Q08	Spring quantity 08	FO	Spring-force opening
Q10	Spring quantity 10*		
Q12	Spring quantity 12**		
Q14	Spring quantity 14		
Q09	Spring quantity 09***		
Q15	Spring quantity 15***		
Q18	Spring quantity 18***		

Code 6: end-position limit		Code 7: version	
–	without adjustable end-position limit	–	standard version
		NPT	with NPT/UNC thread
0	with adjustable end-position limit and extended rotation angle (angle of rotation to 98°, only possible for sizes 6 through 100)	C	corrosion-resistant version ****

\* Standard spring quantity (configured for 6 bar operating pressure).  
 \*\* Standard for size 575.  
 \*\*\* Only with size 575.  
 \*\*\*\* Upon request.

DRD/DRE-880-F30-...	16,000										

\* The specified maximum permissible torques per DIN/ISO 5211 are in accordance with the indicated flange sizes.

\*\* Standard

## Technical data

Design	Piston cylinder, double or single-acting	
Operating pressure*	min.: sizes 1 ... 4: 2.5 bar, sizes 8 ... 880: 2 bar, max.: [all sizes]: 10 bar	
Temperature range**	-20 ... +80 °C [observe operating range of cylinder sensor]	
Material	Housing	Anodized aluminum
	Bearing cap	Painted aluminum
	Shaft	Aluminum, sizes 150 ... 880: steel
	External screws	Stainless steel
	Seals	Polyurethane, perbunan, POM

\* Minimum operating pressures vary for single-acting rotary actuators depending upon spring quantity.

\*\* Additional temperature ranges available upon request.

Conversion factors → page 45.

## Limit switch box with sensors

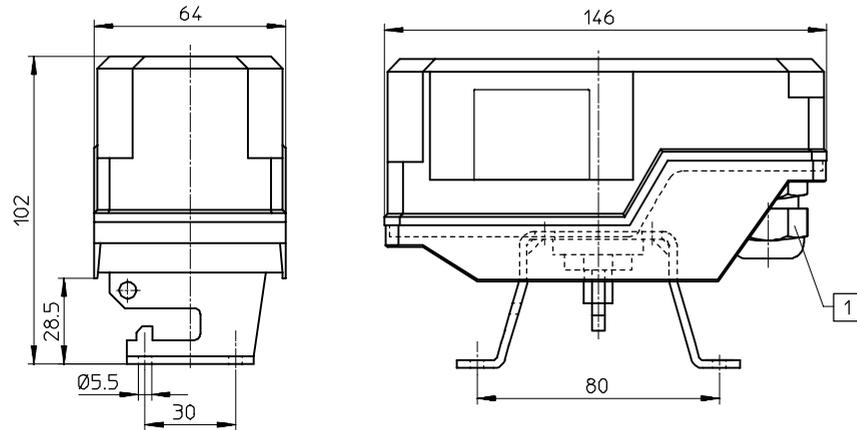

QH-DR-E...

### Materials:

Housing, lower: Vestamid  
 Cap: Macrolon, transparent  
 Seal: EPDM 60 Shore A

The limit switch box is available in 3 versions. Sensing can be:

- Inductive
- Electrical
- Pneumatic

1 Connection PG 13.5

## Inductive sensing

Part No.	Type
164 853	QH-DR-E-SIEN-M12NB B
Permissible operating voltage	10 to 30 VDC
Rated operating current	200 mA
Idle current	≤ 1 mA
Output	Short-circuit proof, reverse polarity protected Voltage drop : ≤ 3.2 V Residual current: ≤ 0.01 mA
Cross section of connection cables	0.2 to 2.5 mm <sup>2</sup>
Switching accuracy unit	≤ 0.5°
Connection	PG 13.5
Temperature range	-25 ... +85° C
Display	LED, yellow
Degree of protection	Housing IP 65
CE symbol	EN50947-5-2:1995

Conversion factors → page 45.

