

## Linear drives ELGL-LAS, with air bearing and linear motor

**FESTO**

# Linear drives ELGL-LAS, with air bearing and linear motor

Key features

FESTO

## At a glance

The electric linear drive ELGL is a handling axis with air-bearing guide and integrated linear motor. The drive elements and the air bearing form a single unit. The slide moves on the stator rail. An integrated displacement encoder sends signals to the controller.

The displacement encoder, controller and motor operate in a closed-loop control circuit. This enables the motor to regulate to specified set values for speed and position within the permitted stroke range with a high degree of accuracy.

## Advantages

- Highly accurate positioning and very good linearity thanks to the air bearing
- Integrated locking brake function through magnetic pretensioning of the air bearing
- Multiple carriages possible on one axis
- Opposing and synchronous movements possible
- No friction on the guide parts
- Maintenance and wear-free

## The technology in detail

- [1] Mounting thread with centring recesses
- [2] Slide
- [3] Supply port for air bearing
- [4] Stator
- [5] End stop with rubber buffer, shock absorbers can alternatively be screwed in
- [6] Integrated displacement encoder
- [7] Sensor
- [8] Electrical interface, rotatable in steps of 90°
- [9] Mounting thread for foot mountings

## Complete system consisting of linear drive and motor controller

Linear axis ELGL

→ 3

Motor controller CMMP-AS

→ 21

### Note

When using the linear axis, make sure that no dirt or dirt particles are sticking to the surface of the air bearing.

