

Solenoid valves MH1, miniature

FESTO

- Directly actuated valves
- Miniaturised design
- Flexible construction of valve manifolds
- Rapid response times of 4 ms
- Short cycle times
- Accurate cycle times

The full range for ultrafast fields of application

FESTO

Extremely miniaturized

The new miniaturized generation of poppet valves: You can choose between flow rates of 14 l/min on the 2/2-way versions or 10 l/min on the 3/2-way version. Either as individual sub-base valve or preassembled on the PR manifold. Incidentally: if used on the PR manifold, it is possible to implement an extremely high packing density. Fast and virtually predestined for more stringent demands: The big brother MH2 with a flow rate up to 100 l/min.

Extreme partnership

Festo offers a broad product range of drives, rodless drives, miniature slides, rotary actuators and accessories under the generic term "compact". Optimally intermatched and aimed at manufacturing sectors which produce and process very small products. Everything incorporating the proverbial Festo quality and with all added values offered by a company operating worldwide.

Extremely versatile and fast

All new miniature valves can be inter-linked by pneumatic multi-pin and electrical multi-pin. Even the electrical terminals offer selection options between horizontal, top and bottom. One other interesting variant is mounting on an electronic printed circuit board including connection. Everything tested and assembled in advance for Festo plug and work. And if the system is to run as fast as possible – no problem: the switching times of the miniature valves are around 4 ms.

Miniature valves not only for the electronics industry ...

...but also for the light assembly industry, medical engineering, semiconductor industry and process industry. Wherever extremely compact and ultrafast switching valves are needed. No speed needs are left to be desired with switching times of approx. 4 ms. Vacuum functions can be also implemented in an extremely easy manner. 100% duty and even three-shift operation guarantee maximum economy.

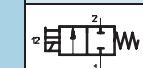

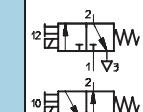

With flow rates of 10 and 14 l/min on the miniature valves, there is still adequate volume available for piloting process valves. And there is also adequate flow rate for the broad range of compact cylinders, rotary actuators and slides from Festo.
Up to 100 l/min if demands are high: MH2.

Solenoid valves MHA1, miniature

Technical data – Sub-base valve with LED

Function

 Voltage
24 V DC

 Pressure
0 ... +8 bar

 Temperature range
-5 ... +50 °C

General technical data

Valve function	3/2, single solenoid	
Design	Poppet valve with spring return	
Sealing principle	Soft	
Actuation type	Electric	
Type of reset	Mechanical spring	
Pilot control mode	Direct	
Direction of flow	Non-reversible	
Exhaust function	Flow control	
Manual override	By pushing (non-detenting)	
Signal status display	LED	
Type of mounting	On sub-base or manifold, via through-hole	
Assembly position	Any	
Nominal diameter	[mm]	0.65
Standard nominal flow rate	[l/min]	10
Grid dimension	[mm]	10
Pneumatic connection	Individual sub-base	1, 33 M3
		2 M3
		3, 11 M3
	Manifold mounting	1, 33 M7
		2 M3
		3, 11 M7
Product weight	[g]	11

Operating and environmental conditions

Valve function	3/2, single solenoid	
Operating medium	Filtered compressed air, lubricated or unlubricated, grade of filtration 40µm	
Operating pressure range	Normally closed	[bar] 0 ... 8 ¹⁾
	Normally open	[bar] 0 ... 6 ¹⁾
Ambient temperature	Individual mounting	[°C] -5 ... +50
	Manifold mounting	[°C] -5 ... +40
Temperature of medium	Individual mounting	[°C] -5 ... +50
	Manifold mounting	[°C] -5 ... +40
Storage temperature	[°C]	-20 ... +60
Corrosion resistance class CRC	2 ²⁾	

1) Vacuum operation possible with special connection method

2) Corrosion resistance class 2 according to Festo standard 940 070

Components requiring moderate corrosion resistance. Externally visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment or media such as coolants or lubricating agents

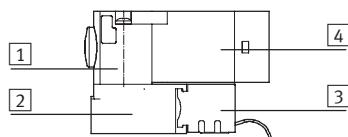

Solenoid valves MHA1, miniature

Technical data – Sub-base valve with LED

Electrical data	
Valve function	3/2, single solenoid
Operating voltage	[V DC] 24 ±10%
Type of connection	Plug connection
Power consumption	[W] 1.1
Protection class to EN 60529	
With plug socket KMH	IP40
With base plug MHAP-PI	
With soldering base PCBC-A	
With Sub-D connector plug	

Response times and switching frequencies	
Valve function	3/2, single solenoid
Response time on/off	[ms] 4/4
Maximum switching frequency	[Hz] 20

