

## Servo press kits YJKP

FESTO

## Key features

### At a glance

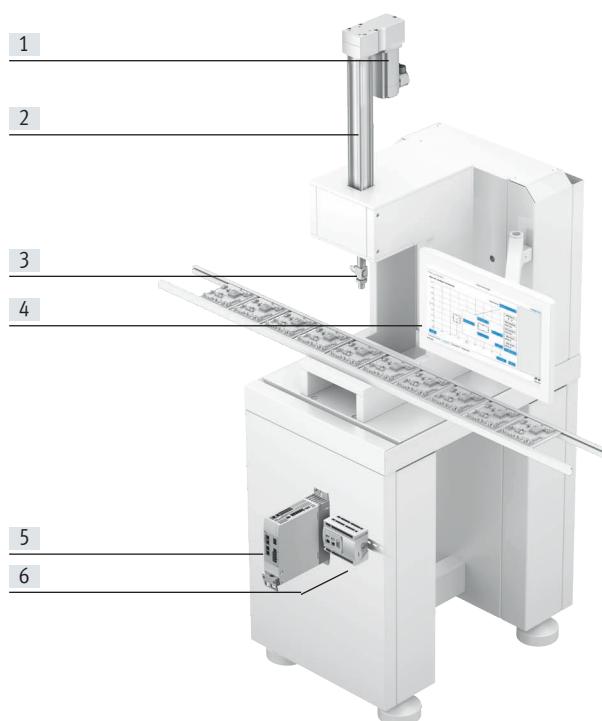

The servo press kit and its associated application software can be used to respond quickly and flexibly to a range of press processes. It is a great alternative to complex and often oversized presses.

The software can be used for continuously monitoring parameters such as moments of force and displacement during joining and press-fitting processes.

### Advantages:

- Pressing forces up to 17 kN (higher force ranges on request)
- Very high positioning and repetition accuracy
- Ideal price/performance ratio
- Easy integration into any application

### Sample pressing device

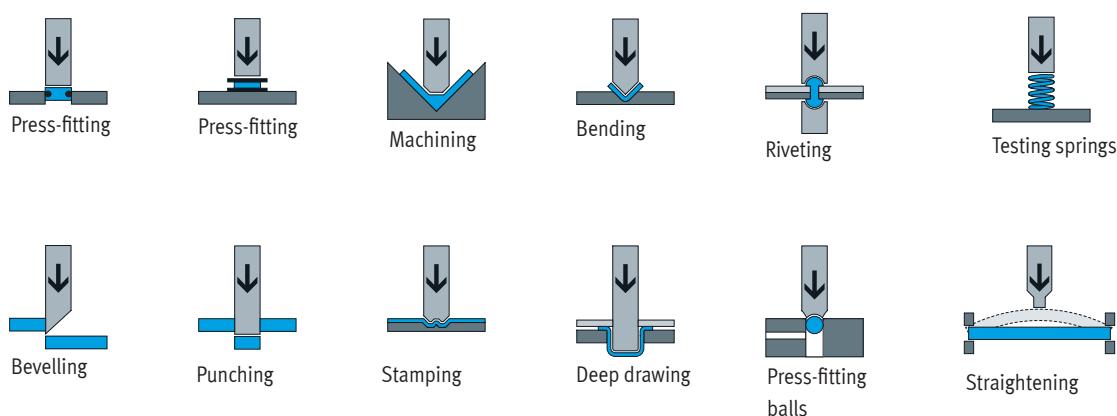

### Individual components:

- [1] Servo motor
- [2] Electric cylinder
- [3] Force sensor (incl. inspection record)
- [4] Software package
- [5] Motor controller
- [6] Controller (incl. micro SD memory card)

Motor cable included in the scope of delivery.