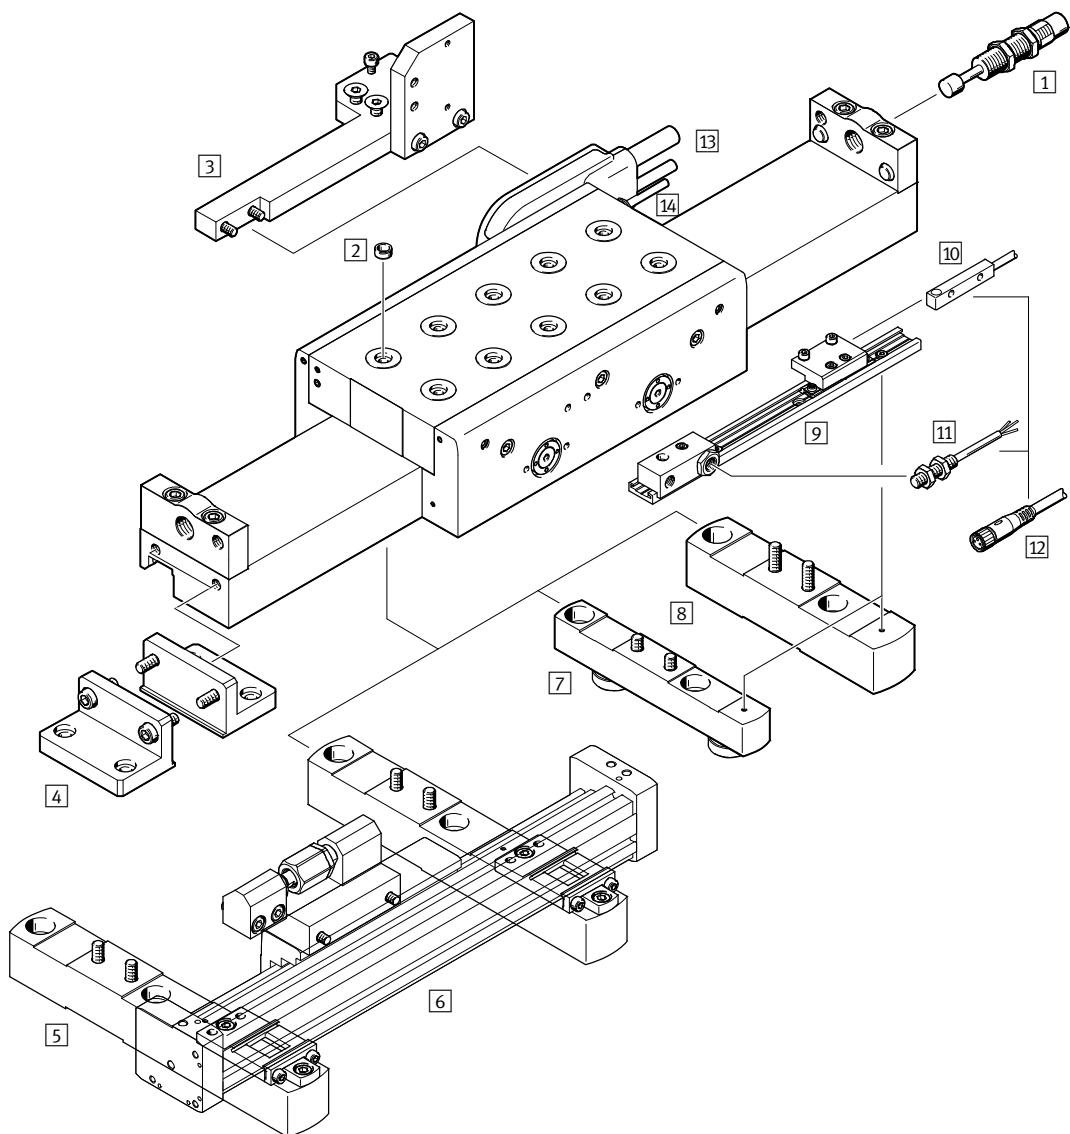

Invasive or hardened dirt can block the nozzles of the air bearing to the extent where they need to be replaced.

[9] Sensor bracket EAPR	For attaching the inductive proximity sensors to the foot mountings EAHF-...-P or EAHF-...-PJ	18	
[10] Proximity sensor SIES	Inductive proximity sensor, square design	21	
[11] Proximity sensor SIEN	Inductive proximity sensor, round design	22	
[12] Connecting cable NEBU	For connecting the proximity sensor with plug connection to the controller	22	
[13] Motor cable NEBM	<ul style="list-style-type: none"> <li>• For connecting the motor and controller</li> <li>• Connection can be rotated in steps of 90°</li> </ul>	21	
[13] Encoder cable NEBM	<ul style="list-style-type: none"> <li>• For connecting the displacement encoder and controller</li> <li>• Connection can be rotated in steps of 90°</li> </ul>	21	
[14] QS push-in fitting QSM	For connecting compressed air tubing with standard external diameters	22	

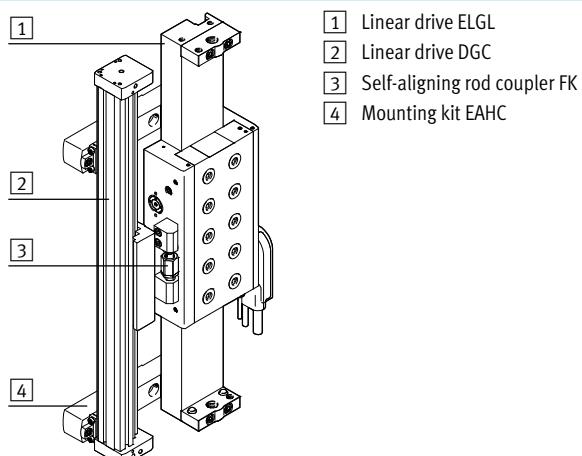

## Compressed air backup for vertical operation

A pneumatic linear drive DGC-18 can be attached to the linear drive ELGL to protect the linear motor from overheating. The effective load is additionally held by the DGC when approaching the position by means of an appropriate backpressure in the DGC.

Ordering aid:

Part number: 532446

Type: DGC-18-...-G-...