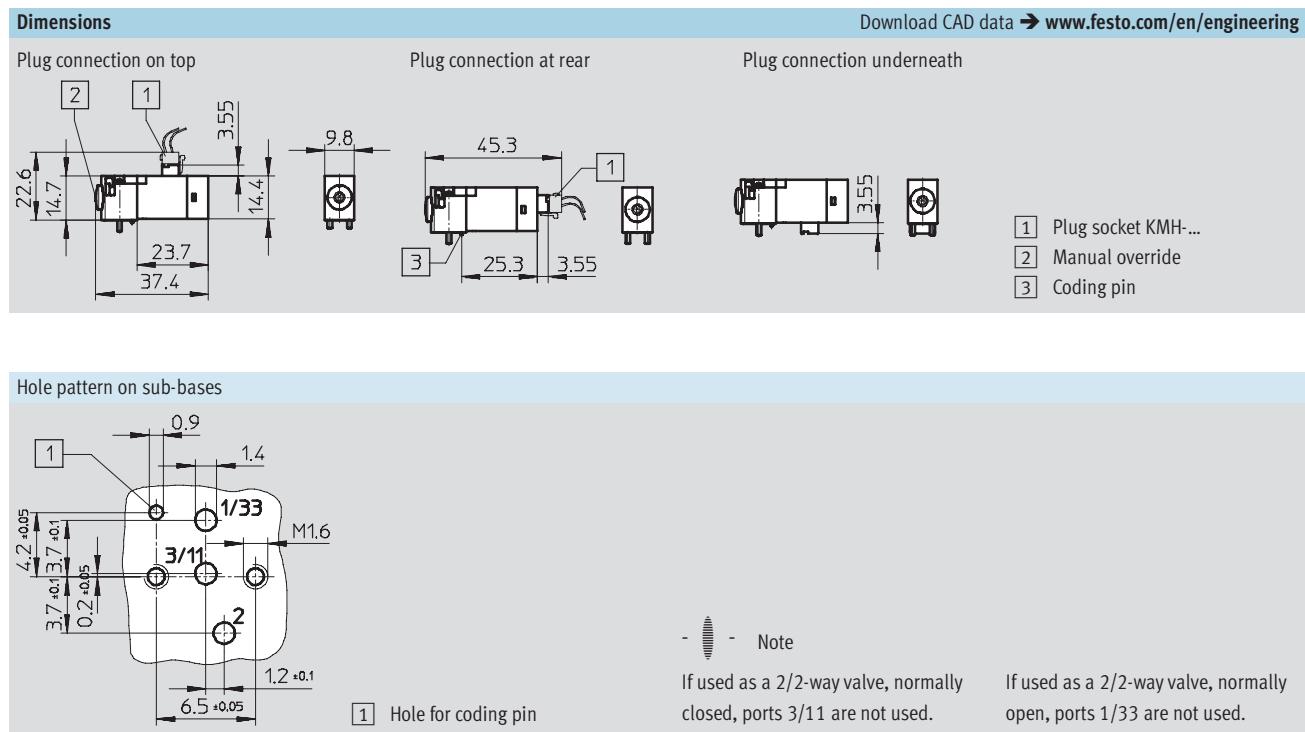

Materials

[1]	Body	Polyphenylene sulphide
[2]	Sub-base/manifold block	Aluminium
[3]	Base plug	Polyamide
[4]	Coil housing	Polyamide
– Seals		Fluorocarbon rubber nitrile rubber, hydrogenated nitrile rubber
Note on materials		Free of copper and PTFE

Fitting for working port	Push-in connector for working port, QS-3, tubing O.D. 3 mm Push-in connector for working port, QS-4, tubing O.D. 4 mm		-QB -QC				
Fitting in supply duct on left	Blanking plug for supply on left Push-in connector for supply on left, QS-4, tubing O.D. 4 mm Push-in connector for supply on left, QS-6, tubing O.D. 6 mm		-AX -AC -AD				
Fitting in exhaust duct on left	Blanking plug for exhaust on left Push-in connector for exhaust on left, QS-4, tubing O.D. 4 mm Push-in connector for exhaust on left, QS-6, tubing O.D. 6 mm Silencer for exhaust on left		-BX -BC -BD -BU				
Fitting in supply duct on right	Blanking plug for supply on right Push-in connector for supply on right, QS-4, tubing O.D. 4 mm Push-in connector for supply on right, QS-6, tubing O.D. 6 mm		-CX -CC -CD				
Fitting in exhaust duct on right	Blanking plug for exhaust on right Push-in connector for exhaust on right, QS-4, tubing O.D. 4 mm Push-in connector for exhaust on right, QS-6, tubing O.D. 6 mm Silencer for exhaust on right		-DX -DC -DD -DU				

[1] **S25, S50, S10**

Max. 8 valve positions

[2] **M25, M50, M10**

Only with 10 or 12 valve positions

[3] **L25, L50, L10**

Min. 10 valve positions

[4] **AX**

Not with fitting in supply duct on right CX

[5] **BX**

Not with fitting in exhaust duct on right DX

[6] **BC, DC**

Not with fitting in supply duct on left AD and fitting in supply duct on right CD