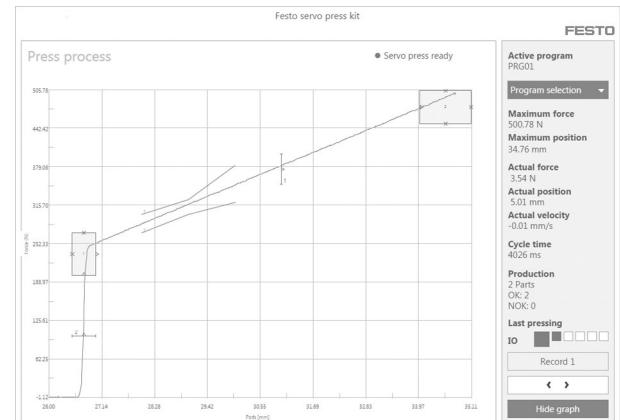

### Areas of application

## Key features

### Modular application software for configuration, operation and visualisation

- The application is controlled via a web interface, which is also used for configuring the application-specific functions
- No programming skills are required to use the pre-installed, ready-to-use software
- The flexible web visualisation can be displayed on any system with a web browser, such as a touchscreen, PC, tablet or smartphone
- The program sequence itself is controlled by variables and digital control inputs, e.g. by the higher-order controller
- All recorded process data can be exchanged individually with the host system

The following software functions are available

#### Commissioning

- Configuring the hardware
- Executing a homing run
- Taring and adjusting the force sensor
- Moving the press manually in "jog" mode
- Configuring logging
- Making fundamental system settings

#### Writing a program

- Managing programs
- Defining press processes and parameterising and configuring them using the sequencer
- Recording/loading reference curves
- Configuring the threshold values/envelopes/windowing evaluation methods
- Managing individual variables

#### Operating

- Selecting saved press programs
- Recording and displaying reference curves
- Allowing OK/NOK evaluation of pressed parts
- Logging

#### Diagnostics

- Process diagnostics
- Sensing of various system parameters, system status and statistical values
- Enabling the display of current data/statuses for the various interfaces, such as digital I/Os or data transferred by a host PLC.

#### Software functions

Max. number of press programs	20 (expandable using variables)
Max. number of variables	100
Number of digital inputs for program control	
Software inputs	8 inputs/8 outputs
Hardware inputs	8 inputs/4 outputs
Max. possible measurements <sup>1)</sup>	5
Max. number of measuring points <sup>1)</sup>	200000
Number of envelopes <sup>2)</sup>	5
Number of evaluation windows <sup>2)</sup>	5
Number of threshold values <sup>2)</sup>	5
Max. possible points per envelope	5 top/5 bottom
Evaluation results via	DIO/fieldbus/PC visualisation
Data export via	FTP, SMB, USB, SD

1) Per program

2) Per measurement

#### Connection to the higher-order controller<sup>1)</sup>

Function	Programming software	Version	Communication	Hardware
Siemens Host FB	Step 7 TIA Portal	V14	Profinet IO	S7-300/S7-400, S7-1200/S7-1500

# Servo press kits YJKP

## Key features

### Ordering via the configurator

It is very easy to put together and order a wide range of servo press kits using the configurator. The "Configuration", "Preassembly" and "Accessories" tabs are used to select the combinations and display them with the correct configuration. CAD files and ePLAN macros are included.

Servo press kit YJKP

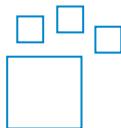

Orderid:  Apply changes

Configuration < Preassembly < Accessories < Overview

Force range up to\*   
Stroke\*   
Encoder\*   
Optional software extension package  No

Payload\*   
Mounting of the servo motor on the electric actuator\*   
Holding brake  No  
Cable length  5 m

### Ordering data – Product options

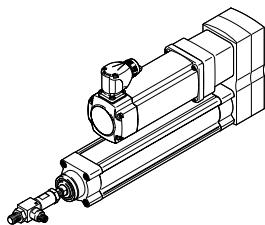

Configurable product	Part no.	Type
This product and all its product options can be ordered using the configurator.	<b>8077950</b>	<b>YJKP</b>

## System components

### Included in the scope of delivery of the servo press kit

Electric cylinder

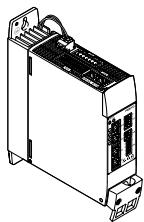

- With force sensor
- Connecting cable to controller

Optionally with:

