

Membrane air dryers MS-LDM1, MS series

FESTO

Characteristics

MS series service unit components

Solutions for every application

With its large product range, highly effective components and a wide choice of functions, the MS series from Festo offers a complete concept for compressed air preparation. Suitable for simple standard applications as well as application-specific solutions to the highest quality standards.

Available as individual components, pre-assembled combinations ex-stock,

application-specific combinations or complete turnkey solutions. The five sizes in the MS series achieve maximum flow rates with minimum space requirements.

Freely combinable function modules

Pressure regulators, on/off and soft-start valves with safety function, filters, pressure and flow sensors, dryers, sensors and lubricators. All these allow a suitable solution to be assembled for every task. Their modular structure means that the components are freely combinable. A simple connection system saves time when replacing individual modules without

needing to dismantle the entire combination.

What's more, many of the components are certified to UL and ATEX.

CAD models and configurator

Convenient aids for planning and selecting application-specific individual devices and combinations. The product configurator lets you configure customised solutions quickly and transfer the order data with no hassle.

Engineering tools

Selection tool for choosing the right service unit without oversizing, and with the right air quality class:

→ www.festo.com/engineering/wartungseinheit

Air quality

This program supports configuring an appropriate service unit. Please insert the required air cleanliness either by your application or an ISO-code or by direct selection of air filters.

Selection criteria: Application

Filter combination is proposed based upon your selected application

- standard pneumatics operation of valves and cylinders, e.g. in automotive industry, secondary packaging
- mining and building industry applications without special air cleanliness requirements
- application of pressure operated tools and machines pneumatic hammer, air engine, positioning with proportional valve
- electronic, flatpanel and solar industry, textile and paper production application with residual oil content $\leq 0.5 \text{ mg/m}^3$
- painting, powder coating, air bearing application with residual oil content $\leq 0.1 \text{ mg/m}^3$
- food and beverage industry, optics application with residual oil content $\leq 0.01 \text{ mg/m}^3$ reduction of all vapours and aromas

Selection criteria: ISO-class

Filter combination is proposed based upon the air cleanliness class according to ISO 8573-1:2010

particle : 4 : oil

ISO

Direct filter selection

Independent selection of filter combination

- 40 µm Filter
- 5 µm Filter
- 1 µm Fine Filter
- 0.01 µm Micro Filter *
- Active Carbon Filter

* Downstream from the compressor the water content is assumed to be ISO class 4, better classes can be achieved by applying an absorption dryer (FCO) or a membrane dryer (CM4)

Integrated sensors

Pressure and flow sensors

Safety functions

Soft-start/quick exhaust valves

MS6-SV/MS9-SV

Energy savings

Service units MSE6

Intelligent mix of sizes

- Maximum machine availability through controlled processes
- Reliable air preparation and supply for systems
- Integrated or stand-alone
- Easy to connect with M8/M12 plug

- Fast and reliable exhausting of systems up to Performance Level e, certified to DIN EN ISO 13849-1
- Integrated soft-start function

- Fully automatic monitoring and regulation of compressed air supply
- Automatic shut-off of the compressed air in stand-by mode
- Detection and notification of leakages
- Condition monitoring of relevant process data

- Optimum flow rate with up to 18% smaller size
- Excellent energy efficiency
- Cost-optimised combinations – save up to 30%!

Size differences

Size	MS2	MS4	MS6	MS9	MS12
Grid dimension [mm]	25	40	62	90	124
Connection sizes	M5, QS-6	G1/8, G1/4, G3/8	G1/4, G3/8, G1/2, G3/4	G1/2, G3/4, G1, G1 1/4, G1 1/2	G1, G1 1/4, G1 1/2, G2
Standard nominal flow rate q_{N1} [l/min]	350	1800	6500	20000	22000

1) Using pressure regulator MS-LR as an example

Characteristics

Note

Information

The next few pages provide a brief overview of the complete product range for the MS series service unit components.

You can find detailed information and all of the technical data in the documentation for the corresponding service unit component.

Accessories such as connecting plates or mounting brackets can be ordered either via the configurator or separately.

