

Pressure sensors SPAE

FESTO

Key features

At a glance

- Single-button operation
- 7-segment display
- Various pneumatic connection options
- Choice of pressure ranges
- Switching status indication

Function

The SPAE is an electronic pressure sensor with piezoresistive pressure measuring cell, integrated signal processing, pressure indicator with percentage, control button and a switching output, PNP/NPN switchable. Two switching signals and the measured value can be transmitted via IO-Link.

- The sensor can be set using the key and display or alternatively using IO-Link or teach-in
- Switching functions: threshold value or window comparator
- Switching logic: normally open (NO) or normally closed (NC)
- Threshold values and hysteresis are adjustable
- Display of minimum and maximum measured values
- Display can be rotated and switched off
- Protection against tampering using security code
- All parameters that have been input can be transferred to other SPAE (replicator function)

General technical data

Certification	RCM c UL us - Recognized (OL)
Degree of protection	IP40
Note on materials	RoHS-compliant
Corrosion resistance class CRC ¹⁾	2
CE marking (see declaration of conformity)	To EU EMC Directive ²⁾

- 1) Corrosion resistance class CRC 2 to Festo standard FN 940070
Moderate corrosion stress. Indoor applications in which condensation can occur. External visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment.
- 2) For information about the area of use, see the EC declaration of conformity at: www.festo.com/catalogue/... → Support/Downloads.
If the devices are subject to usage restrictions in residential, commercial or light-industrial environments, further measures for the reduction of the emitted interference may be necessary.
