

## Linear drives SLM, with guide

**FESTO**

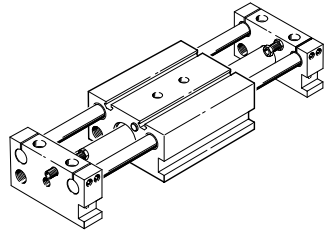

## Key features

### Design

The linear drive SLM is a combination of a slide unit and a rodless linear drive. The drive moves the slide. The movement is transferred via a magnetic coupling. The modular system enables customised end-position cushioning and end-position sensing solutions.

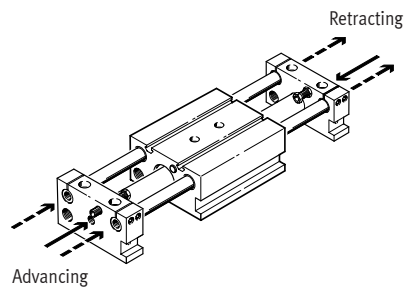

### Basic unit

#### SLM-...-G

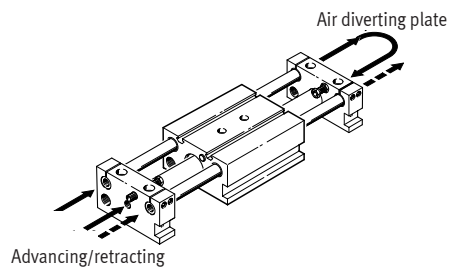

#### SLM-...-GL

with hollow guide rods

#### SLM-...-GU

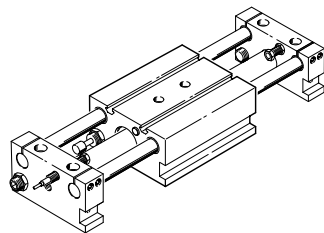

with hollow guide rods, air diverting plate and supply port on one side

### Standard unit

#### SLM-...-S

with two self-adjusting shock absorbers and two inductive proximity switches with PNP output