Technical data

FESTO

## Function

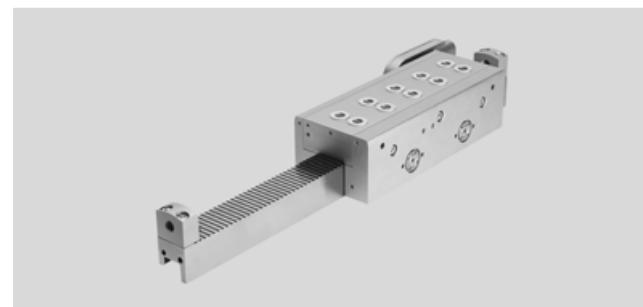

### Note

All values are based on a normal temperature of 23 °C.  
Dynamic response and accuracy depend on the mounting (rigidity) and temperature stresses (heat concentration).

## Static characteristic load values

The indicated forces and torques refer to the slide surface. The point of application of force is the point where the centre of the guide and the longitudinal centre of the slide intersect. These values must not be exceeded during dynamic operation. Attention must be paid to the acceleration and braking.

If the axis is simultaneously subjected to more than two of the indicated forces and torques, the following equation must be satisfied in addition to the indicated maximum loads:

$$\frac{|F_y|}{F_{y\max.}} + \frac{|F_z|}{F_{z\max.}} + \frac{|M_x|}{M_{x\max.}} + \frac{|M_y|}{M_{y\max.}} + \frac{|M_z|}{M_{z\max.}} \leq 1$$

## Mounting options

The stator has an evenness value of 7 µm over 300 mm. To ensure the quality of the air bearing, the mounting surface must be correspondingly precise.

For points of support with smooth surfaces, the linear drive can be mounted directly at the stator [1] or with the help of the foot mountings [2].

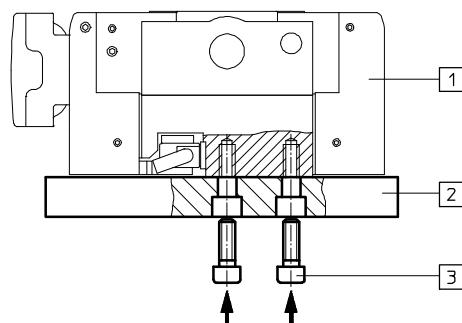

If the surface is not sufficiently even, the foot mounting [3] is used together with the adjustable foot mounting [4].

A 3 or 4-point mounting is recommended to secure the load.

### [1] Direct mounting

Range of application:

- Only with smooth surface (e.g. granite table)
- Required planarity:  
7 µm over 300 mm

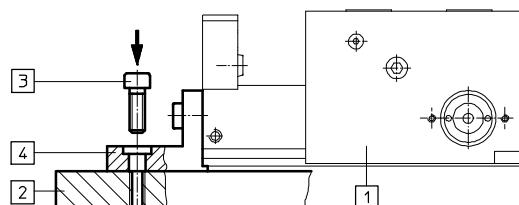

[1] Linear drive  
[2] Mounting surface  
[3] Socket head screw

### [2] Angled foot mounting

Range of application:

- Only with smooth surface (e.g. granite table)
- Up to a stator length of max. 500 mm
- Manual height adjustment may be required

[1] Linear drive  
[2] Mounting surface  
[3] Socket head screw

## Product Range and Company Overview

### A Complete Suite and Company Overview

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

**Custom Automation Components**  
Complete custom engineered solutions

**Custom Control Cabinets**  
Comprehensive engineering support and on-site services

**Complete Systems**  
Shipment, stocking and storage services

### The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

**Electromechanical**  
Electromechanical actuators, motors, controllers & drivers

**Pneumatics**  
Pneumatic linear and rotary actuators, valves, and air supply

**PLCs and I/O Devices**  
PLC's, operator interfaces, sensors and I/O devices

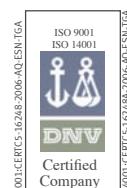

### Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 16,000 employees in 60 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

### Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.
