

Signal converter SCDN

Signal converter SCDN

Key features

FESTO

At a glance

Connections for up to 2 sensor transmitters

Flexible use

- Transmitter signal area scalable (e.g.: 1 ... 5 V)
- Measured value indicator can be individually configured
- Lots of integrated switching functions

Values can be displayed in many

units		
• inchH ₂ O	• GPM	
• bar	• kgf/cm ²	• mm
• kPa	• l/min	• inch
• MPa	• l/h	• V
• psi	• scfm	• MA
• mmHg	• scfh	• %
• inchHg		

Communication interface

Many integrated functions

- Min./max. monitoring
- PNP/NPN, switchable
- Eco mode
- Tamper protection with security code
- Filter can be adjusted to smooth the signals
- The switching points can be easily set via teach-in
- Parameters can be easily copied to other devices

Easy operation

- Blue display with high-contrast white text and red switchover
- Intuitive menu navigation, as for pressure sensors SPAU and SPAN

Product description

The signal converter detects analogue current or voltage signals from sensors (transmitters). Connection to the higher-level system is provided by 1 or 2 switching outputs or alternatively by an IO-Link® interface. The signal converter has a display for visualising the signals and parameters, and can thus be used as a remote display for transmitters.

The switching outputs can be configured to monitor a threshold value, signal range or signal change. The outputs can be set as PNP or NPN and normally open (NO) or normally closed (NC).

Process values can be read out and parameters changed and transmitted to additional devices via the IO-Link® interface.

Area of application

- Converts analogue signals into digital switching signals
- Conversion of analogue signals in IO-Link®
- Reduction in analogue signals to the control systems
- Fast and decentralised signal processing to reduce the load on the control system
- Remote visualisation of process values, the display is detached
- Quantity detection, e.g. pressure transmitters, vacuum transmitters, flow transmitters
- Object detection, e.g. inductive sensors with analogue output, distance sensors
- Position detection, e.g. position sensors for pneumatic cylinders
- Auto difference monitoring, e.g. leak test

Connection in 2 steps

- 1 Connecting cable NEBS-L1
- 2 Plug connector NECU for analogue inputs

The signal converter can be used with the following Festo products, for example.

- Pressure transmitters SPTE, SDE5-NF-V, SPTW
- Vacuum generator OVEL with SPTE
- Flow transmitters SFET-F, SFET-R
- Position sensors SDAT, SMAT-8E, SMAT-8M
- Analogue sensor box SRAP
- Inductive sensors with analogue output SIEA

Technical data

FESTO

Variant for 0 ... 10 V

- Connections for 2 sensor transmitters
- Device variants for 0 ... 10 V and 0 ... 20 mA
- 2 switching outputs + IO-Link®
- Flexible in use owing to scaling of the signal inputs, e.g.: 1 ... 5 V and scaling of the measured value indicator e.g.: -1 ... 1 bar

Variant for 0 ... 20 mA

General technical data	
Certification	RCM trademark c UL us - Listed (OL)
Certificate issuing authority	UL E322346
CE marking (see declaration of conformity)	In accordance with EU EMC Directive In accordance with EU RoHS Directive
KC marking	KC-EMC
Ambient temperature [°C]	0 ... +50
Note on materials	RoHS compliant

Input signal	-2V	-2A
Measured variable	Voltage	Current
Signal range [V]	0 ... 10	-
[mA]	-	0 ... 20
Sampling interval [ms]	1	

Output, general	
Accuracy FS [%]	0.5
Repetition accuracy [%]	0.2

Switching output	
Switching output	2 x PNP or 2 x NPN, switchable
Switching function	Freely programmable
Switching element function	N/C or N/O contact, switchable
Max. output current [mA]	100
Short circuit protection	Yes

Signal converter SCDN

Electronics		
Operating voltage range DC	[V]	15 ... 30
Reverse polarity protection		For all electrical connections
Electrical connection, input		
Function		Analogue input, power supply
Connection type		2x socket
Connection technology		Plug pattern EC
Number of pins/wires		4
Electrical connection, output		
Function		Power supply, communication, switching output
Connection type		Plug connector
Connection technology		Plug pattern L1J
Number of pins/wires		4

IO-Link® device to IEC 61131-9	
Protocol	IO-Link®
Protocol version	Device V 1.1
Profile	Smart sensor profile
Function classes	Binary data channel (BDC)
	Process data variable (PDV)
	Identification
	Diagnostics
	Teach channel
Communication mode	COM2 (38.4 kBaud)
SIO mode support	Yes
Port class	A
Process data width OUT	0 bytes
Process data width IN	5 bytes
Process data content IN	14 bit PDV (measured value InA)
	14 bit PDV (measured value InB)
	2 bit BDC (measured value monitoring)
Minimum cycle time	5 ms
Data memory required	0.5 kilobyte

Pin allocation, output			
Plug connector L1J	Pin	Wire colour ¹⁾	Allocation
	1	Brown	Operating voltage +24 V DC
	2	Black	Switching output A / IO-Link®
	3	White	Switching output B
	4	Blue	0 V DC

1) Wire colour applies to NEBS-L1

Pin allocation, input			
EC socket	Pin	Wire colour	Allocation
	1	–	Operating voltage for the connected signal converter +24 V DC
	2	–	NC
	3	–	0 V DC
	4	–	Analogue input

Signal converter SCDN

Technical data

Mechanical system	
Type of mounting	Front panel mounting
	Via wall/surface bracket
Product weight [g]	23
Housing material	Reinforced PA

Display/operation	
Display type	Illuminated LCD, multi-colour
Setting options	Teach-in
	IO-Link®
	Via display and keys
Protection against tampering	IO-Link®
	PIN code

Immissions/emissions	
Degree of protection	IP40
Corrosion resistance class CRC ¹⁾	2

1) Corrosion resistance class 2 according to Festo standard 940070
Components subject to moderate corrosion stress. Externally visible parts with primarily decorative surface requirements which are in direct contact with the surrounding industrial environment or media such as coolants or lubricating agents.
