

## Servo motors EMMT-AS

**FESTO**

## Characteristics

### Everything from a single source

Motors EMMT-AS

→ Page 3

- Dynamic, brushless, permanently excited synchronous servo motors
- Extremely low cogging torque – supports high synchronisation even at low rotational speeds
- Digital absolute displacement encoder; choose from:
  - Single-turn
  - Multi-turn, no batteries
- Motor temperature transmission, digital via EnDat 2.2; motor protection via CMMT-AS
- Optimised torque
- Optimised rotational speed
- Degree of protection:
  - IP40 (motor shaft)
  - IP67 (motor housing with connection technology)
  - IP65 (motor shaft with rotary shaft seal made of PTFE)
- Optional:
  - Holding brake
  - Shaft with featherkey
  - Motor shaft with rotary shaft seal
- Simple connection technology (OCP: one cable plug) – hybrid cable: motor and connecting cable for supply and encoder rolled into one
- Connector plug rotatable

### Gear unit EMGA-EAS/-SAS

→ Page 17

- Low-backlash planetary gear
- Gear ratio  $i = 3$  and  $5$ , available from stock
- Life-time lubrication
- Degree of protection: IP54
- Other gear unit types, ratios, designs and versions on request

### Servo drive CMMT-AS

→ Internet: cmm

- Universal servo drive for synchronous servo motors
- Integrated EMC filters
- Integrated brake chopper
- Integrated braking resistor
- Integrated safety functions
- Position controller
- Speed controller
- Force controller
- Range of control functions
- Interfaces:
  - EtherCAT
  - PROFINET RT/IRT
  - EtherNet/IP

### Motor cables NEBM

→ Page 18

- Suitable for energy chains
- Connection technology on motor side with degree of protection to IP67
- Can be used in a wide temperature range

### Axial and parallel kits EAMM

→ Internet: eamm

- Specific kits for all electro-mechanical axes from Festo
- Each kit includes the relevant necessary coupling housing, couplings and motor flange as well as all screws
- Optionally with degree of protection IP65

Recommended cable cross section at an ambient temperature of 40°C as a function of cable length and servo drive CMMT-AS

- 0.75 mm<sup>2</sup>
- 1.5 mm<sup>2</sup>
- 2.5 mm<sup>2</sup>
- No cable

- Note

- When using other servo drives, the max. cable lengths may be shorter or the cable cross sections may be different.
- For cable lengths > 25 m, prior technical clarification is recommended.
- For motors with a holding brake, a logic power supply UB ≥ 24 VDC is to be ensured. In this case, the recommended motor cables from Festo with the corresponding cross sections should also be used.
- This recommendation is made on the basis that the servo drive is connected to the supply network via a short connecting cable and network-side voltage drops can therefore be neglected.