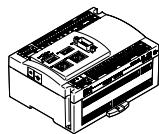

- Motors with absolute displacement encoder:
  - Single-turn
  - Multi-turn
- Motors with/without holding brake
- Axial or parallel motor attachment (pre-assembled if required)

Motor controller

- For servo motor

Control system

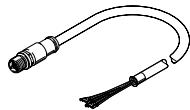

- With special software
- With connecting cable to the motor controller

Motor cable

- Pre-assembled cable

Connecting cable

- Screened cable for force sensor

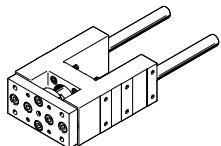

Micro SD memory card

- 32 GB micro SD card for storing the created press programs and log files

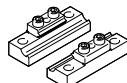

### Can be ordered as accessories

Guide unit

Profile mounting

→ Page 13

Flange mounting

→ Page 14

Clamping element

→ Page 14

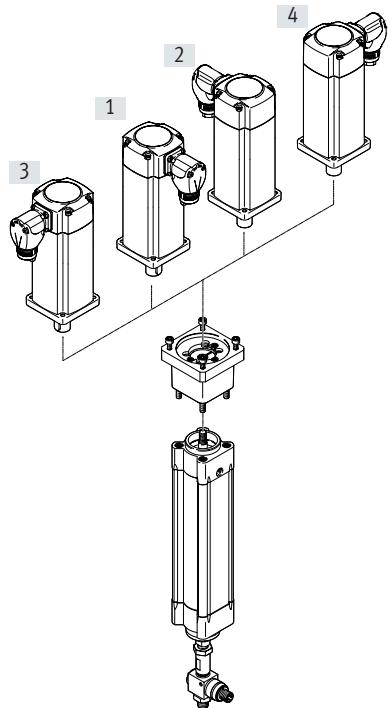

## System components

### Possible combinations of kit and motor, depending on mounting position

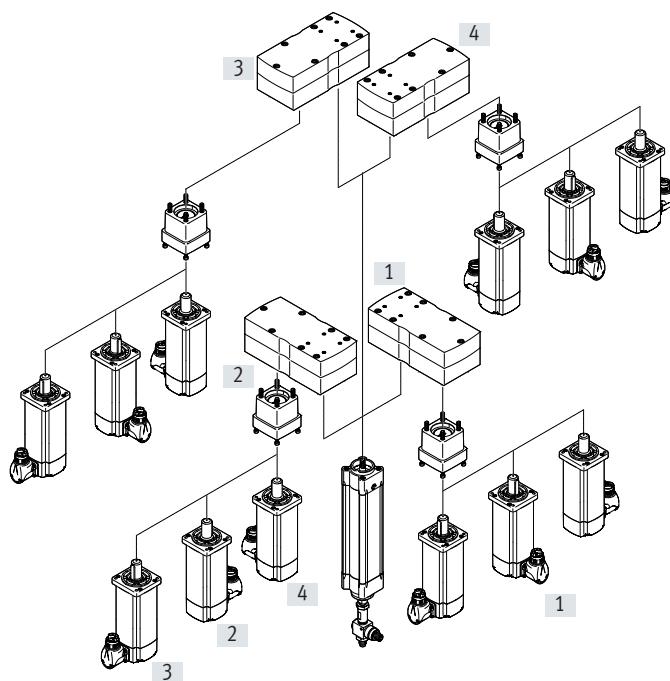

Optionally pre-assembled

The electric cylinder, axial and parallel kit and servo motor are assembled in one application-specific module. This reduces the number of individual components to be managed. This module can be directly integrated in the system thanks to specific mechanical and electrical interfaces. After completion, a full performance test is performed. There is thus no need for the customer to carry out any assembly process.

With axial kit

With parallel kit

Possible attachment variants

- [1] Front
- [2] Rear
- [3] Left
- [4] Right

### Advanced software package

The software package with selected functions makes it possible to adapt the servo press kit even more specifically to the application and the specific task, such as:

- Force control
- Step function with comparison operations
- OPC UA connection

Part no.	Type
8082745	GSAY-A4-F0-Z4-L-Y1

Available to purchase via the App World.