Structure of a service unit

The order of the individual components within a service unit is relevant for safety and functionality. It is not possible to assemble the service unit components in any order in the flow direction. There are restrictions and rules.

The configurator for the service unit MSB is a reliable and convenient way of arranging individual service unit components and this ensures that the applicable rules are complied with. As a result, you get a completely assembled unit with UL or ATEX certification if you need it.

When arranging a combination of individually configured and ordered service unit components, the points on the right must be adhered to under all circumstances.

- Regulators MS-LFR/LR/LRP/LRE are only permissible in the flow direction with the same or decreasing pressure regulation range
- Filters MS-LFR/LF/LFM/LFX are only permissible in the flow direction with an increasing grade of filtration
- Lubricators MS-LOE are not permitted in the flow direction upstream of a filter MS-LFR/LFM/LF/LFX, water separator MS-LWS or membrane air dryer MS-LDM1

- A micro filter MS-LFM must be installed upstream of an activated carbon filter MS-LFX or membrane air dryer MS-LDM1 in the flow direction
- A flow sensor SFAM cannot be installed directly downstream of a regulator MS-LFR/LR; a branching module MS-FRM must be positioned between them
- A soft-start/quick exhaust valve MS-SV must be the last service unit component in the flow direction

Data sheet

Function

-  - Flow rate
50 ... 400 l/min
-  - Temperature range
+2 ... +50°C
-  - Operating pressure
3 ... 12.5 bar

Pressure dewpoint reduction:
20 K

Typical areas of application:

- Drying, cleaning of precision parts
- Measuring technology
- Rinsing of precision glass scales
- Painting systems
- Paper and packaging machines

Note

Prefiltration of the compressed air using a micro filter MS-LFM-A, grade of filtration 0.01 µm (residual particles < 0.1 µm, residual oil content < 0.1 mg/m³) is vital for correct functioning of the component.

- Optimum final dryer with excellent operational reliability
- Suitable for use as an individual device or for integration into existing service unit combinations
- Flow rate-dependent dewpoint reduction
- Wear-free function requiring no external energy
- The composition of the compressed air remains almost unchanged due to the drying process
- 15% purge air flow rate
- Optional purge ring for ducting the purge air
- Optional device variant EX4 for use in potentially explosive areas in zones 1, 2, 21 and 22

General technical data

Size	MS4	MS6

Suitability for the food industry ³⁾		See supplementary material information
UL certification ³⁾		c UL us - Recognized (OL)

1) Value in brackets applies to MS4/MS6-LDM1 with UL certification.

2) Corrosion resistance class CRC 2 to Festo standard FN 940070

Moderate corrosion stress. Indoor applications in which condensation can occur. External visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment.

3) Additional information www.festo.com/sp → Certificates.

ATEX	
EU certification	EX4
ATEX category for gas	II 2G
Type of ignition protection for gas	Ex h IIC T6 Gb X
ATEX category for dust	II 2D
Type of ignition protection for dust	Ex h IIIC T60°C Db X
Explosion-proof ambient temperature	+2°C ≤ Ta ≤ +50°C
CE marking (see declaration of conformity) ¹⁾	To EU Explosion Protection Directive (ATEX)

1) Note operating range of proximity switches.

Weight [g]					
Size	MS4		MS6		
Flow cartridge	P05	P10	P20	P30	P40
Membrane air dryer	420	530	1050	1200	1300

Materials

Sectional view

Membrane air dryer		
[1]	Housing	Die-cast aluminium
[2]	Bowl	Wrought aluminium alloy
-	Seals	NBR
Note on materials		RoHS-compliant

Data sheet

Pressure dewpoint t_{pd} (output) as a function of standard flow rate at output q_n ¹⁾

MS4-LDM1-...-P05

MS4-LDM1-...-P10

MS6-LDM1-...-P20

MS6-LDM1-...-P30

MS6-LDM1-...-P40

- 1) Measured at pressure dewpoint t_{pd} (input) = 25°C.
- Example using MS6-LDM1-...-P40 at 10 bar operating pressure: at a standard flow rate of $q_n = 550$ l/min the pressure dewpoint reduction is 25 K.

Data sheet

Differential pressure Δp as a function of the standard flow rate at output q_n
