

Filter silencers LFU

Filter silencers LFU

Technical data

FESTO

Function

-  Flow rate
4,000 ... 12,500 l/min
-  Temperature range
-10 ... +100 °C
-  Operating pressure
0 ... 16 bar

The filter silencer cleans all exhaust air from pneumatic control systems. The exhaust air is discharged into the atmosphere via a fine filter cartridge (degree of filtration: >99.99%).

At the same time, exhaust noise is greatly reduced. Condensate is collected in the lower plastic bowl and can be discharged via the condensate drain.

- Removes up to 99.99% of oil and other contaminants from exhaust air
- The silencer reduces exhaust noise regardless of frequency

Corrosion resistance class CRC ¹⁾	2		1	

1) Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. For dry indoor applications or transport and storage protection. Also applies to parts behind covers, in the non-visible interior area, and parts which are covered in the application (e.g. drive trunnions).

Corrosion resistance class CRC 2 to Festo standard FN 940070

Moderate corrosion stress. Indoor applications in which condensation may occur. External visible parts with primarily decorative requirements for the surface and which are in direct contact with the ambient atmosphere typical for industrial applications.
