**FESTO**

<b>★ /★</b>	Festo core product range Covers 80% of your automation tasks
<b>Worldwide:</b>	Always in stock
<b>Superb:</b>	Festo quality at an attractive price
<b>Easy:</b>	Reduces procurement and storing complexity

<b>★</b> Ready for dispatch from the Festo factory in 24 hours Held in stock in 13 service centres worldwide More than 2200 products
<b>★</b> Ready for dispatch in 5 days maximum from stock Assembled for you in 4 service centres worldwide Up to $6 \times 10^{12}$ variants per product series

# Positioners CMSX

Key features

FESTO

## Function and application

The positioner CMSX is used to control the position of single- and double-acting pneumatic actuators and double-acting linear actuators in process automation systems. It is suitable for operation with actuators that have a swivel angle of approx. 90° and a mechanical interface in accordance with VDI/VDE Directive 3845. The CMSX enables simple and efficient position control based on the PID control algorithm. Positions are specified via a setpoint signal. The integrated

potentiometer senses the current position of the quarter turn actuator via the shaft and forwards the measured value to the internal regulator. The regulator compares the setpoint value specified by analogue means with the measured value and actuates the solenoid valves accordingly via pulse-width modulation (PWM).

## System structure

- [1] Higher-level system (PLC/IPC or external setpoint generator)
- [2] Positioner CMSX
- [3] Mechanical coupling
- [4] Mounting bridge DARQ
- [5] Quarter turn actuator (example: DFPD)
- [6] Process valve (example: VZBA)

CMSX-...	Piston Ø [mm]	Drives	Sizes	1st generation	2nd generation
Semi-rotary drives

# Positioners CMSX

FESTO

Key features

Variants	
CMSX-...-A	CMSX-...-C
On this product variant, working port 4 is exhausted and working port 2 is pressurised. The process valve is opened or closed depending on the tubing connections between the CMSX-...-A and the quarter turn actuator.	On the product variant CMSX-...-C, working ports 2 and 4 are pressurised to maintain the current position of the quarter turn actuator.
Security Several freely programmable safety positions in case of current failure, additional digital error signal for emergency shut-down. Several freely configurable, analogue input signals for each task, for reliable monitoring of the actual position via the analogue feedback signal.	Economic efficiency Via integrated, analogue feedback functions and the definable safety positions. No air consumption if the actuator is not moving.

## General technical data

Type	CMSX-P-S-C-U-F1-D-50-A-G1	CMSX-P-S-C-U-F1-D-50-C-G1
Pneumatic connection	G $\frac{1}{8}$	
Conforms to standard	VDI/VDE 3845 (NAMUR)	
Cable connector	M20x1.5	
Type of mounting	On flange to ISO 5211, via accessories	
Type of process valve characteristic curves	Freely adjustable over 21 support points Linear, equal percentage (1:25, 1:33, 1:50)	
Leakproof characteristics	Automatic Adjustable	
Control range adaptation	Adjustable	
Alarm for exceeding limit value	No	
Active direction	Adjustable Rising, falling	
Safety precaution	Adjustable - Opening Closing	- Retaining -
UV resistance	Yes	
Display type	Backlit LCD	
Setting options	Via display and keys	
Standard nominal flow rate	[l/min]	50
Sensing range in degrees	[deg]	0 ... 100
Size of the dead zone	[%]	0.1 ... 10
Product weight	[g]	970

## Electrical data

Protection against short circuit	Yes	
Protection against incorrect polarity	For operating voltage connections For setpoint value	
Operating voltage range DC	[V]	21.6 ... 26.4
Setpoint value	[V]	0 ... 10
	[mA]	0 ... 20
	[mA]	4 ... 20
Max. output current	[mA]	500
Max. load resistance of current output	[ohms]	500
Max. current consumption	[A]	1
Idle current	[mA]	100 ... 300
Switching level	[V]	Signal 0 ≤ 5
	[V]	Signal 1 ≥ 10
