## Key features

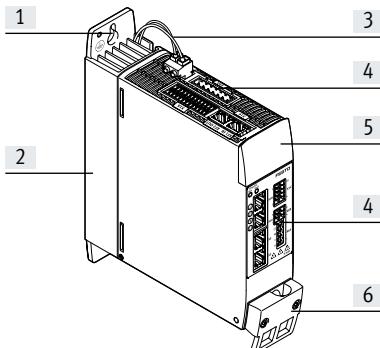

### At a glance

- Universal servo drive for PM-synchronous servo motors with up to 6000 W continuous power
- Supports the motor series EMMT-AS, EMME-AS, EMMB-AS and EMMS-AS as well as third-party motors
- Integrated single-phase/three-phase mains connection 230/400 V AC, mains filter and braking resistor, connection option for external braking resistor
- Precise torque, speed and position control
- Motion from point-to-point to interpolated motion
- Comprehensively integrated protective functions for the servo drive, motor and axis with automatic motor shut-down/quick stop
- Bus protocols

- Modbus TCP is available as an additional protocol for all EtherNet/IP devices
- Prepared device description files and function blocks for integration in PLC systems

### The technology in detail

- Configuration:**
  - Automatically with the "Festo Automation Suite" as well as auto-tuning
  - Directly via fieldbus and PLC
  - Data backup concept via PLC or operator unit CDSB
- Supports digital absolute encoders (EnDat, Hiperface, Nikon-A) in the motor as well as incremental (A/B, Sin/Cos) displacement encoders on the axis
- Integrated safety functions:**
  - Safe torque off (STO) up to SIL3/Cat. 4 PL e
  - Safe stop 1 (SS1) when using a suitable external safety relay unit and suitable circuitry for the servo drive
  - Safe brake control (SBC) up to SIL3/Cat. 3 PL e
  - Diagnostic outputs STA and SBA for feedback of the active safety function

### Electric Motion Sizing

Configuring electromechanical drives

Create the optimum drive package quickly and reliably. Electric Motion Sizing calculates suitable combinations of electric axis, electric motor and servo drive using just a few application details. It provides all the relevant data including the bill of materials and documentation for your selected combination. This avoids design errors and results in significantly improved energy efficiency for the system. Through-connection to the Festo Automation Suite also makes commissioning easier for you.

## Key features

### Library for EPLAN

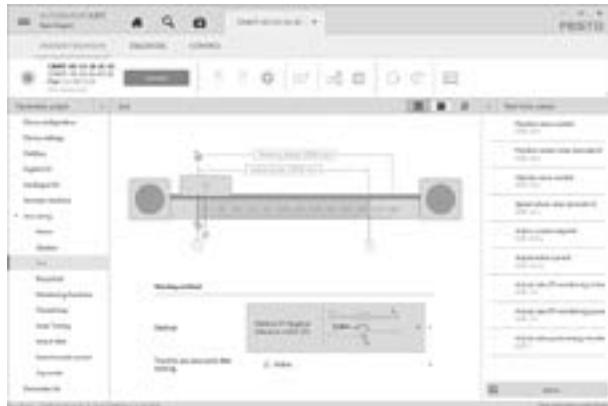

→ [www.festo.de/eplan](http://www.festo.de/eplan)

EPLAN macros for fast and reliable planning of electrical projects in combination with servo drives, motors and cables. This enables a high level of planning reliability and standardisation of documentation without the need to create symbols, graphics and master data.

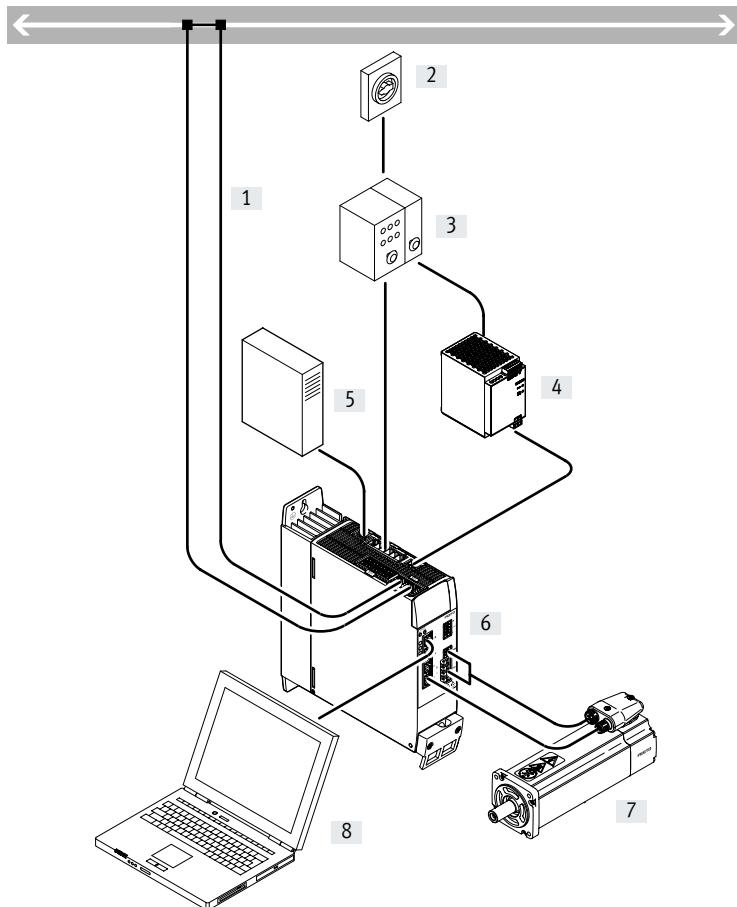

### Festo Automation Suite

Parameterisation and programming software for electronic devices from Festo

- Parameterisation, programming and commissioning in a clear and user-friendly interface
- Optimum support for complex processes thanks to guided wizards (e.g. for commissioning, drive configuration, etc.)
- Fast access to required documents and additional information
- Easy integration of electric drives in the controller programming
