

## Linear actuators DFPI

**FESTO**

## Key features

### Function

DFPIs are adjustable linear actuators. Product versions with an integrated displacement encoder DFPI-...-E-... or fully integrated positioner DFPI-...-C1V-... are available.

The displacement encoder integrated in the DFPI-...-E-... version returns an analogue voltage or current signal proportional to the position of the piston. This can be used for operation with an external positioner. The positioner integrated in the DFPI-...-C1V-... version provides the position control. This actuator has a factory-defined safety position that is assumed if the operating voltage or the analogue setpoint value fails. The positions are specified via an analogue setpoint signal 4 ... 20 mA. The position feedback uses an analogue feedback signal of

4 ... 20 mA. The feedback signal guarantees high reliability and simple diagnostics for the operator. The travel speed can be influenced using the integrated flow control screws. Variants with a mounting interface to ISO 15552 or DIN EN ISO 5210 are available. The sturdy corrosion-resistant design of the DFPI is ideal for use under harsh ambient conditions.

### Innovative

- Ready-to-install, compact unit for easy installation
- Sturdy and corrosion-resistant, ideal for use under harsh ambient conditions
- Suitable for directly attaching a positioner in accordance with VDE/VDI 3847-2 and valve terminal VTOP for additional pneumatic functions. The integrated air supply avoids leakage caused as there are fewer connecting points between the individual components, thus preventing errors

### Versatile

- Wide range of accessories for virtually any installation situation
- Suitable for use in potentially explosive locations
- Additional contactless binary end-position sensing possible with proximity switches
- Suitable for applications with closed-loop controlled linear and swivel motions

### Design

- Double-acting
- Optionally with integrated displacement encoder or fully integrated positioner
- Sizes  $\varnothing$  100,  $\varnothing$  125,  $\varnothing$  160,  $\varnothing$  200,  $\varnothing$  250 and  $\varnothing$  320
- Stroke lengths 40 to 990 mm
- Mounting interfaces to ISO 15552 or DIN EN ISO 5210
- IP65, IP67, IP69K, NEMA4
- ATEX certification

## Key features

### Product options for DFPI-...-NB3P... based on ISO 15552

- [1] DFPI-...-ND2P-E-NB3VM12 with piston diameter 160 ... 320
- [2] DFPI-...-C1V-NB3
- [3] DFPI-...-E-NB3...
- [4] M12x1 plug, 5-pin, A-coded
- [5] Cable fitting M16x1.5
- [6] Metal flange socket
- [7] Push-in fitting QS<sup>1)</sup>
- [8] Air supply on the actuator, stainless steel pipe or plastic tubing
- [9] Connecting cable NHSB<sup>1)</sup>, 5-core, for DFPI-...-C1V-P-A
- [10] Connecting line NHSB<sup>1)</sup> 3-core, for DFPI-...-E-P
- [11] Manifold block for direct attachment of a positioner in accordance with VDE/VDI 3847-2 and valve terminal VTOP for additional pneumatic functions

### Product options for DFPI-...-E-... and DFPI-...-C1V-... based on DIN EN ISO 5210

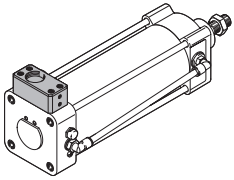

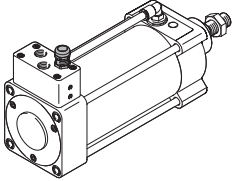

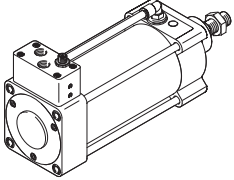

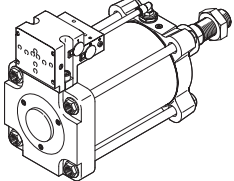

- [1] Polymer flange socket
- [2] Metal flange socket
- [3] Push-in fitting QS<sup>1)</sup>
- [4] Connecting cable NHSB<sup>1)</sup>, 5-core, for DFPI-...-C1V-P-A
- [5] Connecting cable NHSB<sup>1)</sup>, 3-core, for DFPI-...-E-P

1) Can be ordered separately as an accessory

## Product range overview

### DFPI-...-E-NB3...

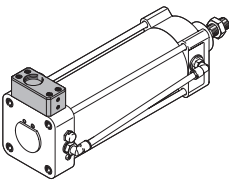

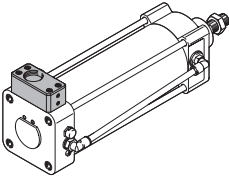

- For operation with an external positioner with analogue voltage input or 4 ... 20 mA current input
- Potentiometric displacement encoder integrated into the actuator DFPI, optionally with integrated 4...20 mA transmitter for analogue current output signal for displacement (DFPI-...ENB3P-...-I-...)
- Sturdy tie rod design
- Double-acting
- Mounting interfaces to ISO 15552 on bearing and end caps

### Max. lateral force as a function of stroke length l

The maximum lateral force (horizontal/vertical) applies to the static application. In closed-loop operation, the maximum lateral force needs to be adjusted to the type of control. If necessary, the piston rod must be guided to avoid system vibration.

#### Horizontal lateral force

#### Vertical lateral force

 **Note**

**Stroke length of the actuator**

The stroke length of the actuator should generally at least correspond to the nominal diameter of the process valve so that the process valve can be fully opened and closed. The system tolerances can lead to a greater stroke range than the specified nominal stroke range of the linear actuator. The adjustable rod clevis enables the system to be adjusted.

 **Note**

### Stroke length of the actuator

The stroke length of the actuator should generally at least correspond to the nominal diameter of the process valve so that the process valve can be fully opened and closed.

The system tolerances can lead to a greater stroke range than the specified nominal stroke range of the linear actuator.

During initialisation, the integrated positioner learns the stroke length used and ensures that the slide gate moves to the required positions in a controlled way, at most to the end positions learned during initialisation.

- 1) Corrosion resistance class CRC 2 to Festo standard FN 940070  
 Moderate corrosion stress. Indoor applications in which condensation can occur. External visible parts with primarily decorative surface requirements that are in direct contact with the normal surrounding industrial environment.  
 Corrosion resistance class CRC 4 to Festo standard FN 940070  
 Particularly high corrosion stress. Outdoor exposure under extreme corrosive conditions. Parts exposed to aggressive media, e.g. in the chemical or food industries. Such applications may need to be supported with special tests  
 (→ also FN 940082) using appropriate media.
- 2) Suitable for ATEX (areas)