## Datasheet

### Service life

The service life of the servo press kit depends to a large extent on the lead screw of the cylinder.

To ensure that the balls of the ball screw drive can reliably realign, a stroke of at least 12.5 mm must be carried out at regular intervals (typically during the reTRACTING phase, ideally after each pressing process).

The service life ends after 10 million switching cycles or when the maximum running performance ( $L$ ) has been reached.

The specifications for running performance ( $L$ ) are based on experimentally determined and theoretically calculated data (at room temperature).

The running performance that can be achieved in practice can deviate considerably from the specified curves under different parameters (e.g. dirt, temperature).

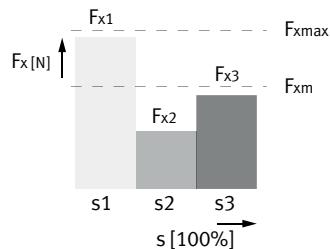

### Calculation of the mean feed force $F_{xm}$

$$F_{xm} = \sqrt{\frac{F_{x1}^3 \cdot s_1 + \dots + F_{xn}^3 \cdot s_n}{s_1 + \dots + s_n}}$$

$F_{xm}$  = Mean feed force

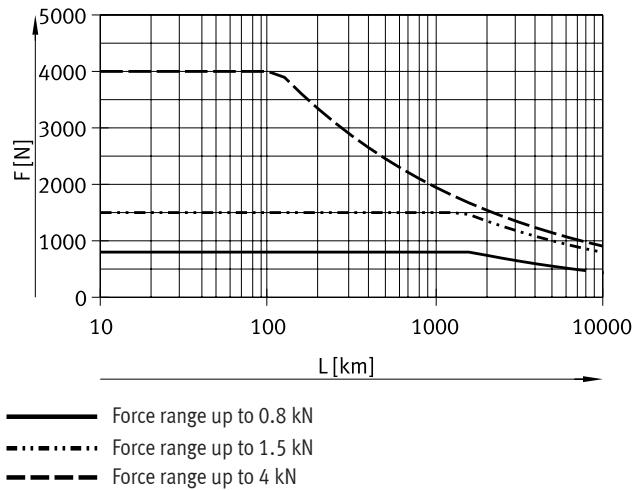

$F_{x1/n}$  = Feed force of section

$s1/n$  = Part of movement cycle that is travel

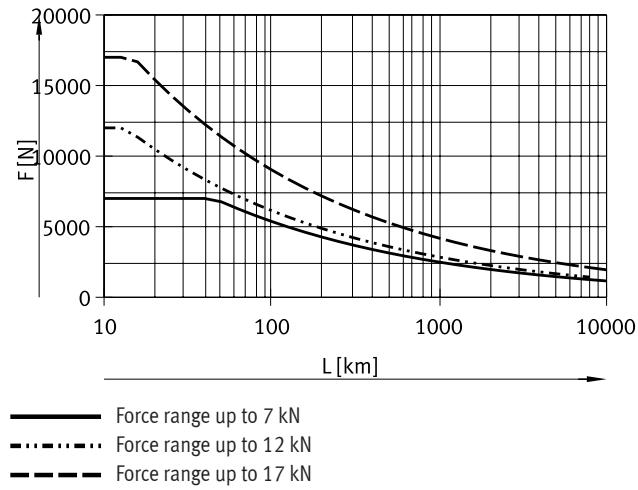

### Mean feed force $F_{xm}$ as a function of running performance $L$ and room temperature

Force range up to 0.8/1.5/4

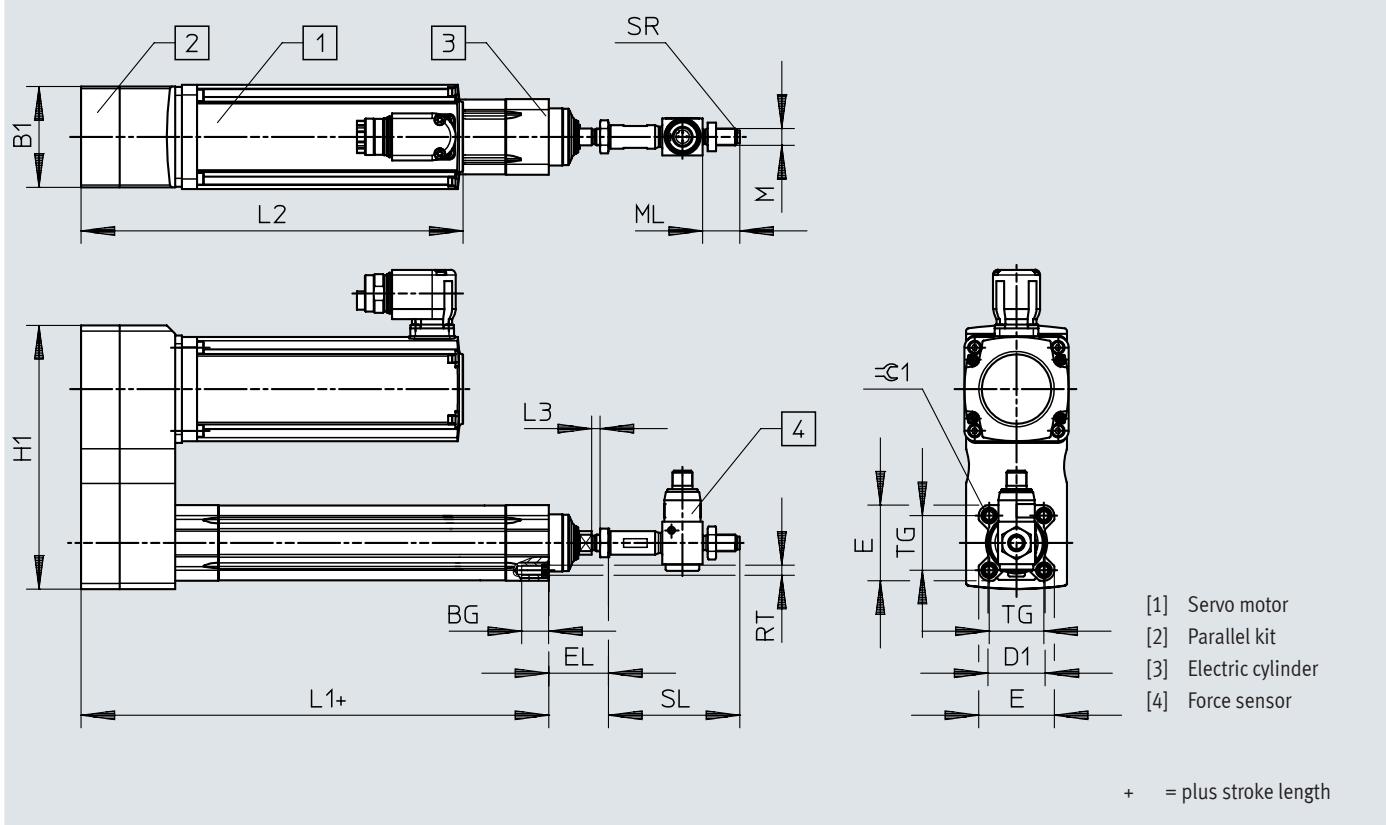

Force range up to 7/12/17

1) Corrosion resistance class CRC 3 to Festo standard FN 940070

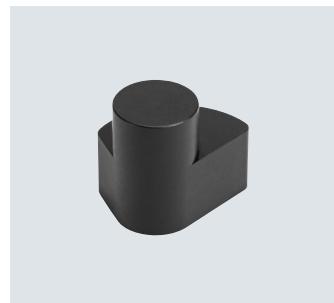

High corrosion stress. Outdoor exposure under moderate corrosive conditions. External visible parts with primarily functional surface requirements that are in direct contact with a normal industrial environment.

## Clamping element EADT

Material:

Polymer

RoHS-compliant

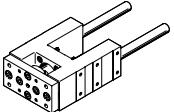

In conjunction with parallel kits, for setting the toothed belt pretension for force ranges 4, 7, 12 and 17 kN.

High toothed belt pretension forces can be generated with low torques at the clamping element.
