Dispense head VTOE

Key features

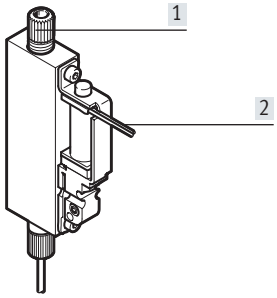
Description

The dispense head VTOE is available in two different variants:
- With transparent manifold duct plate made from polycarbonate (PC)
- With media-resistant manifold duct plate made from polyether ether ketone (PEEK)

Both variants offer three different dosing syringes with three different internal diameters as standard.

Advantages:
- Ready-to-install dosing solution saves time and costs
- Compact 9 mm grid dimension
- Maximum dosing precision down to the microlitre range
- Ideally suited to non-contact dispensing and jetting of liquid media
- Dosing valve isolated from the media, for sensitive and aggressive liquid media
- Small internal volume makes it easy to rinse

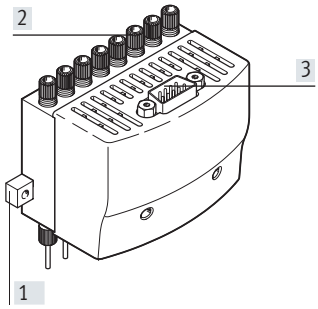
VTOE-...-S design



[1] Fluid connection
[2] Individual electrical connection

Single-channel dispense head:
Enables dosing with the utmost precision.

VTOE-8-...-M design



[1] Mounting strip
[2] Fluid connections
[3] Electrical multi-pin plug connection

8-channel dispense head:
The system is optimally designed for microwell plates and enables a very high throughput as well as dosing of various fill quantities and liquid media.

Individual control of the valves permits the ducts to be coordinated for maximum precision.

Range of application

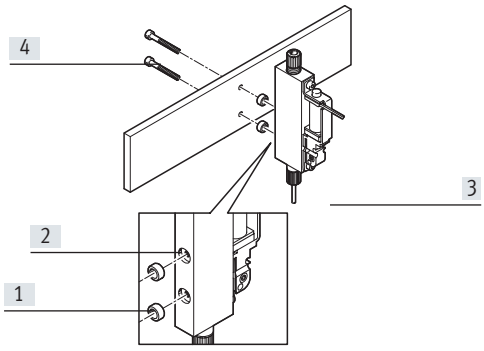
The dispense head VTOE is intended for installation in laboratory devices. It is designed to dispense liquids within the scope of its technical data.

The chemical resistance of the dispense head materials coming into contact with the media must be checked for each application. It is necessary to verify the extent to which the dispense head VTOE is suitable for the intended application.

The dispense head is not suitable for aspiration of liquids. It is not approved for direct contact with foodstuffs or their ingredients.

If you are unsure about the product's suitability for the planned application, please contact Festo for advice.

Mounting

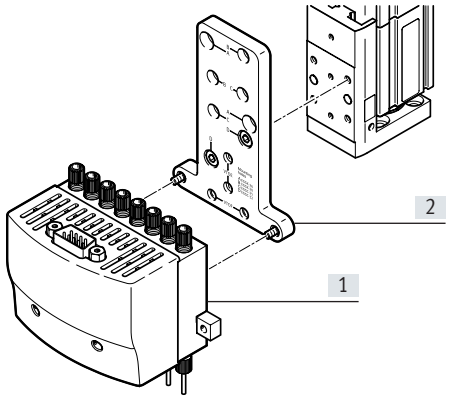


[1] Centring rings
[2] Drilled holes
[3] Dispense head
[4] Screws

Position the centring rings in the drilled holes and mount the dispense head on the strip using the screws. Up to eight dispense heads can be mounted on one rail, with a grid dimension of 9 mm.

Key features

Mounting on a drive with adapter plate



[1] Dispense head VTOE
[2] Adapter plate

Product range overview

Function	Description		Nominal width Dosing needle [mm]	Operating pressure [MPa]	Operating voltage
Single-channel dispense head		**2/2-way valve, normally closed, single solenoid**			
		Electrical connection, cable, open end	0.32	0 ... 0.05	24 V DC
			0.6	0 ... 0.05	24 V DC
			1.0	0 ... 0.05	24 V DC
8-channel dispense head		**8x 2/2-way valves, normally closed, single solenoid**			
		Electrical connection, Sub-D, 9-pin	0.32	0 ... 0.05	24 V DC
			0.6	0 ... 0.05	24 V DC
			1.0	0 ... 0.05	24 V DC
