

- 3 thread types – M, R, and G thread
- 360° rotatable
- R-threads can be re-used up to five times.

# Self-closing/rotary push-in fittings QS, Quick Star

Key features

Application	Simply "plug and work"	Reliably connected	Captive seal
 <p>Effortless selection of the right fitting. Quick Star offers a secure solution for every connection. The convenient push-in fitting system includes well over 1000 types of standard and function fittings.</p>	 <p>The stainless steel retaining ring within the fitting holds the tubing securely without damaging its surface. Vibration and pressure surges are safely absorbed. The tubing can be detached easily by pressing down the blue release ring. For your convenience, the appropriate outside tubing diameter is marked on the release ring.</p>	 <p>A nitrile rubber sealing ring guarantees a perfect seal between standard OD tubing and the body of the fitting. Standard tubing is suitable for use with compressed air and vacuum.</p>	 <p>All of the brass components included in Festo's push-in fittings are nickel plated and are thus highly resistant to corrosion. The tapered ISO R threads have a self-sealing PTFE coating, which allows the fitting to be re-used up to five times without the need for additional sealing components.</p>

360° rotatable	360° rotatable, with ball bearing
 <p>Alignment is performed during assembly. Tube movement is compensated during use.</p>	 <p>Permits rotating motion of up to 500 rpm during use.</p>

- **Single and multiple rotary distributors**
- **Sturdy thanks to dual bearings for absorbing lateral forces**
- **Seal for gaseous and liquid media**
- **Flexible installation thanks to radial and axial connection**

Technical data

## Rotary distributor GF, single

4 outlets

 - Temperature range  
 -10 ... +80 °C

 - Pressure  
 -0.95 ... +10 bar

Materials:  
 Housing: Brass  
 Shaft: High-alloy steel

Technical data			
Pneumatic connection	G $\frac{1}{8}$	G $\frac{1}{4}$	G $\frac{1}{2}$
Operating medium	Filtered compressed air		
Operating pressure [bar]	-0.95 ... +10		
Ambient temperature [°C]	-10 ... +80		
Assembly position	Any		
Corrosion resistance class [CRC] <sup>1)</sup>	1		
Max. speed [rpm]	3000	3000	2500
Max. tightening torque [Nm]	10	15	40
Product weight [g]	400	370	1200

1) Corrosion resistance class 1 according to Festo standard 940 070  
 Components requiring low corrosion resistance. Transport and storage protection. Parts that do not have primarily decorative surface requirements, e.g. in internal areas that are not visible or behind covers.