## Electrical sensing

Part No.	Type
164 854	QH-DR-E-S3-SW B
Category	AC 15 / AC 12 DC 13 / DC 12
Permissible operating voltage	0 to 250 VAC 0 to 250 VAC
Rated operating currents for rated operating voltage	Ohmic load: [AC 12 / DC 12] 230 VAC / 230 VDC 10 A AC / 0.3 A DC Inductive load: [AC 12 / DC 12] 230 VAC / 230 VDC 4 A AC / 0.2 A DC
Rated transient voltage	2.5 kV
Cross section of connection cables	0.2 to 2.5 mm <sup>2</sup>
Switching accuracy unit	1.5°
Connection	PG 13.5
Temperature range	-25 ... +80° C
Degree of protection	Housing IP 65
CE symbol	Yes, to EN60947-5-1:1991

## Pneumatic sensing

Part No.	Type
164 855	QH-DR-E-S3-PK-3-B B
Medium	Compressed air, filtered [lubricated or unlubricated]
Function	3/2-way valve, directly actuated, normally closed
Pneumatic connection	Barbed fitting for plastic tubing NW 3
Nominal width	1.8 mm [smallest cross-section]
Working pressure	-1 to +8 bar
Switching accuracy unit	1.5°
Connection	PG 13.5
Temperature range	-10 ... +60° C

Conversion factors → page 45.

## NAMUR valve

### Basic

Materials:

Housing, Al, anodized, St-A2, POM

Seal: NBR

- 1 Sealing plate set to 5/2-valve function
- 2 Sealing plate set to 3/2-valve function
- 3 Hole for coding pin

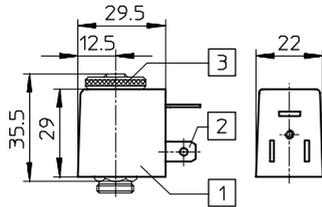

Basic Namur valve body		
Medium		Compressed air, filtered [lubricated or unlubricated]
Design		Spool valve with sealing ring cartridge and convertible sealing plate [NAMUR hole pattern] for either 5/2-way or 3/2-way valve function with exhaust air return.
Type of mounting		2 holes in housing to VDI/VDE 3845, NAMUR DIN 228/1 with 2 cheesehead screws M5x40 DIN 912 A2
Connection threads	1, 3, 5	G $\frac{1}{4}$
	2, 4	NAMUR hole pattern
Nominal width		8 mm
Standard flow rate	5/2-function	1 → 2 800 l/min
		1 → 4 800 l/min
		1 → 3 950 l/min
		1 → 5 950 l/min
	3/2-function	1 → 2 800 l/min
		1 → 3 950 l/min
		1 → 5 140 l/min
Operating pressure		2 to 10 bar for F-, N1- and XM coils; 2 to 8 bar for TB-, XD- and XIA coils
Temperature range [ambient]		-10 ... +50° C
Temperature range [medium]		-10 ... +50° C
Corrosion protection		CRC2 to FN 940 070 [Festo standard]*

\* Paint-wetting impairment substances can cause pitting [localized funnel-shaped depressions] in paint finishes applied to the surfaces.  
Conversion factors → page 45.

24 V DC

0 ... 240 V DC/AC

The 24 V DC version is reverse polarity protected and has a protective circuit for peak voltages of up to 100 V, as well as an operating status indicator with yellow LED.

### Additional accessories

QuickStar fittings and tubing  
– See Catalog 275 363

Available on request:

- Assembly kits
- Couplings
- Shaft adapters
- Reducers
- Position controllers
- Limit switch boxes

One-way flow control valves  
type GRLA-...-B  
– See Catalog 275 360

Quick exhaust valves  
– See Catalog 275 360

Mufflers  
– See Catalog 275 363

## Copac/Copar Valve Actuators, Type DRD/DRE/DLP

Data sheet

### Local controllers – Copac/Copar

The local control unit is used for controlling pneumatic actuators in the process industry. It gives an operator the same functionality as electrical actuators. The operator can switch from local control to remote control and can move the valve into any position from the local mode.

**Additional accessories**  
Available on request  
[Contact your local Festo office]

### Assembly kits

- Couplings [shaft/shaft]
- Shaft adapters/reducing sleeves
- Mounting bridges

### Closed loop controllers for Copac actuators

The controllable copar actuator incorporates an additional integrated measuring system. This system provides for intermediate position control of linear process valves.
